There were no signs of animal life in that dense forest. As we moved along a wild looking individual, armed with a hlunderhuss, would occasionally appear from hehind some cover and complacently watch the elephants moving hy. This was one of the "stops," who, hy firing off their guns when the wild elephants were afoot, preveoted them from hreaking out of the forest. The three parallel lines of elephants worked well together and we had, perhaps, heen in the forest half an hour or so when a din arose which would have awakened the dead. A small herd of elephants was joined close hetween two of the parallel lines and the fun commenced. The trumpeting of elephants, the shouting of "mahouts," the crashiog of hranches, and the hanging of the blunderhusses used hy the "stops" simply rent the air. I was on a pad elephant, with another spectator. To our right a small elephant was quickly surrounded and caught, and heyond that again a hot pursuit was in progress, the sounds of wh'ch died away in the distance.

Close to our left a fine, sturdy, young tusker hroke and fled at an appalling pace, hotly pursued hy a mugreewallah. Runaway locomotives would not have heen in that chase! Pursued and pursuers went crashing through the forest and were very soon lost to sight. The tusker succeeded in making good his escape. Shortly after the tusker hroke cover, a sturdy, half grown female, which had heen noosed was seen making off at a good pace, apparently dragging the mugreewallah along with her. Away went two or three elephants to assist and they soon captured the runaway. My companion and myself just came up in time to see the noose secured. By this time the three parallel lines, which orighally eotered the forest, were completely hroken. Elephants, had seemingly, heen pursued in all directions. By degrees, the 'dio of war' died out, aod from all points of the compass, mugreewallahs and others commenced to appear, the "prisoners"—the sturdy female and two small ones—were collected and the procession started for home. It was interesting to see the "prisoners" heing taken along.

The noosing elephant, with the noose still aroood the neck of each captive, led the way. Two "policemen" were told off to escort each captured "hathi" and prevent it from getting ohstreperous. Sometimes a captive would come to a dead stop and try to hreak away, whereupon the "policemen" would quietly lean to and gently, hut firmly, push the halky heast along until they got it into a proper frame of mind.

The journey hack was performed without any mishap. On arrival at elephant camp No. 2, the captives were speedily secured to trees, the work heing very neatly done by trained members of the native staff, with the assistance of tame elephants. It was curious to see the antics of the oewly captured ones after they had heen made hard and fast. They did their utmost to hreak the ropes hy which they were tied, hut all to no purpose, and, no douht, they, like those which had heen captured hefore them, resigned themselves to their fate after a few days' futile struggle. The captives secured, we recrossed the river, and were hack in camp hefore the afternoon was far advaoced, and thus ended a very interesting day.

AT THE TRAPS.

The Union Gun Club final hlue rock shoot for 1904 will come off at Ingleside tomorrow.

A hasket lunch will he set out hy the club for members and guests. The club medals are still open for competition, no member having yet this season woo a medal twice at the monthly shoots. This fact should ensure a large attendance.

The California Wing Club closing shoot for this season was participated in Sunday hy fifteen shooters The fioal club race was at 20 hirds. C. C. Nauman and A. M. Shields killed straight and divided first and second money of the $150 purse, four shooters with 19 each divided the halance of the purse.

The gold medal winners for the season were: C. C. Nauman, Dr. A. T. Derhy, P. J. Walsh and M. O. Feudner. The medals are handsomely designed and worth $25 each.

The nine high scores for the season at 100 hirds are: C. C. Nauman 95, A. T. Derhy 93, P. J. Walsh 92, M. O. Feudner 91, W. E. Murdock 90, A. M. Shields 90, Ed Donohoe 88, S. E. Knowles 88, E. G. McConoell 88.

The scores made Sunday were as follows:

Club race, 20 pigeoos, distance handicap, $150 purse added—

Nauman	33 yds	12222 21111 22222 11122	—20
Shields	29	" 21211 21111 11111 11111	—20
Walsh	30	" 11011 11111 21111 21221	—19
Murdock	28	" 11111 *1112 21122 12212	—19
Roos	28	" 12212 22222 *1221 22222	—19
Stone	30	" 22021 22122 21211 21221	—19
Derby	33	" 21211 2*212 22121 22022	—18
Laing	26	" 12121 12221 11220 02112	—18
Turner	28	" 22222 20122 12022 22222	—18
Feudner	32	" 20122 22222 22022 22222	—18

McConnell	222121	—6	Decker 112101 —5
Turner	12 212	—6	Murdock 1110 w —3
Laing	122212	—6	Lewis 220002 —3

BEAGLE TRIALS.

The eleventh annual field trial of the New England Beagle Club will be held on the preserves of the Grafton Country Club, Grafton, Mass., either the week hefore or the week following the National trials which are to commence on Octoher 31. The exact date is dependent upon where the Natiooal's are run. Last year the trials were held on these grounds and a great ahundance of game was found which added materially to the sport as there were no long and tedious delays hetween runs, and since the covers although open, are large, driving of three-quarter's to an hour's duration was the rule rather than the exception. There will he the usual open All-Age classes as well as the Derhy, Pack and All-Day stakes. Several specials of cups and horns have already heen offered and a most attractive meet is assured.

A FINE NUMBER.

The special douhle anniversary number of *The Sportsman* is a very handsome edition and full of good things for devotees of gun, rod and outdoor sports. Congratulations to our St. Louis contemporary.

Jackson's Napa Soda does not tangle the feet.

British Columbia Game Laws.

The open shooting season in the province of British Columbia began on the 1st inst. We give below a synopsis of the game laws as published by the Victoria *Colonist*. A perusal of the same by our sportsmen and the friends of game protection will reveal several features that we believe might be adopted with profit in this State.

The open seasons are as follows, all dates inclusive:

September 1st to December 14th—Deer (buck or doe)' mountain goat, mountain sheep (ram).

September 1st to December 31st—Caribou, elk, wapiti (bull), grouse of all kinds, including prairie chicken, hare moose (bull).

September 1st to February 28th—Bittern, duck of all kinds, heron, meadow lark, plover.

November 2nd to March 31st—Beaver, land otter, marten. The open season for cock pheasants will shortly be proclaimed by an order-in council.

There are certain game animals and birds which it is unlawful to shoot or destroy at any time, and the list includes: Birds living on noxious insects, English blackbirds, chaffinches, caribou, cow or calf, deer or fawn under twelve months old, elk or wapiti, cow or calf under two years old, gulls, linnets, moose, cow or calf under twelve months old, mountain sheep (ewe or lamb), English partridges, pheasants, cock or hen, except as per proclamation; quail any variety; skylark, thrush, robins (except in farmers' gardens between June 1st and September 1st); eggs of protected birds.

In the foregoing it will be observed that the economic value of song and other birds is recognized and they are accordingly protected. Quail are so well thought of that they are to be protected until such time as may be sufficient for their acclimatization and corresponding increase, should the project of introducing and propagating them be a successful one. A number of varieties of English pheasants and grouse have recently been liberated in an apparently congenial habitat and an effort is being made to encourage these birds so that they may increase and do as well as the Mongolian pheasant has in Oregon.

It will also be noticed that there is an age limit on certain members of the deer family. Robins, not wisely we believe, have a close and open season. This bird has been proven to be a friend of the farmer and orchardist and could also have been placed on the protected list.

And here are additional restrictions of which the hunter and others should take note: It is unlawful to buy, sell or advertise, any of the animals or birds in the last above mentioned paragraph; buck deer before September 1st; carihou, hare, bull moose, mountain sheep (ram), before October 1st; duck, heron, plover, during the close season; bittern, doe deer, bulk elk or wapiti, meadow lark and grouse, excepting blue grouse, which may be sold during the season.

Moreover, it is unlawful to kill or take more than two bull elk or wapiti or bull moose in one season; more than three mountain sheep (ram) in one season; more than five caribou or mountain goat in one season; more than ten deer in one season; or to hunt with dog or kill for hides alone; more than 250 ducks in one season.

The bag limit on deer is evidently a liberal one, here there is no discrimination made between the killing of bucks or does. After all, the absolute and perpetual protection of does in not actually necessary. A superabundance of does is detrimental to an increase of deer and is not a material factor in protection. This has been proven by statistics garnered from the game preserves of Great Britain and the Continent, where at certain times there is a systematic killing off of the old and usually barren does, it having been found by experience that their influence is not beneficial The prohibition of the use of dogs is, possibly, a feature of the law controlled entirely by local environment. The bag limit on ducks, 250 for one season, seems to us to be a limited one, possibly, however, northern conditions are such as to require putting on the brakes to save the ducks. The protection of breeding grounds and short season, before migration of the northern birds, are possibly a reason for the particular bag limit.

It shall be unlawful at any time to kill except for actual use, on Vancouver Island, to buy or sell any deer, or portion or part of a deer, either alive or dead, or the skin or hide of any deer, and it shall be unlawful, except as hereafter mentioned, to export from British Columbia any deer or skin or skin or hide of any deer.

The authorities here seem to be very much alive on protection for a locality where it would appear it was very much needed.

It shall be unlawful at any time to take, catch, kill or have in possession any trout of any kind or species under the size of six inches in length, and it shall be unlawful to take, catch or kill or have in possession any trout of any kind or species except steelhead trout (salmo gairdneiri), between the 15th day of November in any one year and the 25th day of March in the following year, and it shall be unlawful to take, catch or kill any steelhead trout (salmo gairdneri), above the water between the 15th day of November in any year and the 25th day of March in the following year. This section shall not apply to children under fifteen years of age.

The size limit on trout is a move in the right direction.

Among other unlawful acts are the following—and which prohibitions in many respects can not help receiving the approbation of sportsmen.

To enter enclosed lands after notification, or if proper sign is exposed.

For non-residents to shoot without a license.

For Indians not residents of this province to kill game at any time.

To export and to transport for export by railway, express or express, in the raw state, game birds of [illegible] and all animals protected by the act, except beaver marten or ottor.

To use traps, nets, snares, gins, baited lines, or drugged bait, to catch game birds.

To expose for sale any deer without its head on, or any game bird without its plumage.

To use batteries, swivel guns or sunken punts in non-tidal waters, to take ducks or geese.

To shoot any wild fowl in Victoria or Vancouver harbor.

For unlicensed non-residents to trap or kill bear or beaver for their pelts.

To kill any game birds between one hour after sunset and one hour before sun ise.

To kill game birds or animals imported for acclimatization purposes.

To buy or sell heads of mountain sheep.

To take trout by other device than book and line No salmon roe to be used for bait.

To hunt in growing or standing grain or allow dogs there or on any enclosed land without permission; penalty, $20. besides common law re-trespass.

Penalty for shooting on enclosed lands on Sundays without permission, $50.

Indians may not kill doe or fawns from February 1st to August 1st.

As general exceptions to all the foregoing: A resident farmer or his resident authorized employ es may kill deer depasturing his cultivated fields.

Free miners have the right to kill game for their own use.

The Lieutenant-Governor may, by proclamation, remove disabilities.

GOSSIP FOR SPORTSMEN.

EXCEL ENT SALMON FISHING.

Local salt water angling devotees are jubilant over the unprecedented developments in trolling for salmon in Racoon straits and along the Marin shores.

All records, for rod and line, in San Francisco Bay waters were beaten, Sunday last, by Frank Marcus, accompanied by Roy Davis and Sam Wells, who put out from a Tiburon boat house early in the morning. The tide was on the ebb, a stiff westerly wind and cold fog made not only weather conditions unpleasant, but tide and wind kicked up a choppy swell in the channel that gave many of the anglers a drenching during the day. The three fishermen trolled around Point Bluff and when out in the stream, a bit south of Paradise Cove, Marcus got a strike on his line. From the vigor displayed by the hooked fish be immediately realized be had a big fellow to contend with. The fish took out 100 yards of line in a jiffy. No sooner would Marcus wind in a few yards than the reel would sing again and away the fisb would go. The fight lasted just one hour and twenty minutes. The fish was brought up to the boat several times; once Wells gaffed the fish, but it would not give up before another fight and the boat was off Stewart's Point on Angel Island, over a mile from where the fish was first struck, before they got it in the boat. This fish weighed 42 pounds. The three anglers were almost ont of business themselves after the figbt was over.

Going back to the place where they hooked on to the first fish, Marcus was again the envied lucky man, for another big fish took bis trolling spoon and gave the boatmen a figbt for forty minutes before succumbing to the gaff. The men were happily in a stout boat, else they would probably bave been capsized or have lost fish and tackle. The two fights were witnessed by a number of interested fellow anglers in other boats. Both Wells and Davis got strikes, but lost their fish. When the three fishers were out in the stream numerous large salmon were seen swimming in the current, near the surface. The rough water enabled the anglers to get a good view of the fish. Marcus landed these two record salmon with an 11-ounce split bamboo rod and a No. 12 Cuttybunk line, to which was attached a No. 5 Wilson spoon.

Many other boats were out after salmon all day, from daybreak until dark Mr. G. E. Miles landed a 20 pounder off Sausalito. This fish was taken on a spoon of new design, invented by Dr. E. D. Knowles of this city.

Harry Hosmer, Al Wilson, Chas. Kewell and members of the Pacific Striped Bass Club all had fairly good luck, but the fish caugbt were pigmies compared to the huge ones Marcus fought and killed.

The phenomenal run of large-sized salmon at this time is attributed to the foresight and wisdom of the Board of Fisb Commissioners, who several years ago placed 5,000,000 salmon fry in the waters of the Upper Sacramento. Salmon after leaving the fresh water stay in the ocean for about three years and then go back to spawn in the waters and breeding grounds where they were hatched. After spawning the female dies and but rarely do the spent males or "kelts" get back to salt water again.

The present run is paralleled by the big run of salmon at Point Reyes last year, which was attributed to similar action of the Fisb Commissioners, who several years previous planted salmon fry in Paper Mill creek and its tributaries.

The salmon fishing in the "straits" is expected to be even better in October than at present. What this will be may be anticipated when it is known that over 100 fine salmon have been taken by anglers in the Tiburon waters in the past three weeks. It is claimed that these fish will stay about the Marin shores until some time later; a freshet will send them up river to spawn in a day. Examination made of fish already taken shows that the milt and spawn of both sexes are hardly, as yet, well enough developed to fulfill nature's purposes Consequently the fisb will "loaf" in the greenest and clearest salt water to be found inside the heads—the waters of Raccoon straits about Tiburon.

The annual planting of salmon fry by the Fish Commissioners cannot now be regarded as anything but of the greatest benefit. The cannery operations prove this substantially, and as for the angler and his sport, the foresight of the Fish Commission is looked upon as a Godsend. Indications are that San Franaisco bay salmon fishing will be almost as good as the sport to be found in Monterey bay.

BUCKS PLENTIFUL.

Deer hunters are still successful in bagging bucks in various localities and the venison prospectors are taking full advantage of the few remaining weeks of the season for indulgence in their favorite sport.

In Shasta county William Ellery, President of the National Bond and Trust Co., maintains a game preserve for sixteen miles along the course of the McCloud and a mile on each side. This district is thirty-one miles away from the railroad and abounds in good hunting and fishing. Here Dr. Julian L. Waller recently killed a four-point buck that weighed 150 pounds, Charles Shaw of this city killed two bucks as did Mr. Ellery and his nephew.

On this preserve the individual limit is two bucks—two-pointers or better. All bucks under that size are not molested.

Mr. Ellery is very skillful in butchering a carcass and is called by his hunting companions the "capitalist butcher." Cutting up venison neatly with saw clever and knife is by no means a trick that every hunter can do or is even familiar with.

This winter it is proposed to develop the hear hunting for which the preserve is noted.

One of the bucks Shaw killed was a four-pointer and was shot with a 22 Winchester. At a distance of 175 yards, the bullet entered just below the last right rib and lodged between two of the vertebrae, paralyzing the animal's hindquarters.

Last Sunday four fine bucks were shot on the Geyser Peak range, near Geyserville. Richard Petray killed two, C. Feldmeyer one and Ernest Merrill one.

Al Coney and L. F Douglass of Philadelphia were hunting near Booneville last week and bagged eight deer. Mr Douglass was on his initial deer hunt, and got his first buck on the first shot. The animal was the largest killed on this trip.

Phil B. Bekeart and Clarence Ward, both of this city, recently returned from a very successful and at times exciting trip through a wild portion of Mendocino county. They started from Willitts on horseback with Life Ball as a guide; rode to Hearst's, fourteen miles, thence to Covelo, thirty-four miles. During the second day's race they came across several rattlesnakes on the road, two of the reptiles being of enormous size. One of these snakes gave Bekeart a lively chase when he dismounted to take a snapshot at it. The rattler went for Bekeart with speed and a deadly purpose that was so apparent that the camera was dropped and broken in the quick retreat that was necessary to get out of harm's way. The snake was then killed after a fight lasting several minutes.

From Covelo the party packed into Rattlesnake Camp, a fine hunting and fishing spot on Eel river, twenty-eight miles distant from Covelo. Ward and Bekeart besides getting three fine bucks, also had sport in hunting pine grouse with a .22 rifle. The return trip to Willitts was ridden on horseback by way of Laytonville, a ride of over sixty miles. The party covered altogether 225 miles in the saddle.

Walter Granger, a 14-year-old youth, residing in Purissima canyon, San Mateo county, enjoys the distinction of being one of the youngest and most successful deer hunters in that section. Last Sunday he dropped a large buck near Bald Knob. Deer are reported to be very plentiful all along the Coast Range, as many as seven or eight being often seen in a band.

San Jose hunters have been very lucky recently in getting bucks. The Arroyo Puerto country, Olive Springs and Alameda districts have been found good hunting grounds.

Engineer Billy Dow, who has had a run on the Boulder Creek narrow guage road for over twenty years past, is an expert rifle shot and veteran deer hunter. In company with W. W. Richards and a party he was one of the successful hunters during a recent deer hunt in the "chalks" of the Big Basin. On the Country Club preserve in Marin county six bucks were killed by the following club members last Saturday, Sunday and Monday: George Boyd bagged three, Fred Van Sicklen two and C F. Mullins one.

Deer shooting in Lake and Mendocino counties will close on September 30. In Napa county the 15th inst. is the time limit for deer. In Sonoma county the season closed on the 1st inst.

TROUT NOT EARLY RISERS.

"The angler who turns out of his bed at an unseemly hour in the morning in order to get fishing by daylight is following a rule as old as the art of angling, but a false rule," said an observant fisherman.

"Anyone who has ever sat by some brush-skirted pool on a trout stream as night began to fall knows what a lively change comes over its surface with the passing of day. He might have sat there an hour or more, and seen no disturbance of the placid surface of the pool, save the occasional ruffing by a passing breeze.

"But with the darkening of it by the evening shades what a transformation he sees. First a bulbous lifting of the water near one edge of the pool, that bulging bit of surface instantly breaking into a splash and fading away in widening ripples.

"This movement is quickly followed by similar ones, here, there and yonder, until the gathering darkness hides them from his view.

"The listner, if a skilled angler, would know that with the coming of evening the winged and creeping insects that appear only at night had left their daytime hiding places and were abroad, bosts of them falling into or aimlessly alighting on the water or crawling into it, and that the trout which had been lying low in the depths of the pool had aroused to their royal feeding time.

"If the listener should remain at the side of the stream until midnight, he would bear the commotion to grow less and less, until within an hour only the water's own music would be heard. The time for feeding is past, the time for rest and sleep has come, and the trout have retired to their haunts beneath the roots and rocks and overbanging banks, surfeited, and no tempting lure could induce them to dash upon it.

"The person who has seen the transformation that

takes place in a trout pool at evening will sit in vain to see it disturbed again by trout rising to passing food before 8 o'clock next morning. Game fish are rarely astir before that hour in the morning, as I have demonstrated by years of close observation.

"So when I hear the angler crawling out of his comfortable bed an hour or so before day, and regardless of breakfast, or, at best, hastily gorging a cold bite, hurrying away to be the first on the brook or lake in the belief that daybreak is the time of all times to catch fish, I smile and turn over, enjoy an hour or two of that incomparable early morning sleep, get up and eat a good breakfast, and go out to deliver goods to the trout or bass, which are just then themselves getting up.

"The early bird may catch the worm, but it isn't the early angler that catches the fish."

DOINGS IN DOGDOM.

A CONTRADICTION.

EDITOR BREEDER AND SPORTSMAN—At the meeting held on August 30th the following resolution was passed by the Pacific Advisory Committee of the American Kennel Club, and the Committee requests the favor of its publication in the columns of your valued periodical. Yours very truly,

Pacific Advisory Committee, A. K. C.
J. P. NORMAN, Secretary.

Excerpt from minutes of meeting of August 30th. The following extract was read from a letter appearing generally in the sporting press, purporting to be signed by Norman J. Stewart, Secretary of the Western Kennel League.

"At the same time, it became known to us that the A. K. C. intended fighting the league in its own territory. We were told that A. K. C. shows would be held in every town, which at present gave W. K. L. shows. In one case, at least, money (the amount, I I believe was $300) and a guarantee of fifty dogs from San Francisco was offered to some fanciers of the north to get up a show under A. K. C. rules in opposition to the W. K. L. club in the town. It is always hard to get information of such offers, as they are naturally made sub rosa, but it is only fair to assume, that similar offer was made to other fanciers in other towns."

The chair called for the personal assurance of each member as to the truth of the allegations contained in the foregoing, as affecting each personally, and after each member had denied that he had, either privately or in his capacity of member of this committee, offered any monetary subsidy or consideration to aid any show to be held in the north under the rules of the American Kennel Club in opposition to shows held under the rules of the Western Kennel League, it was

Moved and seconded that the statement published in the sporting papers over the alleged signature of Norman J. Stewart, Secretary of the Western Kennel League, that the American Kennel Club, or anyone having authority to speak for the American Kennel Club, had offered any monetary subsidy to aid in holding a show in the north under the rules of the American Kennel Club in opposition to shows held under the rules of the Western Kennel League, was, in so far as this Pacific Advisory Committee of the American Kennel Club or any of its members are concerned, an utter fabrication, devoid of any foundation in substance or in truth. Carried.

SPOKANE NOTES.

Mr. Thos S. Griffith writes us that he had received a telegram dated August 31, from Secretary J. P. Norman stating that the Pacific Advisory Committee decided that the disqualification of officials and employes will stand and that there would be no exceptions.

In consequence he states, "as I only breed dogs for the sport of showing them, etc., and feel kindly to both leagues and expect to show all over the United States, if I have any dogs good enough, I have resigned as an officer and President of the Spokane Kennel Club, as I did not wish to be disqualified."

Another communication from Spokane is the following:

KENNEL EDITOR BREEDER AND SPORTSMAN—Dear Sir: I beg to acknowledge receipt of your favor of August 26th, also of a marked copy. I thank you for the favorable notice given our dog show to be held here next month, but am sorry to say we are not in a position to carry any "ads" in any paper, advertising our dog show. We make no charge for admission and we only have just a certain amount with which to hold our show, and for this reason we have to be very economical.

We do not look for or expect any entries from California, though our President, Mr. Griffith, patronized both the A. K. C. and the W. K. L. this season through California.

Again thanking you for the notice extended us, I remain, yours truly,

A. B. JACKSON, Secretary S. K. C.

THE OAKLAND SHOW.

The Oakland bench show for two days, under canvas, was to the old stagers quite a disappointment. The entries were an averaging fair lot, most of them old familiars. The catalogue gives 123 entries—4 St. Bernards, 1 Mastiff, 1 Newfoundland, 5 Great Danes, 2 Greyhounds. 4 Pointers, 13 English Setters, 1 Irish Setter, 3 Gordons, 2 Irish Water Spaniels, 3 Field Spaniels, 17 Cockers, 10 Collies, 4 Bulldogs, 6 Bull Terriers. 5 Bostons, 3 Dachshundes, 4 Irish Terriers, 10 Fox Terriers (smooth), 19 Fox Terriers (wire hairs), 2 Italian Greyhounds, 1 Airedale Terrier, 1 Ruby Spaniel, 2 Japs, a total of 116 dogs, counting a one point show.

The initial venture of the club we regret to note was evidently not a success financially or otherwise. A deficit of $1000 would probably not be an exaggeration. This incubus, we surmise, will probably not hamper the club officials, as under the circumstances, a substantial guarantee must have been provided for. If such was the case it is a relief to know that the hard working officials and employees, from the clever Superintendent down to the vivacious ticket seller will not be left out in the cold.

The tent, lighting, etc., could have been better, in fact, these could not have been much worse, so far as comfort and convenience is concerned. The Superintendent, however, did the very best he could, this being his initial effort, much allowance must be made for a few oversights. In fact. this must have been by many of the exhibitors and visitors, for it required a degree of fortitude to withstand the stuffy heat and stifling dust These slight discomforts were much reduced by taking away a portion of the tent walls to let in fresh air. It is to be regretted that the management had to take what must have been the only available tent procurable, a soiled and ragged affair that had seen many campaigns, it was large enough, however. Most of the dogs shown were old veterans and stood the ordeal nobly. About thirty dogs were novitiates, some of these succombed to close air and dust, but they were properly cared for by being taken outside into the sunshine and fresh air.

Things were unfortunately a bit mixed and unlucky from the start. The tent (?) was made ready for the inaugural show by about noon on Friday. Here we must express our most sincere regret that Dr. Geo. W. Clayton, who was to judge, was the victim of a most unfortunate and painful accident. One of the center poles, six inches thick, fell knocking the Doctor to the ground. The other pole toppling and in danger of falling created a panic and there was general rush for safety. Poor Dr. Clayton being pinned to the ground and insensible was in greater danger of death but for the presence of mind of George, an employee of Tommy Banks, Spratts representative, who heroically stayed with the injured man and gave him the first effective aid. The Doctor was immediately taken to a hospital where he was found to be pretty badly shaken up. We are very glad to state now that he will be out and well again in a few days. He is on this side of the hay now, and doing nicely.

This unlucky accident necessitated a change of judges. Messrs. Phil Wand, Thomas Blight, W. E. Chute and J. Bradshaw, a familiar to local show goers as a dog handler, and ordered the ribbons. Mr. Blight gave universal satisfaction in Cockers and proved himself a good judge of the breed. Mr. Wand's decisions were also satisfactory.

It was possibly the oversight of inexperience, that there was no marked catalogue and press arrangements were a bit inadequate—for the reports of awards, etc., in the daily press were woefully mixed up. We regret that we could not obtain from the Secretary a correct list of awards and other data. The Secretary stated that he had left the judges book behind in the tent and didn't know whether Banks would bring it over or not, but that he would furnish a marked copy in time for this week's issue. An excuse like this, for so grave an offense to our readers seems puerile, but a poor excuse is better than none. So taken all in all the initial show of the club was a great success, so far as the heated dogs were concerned it was a bowling success, and the "boys" will surely do better next time—if they have a guarantee fund again.

A GOOD PAL GONE.

We regret to note the loss of the Bulldog W. Masquerade owned by Dr. L. Gambitz. Masquerade was bred by Carl Hagenjos, he was second puppy '02 to True Blue. He developed into a most amiable canine companion, the Doctor and his family became very much attached to him and feel as if his place could hardly be filled by any other dog.

Women Should Know How to Use Firearms.

Women and the intelligent use of firearms were the topics of an interview given by Annie Oakley recently to a well known local sportsman during a brief visit to her home in Newark.

The famous shot, who disdains the abused title of champion, and prefers that bestowed upon her when she was a little girl by Sitting Bull, who, after he had seen some of her work with revolver and rifle, called her Little Sure Shot, is the wife of Frank E. Butler of Newark, N. J.

The couple have a cozy villa in Nutley, where they have made their home since they were married about a dozen years ago. Two years ago while traveling with Buffalo Bill's show, Mrs. Butler met with a railroad accident, and for a long time her life was despaired of. She was brought home, and after many weary weeks was at last able to leave St. Michael's Hospital. As a result of the mental terrors she endured in the collision her dark brown hair has turned snow white.

"Every intelligent woman," she said, "should become familiar with the use of firearms. You will observe that I do not say that every woman should learn how to shoot. That would be a physical impossibility, for there are women, and men, too, for that matter, who are constitutionally debarred from ever learning how to make a shot. But—and this is the important thing—every woman, young and old, should become familiar with firearms.

This is one instance where the misused adage that familiarity breeds contempt does not hold good. Familiarity with firearms inculcates profound respect and fear. I have been using firearms since I was a little girl, and I fear a gun or a rifle, not with the fear of ignorance, but with that respectful fear begotten of education and experience. You will find this the case among men and women all the world over who are used to handling firearms. They know their danger and fear these weapons accordingly. There is a difference between fear and terror. For example, a woman is said to be in fear when she goes into a dark room at night. That isn't fear; it's terror. In the same way women who know nothing about firearms are said to be in fear of them; but they are not in fear. They are in terror, the terror of that which comes of crass ignorance. The woman who knows of the dangers of revolvers and rifles has a fear, but it is an intelligent fear, not the kind that strikes terror into them when they handle them.

One reason why I say that every woman should become familiar with firearms is that she may lose that inherited timidity and terror. It should be part of every girl's education to learn something of the mechanism and handling of small arms. I do not say that it should be taught them in school, for the average pupil is now overburdened with studies, and I would be the last to suggest an addition to them. This part of their education can be given to them in their homes or at physical culture places, which are now so popular. It is a subject which will not take up much time or call for close application; all that is necessary is to have some one for teacher who is expert with firearms, who can indicate the right and the wrong way of handling them."

Mrs. Butler then illustrated what she meant by the right and wrong way of handling weapons by taking up one after another of her own assortment of shooting irons and showing how to handle and hold them properly and otherwise. The armory of the famous crack shot is perhaps the most varied and costly of any woman in the world. She has many cases filled with revolvers of all sizes and shapes, and as for rifles, she has enough to equip a small regiment. Many of these arms are gifts; others are trophies—silent proofs of her skill with the revolver and rifle in all parts of the world. She has weapons with the stocks and barrels of gold and silver and some of these are engraved in a most elaborate manner. While she is justly proud of these expensive weapons they are not the ones that she uses when she enters into a match.

"Now," said she, "when you pick up a weapon, whether it is loaded or not, always hold it away from you; speaking of loaded weapons reminds me of that tragic joke about the 'didn't-know-it-was-loaded' idiot, who causes so much trouble. If you will always handle a pistol or gun as if it were loaded, these so-called accidents will not happen. When you pick up a weapon grasp it firmly and hold it with the muzzle pointing downward at an angle of fifteen degrees. Then it will not be pointed directly at your foot.

One of the vital rules with weapons is to remember never to point the muzzle toward yourself or at another person. Never hold it carelessly. These suggestions are necessary to the person unused to weapons, because the expert will never treat any firearm with the familiarity of contempt; the more one knows about them the more respect is shown them. Having firmly grasped the weapon, draw up the hand holding it, draw it up and away from the body, bringing the pistol above the shoulder so that the muzzle points upward and out, away from your head and away from the head of anyone standing near by. If any woman or girl will go through these motions with an unloaded pistol half a dozen times, always under the watchful eye of an expert, the familiarity thus obtained will be of great advantage.

The next lesson should be devoted to the loaded weapon. The same vital rule of holding the muzzle away from the body holds good. I never tire of repeating that one rule, because it is due to its violation that so many tragedies occur. When you are loading your weapon keep the muzzle turned from you.

One who is learning the use of firearms should begin with those of small caliber. A woman will be more or less nervous during the first few shooting lessons, but the object of those lessons is to overcome that nervousness and an ingrained timidity. It is no uncommon thing to see pictures of women, and men, too, that tell you at once that these persons know nothing about the use of firearms. These pictures show them resting on the barrel of a gun. That brings the muzzle toward the body, and that's dangerous. When you see a photograph of anyone holding a gun that way you can make up your mind that he or she does not know the first thing about shooting. The man who would hold a gun that way is the kind of a man who would point his gun at his best friend and shoot him and afterward explain that he 'didn't know it was loaded.'

"But," she continued, with a smile, "we are not talking of 'some fool men.' You want to know about the use of firearms by women and I want to tell you what I can. I want to see women rise superior to that old-fashioned terror of firearms. I would like to see every woman know how to handle them as naturally as they know how to handle babies An intelligent knowledge of firearms will prevent many tragedies and will tend to give women more courage and self-reliance when they happen to be left alone in the house with no other protector than a revolver or gun.

They are excellent life preservers to have at home. I, of course, would not shoot at any human being unless my own life was in jeopardy, but the mere fact that there is a weapon in the house, when a woman knows how to use it, will give her courage and make her comparatively fearless when she retires for the night.

Good Live Bird Scores.

At the California Wing Club shoot last Sunday, C. C. Nauman, 33 yards; A. M. Shields, 29 yards; each killed 20 straight—they used U. M. C. "Magic"

shells. The longest run made during the day was shot up by A. M. Shields, 48 straight. Of the nineteen shooters present at the meet all used U. M. C. shells but one.

Smokeless Averages Reported.

Birmingham, Ala., August 16th and 17th, Mr. Walter Huff, first general average, 380 out of 400, shooting "Du Pont." Second general average, Mr. C. Spencer, 379 out of 400, shooting "Du Pont." Third general average, Mr Harold Money, 373 out of 400, shooting "E. C." First amateur average, Mr. Robert Saucier of New Orleans, La., 371 out of 400, shooting "Infallible." Second amateur average, Mr. Jno. Fletcher of Birmingham, Ala., 369 out of 400, shooting "Du Pont." Third amateur average, Mr. H. D. Freeman, Atlanta, Ga., 364 out of 400, shooting "Du Pont."

New York State Shoot held at Buffalo, August 16th, 17th and 18th. State events: H. McMurchy of Fulton, N. Y., first general average, 457 out of 485, shooting "Schultze." First amateur average, and second general average, C. W. Hart of Buffalo, N. Y., with 446 shooting "Du Pont Smokeless." Second amateur average and third general average, F. D. Kelsey of East Aurora, N. Y., with 444, shooting 'Du Pont" also. Open events: Fred Gilbert, first general average 459 out of 480, shooting "Du Pont." Second general average, Mr. J. A. R. Elliott, 452, shooting "Schultze." Third general average, Mr. W. H. Heer, 448, shooting "Schultze." First amateur average, Mr. E. C. Griffith of Pascoag, R. I., 446 out of 480, shooting "Infallible." Second amateur average, Mr. F. B. Kelsey of East Aurora, N. Y., 435, shooting "Du Pont." Third amateur average, Mr. E. W. Hart of Buffalo, N. Y., 432, shooting "Du Pont." The Dean Richmond trophy three-men team state championship was won by Hunter Gun Club of Fulton, N. Y., all shooting "Schultze." Individual State Championship (the New York City trophy) was won by Harvey McMurchy shooting "Schultze." The Canadian trophy was won by Thos. Upton of Hamilton, Ont., shooting Hazard powder. Mr. Fred Gilbert at 22 yards, shooting "Du Pont" and Geo. H. Piercy, Jersey City, N. J., at 17 yards, shooting "Schultze," tied for first ann second prizes in the open-to all handicap on 36 out of 50.

West Baden, Ind, August 9th to 12th, W. R. Crosby, first general average, 778 out of 800, shooting "E. C." Second general average, Fred Gilbert and Harold Money, 761 out of 800, shooting "Du Pont." Third general average, W. M. Heer, 758 out of 800, shooting "Du Pont." First amateur average, Russell Klein of Spirit Lake, Ia., shooting "Infallible." Second amateur average, C. M. Powers of Decatur, Ill., shooting "Du Pont."

Brantford, Ont., H. D. Bates of Ridgetown, Ont., shooting "Du Pont" first amateur average, and tied with J. A. R. Elliott, shooting "Schultze," for first general average, 551 out of 600. Second general average, E. H. Conover, 543 out of 600, shooting "Du Pont." Second amateur average, H. T. Westbrook of Brantford, 542 out of 600, shooting "Du Pont." Third amateur average, I. M. Craig of Sherbrook, Ont, 538 out of 600, shooting "Schultze." A sliding handicap of 16 to 22 yards was used. The Two-Man Team Championship of Canada was won by Thos. Upton and M. E. Fletcher of Hamilton, Ont., shooting "Du Pont." The Five-Man Team Championship of Canada was won by the Brantford Gun Club after a tie with the Hamilton Gun Club, all shooting "Du Pont." The Eight Man Team Championship of Canada was won by the Hamilton Gun Club's team, all shooting "Du Pont." The Grand Canadian Handicap was won by H. T. Westbrook of Brantford, Ont., shooting "Du Pont."

Albert Lea, Minn., August 11th and 12th, Mr. Hood Waters, first general average 322 out of 355, shooting "Infallible."

Superlatively Parker.

Mr. F. G. Simpson of Winnipeg, Man., and a staunch advocate and wonderful shooter of the Parker gun at the Dominion Fair, Aug. 1st and 2d, made an excellent record. Mr. Simpson won the challenge cup emblematic of the amateur championship of Canada with a score of 47 out of possible 50. On the next day Mr. Simpson broke straight and in the shoot-off for the trophy again broke the possible. Mr. Simpson's score for the second day's shooting was 124 out of a possible 140.

Mr. Wm. L. Boyd of Richmond, Va., a strict amateur, won the loving cup presented by the Peters Cartridge Co. on August 5th at Richmond, with a score of 49 out of possible 50. This is pretty good shooting. Mr. Boyd shoots a Parker gun.

At Grand Rapids, Mich., Mr. Felger shooting the "Old Reliable" Parker gun landed high amateur average. Good for Felger.

Ben Scott of Grass Lake, Mich., won the expert medal of amateurs at the same shoot with 25 straight. Ben shoots the Parker, you bet.

At Brantford, Ont., H. D. Bates, shooting the Parker gun won high amateur general average for three days' shooting, putting out a field of about 80 shooters. This is shooting some.

Fred Gilbert made a lucky run at Spirit Lake recently of 392 straight. Gee whiz! shoot the Parker gun. Every hony shoots it.

T. M. Craig at the Brantford, Ont. shoot, won high average on two days. Mr. Craig shoots the Parker.

On August 18th Mr. G. L. Bruffey of University, of Va. shooting the Parker gun in the race for the championship cup, made a cool 25 straight.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Sept. 17—Saturday Contest. Final Class Re-entry, Stow lake, 2:30 P. M.

Sept. 18—Sunday Contest. Final Class Re-entry. Stow lake, 10 A. M.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tidewater.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Sept. 11—Union Gun Club. Blue rocks. Ingleside.

Sept. 18—Golden Gate Gun Club. Blue rocks. Ingleside.

Sept. 25—Millwood Gun Club. Blue rocks. Mill Valley.

Oct 8, 9—Los Angeles Gun Club. 17th semi-annual tournament Blue rocks Sherman grounds.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Sept. 7, 8—Franklin-Oil City Kennel Club. Stoneboro, Pa. F G. McIntosh, Secretary.

Sept 5, 8—Canadian National Exhibition's Bench Show. Dr. A, W Bell, Superintendent.

Sept 5, 10—Toronto Kennel Club. Toronto, Can. J. G. Kent. Chairman.

Sept 9—San Mateo. 1 day show. A. K. C. rules. Irving C Ackerman, Secretary Entries close Sept. 2.

Sept. 10—Englewood Kennel Club. Englewood, N. J. Myron W. Robinson. Secretary-Treasurer.

Sept. 12, 13—Newport Bench Show. Newport, R. I. F. M. Ware, Secretary.

Sept. 13, 16—Orange County Fair Association's Bench Show. Middletown, N. Y. W. H Saxton, Superintendent.

Sept 17—Bryn Mawr Kennel Club Bryn Nawr, Pa. J. A. Caldwell Jr., Secretary, Penllyn, Pa.

Sept. 17—Scottish Terrier Club Specialty Show. Bryn Mawr, Pa. E. S. Woodward, Secretary, New York City.

Sept. 22, 24—Lawrence Kennel Club Initial sbow. New Castle, Pa. W. L. McConnell, Secretary

Sept 28, 29—Valley Fair Kennel Club. Initial sbow. Brattleboro, Vt. H. C. Rice, Secretary, Brattleboro, Vt.

Oct 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas Mortimer, Superintendent.

Oct. 5, 8—Spokane Kennel Club. Spokane, Wasb. W. K. L. A. B. Jackson, Secretary.

Oct. 10—Brunswick Fur Club. Foxbound show. Barre, Mass. B. S. Turpin, Secretary

Oct. 12, 16—Walla Walla Kennel Club. Walla Walla, Wash. Geo. L. Mason, Secretary.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

Oct. 25, 28—World's Fair Dog Show, St. Louis, Mo. F. D. Coburn, Chief of L. S. Dept., St. Louis, Mo.

Nov. 16, 19—Boston Terrier Club. Specialty abow. Boston, Mass. Walter E Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Sept. 5—Western Canada Kennel Club. La Salle, Man. Wm. C. Lee, Acting Secretary, Winnipeg, Man.

Sept. 8—Manitoba Field Trial Club 18th annual trials. Carman, Man. Eric Hamber, Secretary, Winnipeg, Man.

Sept 30—British Columbia Field Trial Club. Steveston, B. C. Norman F. Tyne, Secretary-Treasurer, Vancouver. B. C.

Oct. 11—Pacific Northwest Field Trials Club. ————————, Wasb. F. R. Atkins, Secretary pro tem, Seattle, Wash.

Oct 24—Missouri Field Trial Association. Sturgeon, Mo L. S. Eddins, Secretary, Sedalia, Mo.

Oct. 24.—Ohio Field Trials Club. Washington Court House, O. G. R. Haswell, Secretary, Circleville, O.

Oct. 25—Connecticut Field Trial Club. ————————, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Oct. 31—Monongahela Field Trial Club. Oblong, Ill. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 1—Sportsmen's Field Trial Club. Clare, Micb. Erwin C. Smitb, Secretary, Midland, Mich.

Nov 7—Independent Field Trial Club. 6th annual trials. Hutsonville, Ills. H. S Humphrey, Secretary, Indianapolis, Ind.

Nov. 8—Western Beagle Club. Inaugural trials. Oregon, Ills. Reno B. Cole, Secretary, De Kalb; Ills.

Nov 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Kennel Club. Field trials. Clay City, Ind. C F. Young, Secretary, Clay City, Ind Week following Ills. Ch. trials.

Nov. ——National Beagle Club. 11th annual trials. Grafton, Mass.

Nov. 15—Michigan Field Trial Club. ————————, Mich. Chas. E. Sisson, Secretary, Muskegon, Mich.

Nov. 15—Central Beagle Club. 9th annual trials ————————. A. C Peterson Secretary, Homestead, Pa.

Nov. 22—International Field Trial Club Ruthven, Ont. W, B Wells, Honorary Secretary, Chatbam, Ont.

Nov. 29—Virginia Field Trial Association. Martinsville, Va. C. B. Cooke, Secretary.

Dec. 3—Continental Field Trial Club 10th annual trials. Thomasville, N. C John White, Secretary, Hempstead, L. I.

Dec. 12—Alabama Field Trial Club Huntsville, Ala. J. M. Kirkpatrick, Secretary, Huntsville, Ala.

Dec 12—Pointer Club of America. 5th annual trials. C. F. Lewis, Secretary.

Dec. 17—Eastern Field Trial Club. Waynesboro, Ga. Simon C. Bradley, Secretary-Treasurer, Greenfield Hills, Conn.

1905

———American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Am. Field Publishing Co., Chicago

Jan. 9—Pacific Coast Field Trials Club. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco, Cal.

Jan. 10—Georgia Field Trial Association. Albany, Ga. P. M. Essig, Secretary, Atlanta, Ga.

Jan. 10—Texas Field Trial Club. 3d annual trials. ————, Tex. T. A Perlet, Secretary, San Antonio, Tex.

Jan. 16—United States Field Trial Club Grand Junction, Tenn. W. B Stafford, Secretary-Treasurer, Trenton, Tenn.

THE FARM.

Livestock Breeders' Convention.

The second session of the California Livestock Breeders' Convention, called under the auspices of the California Livestock Breeders' Association, convened Tuesday evening of last week in the Senate Chamber of the Capitol, with Charles D. Pierce of San Francisco, President of the Livestock Association, in the chair.

Robert Ashburner was the first speaker and his subject was "The Farmer's Cow." She must have good feed and plenty of it, and her surroundings should be of the best. More breeds have been spoiled by promiscuous breeding than by any other cause. He believed in selecting and sticking to one breed. The bulls must not be only good animals, but trace back to good stock. Cows of good quality are always economic ones. He has been thirty-seven years a breeder and his herd is wholly home bred. The young farmer must have a standard and weed out his herds all failures to reach the standard. If a herd is not getting better all the time, it is getting worse.

paper on the same subject by E. S. Waggenheimer was read by Professor Major. In selecting stock one wants the animal that produces the best at the least cost. Holsteins, Jerseys and Durham breeds are more generally selected by cow farmers. The Holsteins are good feeders and do not have to be housed in winter. Jerseys are quiet and have more butter fat in the milk. They do better when housed in the winter. Durhams give a good flow of milk and milk longer than others. They are good hustlers. The best all nround cow is a cross of Holstein and Durham. He has tried all kinds of stock and Jerseys do not meet with his favor.

The average return from a cow is between $50 and $70 a year in butter fat. Count calf and other things and the net profit on a cow is $35 a year.

A voice—That man values low when he values a calf at $5 and skim milk at $5.

Professor Major said he did not believe Durhams to be best and longest milkers, with a fair test, as claimed by Mr. Waggenheimer.

Professor E. W. Major, University of California, said stock conditions are like climatic conditions. "In California you have any climate you want and better than in any other State. So you have as to stock." Meat cattle as a rule do not come into California in as good a condition as in the Chicago market.

In breeding stock California has a great future for beef cattle. Our people are

THIS PHOTOGRAPH WAS TAKEN WHEN DAN WAS GOING AT HIS HIGHEST RATE OF SPEED AND SHOWS ALL FOUR FEET OFF THE GROUND.
Large Colored Lithograph Of This Picture Mailed Free If You State Where You Saw This Offer And Tell Us How Many Horses You Own Or Feed.

DO YOU WANT MORE SPEED?

The former owner of Dan Patch tried to break the pacing record the entire season, before we bought him, and failed. Dan has eaten "International Stock Food" every day since January, 1903, and during that season he easily secured six world records. At the close of 1903 Horse Papers commented on the remarkable appearance of Dan Patch after being shipped 10,000 miles and his season of fast miles. Dan Patch is in much better condition this year than ever before. If "International Stock Food" is good for Dan Patch it certainly will be beneficial for your horse. A large majority of the greatest trainers are constant users of "International Stock Food" this season. Its use only costs

3 FEEDS FOR ONE CENT

We positively guarantee that it will give your horse from two to five seconds more speed and also more endurance. It makes a delicate feeder eat heartily. It greatly aids digestion and assimilation and permanently "tones up" and strengthens the entire system. You will keep your Horses in better condition during the hot racing season and win more races if you use "International Stock Food" every day as an addition to their feed of oats. It is equally good for Stallions, Race Horses, Brood Mares, Colts or Show Horses. It is absolutely harmless even for the human system and can be fed at all times in perfect safety. Horses that are given "International Stock Food" every day are hard propositions to beat. Write us for testimonials and any further information. Special introductory Offer entirely at our risk

International Stock Food Co.
Minneapolis, Minn., U. S. A.

demanding better beef and breeders are recognizing it, and so pure bred stock for beef is coming on.

So, too, as to the dairy herd. Our dairy herds are not all they should be. Plenty of herds, however, go to 300 and 400 pounds, but the average in California is only about 140. Think of the difference.

If it were not for ample feed, good pasture and mild winters, California dairymen in many cases would go bankrupt. There is no profit in a 140-pound cow.

The question of feed is a big one. Wheat and cattle or wheat and sheep, in all this great Sacramento Valley, should be raised together. As a rule, our mutton of the markets is not of the best, and must be improved.

So, too, as to pork. It is low grade in California in too many cases, because best methods of feeding are not employed, for one thing.

Hog raisers must be educated to the value of fine breeds and good feed. There is no reason for pork being sent to us salted, to be cured here.

We do not give attention sufficiently to raising good draught horses. That raising can go on with farm work. There is no reason for us sending to Oregon and Washington for draught horses or coach horses.

Henry Benar read a paper on "Poultry Culture in California as a Leading Industry." Here it is spoken of as an infant industry, he said. It is insignificant compared with the magnitude it will attain. California last year raised $5,000,000 of poultry and 35,000,000 dozen eggs, and yet large shipments come from the East. There can be no overproduction in the industry for many years. No poultry man ever fears it.

No industry to small investment gives such large returns as poultry raising. About all failures are due to ignorance, or failure to work and to establish cleanliness. It is not hard work, but is persistent upon cleanliness. Women can conduct the business as well or better than men. There are more people directly in poultry culture than in any two other livestock interest combined.

Petaluma and vicinity produces more chickens and eggs than any similar area in the world. Breeding for higher selection is essential and it is prosecuted generally in California. Thoroughbred poultry stock gives far better returns than any other. No other place in the world produces finer varieties of poultry than California. At Buffalo's exposition in competition with the world California birds carried off the honors and premiums.

Thousands of dollars are sent here from the East to buy samples of fine birds to improve Eastern stock. California's wonderful climate gives her advantages for poultry equalled by none, and because of it California is bound to control the Pacific export market.

Our birds ship better to foreign parts than do Eastern birds, and this is a very important fact in our commerce. There are from 800 to 1000 birds of high quality at the State Fair, notwithstanding the fact that the fair is held at the moulting season of the birds.

He thanked the State Board of Agricultural for its liberal offers of premiums for high-class poultry. California birds are to go to the St. Louis Exposition in October, and predicted that they will carry off a large share of honors and prizes.

A voice—"Why then is there such a demand for Eastern birds and eggs?"

Mr. Blenar—"Because we do not produce enough."

INFECTIOUS DISEASES.

Dr. C. H. Blemer, V. S., on this subject spoke first of Texas fever and the quarantine established by the Federal authorities, and by the State, by which a vast territory has been saved from the fever. He complimented the counties that have seconded the work of the Government in this matter. He explained dipping processes, and said they would stamp out the disease, and he believed that in a few years we will be wholly rid of it.

Antharax is quite prevalent. It is regrettable, but true. "You must vaccinate cattle, sheep and horses to blot out anthrax, and vaccine must be used that insures immunity."

Hog cholera we have here and there, and it is almost impossible to guard against it. Disinfection is the thing to do in those cases. Dipping the hogs into a disinfecting solution is good practice. The speaker has better results from that than any other method. We have a dissase in California scarcely known elsewhere, a bronchitis. It occurs among calves and is due to a lodgment in and irritation in the bronchial tubes. It is going to take hard work to eradicate it. The chief interest, however, centers about tuberculosis. Stockmen must wake up and do something practical in this matter, for it is the chiefest ill to which stock herds are subjected. It demands vigorous movement by live stock interests, and at once.

Elias Gallup spoke of selecting breeding swine. Selection is a prime essential.

In selecting stock there is a wide field for choice. The novice should buy only from an experienced breeder and of reliability. It pays to buy good animals and good advice, also how to handle stock. After that there is time enough for experimenting.

The fairs give good opportunities for observing thoroughbred stock, but care should be taken, for big show stock is largely too fat. He pointed out the characteristics of good stock and how to distinguish fine grade animals.

There is no infallable sign of strong vitality in swine, but there are general rules as to form of body, head and legs, which cannot be ignored and insure the selection of good stock. He told his hearers how to judge a hog so as to determine if its vital organs are doing full duty. Constitution in the hog is of the greatest importance, and how to determine it, he explained with considerable detail.

He advised against breeding two animals together which are exactly the same in size, characteristics and merits. He urged that pedigrees be studied in selecting fine bred stock. In selecting breeders he advised against large heads, coarse hide, coarse hair, crooked legs, curved bodies and flabby ears, dull cross grained and ugly animals.

James Irvine spoke of his experience with California oils in dipping to destroy Texas tick. For a long time his range was free from tick, but cattle brought in brought with them the tick.

It increased gradually and he lost cattle from it. He had found innoculation practicable in some cases. The tick reduces the blood and soon renders the animal useless. He had a rude method of oil dipping, or oil treatment, on the thrown animal. One can't make a satisfactory job of it, and throwing injures cattle. Then he tried a solution for dipping with success, in which tobacco and lard oil are used. The lard does no harm, but kerosene does.

He built a dip after the best example. It was forty feet long and six feet deep at the center. In this he prepared to use crude oil. He was told he would kill his cattle. He got his oil at Los Angeles wells. He had from one to two inches of oil floating on water. It had a high percentage of asphaltum. Some of his cattle he did kill by the dip, and it took the others weeks to get over it.

Then he used a lighter oil, and used it only on cool days, and with shelter provided, and still the cattle were burned.

In 1898 he got a refined oil, the use of which proved far more satisfactory. No oil is used that will not, with two or three dips, injure the cattle.

He does not believe that Beaumont oil will at one dipping, kill all the ticks. But that oil cost him $10 a barrel, or in carload lots $3. He further studied and reached the conclusion that grease is needful. He presented analyses of oils that may be used, to show how much alike the successful ones are. The oil he now uses is not from any well, but from manufacturers. With a small amount of oil, a mere film on the water, in dipping 500 cattle he found afterward tick upon but five. A lot of yearlings dipped, after five days were found free from the tick. California does not produce any oil that in its natural state is proper to use in dipping cattle. The tick can be eradicated, but it seems impossible to get the California farmers to act as they should, especially in the southern part of the State—though they are doing better now.

The northern and central California stock growers should take up the matter and promote intelligent action for eradication of the pest.

Professor Woodworth of the University of California told of the thousands of dollars lost at Newman, in California, from grasshoppers, because of lack of knowledge how to fight the hopper. The hoppers differ in different districts.

He exhibited pictures in colors of the species that did damage here and there in the State. In the Turlock vicinity the katydid of a peculiar form worked great damage.

The migratory and non-migratory grasshoppers are the two kinds doing most damage. The migratory comes in great swarms and sweeps the land bare of vegetation. Here, fortunately, the swarms are small, and come but short distances. But most damage is done by the non-migratory form of hopper, and it can be prevented by close watchfulness for appearance of the young hoppers. They like bran and dislike smoke, and have many peculiar characteristics. Thus far but three species have been studied thoroughly. The Legislature should promote the inquiry to the end that remedial applications may be made.

In alfalfa fields the hopper dozer is best employed. It is very efficient. A sixteen-foot dozer can easily be handled by two men and one horse. One going over the field is not enough, but it is not yet known when all the hoppers are all killed off.

When the hoppers are abundant in the fall in alfalfa the use of spade to cultivate the ground should be encouraged. Everyone should inform himself upon the whole subject, to the end that the coming of the hopper may be controlled, as they usually can be, where there is preparation for them.

With this delivery the programme was completed and the convention, at 11 o'clock, adjourned sine die.

Of the total number of 11,268 head of cattle exported from the United States during the past year to the Transvaal 10,000 were from Texas. On the voyage 156 head died or were lost, and 1500 died while becoming acclimated. A lengthy report on the exportation of these cattle adds that the Texas cattle are preferable for the reason that they are the hardiest, and can stand the hardships in transportation better than cattle from other parts.

Flavor in Butter at St. Louis.

A creamery butter makers' contest is now being held at the St. Louis Exposition. Butter is sent in every month by different butter makers and scored by a committee of experts, one from New York. In writing concerning the butter sent in June, P. H. Kieffer, assistant state dairy commissioner of Iowa, refers to the chief fault found in most of this butter, namely, imperfect flavor, and calls attention to the following different kinds of flavor which the judges detected: Feverish and smothered flavor, strong flavor, overripe acid, a mild flat flavor, briny flavor, unclean flavor, stale water flavor, fishy flavor, weedy flavor, sour flavor, cheesy flavor, rank and rancid flavor; butter weak in body, due to churning at too high temperature; overworked butter, greasy butter, salvy butter and butter gritty with salt. A few packages showed mottles, and a trifle more working would have overcome that.

Our readers may think the judges are drawing it rather fine when they undertake to diagnose the different flavors noted above, but we can assure them that an expert judge will quickly place a sample of butter in one or more of the above classes The name given each of these different flavors indicates the source from which it comes. The feverish or smothered flavor is usually caused either by an unhealthy condition of the cows or by keeping the milk or cream in a close, poorly ventilated place. This is a common flavor in milk which is put in tight cans or bottles without being aerated or before it has had time to cool, and is common to much of the milk sold in cities.

A machine has been invented which bales hay without the use of wire. Instead of wire to hold the bale intact a jacket of hay is used, which holds the hay so securely that no amount of handling will loosen it. If the press which does this work is as practical as it is ingenious, those who have seen it work believe it will entirely supplant the presses which use wire.

Isn't He Worth Saving?

ABSOLUTELY REMOVES CURBS SPLINTS SPAVINS WINDPUFFS BUNCHES QUINN'S OINTMENT

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan Ind., writes. "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price $1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials etc.

DR. HOOPER'S PARSLEY KIDNEY PILLS

A CURE FOR ALL KIDNEY AND BLADDER DISEASES
BRITISH PHARMACAL CO. LTD. DISTRIBUTORS MILWAUKEE, WIS.

MEN—WOMEN—CHILDREN.
WEAK KIDNEYS CURED FOREVER.

If you have a pain or dull ache in the back it is unmistakable evidence of kidney trouble. It is a warning to tell you trouble is ahead unless you remedy the cause immediately.

Lame back is only one symptom of kidney trouble. Other symptoms are, being obliged to pass water often during the day and to get up many times during the night, inability to hold your urine, smarting or irritation, passing brick-dust or sediment in the urine, catarrh of the bladder, uric acid, constant headache, dizziness, sleeplessness, nervousness, irregular heart beating, rheumatism, bloating, irritability, worn-out feeling, lack of ambition and sallow complexion.

Hooper's Parsley Kidney Pills are proving to be the most wonderful cure ever gotten out for weak and diseased Kidneys. If you have tried the many so-called "cures"—if you have become disgusted with them and stopped using them, try one package of Hooper's Parsley Kidney Pills and you will immediately begin to feel better. Hooper's Pills are a cure. They will stop the trouble just where it is and prevent that awful and dreaded Brights Disease. Don't buy any but Hoopers. The British Pharmacal Co., Milwaukee, Wis., Distributors.

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1904

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES CLOSE OCTOBER 15, 1904.

ONLY $2 TO NOMINATE MARE

4250 for Trotting Foals. $1750 for Pacing Foals. $800 to Nominators of Dams of Winners and $200 for Owners of Stallions. Money Divided as Follows:

$3000 for Three-Year-Old Trotters.
200 for Nominator of Dam of Winner of Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
200 for Nominator of Dam of Winner of Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$1000 for Three-Year-Old Pacers.
200 for the Nominator of Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator of Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—$2 to nominate Mare on October 15, 1904, when name, color and description of Mare and Stallion bred to must be given. $5 February 1, 1905. $5 September 1, 1905. $10 on Yearlings February 1, 1906. $10 on Two-Year-Olds February 1, 1907. $10 on Three-Year-Olds February 1 1908.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace. $35 to start in the Two-Year-Old Trot. $35 to start in the Three-Year-Old Pace. $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3), and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before February 1, 1906, her Nominator may sell and transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1904.

Entries must be accompanied by the entrance fee.

Should the amount of entrance money received be in excess of the amount of the Stakes the excess will be added, less the cost of postage stamps, printing and advertising, to the Stakes for the Three-Year-Old divisions in proportion to the amount offered in each division.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse will be allowed to start until the owner has become a member.

Write for Entry Blanks to

SALT LAKE CITY

OCTOBER 4, 5, 6, 7 and 8, 1904

Good Track. Good Climate. Good Treatment.

Entries to Harness Races Close WEDNESDAY, SEPT. 21, 1904.

Entries to Running Races Close 12 o'clock Noon, Day Before Race.

PROGRAMME:

FIRST DAY—TUESDAY, OCT. 4, 1904.

No. 1—Trotting 2:33 class	$ 400 00
No. 2—Trot or Pace, 2:20 class	500.00
No 3—Running, ⅞-mile dash	200 00
No. 4—Running, ¾ mile dash	150.00

SECOND DAY—WEDNESDAY, OCT. 5, 1904

No. 5—Trot or Pace, 2-year-old Utah bred (or owned and kept in the State 6 months prior to day of race), mile heats, 2 in 3	200.00
No 6—Trot or Pace, 2:25 class	400.00
No. 7—Running, ⅞-mile dash	200 00
No 8—Running, ½-mile dash	100 00

THIRD DAY—THURSDAY OCT. 6, 1904.

No 9—Trot or Pace, 2:30 class	$ 400 00
No. 10—Trot or Pace, 2:15 class	500 00
No. 11—Running, 1⅛-mile dash	250.00
No. 12—Running, ⅝-mile dash	150 00

FOURTH DAY—FRIDAY OCT. 7, 1904.

No. 13—Free-For-All trotting	500.00
No. 14—Trot or Pace, 3-year-olds or under, Utah bred (or owned and kept in the State 6 months prior to day of race), mile heats 2 in 3	300 00
No. 15—Running, ½-mile dash	150.00
No 16—Running, ¾-mile dash	200 00

FIFTH DAY—SATURDAY, OCT. 8, 1904.

No. 17—Trot or Pace, free-for-all	$700 00
No. 18—Trot or Pace, 2:22 class	500 00
No 19—Running, 1-mile dash	200 00
No. 20—Running, 4½ furlongs	150 00

CONDITIONS.

Entries to harness races to close with the Secretary Wednesday, September 21, 1904.

Entries to running races to close at 12 o'clock noon, day before race.

Entries not declared out at 5 o'clock p. m., on the day preceding the race, shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

Races will be divided into four moneys, 50, 25, 15 and 10 per cent, *unless otherwise specified*. Entrance fee, 5 per cent of purse, and 5 per cent additional from money winners. Entrance to running races free.

Records made on or after September 1, 1904, no bar. Nominators in any race that should fail to fill, may on September 25, 1904, transfer their entry in such race to any other race of the classes that have filled in which their horse was eligible on September 21, 1904.

Otherwise than as specified in conditions, rules of the American Trotting Association (of which this Association is a member) to govern.

Weights and special conditions for running races will be announced each day before entries close.

Address all communications to the Secretary.

NELSON A. EMPEY, President.
J. S. BRANSFORD, Supervisor.

W. J. BATEMAN, Secretary.
SALT LAKE CITY, UTAH.

CEDAR RAPIDS (IOWA) JACK FARM

W. L. DE CLOW Proprietor

FARMERS' SUPPLY OF THE MIDDLE WEST.

I HAVE THE LARGEST AND BEST IMPORTED AND HOMEBRED JACKS in America, and also the finest line and best assortment of Belgian horses freshly imported; also some of the latest prize winners in Germany and France in Percheron and Oldenburg Stallions. I quote consistent living prices on all stock, and will sell you more quality for the money than you can buy elsewhere. Terms to suit the purchaser. Write for photographs and catalogue.
W. L. DE CLOW, Cedar Rapids, Iowa.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fe ck which injure and often lay up race horses.

All Trainers Should Have It In Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, $1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

JAS. B. CAMPBELL & CO., Mfrs., 412 W. Madison St., Chicago, Ill.

Sold by all Dealers in Harness and Turf Goods. If not in stock ask them to write any Jobber for it

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

A Sick Horse, for Fifty Cents

can be made well by **CRAFT'S DISTEMPER & COUGH CURE**, the guaranteed remedy for influenza, coughs, colds, catarrhal fever, distemper, etc. It has cured thousands and prevented millions of cases. Veterinary advice free of charge, and booklet, "The Horse: His Diseases and Treatment," for the asking. Sold by druggists, or prepaid direct at 50c and $1 a bottle or $4.50 a dozen. You cannot lose—it is guaranteed.

Boise	Oct. 17 to Oct. 22

GRAND CIRCUIT.

Columbus	Sept. 19 to Sept. 24
Cincinnati	Sept. 26 to Oct. 1
Memphis	Oct. 17 to Oct. 27

MANY GOOD DRAFT STALLIONS of different breeds are being sold to California farmers by parties who bring them from the eastern states. A large number of these horses were on exhibition at the recent State Fair at Sacramento and were rated a splendid lot by such good judges as Prof. Carlyle of the Colorado Agricultural College and Prof. Majors of the California State University, besides many practical horsemen. Belgians, Percherons, Clydesdales and Shires have all been brought here to supply the demands of buyers and all have their admirers. We would offer a little advice to the farmers and owners of draft mares who will patronize these stallions next spring. Don't begin now to mix up the breeds. If your choice is the Belgian type select the mares that are nearest that type to breed to a Belgian stallion. Breed your Percheron mares to Percheron stallions, and pick out the very best sire you can find to send them to. Don't let a smaller service fee induce you to patronize an inferior stallion. This never did nor never will pay. While it may be an impossibility in the present condition of things in California, to have the farmers in certain localities agree to breed one type of draft horse it would be a great benefit to all concerned if it could be done. Horse buyers who go to Europe go to Belgium for Belgians, to France for Percherons, and to England and Scotland for Clydesdales and Shires. Any district in California could in a few years become noted for its horses if the farmers would confine themselves to any one type and try to produce horses of that character. The fillies got by the Belgians stallions next year in California should be bred to the best stallions of the same breed that can be reached when they are of suitable age, and the same course should be pursued with the fillies sired by the Percherons or Clydes. It is only by breeding up that high class horses can be produced and cross breeding should not be indulged in. It is true that once in a while a cross-bred horse is produced that is a great individual, but his value will be as a gelding to be sold, and not as a stallion to be used in the stud. Select your breed and then stick to it always striving to improve on what you have. Every breed has its merits and its demerits, but the typical sound horse of any of the leading breeds is a good enough horse for anybody, and will always bring a profitable price. The chancy cross-bred horse is a freak, and the hardest horse on earth to find a mate for.

THE VERY SUCCESSFUL MEETINGS given at Pleasanton, San Jose and Santa Rosa this year, the two last mentioned under the auspices of the Pacific Coast Trotting Horse Breeders Association and the other by the Pleasanton Racing Association should and doubtless will do much toward assuring a much more extensive and still more successful circuit next year. That well managed harness meetings will be patronized by the California public has been demonstrated. It is not too early to begin the preliminary work of arranging for the California circuit of 1905 and it should be so arranged that all the larger meetings except the one at Los Angeles will be held before racing begins at the Oregon State Fair at Salem. By such an arrangement the owners of trotters and pacers will have a chance to enter through a circuit where large purses will be given every week, and the earning capacity of their trotters and pacers very largely increased. We suggest, if the Los Angeles people can give two meetings, that the circuit be opened there. The shipment could be thence to Fresno, to Stockton, to Pleasanton, to San Jose, to Santa Cruz, to Santa Rosa, to Woodland, to Sacramento and thence to Salem where the northern circuit of big purses opens at the Oregon State Fair, and continues several weeks. A final big meeting could then be given at Los Angeles late in November, where all the best on the circuit could compete for championship honors, with greater assurance of dry weather than at any other point on the Coast. The small circuit this year brought out many starters at Pleasanton and San Jose, but at Santa Rosa and Sacramento the fields were comparatively small. In a large circuit like the one suggested above the fields would average better and after every two or three meetings a number of new horses would make their appearance as many would start only at a few meetings near home. The opportunity is ripe for the establishment of a Pacific Coast Circuit that will furnish racing enough to keep all the Pacific Coast horses engaged at home, except those that develop sufficient class to be considered Grand Circuit material and are taken east to compete for the big stakes offered there. This year should not close without action being taken in this matter by the managers of the leading California, Oregon and Washington associations that hold harness race meetings.

SURPRISE has sometimes been expressed by Eastern horsemen who visit San Francisco that no regular harness meetings are given at or close to the metropolis. The reason is plain to those who are acquainted with the conditions here. There is no suitable track on which to hold first-class harness racing here. It is true there are three magnificently appointed race tracks—one at Ingleside in this city, another at Emeryville across the bay, and still another at Tanforan, twelve miles by steam railway and electric lines from the city. All have splendid stables, grand stands and other appointments that are almost perfect, but the tracks were made for winter racing of runners and are not at all suitable for harness horses to speed over. The Ingleside track has a sandy covering which makes fast time impossible over it. By scraping this off and covering with a coat of loam a good trotting track could be made, but as it is the property of the California Jockey Club that holds meetings there every winter, such a change in the condition of the course would have to be made every time a harness meeting was given, which would be very expensive—too great, in fact, to be feasible. Then again, the weather at Ingleside is raw, cold and foggy during the greater part of the summer months, making it a very unpopular place with harness horse trainers. The same conditions prevail at Tanforan, and although harness horse trainers are welcomed there with their strings during the summer, San Francisco trainers that prepare harness horses for the circuit pass it by and take their strings to San Jose or Pleasanton, which are fifty miles from the city. The track at Oakland, or, to speak more correctly, Emeryville, is also the California Jockey Club's property, and was built especially for the runners. As the soil is not sandy there as it is at Ingleside and Tanforan, the track has been rounded up in the center like a macadamized road and is particularly unfit for harness horses. A horse that can keep on the inner half of the track can make pretty good time when the surface is packed, but if compelled to take the outside is thrown off his gait, and many horses have hit their knees there and been seriously injured that never touched a hair on other tracks. The climate at the Oakland track is very good, and good crowds could doubtless be secured for harness meetings held there, but very few of the leading trainers could be induced to enter their horses there under present conditions. It is unfortunate that there is not a trotting track in the near vicinity of San Francisco that could be used by the Pacific Coast Trotting Horse Breeders Association, as that organization hangs up the largest purses of any organization in California and receives the entries of all the best horses. Its meetings are very popular, both with the horsemen and the public.

FUTURITY STAKES are getting more and more popular with breeders, and although they have increased in numbers very largely during recent years, the list of entries received generally show an increase instead of falling off. The Pacific Breeders Futurity is undoubtedly the most popular colt stake that has ever been devised on this coast, and the record breaking entry list of stake No. 4, which was 403, promises to be eclipsed by Stake No. 5. Although the first official announcement was only made one week ago last Saturday, nominations are coming in from all quarters, many not even waiting to get entry blanks, but mailing the name and description of mare on any old piece of paper. Pacific Breeders Futurity No. 5 has a positive guarantee of $7000 and will undoubtedly be worth much more than that sum. The money received by the secretary for nominations in these stakes is turned over to Treasurer N. T. Smith, who deposits it in savings banks where it draws interest and can only be taken out to be paid to the winners of the several divisions of the stake. The winner of any one of the divisions of any of the Breeders Futurities can be certain of getting his money. There are no strings on it. Mares bred this year are eligible to be named in Stake No. 5 and must be nominated on or before October 15th. Every owner should see that his mare is named as the cost is only $2 and the payments smaller and less frequent than any stake of the same kind that is given in America. Every stallion owner should see to it that the get of his horse are well represented in this stake and if he will send to Secretary Kelley a list of the mares bred to his stallion, the Secretary will see that each owner receives an entry blank and a request to name the mare in the stake. Stakes are the very life of the breeding business and it is to the interest of every stallion owner and breeder that they be made as valuable as possible

THE HORSE owes much to the bicycle, as its coming doubtless made his work much easier. James W. Abbott in the *Sunset Magazine* for September, (a number, by the way, which is one of the most entertaining and beautifully illustrated ever issued by this excellent publication) makes the following statement which is only giving credit where due: "The revival of public interest in American highways was due to the bicycle. As a people we had endured with equanimity the discomforts of rough and muddy roads. The hardships and sufferings of our draft animals appealed to us in vain. But when men began to get a-straddle of a two-wheeled vehicle and actually propel it with their own legs the trouble began. Such roads would never do. The legs kicked—and their owners also, metaphorically. The interest in bicycles increased. The League of American Wheelmen was organized. There were other wrongs to be righted and advantages to be gained, but the great work for which the L. A. W. will live in history was the initiation of the good roads movement."

Oakwood Park Stock Farm Sale.

Fred H. Chase & Co., Live Stock Auctioneers, advertise an auction sale of high-class trotting and standard bred stallions, fillies and geldings from the Oakwood Park Stock Farm, to take place on Monday evening September 26th. This sale will present an opportunity of procuring some high bred animals among which are listed: bay gelding, three years old, half brother to Bay Rum 2:25; a bay mare, three years old, full sister to Algregor 2:11 and W. W. Foote 2:15½; four-year-old bay mare, half sister to Neernut 2:11½; chestnut gelding, three years old, full brother to Rajah 2:10; a brown gelding, brother to Joe Scott 2:18 and half brother to Azalia 2:15, and a fine looking black stallion by Chas. Derby out of Lydia Bright. The horses will be on exhibition next Saturday and intending purchasers are invited to come and look them over.

A Big Prize Cattle Sale.

F. H. Chase & Co. will sell at their salesyard on the evening of October 25th, the entire prize winning Yerba Buena herd of Jerseys belonging to the estate of the late Henry Pierce. This is one of the most famous herds of Jerseys in the United States and is the result of years of careful selection and breeding, no expense being spared in purchasing the best Jerseys to be found. The entire herd which consists of 75 head of registered bulls, cows and calves will be sold and the sale presents a rare opportunity, as it is seldom such high-class animals are offered at auction. Full particulars will be announced later and intending purchasers are invited to write to the auctioneers for catalogues.

Occasionally a trainer is found who gets away from the beaten path and adopts some system of training different from the regulation jogging and work-outs. Millard Sanders gave Lou Dillon much of her work early in the season under saddle, his hoy up, and as a contrast there is a thoroughbred that is a winner, too, that gets his work in harness. His name is Alan-a-Dale and he put in two winning races week before last after being got ready in harness.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Cresco Wilkes 2:17.

The picture which adorns the front page of the Breeder and Sportsman this week is a half tone reproduction of a recent photograph of Cresco Wilkes 2:17, a three-year-old stallion bred aod cwoed by Mr. Ivey L. Borden, one of the Directors of the Pacific Coast Trotting Horse Breeders Association and an enthusiastic lover of the haroess horse. Cresco Wilkes is by that great sire of speed, Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½ and many others), and his dam is the fast mare Allie Cresco 2:13¼ by Cresco, son of Strathmore. This is a great combination of blood—Wilkes, Nutwood and Strathmore—and it is not surprising that Cresco Wilkes possesses speed. Mr. Borden had a two two-year-old out of the same dam of his own breeding on the circuit this year and hoth took low records. The other was the filly Roberta 2:19¼, also a pacer, by Robert I. 2:08¾. Roberta met the champion two-year-old of the year, Delilah 2:16½, at Santa Rosa, and in a hard-fought race took one heat from her and came very near taking the race. Few amateur breeders have brought out two such colts in one year as Cresco Wilkes and Roberta. They are hoth very promisiog candidates for the 2:10 list next year.

A Good Word for Hambletonian Wilkes.

Editor Breeder and Sportsman:—I read with a lot of pleasure your comment on Hambletonian Wilkes and his son Murray M. 2:14, and I will take the liberty of again sayiog to the breeders of the Pacific Coast that Hambletonian Wilkes is the only son of George Wilkes on the Pacific Coast; that he is one of the great sires, and that all his foals that have heen raced have taken low records and proven themselves game race horses.

The writer in an article written at Santa Ana in the early part of last spring said that Murray M. was one of the highest class colts in California. His record of 2:14 looks as though he is the highest class colt that ever trotted for the Breeders Futurity.

The writer also stated that Anna Belle 2:27¼, the dam of Robert I. 2:08¼, La Belle 2:16¼ and Murray M. 2:14, would certainly hold a position in the great hroodmare list. She is there now and more of her foals ready to train.

The great sire McKinney was picked up at a hargain counter price hy Mr. Gentry and taken to Indiana. Some bright morning your hreeders will wake up and find some enterprising hreeder from east of the Rockies huying Hambletonian Wilkes. I sincerely hope that Robert I. Moorhead will get a big figure for him as he deserves praise and a big monetary consideration for the way he has kept Hambletonian Wilkes, even through hard times. Now that the get of Hambletonian Wilkes are showing up in such a splendid race horse way it is to he hoped that breeders will quickly appreciate the fact that Hambletonian Wilkes is a great sire and a great son of the great George Wilkes. C. A. Harrison.

Thoroughpin Cured.

Mr. F. W. Couch of Pittsfield, Mass., writes as follows: "Enclosed find $2, for which please send me two bottles of Quinn's Ointment. The next time I shall probably order six bottles, it being talked of a great deal in Pittsfield. I have cured two thoroughpins and one spavin and am now going to try it on another blemish." This is the general verdict of leading horsemen all over the country who are using Quinn's Ointment. For curbs, splints, spavins, windpuffs and all bunches try this wonderful remedy. Price one dollar per bottle. Satisfaction guaranteed. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain of druggist.

A GREAT SALE OF THOROUGHBREDS.

The Entire Stud of the Whitney Estate to be Sold at Madison Square Garden.

The Fasig-Tipton Co., announce that the entire collection of stallions and hroodmares owned hy the estate of the late W. C. Whitney will ho sold at public auction in Madison Square Garden, on October 10th. This will he the most important sale of thoroughhreds since the disposal sale of Marcus Daly's Bitter Root farm.

Strange to say, the stallion that hrought the most money at that sale, when half a million dollars' worth of hreeding stock was disposed of, will again he the star of the Whitney lot, hut the chances are that he will hring almost twice as much as Mr. Whitney paid for him four years ago. The stallion is Hamburg, sire of Hamburg Belle and Artful, winners of the last two Futurities, and also of Leonidas.

At the Daly sale he was hought for Mr. Whitney, for $60,000. It is expected that hreeders from all over the country will attend the sale, while it would not he surprising to hear of several English hreeders having agents at the ringside. It is generally helieved that this time Hamburg will hring under the hammer not less than $100,000. The entire stud will he sold at this sale and among the famous thoroughbreds in addition to the great Hamburg will be such great ones as Meddler, Yankee, Nasturtium, Sandringham, Ballyhoo Bey, Kilmarnock, Blackstock, and eighty of the greatest hroodmares.

Horses in Hawaii.

A correspondent in the *Horse Review* says in a letter dated August 10th:

"Creola 2:18, hy Creole 2:15, hoth pacers, bred hy Senator D. P. R. Isenberg at Waialoe Farm, now holds the record for Hawaiian-hred harness horses. Senator Isenberg is the gentleman who imported Waldo J. 2:08 and Joe Wheeler 2:07½, and J. Quinn is head trainer at the farm. Mr. Quinn deserves great credit for the way he handled Creola. She was green when he got her and in six weeks' time she made her record in her maiden race. There is but one young mare on the islands that I think can lower Creola's record, and that is a filly hy Creole, out of a driving mare, Lady Wentworth, by Altamont 2:26¾; second dam Kitty Kishar, dam of Doc Sperry 2:09. This filly is owned hy C. McFarland, of Honolulu, and is not quite two years old, yet she has shown quarters in 39 seconds, and is very smooth going.

Mr. Isenberg has a four-year-old colt hy Boodle 2:12½, dam hy Electioneer 125, that he thinks a great deal of. He is a fine looker and speed prospect.

This is a great land for old-timers and most of them have happy homes. The climate seems to suit them and they all look well. We have with us Joe Wheeler 2:07¼, W. Wood 2:07, Waldo J. 2:08, Thomas Ryder 2:13½, Wait-a-Little 2:17½, Faro Bank 2:16, Acrobat 2:18¼, Los Angeles 2:23½ and the latest, Ayres P. 2:21¾, 2:03 with running mate, who is as slick as a four-year-old."

Last Day at Hartford.

The Hartford Futurity, foals of 1901, pacing, $2500, mile heats, two in three.

Buckshot, ch h hy Axworthy	(Curry)	2	1	1
Belass, ch f by Boreal	(Jolly)	1	2	2

Time—2:14¼, 2:16, 2:17¼.

2:17 class pace, $1000, mile heats, three in five.

Bad News, h g hy Constman	(Wilson)	1	1	1
Funston, ro g by Dictatus	(Snow)	3	2	2
Lookout Hal, h b	(Shank)	2	3	3
Edgar Boy, b h	(Wilson)	4	4	4

Time—2:13¼, 2:10, 2:14¼.

Mrs. Phelps of Troy, New York, holds the record for the fastest mile driven by a woman. At the New York State Fair last week she drove the pacer Albert 2:04¼, a mile in 2:05½.

State Fair Grounds to Be Sold.

Says the Sacramento *Bee*: "Agricultural Park, for many years the Mecca toward which the horsemen aod stockraisers of California have journeyed in the autumn of each year, may soon pass into history, and the land he cut up into city huilding lots. When autumn comes again and visitors from every part of the State are assembling for the Fifty-second State Fair, the grandstand, the stables aod cattle pens, now at Agricultural Park, will in all prohability have disappeared, and the mile track, where many an exciting finish has heen run, will he covered hy the pioneer residence of a new suhurhan residence district and a new track will be in operation near this city.

The Directors of the Agricultural Society have decided to sell the park, and hids for a new site for race track and stock exhibit will he opened at the next meeting, to be held on October 15th. The Board has referred the sale to the Site Committee, of which Thomas Fox is chairman. It is hoped that an acceptable offer for the park property will have heen received hy that time, and that a new location may he selected.

Agricultural Park contains ahout 42 acres, and an offer of $65,000 made some time ago, is the only estimate of its value ever make public. This offer, it is said, will he repeated as soon as the determination of the directors to make a sale hecomes known.

There is not the slightest douht in the minds of any of the State Fair directors that a new track will he ready for the next State Fair. Already a number of offers have heen made and there is quite a rivalry among those who own land within easy reach of this city to secure the society for a purchaser. It is explained that there is so much level ground in the valley hereabouts that it will he no difficult task to secure a proper site at reasonable figures, leaving a good margin for the State Fair directors after they have paid for the new park, and they have fitted it up properly for the next racing meet. All of the friends of the State Fair stand ready to rally to its support, according to the statements of the directors and they declare that the assurance of continuing the yearly meetings here was never hetter.

A Delightful Innovation.

During the Iowa State Fair this year there was on two afternoons, Tuesday and Friday, a visit to the fair of the Eleventh United States Cavalry, under command of Colonel Thomas, 300 strong and all handsomely mounted. After parading around the race course, so that all might have a chance to see what Uncle Sam's regular troops looked like, they dismounted in the infield, and after a selection or two hy their fine band, under the direction of their bandmaster, Prof. Perweins, some of the cavalrymen gave several exhibitions on the track in front of the amphitheatres. The first was a Cossack charge, with the men standing in their stirrups, and in this position making a wild charge and firing as they passed the great masses of people who were present. The second exhibition was what is called a rescue race, in which five mounted men, hearing firiog in the distance, charged down the track to their rescue, firing as they rode, picked up the dismounted men, placed them hehind themselves on their horses and returned to their origioal position, with two men on each horse. Then they gave a Roman standing race, each man riding two barehacked horses in a standing position, then made a run of a half-mile, and it proved to he a sensational performance and far better than is seen in the so-called Roman hippodromes given with the big circuses. The men taking part in these special events were memhers of Troop G, Captain Tompkins commanding, and he has long had the reputation of training his men in all sorts of feats while mounted. The Eleventh Cavalry also gave some fine exhibitions again on Friday afternoon, and the people who witnessed these exhibitions by the cavalrymen were loud in their praise of their daring work. By the time that the next State Fair is held the whole regiment will he in quarters at Fort Des Moines, and the fair management can provide no stronger attraction than to again invite Colonel Thomas and his regiment to appear and give some of their celebrated exhibitions. —*Spirit of the West.*

No Kick Coming.

Lititz, Pa., March 22, 1898.

W. F. Young, Springfield, Mass.

Dear Sir:—I am very well satisfied with your Absorbine, which did exactly what you said it would.

Yours respectfully,

Jacob Biedinger.

The roan pacer Albert, which entered the 2:05 list at Poughkeepsie, when he won a heat from Hettie G. in 2:04¾, is by Flower 2:21¾, out of Ella Wilkes 2:26¾ hy Favorite Wilkes 2:24½. Flower is a son of Baron Rose 2:20¼, Baron Rose was by Stamboul 2:07½, dam the renowned Minnehaha.

Notes and News.

Direct View 2:08¾ is the season's fastest trottiog stallion to date.

Millard Sanders will race whatever J. H. Shults may start this season.

Monroe Salisbury says, "Dash races are all right for the runners, hut they won't do for the trotters."

In addition to his wonderful ability at either way of going, Anaconda is said to he an ideal horse under saddle.

The price paid for Dr. Strong 2:08 hy E. E. Smathers was $15,000, and not $11,000 or $14,000, as has heen reported.

It is prohahle that Sweet Marie 2:06¼ and Wilque 2:09¼ will meet in a race to wagon over Belmont track in Septemher.

The Michigan gelding McKinley hy George St. Clair, is now tied with Sweet Marie for the season's trotting race record of 2:06¼.

J. A. Hervey, of Des Moines, has sold the four-year-old filly, Ruhy Dale, hy Barondale 2:11¼, to J. A. McLeod, for a good long price.

Mr. P. W. Hodges of Santa Ana has moved his string of horses from that place to the San Jose track. He has ahout twenty head in traioing.

It is reported that C. B. Knox, the owner of Anaconda, has purchased the pacing stallion Red Bird 2:08¼, winner of the 2:10 pace at Readville.

Oregon Maid took a record of 2:08¼ at Galeshurg, winning two heats in a 3 in 5 race and second money. She is Del Norte's first 2:10 performer.

Maxine 2:08¾ is getting hack to her 1902 form, and hegins to act like a 2:07 trotter. She made Stanley Dillon step in 2:07¾ the second heat at Readville.

Stanley Dillon 2:07¾, George G. 2:07¾, Direct View 2:08¾, Kent 2:09¾, Alexander 2:09½, Tuna 2:09¼ and Anaconda 2:09¾ all entered the 2:10 list at Readville.

Anaconda 2:01¾ pacing and 2:09¾ trotting, has the distinction of heing the holder of the records at hoth gaits. Jay Eye See 2:10 and 2:06½, is the next fastest.

Captain Sphinx placed the Michigan half-mile track record at 2:09¼ in the first heat of the free-for-all pace at Port Huron recently, hut lost the race to Little Squaw.

Santa Cruz will douhtless he on the circuit next year and we will all want to attend. It should make a most delightful place for a high-class harness meeting.

Miss Kinney 2:19¼, is a new 2:20 performer for McKinney 2:11¼. She took her record in a winning race at Port Huron, Mich., last week, driven hy Frank Cares of Detroit.

Sweet Marie continues to accumulate new records. She is the largest money winner of the year, holds the season's record and is winner of the fastest five heat race ever trotted.

John A. McKerron, 2:04½, stepped an easy workout at the Glenville track recently in 2:12½. The great wagon trotter is rounding to in fine shape and is apt to step a merry mile hefore the end of the season.

New York speedway enthusiasts are eagerly lookiog forward to a match race hetween Black Rohert 2:13¼, and the gray Pilot Medium trotter Pilot Boy 2:09¼, which was a Grand Circuit star several years ago.

Monroe, the hig son of Seymour Wilkes, in the East View Farm stahle, went a surprisingly good race in the 2:13 trot at Providence, which he won in 2:12½ and 2:10½. He will no douht he a new 2:10 trotter ere long.

Utah State Fair entries close next Wednesday, Septemher 21st. There are six days of harness racing with purses from $400 to $700. Big inducements are offered California horses to race there. See advertisement.

The Virginia stallions Condova 2:17¼, owned hy E. F. Nottingham, and Jack Brereton 2:17¼, owned hy E. G. Fox, have heen matched for $1000 a side, the race to take place over the Tasley, Va., track within sixty days.

Now that Mr. Billings has ridden Charlie Mac in 2:15½, which is the world's record for trotting under saddle, a mile in 2:10 or 2:11 is freely predicted as within the limit of the gelding's speed at that way of going.

The hay gelding John Caldwell hy Strathway, owned by Colonel J. C. Kirkpatrick of this city, won the 2:25 class trotting stake at Readville last Monday in straight heats, getting a record of 2:14½ in the last heat of the race.

Star Pointer's mile in 1:59¼ in 1897 and Lou Dillon's mile in 2:00 in 1903 were the first two minute miles at the pacing and trotting gaits. Both were made over the New England Trotting Horse Breeders Association track at Readville.

When the dash races were on at Empire track, New York, hut few pools were sold where first choice hrought over $25, hut when the heat races were called first choice jumped to $100 and oftentimes to three or four times that amount.

Springer & Stuhbs of Denver returned last week from Europe with an importation of twenty-one head of Belgian draft and Oldenhurg coach horses, which will he taken to Deover after remaining in quarantine the required length of time.

Mamie R. 2:15½ worked a mile at Sacramento one morning during the fair in 2:12½. She is undouhtedly one of the hest three-year-olds ever hred in California. We understand that Mannie Reams, her owner, has given a prospective huyer an option on her at a long price.

Sunol 2:08¼, by Electioneer, the ex-champion trotter of the world, foaled a hay colt hy Axworthy 2:15½ at Shultshurst Farm, Port Chester, N. Y., August 12th. It is her first living produce, and great efforts to save it will he made as all her previous foals have died very young.

Charles Marvin shipped his stahle to Lexington after the Galeshurg meeting and will give his stahle a rest for a few weeks. Bequeath, his Futurity caodidate, had a had knee hut the veteran trainer hopes to have the daughter of Cecilian right again before the Kentucky meetiog.

M. S. King at the Cleveland track worked the handsome four-year-old mare Reydlette hy Rey Direct 2:10 a mile in 2:20¼, with a final quarter in 31¾ seconds. This mare is coming to her speed very fast and should go a mile in 2:12 yet this fall. She is a very handsome mare and good headed.

Marengo King, said to have heen the hest looking stallion ever sired hy McKinney 2:11¼, died at Brighton Beach last week. He had shown around 2:15 trotting, and was owned hy J. H. Brown, Detroit, owner of Stanley Dillon 2:07¾. The dam of Marengo King was By By, own sister to Lockheart 2:08½.

A dispatch from Providence dated Septemher 13th says: Secretary Alhert H. Moone of the Grand Circuit today announced that R. A. Smith has been disqualified from racing for the remainder of the season hy the stewards of the Grand Circuit. The action is taken for the alleged laying up of the first two heats of the Roger Williams trotting stake with the California mare, Sweet Marie, on August 31st at Narragansett Park.

One of the hest fields of trotters which will meet this year is entered in the Diamond Handicap at Memphis. They are John Taylor 2:08¼, The Roman 2:09½, Hall Frey 2:09¼, Silversign 2:10½, Billy Foster Boy 2:11½, Jim Ferry 2:10¾, Dr. Strong 2:08, Prince Selma 2:10¾, Early Reaper 2:09¾, Sweet Marie 2:06¼, Snyder McGregor 2:09¼, Mary Gage 2:11¼, Alexander 2:09½, Stanley Dillon 2:07¾, Lady Gail Hamilton 2:11¾, Dan Wilkes 2:09¾, George G. 2:07¾, Direct View 2:08¾ and Consuela S. 2:07¾.

There is to he no dockiog of horses' tails in the army. The new regulations prohibit the docking, hanging or clippiog of the tails, manes or forelocks of horses. The puhlic animals are not to he so mutilated and only such reasonahle trimming and plucking as may he necessary to prevent shagginess of appearance is permitted. The author of that paragraph has rendered a real service to the horses, to say nothing of his contrihution to an enforced preservation of the nohle appearance of the animal.

T. W. Barstow's fast pacing mare Alone is rapidly recovering from her sickness at the time of the San Jose meeting and goes like herself. Her owner stepped her a mile in 2:06¾ on Tuesday, the first half in 1:04 and last half in 1:02¾. Next week he expects to step her a mile helow 2:06. This is what her class would have heen and it would have taken hetter than 2:06 to have heaten her at the San Jose meeting had she not heen taken sick, as she was fully in as good if not hetter condition just hefore the Breeders meeting.

The yearling pacing record of 2:20¾ made hy the filly Belle Acton in 1892, has at last heen equalled. At the New York State Fair last week, the yearling colt Paul D. Kelly, owned hy U. G. Smith of Glens Falls, made a mile in that time, having heen driven to beat 2:22. According to the dispatches he covered the first half in 1:04, and if that is correct, a hetter rated mile would douhtless land him well inside the 2:20 mark. Paul D. Kelly is hy Armont, son of Belmont 64, and his dam is called a Morgan mare. Armont is the sire of Flirt 2:07¼, pacing.

The Hartford Futurity furnished two excellent contests, although the fields were small in hoth events. Five three year olds started in the trotting division which was won hy Alta Axworthy in straight heats. Princess Athel was second hoth times and Totara third. The fastest three-year-old of the year, Lord Revelstoke 2:12¼ was distanced in the first heat. The time of the race was fast—2:13¼ and 2:14¼ and stamps Alta Axworthy as a high class filly. In the pacing division the heats were split although there were hut two starters. Belass hy Boreal took the first heat in 2:14½ hut was then heaten hy Buckshot in 2:16 and 2:17½. This does not equal the time made in the Breeders Futurity at San Jose this year, where the pacing divisien was won hy Friskarina, a daughter of Bayswater Wilkes in 2:13¾. That Axworthy should he the sire of the winners of hoth divisions of the Hartford Futurity this year is a great credit to this comparatively young sire, who is a son of Axtell out of a mare hy Kentucky Prince.

One can't tell from the summary just how every heat was driven. An Eastern turf writer who was several hundred miles away from the firing line, wrote up a half column denouncing a driver who had finished seventh and last in the first heat and then won the next two, accusing him of laying up and insisting that he should have heen fined heavily. When he found that the horse had made a tangled hreak in the first heat of the race and had harely saved his distance hy hard driving, he apologized, hut the apology was not half as strong as the criticism.

A new racing association has heen organized at Dallas, Texas. The officers of the new association are: Ralph Eastman, president; M. W. Strickland, vice-president; Charles A. Mangold, treasurer; Charles F. Mills, secretary. Five thousand dollars will he hung up for trotters and pacers October 11-15, during the grand fall festival of the State Fair of Texas at Dallas. Among the directors of the new association are Colonel Henry Exall of Lomo Alto Farm, A. D. Aldredge of Electioneer Stock Farm, and many prominent horse owners and husiness men.

The aonual race for the trotting championship of Europe was decided at the Baden track, near Vienna, Austria, recently, and resulted in a victory for Contralto 2:10, after a hard four-heat race. There were eleven starters—ahout the largest field in the history of the race—of which all hut Mary C., were ex-Americans with fast records, and she of American hlood. Dolly Dillon 2:06¾, was the fastest hy the records, followed hy Belle Kuser 2:08, Dillon Boy 2:09¼, Contralto 2:10, Wainscott 2:10¼, Lady Constantina 2:12¼, Axmere 2:13¼, Nelly Gay 2:14¾, Wig Wag 2:16¼ and Soano 2:23¼.

On Wednesday evening the crack four-year-old gelding, Swift B. 2:16¼, after having won during that afternoon the 2:17 trot over a very muddy track at Hamlin, developed a severe case of laminitis, or founder. While given the henefit of prompt and efficient treatment he was in a quite critical condition, during the latter part of that night and the early morning hours of Thursday. Ahout noon on Thursday a decided turn came for the hetter so that his owner, J. A. Richardson, Boise, Idaho, as well as his trainer and driver, J. B. Stetson, felt considerahly more at ease concerning the final outcome of the attack.

Montgomery Chief is the kiog of gaited saddlers. This was the decision of the judges at the world's fair horse show last week when they affixed the hlue streamer to this high stepper from the hlue grass state. This colt, helonging to the Ball hrothers, was first heard from a year or two ago since which time he has heen winniog pretty regularly at the fairs and shows in the central states. He is the rightful successor to the great Rex McDonald, who has heen retired to the stud and who will probahly never enter the show ring again. Rex reigned for ten years, yet there are many who helieve that Montgomery Chief is as good or hetter than Rex ever was.

Editor Hervey of the *Horse Review* aptly says: "The craze for dash races in the harness turf originated in the huge mistake that the trotter, as a gamhling tool, could compete, virtually on the same ground, with the thoroughhred, and divert from the 'running octopus' a large share of the golden stream which pours so dazzlingly into the latter's coffers. We have repeatedly expressed our opinion that racing, on the grand scale, without hetting, was and is impossihle, hut in recognizing this fact we have also consistently insisted that hetting should never he more than an adjunct to racing, and that racing should never sink into a mere adjunct of hetting. That the latter is the present condition of thoroughhred racing no one can deny. That it can nor will ever become that of the harness turf we shall never helieve."

Pacheco, the thoroughhred mare hy Huhbard is the dam of Anna Belle 2:27½ that is in turn the dam of Robert I. 2:08¾ and Murray M. 2:14, the three-year-old colt that won the the Breeders Futurity this year. Anna Belle also produced La Belle 2:16 that took her record as a two-year-old, and Maud Murray a mare that went to Austria and trotted in 2:12. Now, the hlood that coursed through Pacheco's veins is the sort of thoroughhred hlood to use in hreeding fast trotters or pacers. Our friend Payne J. Shafter has a daughter of Pacheco for sale. He calls her Dusky Belle hecause she is a coal black. She is only seven years old, stands 15.2, is a pure gaited trotter and hroke single and douhle. She is a good roadster and Mr. Shafter will sell her for a low price. Bred to any good stallion she will produce a colt or filly that will sell for more than Mr. Shafter asks for her.

The Los Angeles *Express* says: Dr. Ralph Hagan has heen elected secretary of the Los Angeles Driving Club in place of Mrs. Chandler, whose resignation was reported a few days ago. At present there is no activity in driving cluh circles, hut the first regular matinee prohahly will he held Thanksgiving Day. October 3 is the date set for the annual banquet, at which time officers are elected and plans for the ensuing year discussed. Memhers of the driving cluh and all lovers of harness horse racing are hoping the new hoard that has in charge the arrangements for a fair to he held at Agricultural Park in Novemher will succeed in carrying out its plans for a late harness horse meet at that time. The memhers of the hoard are working with this idea in view. Coming at a time when interest is just awakening among driving cluh memhers, and when the northern circuit is just completed and the hest horses of the state can he secured if acceptahle stakes are hung up, the meet should he a great success. It is understood the present litigation over possession of the Agricultural Park grounds in no way will prevent the holding of a fair and race meet, and the only thing necessary to insure a successful meet is the co-operation of the Los Angeles county husiness men and ranchers.

Readville Summaries.

September 12—Trotting, 2:25 class, purse $1000.

John Caldwell, b g by Strathway	(Thompson)	1	1	1
The Peer, blk b	(Howard)	2	2	6

Fastest Records of the Year.

Following is a list of California bred horses and horses that come from California bred sires that hold the fastest records of the year:

TROTTING.

Two-year-old—	
Athasham, b c by Athadon	2:20
Four-year-old—	
Tuna, b f by James Madison 2:17¾	2:09½
Five-year-old—	
Aristo, b g by Nushagak	2:08¼
Fastest mare—	
Lou Dillon, ch (6), by Sidney Dillon	2:04
Consuela S., b (10), by Directum 2:05¼	2:07¾
Fastest gelding—	
George G., b (6), by Homeward 2:13¼	2:07¼
Stanley Dillon, b (9), by Sidney Dillon	2:07¾
Fastest stallion—	
Direct View, br (5), by Direct (p) 2:05½	2:08¾
Fastest new performer—	
Stanley Dillon, b g (9), by Sidney Dillon	2:07¾

PACING.

Two-year-old—	
Delilah, b f by Zolock (p) 2:09¼	2:16½
Four-year-old—	
Irish, ch c by Montorey 2:09¼	2:08¼

Santa Cruz will doubtless be on the circuit next year a͏nd we will all want to attend. It should make mos͏t delightful place for a high-class harness ...

Changing Drivers.

There is a suggestion for the rule committee of the next Congress of the National Trotting Association in the circumstances surrounding the handling of the Michigan gelding McKinley at the Readville and Providence meetings. By reference to the summaries of the above meetings it will be seen that in each of McKinley's races at those tracks it was deemed by the judges expedient, in the interest of the horse's chances to win, to change the driver after the race had begun, and this was accordingly done, Mr. Geers being substituted for the junior Boone at Readville and Mr. A. P. McDonald at Providence. There was in either race not the slightest intimation of a more serious indictment against the young man originally selected to drive than his inability to realize on the speed which the horse was known to possess, and it was not only by his consent but upon his solicitation that a new driver was selected.

Undoubtedly the change of drivers was fully justified in both races, inasmuch as immediately thereafter the race took on a new phase, and the horse won without the slightest difficulty. But the thing that was subversive of justice, and that leads to the suggestion of a rule upon the subject, was the fact that many bettors had placed their money against McKinley with the understanding that the regular driver was to be entrusted with his chances. In other words, they risked their money not so much against the ability of the horse as upon the inability of the driver, and the judges upset their calculations when they ordered a substitution. What offered to them a fair betting proposition and a chance for their money, became a "lead pipe cinch" for the other fellows when the change of drivers was made.

The qualifications of the driver always have been and have a right to be considered a factor in the bettor's judgment, and if he chooses to back the driver instead of the horse he is entitled to as much protection as those who have backed the horse and ignored the driver, except in cases where fraud enters into the proposition. There are no circumstances under which a change of drivers may not be justified in case of fraud. The rule suggested is one requiring the name of the driver to be stated in connection with that of the horse when the fields are posted in the betting ring before the race, with a provision that no change shall be ordered unless a driver is guilty of misconduct. This would give the speculators a chance to know what they were doing and to depend upon getting at least a "run for their money" when they took the driver into the calculation on their investment.—*Trotter and Pacer.*

The Williamson's Belmont Cross.

"It is evident that the veteran trainer Charles Marvin did not overestimate the value of a cross of the thoroughbred Williamson's Belmont when he stated 14 years ago in his valuable work, "Training the Trotting Horse," that "a trotting pedigree can have no better foundation than to rest on Belmont blood." All the best California bred trotters now before the public inherit the blood of that famous son of American Boy.

The sire of the peerless trotter Lou Dillon 1:58½, also of Dolly Dillon 2:06¾ and Stanley Dillon 2:07¾, was from a mare got by a son of Williamson's Belmont. The fourth dam of the largest money-winner in the Grand Circuit this year to date—Sweet Marie 2:06¼—was by the thoroughbred Owen Dale, whose sire was Williamson's Belmont and whose dam was by American Eclipse. Consuela S. 2:07¾, the second largest money-winning trotter to date in the Grand Circuit this year, is inbred to the Williamson's Belmont strain. The dam of her sire was by a son of Williamson's Belmont. The dam of Consuela S. was by Nutwood and her second dam was by Bel Alta, another of Williamson's Belmont sons."—*American Horse Breeder.*

There are many other trotting stallions that could have better been spared to go abroad than Onward Silver 2:05¼. It is far better, however, to have him help increase the reputation of American trotting stock in Italy than to have had him destroyed by fire as was much of the valuable trotting stock of J. L.

JOHN CALDWELL 2:14 1-2

Bay Gelding by Strathway. Owned by Col. J. C. Kirkpatrick of San Francisco

Druien, Onward Silver's late owner, at St. Edmere Stock Farm, near Lexington, Ky., on the night of the 25th ult. Onward Silver is by far the best trotting stallion that ever went abroad. He is bred right to get very high class race winning trotters. He is the fastest trotter got by the great Onward 2:25¼. His dam was full sister of Kentucky Union 2:07¼, and she was the fastest trotter got by Aberdeen. Mr. Druien suffered a severe loss from the fire mentioned above. Most of his valuable broodmares were destroyed, and doubtless many of them were with foal by Onward Silver 2:05¼.

A dispatch from Topeka, Kansas, dated September 13, stated that the world's champion pacer Dan Patch 1:56¼ was at the point of death at that place. He is suffering from strangulated hernia. A later report states that the champion is slowly improving and has a good chance to recover. The attempt to have the horse go against his own record at the State Fair has been abandoned.

Geers has now driven three horses to victory in the M. & M. and two in the C. of C. His first win in the M. & M. was behind The Corporal, after the judges had removed J. B. Chandler. The silent man's next winning ride was behind Lady Geraldine, while his latest victory was with Stanley Dillon. His first winner in the C. of C. was Direct Hal, a horse of his own breeding, and his second, Baron Grattan, that he drove to a mark of 2:06¼.

W. G. Durfee won both races in which he had entries on Monday and Tuesday at the Oregon State Fair. Cavalier winning the third and fourth heats of the 2:20 pace in 2:16½ and 2:16¾, and Rita H. winning the 2:13 class trot in straight heats in 2:15 and 2:14¼.

Jackson's Napa Soda does not tangle the feet.

Thoroughbred Notes.

Jockey Jed Lewis is once more riding for his employer, Ed Corrigsn. He had both legs fractured at Kansas City in May, but is now himself again.

The Chicago tracks are now supplied with better jockey material than at any time during the season. Henry, Helgesen, Dominick, Nicol, Aubuchon, Prior, Knapp and Mountain compose a pretty strong bunch, and it may be said they ride the bulk of the winners.

It is reported that definite arrangements have been made whereby Rslph Tozier, secretary of the Union Park Club, St. Louis, will operate the Newport, Ky., race track for a period of thirty days, heginning September 17th and closing October 21st. Latonia races begin Octoher 23d, and it is stipulated in the contract that the Newport dates shall not confliot with the Latonia meeting.

John Shields, a well-known trainer of race horses, died at a hotel in Chicago, September 1st, of heart disease. Shields was 50 years old, lived at Oakland, Cal., where he had a stock farm, and had recently heen employed hy W. O'B. Macdorough, the California turfman, and trained Beau Ormonde and several other fast horses.

It is more than likely that at the next annual meeting of the Western Jockey Club the scale of weights will be revised and raised. There is some agitation here in that direction, and certain it is a change would be in order, and mainly with reference to giving the competent and heavy boys a chsnce.

Waterboy, The Slave and eight colts have been shipped from Sheepshead Bay to Mr. J. B. Haggin's Elmdorf Farm. The Slave arrived in had condition; he is afflicted with somethiug like colic. How serious his condition is could not be learned but he was attended by a veterinary surgeon. The Slave is an imported horse well known to local race goers as he was raced at Oakland several times by G. B. Morris, a couple of seasons sgo. Waterboy will be sent to the stud permanently.

It is prohable that Artful, winner of this year's Futurity, will be started in the Great Esstern Handicap. She was, however, injured in the Great Filly to such an extent her leg swelled badly, and while she is now appsrently sound again, she will not be started until she is in perfect condition. Mr. Duryea is wisely pursuing a policy with her that will insure her being fit for other things when she is wanted.

At the regular monthly meeting of the Stewards of the Western Jockey Cluh held in Chicsgo last week, all applications for the re-instatement of persons and horses that participated in the racing at Newport and the Union Jockey Club were denied.

The greatest race that has been seen on the Eastern tracks this year and one of the greatest in all turf history was the rich Century Stake run Saturday, the 3d inst., worth $14,650 to the winner. Stalwart, Mr. E. R. Thomas' three-year-old chestnut colt, by imp. Meddler—Melha, defeated the great Ort Wells, after a grueling drive for a full quarter of a mile. In addition to these two, Shorthose, Major Daingerfield and Delhi also started. It wss a good field, but to the regret of all who desired to see the three-year-old championship definitely settled, Delni, winner of the Withers, the Belmont and the $50,000 Great Republic, was not in form, and the race resolved itself into a duel between the son of Meddler and the son of King Eric. When the barrier was sprung Delhi took the lead, with Ort Wells two lengths behind, and Major Daingerfield a length and a half in the rear of him, and a neck in front of Stalwart. The Keene colt cut out a fast pace. The first half mile was run in 49 seoonds, the six furlongs in 1:14. For a mile Delhi led and the mile was run in 1:39 2-5, but less than a furlong further O'Neil moved up with Ort Wells and Redfern followed close on his heels with Stalwart. When they got up to Delhi, Odom drew his whip, but to no avail. The Ben Brush colt had shot his bolt. He was in condition to race but a mile and further effort with him was useless.

Ort Wells shot forward in front of him, seemingly sure of victory, and then it was that Redfern called on Stalwart and the great duel between the two hegan. Gaining slowly but surely, creeping up by inches, the Meddler colt managed in the first furlong in the run through tne stretch to get on almost even terms with Ort Wells. O'Neil took to the whip on the favorite and from the sixteenth pole to the wire there was a battle than which none gamer nor truer was ever fought. Both boys rode their hardest, both horses were extended to their utmost. For fifty yards they battled when no man in all the thousands that cheered could tell which was the first and which would be the victor, and only in the final stride did Redfern lift Stalwart to the line a head in front of his great opponent in a race which will live long in the memory of sll who saw it. The time for the mile and a half, 2:31 1-5, constitutes the record for the course. The mile and a quarter was run in 2:05 2-5, only two-fifths of a second slower than the time made hy Salvator in his famous match with Tenny.

In the Ocean Handicap run on Labor Day at Sheepshead Bay Dainty, well known to San Francisco race goers, proved the winner; but, good mare though she is, her victory was due solely to the poor riding of Lyne on Alan-a-Dale. Mr. McDowell's horse should have won, and would have won had Lyne not gone to sleep during the last sixteenth and allowed Dainty to go through on the rail. Dainty ran a splendid race and stood a long, hard drive, hutit was only good luck in finding an opening on the rail that enabled her to win.

Beldame proved herself the best three-year-old in America hy defeating Graziallo, Ort Wells and Ocean Tide in the September Stakes, at a mile and three-eighths, on the 8th inst. She was never extended at any part of tho race and won well in hand. Ort Wells finished a bad third. Graziallo, well handled by Hildehrand, lasted long enough to get the place.

It was a curious coincidence that on the same date Pretty Polly, the wonderful English three-year-old filly, won the famous Doncaster St. Leger, defeating the hest of her age of either sex and placing to her credit fourteen successive victories. Pretty Polly has never yet been beaten, and in the St. Leger sgain defested the Derby winner, St. Amant. The match race suggested between these two, not only the hest fillies, but the hest three-year-olds in England and America, respectively, would now command greater interest than ever, were it possihle to arrange it.

Do Horses Think?

Edward Shipp, chief horse trainer for Forepaugh & Sells circus, has recently written an article on the training of horses, from which the following extract is made:

"That curious, indefinite quantity known ss 'instinct' is at the bottom of all the tricks the horse learns. Just as he eats from instinct, he learns tricks. Usually the eating is at the bottom of his entire education. He does things for the most part because he gets something good to eat after the doing. It is his natural search after food that makes him do them, just as he paws away the snow to get at the grass. After a while the actions become habits, and we will ssy he is 'broken.'

Nothing of the sort.

There never was anything to break. His instincts were simply set in motion. Some men take months to teach a horse the simplest trick and weeks to make him bridle-wise. In a week I can have the same horse responding easily to my directions in simple tricks. It isn't the horse; it is the trainer. Some men exercise an influence over animals which is almost hypnotic. The man himself can't tell how it is done. In some mysterious manner the horse's instincts make him do certsin things in certain ways at certain times. He does them just as he eats and with no more evidence of judgment.

It is no uncommon thing foi a horse to open a feed-box to get at the grain inside. Some people fancy this is a proof of intelligence. Really it is natural nosing after something to eat. Man is not the only animal whose heart can hest be reached through his stomach.

There is not the slightest reason to believe that a horse has a thinking mind. Here is an instance:

During the winter, two of our ponies that do a pedestal act, and always get a lump of sugar after it, if they make no mistakes, rehearsed so much that their pedestals became duncolored from dirt. When, we came into Madison Square garden to perform the little platforms were repainted. What do you think those ponies did?

They refused to act. When led into the ring and set at their tasks they looked and sniffed at the new pedestals and didn't make a movement in the direction of their usual performance.

It wasn't intelligence that made them act thus. The same lumps of sugar were waiting at the end. They simply had not sense enough to know their own implements in white paint.

If a horse is taught to go through a red door he will have to he taught all over again to go through a white one. All doors do not look alike to them.

But a horse has nerves, plenty of them. Sometimes I think it is more these little electric wires than anything else that makes him amenable to teaching. Imagine, then, the skill a trainer must possess to train creatures with nerves hut no logic, so far as I am able to see.

It takes patience, such as any man may own, too. Also coursge—an enraged horse is a redoubtable foe as any creature of temper with no good sense to back it Any one who has ever seen a human idiot in a rage can understand the situation. There is nothing more horrible than hlind, unreasoning, unguided temper.

Creatures of nerves are also creatures of fear. Kindness must be exercised at all times in order to overcome it. Until a horse is unafraid he is valueless.

Sometimes they never get over their tempers. Not ong ago one of our finest thoroughbreds killed his partner. It was in a car. The partner fell down. The other literally trampled him to death. He danced on him and refused to stop long after he was dead.

They never dwelt in peace, these two. From their first days together they quarreled. The end was inevitable. We should have seen it.

But the success of a trick horse is all in his trainer. The public fancies it is in the horse, hut it is not. Without a sensible trsiner a trick horse is nothing.',

Two Great State Fairs.

If any fairs in the United States were in line to suffer loss by the counter attraction of the great World's Fair at St. Louis it was the Missouri and Iowa state fairs. Strange as it may seem, however, both held very successful fairs and made a hig profit. The receipts of the Iowa fair were about $6000 larger than ever before. *Spirit of the West*, printed at Des Moines, Iowa, says:

"The agricultural and live stock displays this year were high-class and superior in every respect to former years. The special attractions were of a high order and the people were highly pleased and well entertained. The number and class of horses that were entered and raced this year were the hest that ever were seen on the state fair grounds track, and as usual was the leading attraction. The famous pscer, Dan Patch, the world's champion, was a decided hit, and did as much as any special feature to win success this year. A commendable feature of the fair was the absence of the "fakirs" that in past years has been a source of annoyance to the public, and but slight income to the fair. Now, that dignity coupled with pleasure and profit, has been a leading feature, let no backward step be taken in any direction."

The *Rural World*, printed at St. Louis, has this to say of the Missouri State Fair:

"For the fourth time Missouri tried her hand st an annual state fair during the week of August 15. The Missouri State Fair stands out conspicuously among its neighhors hecause of its absolute freedom from disagreeable features. These things too often characterize state and county fairs. Here there were no fakirs or grafters of any kind on the grounds; no immoral and disreputable side shows; no bookmskers or betting, and intoxicating liquors were also conspicuous by their absence. The Missouri State Fair was a clean one, and every farmer in the state should he proud of it."

Back Number Wanted.

To complete a file the following back number of the BREEDER AND SPORTSMAN is wanted:

April 3, 1897—Part 14 of Vol. 30.

A dollar will be paid for one copy of the above issue. Address F. W. KELLEY, BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco. tf

Horse Owners Should Use
GOMBAULT'S
CAUSTIC BALSAM
The Great French Veterinary Remedy.
A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

SUPERSEDES ALL CAUTERY OR FIRING.
Impossible to produce any scar or blemish.
The safest best Blister ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle.
As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.
WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin cure mixture ever made.
Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

EASTERN OPINIONS.

Henry Ten Eyck White, whose harness horse gossip in the Sunday Chicago *Tribune* is a feature of that journal writes as follows:

The trotters in the big stakes down east this year aro hardly up to the grade of formor seasons. In the Massachusetts, for instance, there was not a starter of extra high class, with tho possible exception of the Ohio horse, Doctor Strong, the defeated favorite. The man who drove the gray horss at Boston, and wbo has been his pilot ever since the son of Strong Boy made speed enough to go to the races, has not bad sufficiont experience in the sulky to compete successfully on even terms with such men as Geers, Andrews, Snow, nnd other reinsmen of that class who had starters in the Massachusetts. Most of the critics who saw the race agree that Doctor Strong should have won had he been better protected at all stages of the contest. Starting in sixth position for the first heat, he went "the long mile" and was separately timcd, the distance being done in better than 2:07, which rate of speed would have won easily bad he been given really skillful handling.

On tbe other hand, Cnnsuela S., wbo finally won the race nnd beat Doctor Strong, was driven with skill and judgment that could not have been improved upon. The young man wbo had her in cbarge and bas made sucb a successful campaign with the Butler horses is "Charlie" De Ryder. Although he is not well known to the general public, the people who fancy harness racing have learned in the last few years that De Ryder can hold his own in any company when it comes to training and driving a trotter or pacer, an aged horse or a colt. He is equally at home "in the bushes" or on a grand circuit track competing for the richest prizes of the turf, and aside from his ability as a horseman he has other qualities that are bound to keep him in the front rank of American reinsmen, now that he has been given a chance to show what he can do in the highest class of harness racing.

De Ryder, who is a well bred man and looks the part, is still a member of the younger generation of drivers, alheit he has been a good many years in the business As a boy he was a bustler. Telegrapby was his first fancy, and so apt a pupil did he prove that at the age of 14 he was pounding a key alongside cf men twenty years his senior and getting more than a boy's pay for it. And that De Ryder has not forgotten how to bandle the key was shown at Boston after he had won the $15,000 race with Consuela S., and was the center of attraction at tbe track. He was naturally anxious to send to his family the news of the victory of the mare he drove in the richest trotting event of tbe year, and went to the place where half a dozen of Boston's best operators were working away for dear life on press reports and private messages about tbe event of tho day. De Ryder wrote his message in the usual way and handed it to the chief operator. Just as that functionary was about to put it on the wire De Ryder became interested. He gazed wistfully at the row of clicking instruments for an instant. "Let me send it," be said to the head operator.

Not exactly understanding the situation and doubting tbat a man who had just finished driving a hard five heat race for a small fortune and won it could send a message up to the standard required by the Western Union in large cities, the chief operator hesitated for a moment. Then good nature came to his aid and he got out of his seat. De Ryder, attired in his driver's jacket and jockey cap, sat down at tbe instrument and "tore off" the message he had written as if ho had no othor business than telegraphy, while tho work of tho improvised office at the race track stopped and the operators watched tbe man who had just won the Massachusetts and had been wildly cheered by 15,000 people for his brilliant reinsmanship.

While Dr. Strong was tbo disappointment of the Massachusetts, the surprise of tbe race was George G. When this horse came from California a couple of months ago it was known he possessed remarkable speod. Ho worked the Cloveland track soon after roaching thoro in 2:07¼, and later in the day stopped tbe homestretch quartor in :28¾. But while the Californian had plenty of speed ho was a good ways from a race horso, as those who had him in chargo soon discovorod. One of his faults was driving on one rein. As soon as he was speeded in company ho wantod to dig for the pole as soon as tbe word was given, and this moant that in n field of horses able to step at his clip thor› would be serious trouble and possibly an accident. The side reining and otbor things also made G'orgo G. not as good gaited as ho might have oon.

It was at this time, just previous to the Detroit July meeting, that Geers took the horse and began to educate him. It was not an easy job, and when Geers found what was wanted it was his idea not to start the gelding in any races this season, hut give him a thorough schooling, winter him in the south, and for 1905 have a trotter that would not make any mistakes to speak of. George G. had been entered in a number of big stakes, however, and his owner, who has been more or less interested in trotters for a good many years, was anxious to see his $15,000 nag perform. In one of his races at Brighton or Empire George G. made a break and was distanced. At Boston he drew third place, which gave him a chance in the front row of horses, something greatly to be desired where the field is big and the starters are all supposed to have both speed and manners. Geers did not think George G. had a chance to win the three heats necessary to take down first money, but the horse's owner wanted to have the gelding do the best he could. Hence, when the word for the first heat was given and Geers found his horse on his stride and going well, he let him step away from the others and had the track before an eighth of a mile had been covered. It is not the Geers style to drive in front all the way, but when circumstances demand he can do it, and this was one of the occasions where keeping the pole was the proper thing to do. Therefore George G. led all the way and won in 2:07¾.

After the first heat and a piece of the second mile George G. was not a factor in the race. After the final mile had been trotted Geers told me that from the time George G. came into his stable until the Massachusetts was trotted the horse had been given just one good mile in his work. While George G. was winning this heat and Dr. Strong was going a hard mile only to finish fourth De Ryder was having his own troubles with Consuela S. Tbe mare did not get away any too well, and once under way she seemed to not flatten out and go smoothly. So she was not persevered with after it was evident she could not win and finished in the ruck. The second heat went to Dr. Strong, but by that time Consuela S. had a good position from which to make her battle, and it was then De Ryder showed how good a driver and race general he was. It is true he had a good mare that day—her third heat in 2·07¾ proves that—but it was De Ryder who put her in condition for that mile and the two hard ones that followed. Any trotter that can win a five heat race for a $15,000 stake against the pick of the land must be well trained and driven, and De Ryder is entitled to the credit that comes from a performance of that sort. Before Consuela S. joined the Butler string she was not rated by those who had seen her perform as a practicularly game mare, although she was sired by the bulldog trotter Directum. It was on account of her breeding in the male line that Monroe Salisbury, manager of the Butler horses, advised the purchase of Consuela S. when the death of her former owner put the mare on the market at auction, and the excellence of his judgment in the matter has been proven in a manner pleasing to the mare's purchaser.

Between the horses wintered at Memphis and those that passed tbe cold montbs in California so much of the grand circuit purse and stake money has been divided that it is now pretty well admitted that the animals given a long preparation in a warm climate, where more or less stiff work can be given all winter, have an advantage over those fitted in the east and the middle west that cannot be overcome. Everybody knows what Stanley Dillon, Alexander, Baron Grattan, and a few other members of the Geers stable have been doing in the way of money winning since the grand circuit started, and the showing made by the horses wintered in California is equally discouraging to owners of good ones fitted elsewhere. Sweet Marie, winner of two $10,000 purses, also of the record breaking Roger Williams stake at Providence and unbeaten in the grand circuit, taking down a race a week from Detroit to Providence, comes from California, whore she was wintered. So do Brilliant Girl and Tuna, a pair of trotting mares that for pure speed and good manners have few equals. John Caldwell won the 2:25 trot at Readville, can step a mile better tban 2:09 and manages to get some of the money every time he starts, no matter what the company. It has passed the experimental stage this mattor of wintering horses with which it is expected to win important grand circuit races tho following summer, and the net result is tbat a man who cannot afford to give his trotter or pacer the benefit of long preliminary training in a mild climate might as well make up his mind first as last that he will bo at a serious disadvantago when ho undertakes to beat animals that have boon at Pleasanton or Memphis from December to June.

How often is heard the expression: "There's nothing in it. It does not pay to own a trotting horse." Why men who own fast trotters and pacers should invariably assumo tbis attidude with regard to the sport has always been n puzzle to me. A man who owns a well bred harness horse, either for the purpose of driving on the road, racing in matinees, or following the circuit, does so, or ought to do so, purely for the pleasure and sport that he derives therefrom. While it is possible that he may derive some pecuniary benefit the presumption that he should always do so is ridiculous. There is no reason in the world why a man should derive a profit from his pleasure or sport in the horse game any more than he should derive a pecuniary benefit from following the pastime of golf, or the sport of yachting. A prominent business man told me only the other day that his golf club connections from which he enjoyed not over fifteen days' sport for the entire season cost him over $1000 and that he considered it money well spent, and if the average horse owner will look at the matter in the same light I think he will agree with me that his sport is cheap at the price he pays for it. I wonder what tbe chronic grumbler along this line would think if he had to put up the price of a first class horse for a yacht, and then pay a crew for sailing her, and a watchman to stay witb her over night, with the only possible emolument an occasional silver cup? A year's experience at such sport would make them think the trainers' and swipes' expense a mere bagetelle. This, be it understood, refers only to the gentleman owner. The breeder, driver, trainer and caretaker are in the horse gamo as a business, and should derive a profit commensurate with their ability. True, there are always those who breed and raise horses for the pleasure of it, rather than for any desire for profit, and the pleasure derived from the breeding of a possible world beater is reward enough for the time and money spent in this pursuit. If the sport does not warrant the cost, by all means accept some other game that will give comparative enjoyment for the outlay and cease your grumbling.—*Inter-Ocean.*

It is doubtful if any 2:10 mare was ever trained, or ever received so little training as Maud H. which is owned by Jacob Hanes of Decatur, Ill. Maud H. wss sired by Bowerman Wilkes, son of Baron Wilkes and her dam was by Regalia, son of Jay Gould, and the sire of the dam of Effie Powers, 2:08¼ and others. She was foaled the property of Frank McKay at Stevens creek, near Decatur, and was twice sent to the auctions where she went begging at fifty and sixty dollars. She was finally purchased by Mr. Hanes in February, 1901, At that time she was not thoroughly broken and had bad manners, being considered vicious. Mr. Hanes educated her to the point where she was a good family mare and two years ago started her in a Fourth of July race which she won handily right off the road.

Last year she was used to prompt other horses in tbeir workouts and this spring she was leased to I. R. Mills who was killed in a railroad wreck at Litchfield, Kas. She was started in a race at Parsons, Kas., but was suffering from the effects of the wreck and was behind the money. Owing to Mr. Mills' death she was returned to her owner, an old gentleman who trains her after ideas of her own. She was entered at the meeting at Monticello, Ill, which is thirty-three miles from Decatur. The day before the race Mr. Hanes hitched the mare to a buggy and drove over to Monticello with his wife, the sulky and pails being tied behind the buggy. In the first heat the next day Mr. Hanes pulled up after going around the track once. The judges warned him to keep going as he had been but half a mile. Mr. Hanes expressed himself in forcible language as to that kind of tracks and said tbat where he lived be had only to go round once to go a mile. However, he kept on, finishing third in 2:15¼ that heat and then won the next three heats. The old man says he has not yet received his winnings as the judges did not like the way be talked after pulling up at the end of the first half mile. The next day he hitched the mare to the buggy and drove home.

Last week at Decatur he never unhitched the mare between heats After the boys walked her round for a while he would sing out: "She's had walking enough, bring her over here in the shade and let her cool out." There she would stand without blankets until the next beat was called and after the race was over he drove her to his son-in-law's farm, some five or six miles from the track. When he went in to weigh he needed tbe cushion to make weight. He had left that on the sulky but explained to the clerk that ho knew how much the cushion weighed. When told that he must get it he exclaimed, "If you are as partictular as al that I'd have you understand that I can put a two-bushel sack of oats on the seat and beat all such critters as thero are in this race."

The next morning the mare was seen turned out in the yard, without a halter or blankot, and complacently switching flies while standing in the shade of an applo tree. In between races Mr. Hanes uses Maud H. as a buggy mare and she is never rubbed down and bandaged after the manner of even the cheapest kind of a race horse.—*Chicago Horseman.*

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Protection of Deer and Other Game.

The following article by Mr. Charles W. Coe touches a keynote in one important respect—the preservation and protection of deer by the destruction of California lions. In some States there is a bounty on cougars, bear, etc. The sport of hunting California lions is exciting and full of adventure. These beasts are hunted to quite an extent in some parts of the State, but the field has been prospected very slightly in comparison, and this diversion is, so far as the main body of sportsmen are concerned, in its infancy.

A bounty on these varmints, while it would, of course, be acceptable to sportsmen generally, would be most effective in another way. It would be a strong incentive for hunters resident in and near the districts where these animals flourish to hunt them at all times. As it is now, a lion hunt is generally undertaken when patience is exhausted by more than ordinary losses of cattle and stock in a particular locality, and a spasmodic attempt or two is made to kill or drive the animals from the district. Under encouraging auspices much good would be done if there was more attention paid to the varmints. Deer undoubtedly would increase, to say nothing of smaller game. The benefit would be for the sportsman as well as the rancher and stockgrower. In other parts of this country the opportunity for good sport in this line would not go a-begging.

During a twenty-five years' residence in the Mt. Hamilton range, I have noticed, in localities which hunters seldom frequent, a great decrease in the number of quail, doves, rabbits and deer. At the same time there has been an equal increase in coyotes, lynxes, wild cats, California lions, coons, foxes, hawks and polecats. Why is this? Because nothing preys upon these last. Wild pigeons and robins—they stay with us, more or less, from December to May—are about as numerous as ever. There has been an enormous increase in the number of ground squirrels. And be it remembered that twenty such squirrels will destroy more grass than a steer. These squirrels make more than one harvest. They store away the succulent grass seeds; practically destroying the grass itself, with an entire disregard of its value to the stockman. They are absolutely unscrupulous in the appropriation of acorns and pine nuts, which they store away for the provisions of their multitudinous little ones; being, evidently, proud of a fresh batch of these, several times yearly.

It is interesting to note how industrious woodpeckers store away great quantities of acorns within the thick bark of the oak or pine tree I have seen pines one hundred and fifty feet high with almost every square inch of bark made the receptacle of a large and luscious acorn. The woodpecker knows perfectly well what he is about, and admirably bow to provide for himself and his family; for he fortifies his acorn with the skill of an engineer, and, with your fingers, you can't dislodge it. Also, with all their loving skill the poor woodpeckers are robbed by the tree squirrel and the wild pigeon. And so the perpetual battle of nature goes on.

But man, after all, is the arbiter, and the interest of the sportsman and the rancher should be one. That this unity does not obtain is the fault of the sportsman. Many ranchers are sportsmen themselves, and have not one unkindly feeling to the sportsman as such; but the best of all things, and of all kindnesses may be trespassed upon too far. The sportsman, as a rule, has much too little regard and respect for the privileges he enjoys. If the "Golden Rule" obtained more effectively, between the sportsman and the rancher, both would profit by its application.

Now, to facts: More deer are killed annually within the Mt. Hamilton range by California lions than by the bullets of the hunters. Wherever there is a good deer country in this State, that is the place to look for your mountain lion. That is why herds of deer are restless. They seldom stay in one locality. There is nothing they fear so much as the sight, or scent, of a mountain lion. Not even the sudden appearance of a hunter will so quickly drive them from a range of hills. But this infernal so-called mountain lion preys, not only upon our deer but our calves. It is not too much to say that, on many ranches, five per cent of these are destroyed by the so called lions. I have known them to attack and kill colts, and nearly tear in pieces a fair-sized horse. The sight is an awful one when you meet it; the lacerated carcass presenting a gruesome sight. I once found a year and a half old heifer that had been killed by a lion. I poisoned what flesh remained. His lionship had breakfasted. Having done so he nearly covered up the remains with grass, leaves and weeds, to protect them from the sun's rays. Removing the covering—which I replaced, after inserting the poison—I waited for events. Next day I found his lionship, as dead as one of the Plantagenets, not fifteen feet away. Others might have partaken of the poisoned meat to die in the thickets. He was a beauty. He measured eight feet from tip to tip. That shows how easily the lion can be killed when you have found the agent that will put his worshipful career out of existence.

The lion's method of killing, either a colt, a yearling calf, a deer, or what not, is much the same as his venerable ancestors have found so useful in India and Africa. His kingship locates a spring, or pool, where the desired game are in the habit of coming at night. His majesty selects an overhanging limb of a tree, or condescends to an overhanging rock, if no tree is available One leap carries him to the back or the throat of his prey. The deer, the colt, the unsuspecting calf have no chance, with their weaker eyes, against this hidden terror, and that hidden terror takes good care that the wind shall be his useful ally. The tender neck of the victim, whatever it be, yields easily, and Might again has conquered. I have noticed, after a battle of this kind, how savagely the poor, slain thing has been torn. And yet your California lion knows little of his strength. He could grind a man to pieces; yet a little dog can tree him. He will run away rather than fight anyone at any time. And that's your beautiful mountain lion—so-called!

Some three years ago three herders, on the Pine Ridge range, were returning to camp. The one in the lead, in passing under a huge oak, saw an enormous lion directly over his head. He emptied his revolver at him. A plucky thing to do within ten feet. The lion sprang to the ground and, instead of attacking, as the tiger would have done, bolted and made his escape. He left a trail of blood which the dogs refused to follow. The California (so-called) lion is in reality no lion at all, and we are, therefore, not surprised to find him without a mane. Yet you may see them, as I myself have seen them, on the range—a lioness and her cubs—head erect and whiskers bristling, the very personification of animal dignity and nobleness, and far more beautiful than any circus ever presented On one occasion I took my eyes off for a moment from a scene like this to reach for my gun, and what I had been watching was gone in a second, the Lord knows where. I had a much beloved, intelligent and noble dog called Bruce. It was the only occasion when I was thoroughly provoked at him. He refused to follow the track, and bad, evidently, no desire to hunt lions. When a deer dropped Bruce was inclined to take all the credit. He felt "you are only an accessory to the fact" He had really brought down the quarry. Brave Bruce, though he didn't care for lions!

There is a lesson to be learned from the lion. He is mighty patient. He will wait for hours, on a narrow limb, or rocky ledge, through the coldest night, rather than go out, like the coyote, and scour the plains for his supper. This would hardly suit his majesty's dignity. But he will tread, when he wants to, with feet as noiseless as an owl's wing, for the unsuspecting rabbit, or the belated spike-buck, till genius and strength have conquered, as they do in nations, and the lion's game of politics is won. The lion loves venison, as the Russian loves the Japs. But true game is always wary. And it often times outwits its would-be destroyer.

Now what is the true purport of this letter? There are sportsmen and sportsmen. There are those who live for the sake of sport itself. These are your thoroughbreds. There are others who have no idea, and no aim, therefore, whatever, but their bag (however obtained) and, if it were not a contradiction in terms—the momentary immortality conferred upon them by their hag and three lines in a newsparer. I don't want to be misunderstood. I am as fond, and as proud, of a good bag as anyone; and I doubt if anybody so reverences a newspaper as I do. But, bags and newspapers notwithstanding, what this whole state wants are those who go after "fauna" because of the sport to be found in chasing them and of the real value to the country their destruction affords. Your deer are harmless as they are beautiful. Kill lions and vermin first, and soon game will be abundant.

External Parasites.

[By "Ashmont."]

Of the various agents that have been recommended for the destruction of fleas, the Persian and Dalmatian insect powders appear to be the most popular. They are often destructive, yet by no means positively so in all instances, and in the exceptions they have simply a narcotic effect, which lasts for a few hours only, when apparently complete restoration occurs. Nor can they be relied upon to keep dogs free from the pests, for they are soon shaken off, with all their constituents, consequently must be used once, and perhaps twice, daily to effect lasting benefit.

A bellows is the best means of application, or in its absence a tin box with perforated cover can be used. And in every instance the powder should be well worked into the hair, and down to the skin, with the fingers, the subject under treatment the meanwhile standing or lying on a paper, which, with what falls on it, should be burned, that all the fleas may be with certainty destroyed.

A dip may be made of the insect powder in the following manner:

Into a small jug pour one pound of the powder and three pints of cheap alcohol. Cork tightly to prevent evaporation, and shake often for three days. Then obtain a thin funnel large enough to hold the contents of this jug, also a three gallon demijohn.

Lightly pack the bottom of the funnel and its neck with absorbent cotton, and insert it into the mouth of the demijohn. Shake the small jug and pour its entire contents into the funnel. The fluid portion, which is the tincture of the insect powder, will slowly filter through the cotton, and as it does so, keep the funnel full of water until sufficient has passed through to fill the three gallon demijohn. And each time water is put into the funnel the muddy mass at the bottom of it should be lightly stirred, otherwise the filter will be choked. What remains in it should be thrown away.

By the operations described, which may take two or three days, all the virtues of the insect powder will be washed into the demijohn.

The tincture of the powder, which that now holds, is too strong for a dip, and should be diluted with two parts of water. That is assuming that the dog is small and a three gallon dip quite large enough, to make it one gallon of the tincture should be added to two gallons of water.

The effects of this solution are far more lasting than those of the dry powder, and a dip every two or three days ought to secure freedom from fleas in most troublesome times; but a dip daily would be perfectly safe. And were the solution sprinkled over the bedding and about the kennels, fewer dips would be required. It stains very light coats, but the discoloration washes off readily after having dried.

Mature dogs are not often infested with lice, but puppies are frequent victims, and the favorite location of this vermin is at the back of the neck, where they appear as small steel gray specks.

Lice may be destroyed by the remedies recommend d for fleas, but where the infested subjects are puppies it is best to use an emulsion made of kerosene oil, two parts, and fresh skimmed milk, one part. This should be prepared as follows:

Heat the milk, and while hot put it into a bottle considerably larger than required for the mixture, together with twice as much oil as milk; then shake the whole vigorously for several minutes, by which means the ingredients will be thoroughly mixed.

As soon as it has cooled sufficiently apply the mixture with a sponge or stiff brush, such as painters use, and with considerable force, that the skin may be well bathed. On the day following it will be advisable to employ a fine-tooth comb on the parts treated; and if any of the vermin are yet alive, a second application of the milk and oil will be indicated.

Druggists have on sale the crude petroleum oil, which is destructive of lice, and can be used freely with perfect safety. It should be applied to the hair with a brush, be allowed to remain on for three hours, and then washed off with warm water and soap. This operation should be repeated on three successive days, when the nits may be removed by combing the hair very carefully.

Another agent, which will immediately destroy all varieties of lice and their nits, and of which a single application only is necessary, is the oil of sassafras.

In using this, care must be taken to keep it from the eyes or mouth, for it will burn mucous membranes painfully.

A more expensive preparation, but much to be preferred for use on house pets, is composed as follows:

Calomel, two grains: alcohol, three drachms: chloride of ammonium, fifteen grains; rose water, sufficient to make three ounces.

This should be applied once daily.

Of the flea-destroyers adapted to lice on advanced puppies or mature dogs, benzin is the best.

Ticks occasionally infest dogs; and while still on the surface require practically the same treatment as lice and fleas; benzin being one of the most active destroyers. They, however, work their way through the skin; and after gorging themselves, often find it impossible to return. They consequently die; and then, being more or less poisonous cause inflammation of the adjacent tissues and swellings of considerable size; for which the only treatment is the knife.

Flies may properly be included in the list of troublesome insects. To them the odor of tar is highly objectionable, therefore washing now and then with soap containing it is recommended.

A strong suds should be made, and without being rinsed after being washed, the dogs should be allowed to dry themselves in their own way.

Aside from common flies there are the so-called gad flies of tropical countries, also "wood," "deer" and "shore" flies, familiar to sportsmen; all of which cruelly torment the dog.

When in the field any approach to complicated and elaborate treatment is not possible, and condensed remedies only are likely to be carried about. The tincture of quassia is quite an efficient protection against the larger external parasites, as fleas, flies, etc., and a four-ounce bottleful of it should be in the hunting kit, to be applied freely to the coat of the dogs, with the hands or a sponge, if either of such pests trouble him.

Scratching excited by vermin causes eczema, which should, of course, be appropriately treated after the vermin have been destroyed.

In every instance in which a kennel has become infested with any of the troublesome insects, the bedding should be at once destroyed, the quarters thoroughly cleaned, fumigated or disinfected with suitable means, and the entire inside treated to a coat of whitewash, which should enter every part, crack and crevice, or to a drenching with kerosene oil or naphta.

We understand that several well known doggy men from America are spending a few weeks in England, possibly on the look-out for exhibits for the great World's Show at St. Louis. Amongst those who are visiting this country is Mr. Jas. Watson, the well known exponent of canine matters, who is at the present time interested in collecting material for a comprehensive work on the dog, which is to be shortly issued in monthly parts by an American firm of publishers. Mr. Watson has had considerable experience in the work upon which he is now engaged.—*Sporting Times.*

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

San Mateo Show.

The first open air bench show ever held on the Coast was that of the San Mateo Keonel Club at the Polo Field of the Burlingame Country Club last Saturday. Judging from the enthusiasm shown by exhibitors and spectators alike the open air show will be a well patronized function in the future. As a success, in nearly every respect, the management can be congratulated upon the smooth manner in which everything connected with the show went off. The dogs were benched on the ground, Spratt's wire partitions were used to separate them and a shelter of bagging was comfortably arranged to protect the dogs from the sun, the heat of which was quite strong during some hours of the day.

The show officials had their headquarters in a marquee on the lawn just opposite the cozy club house—the intervening space on the lawo was used as a ring. The judges were: Mr. Jos. E. Cutten, St. Bernards; Mr Geo. A. Cranfield, all Hounds except Dachshunde, Poodles, Beagles, Irish, Black and Tan, and Yorkshire Terriers; Mr Wm. E Chute, Pointers, Irish and Gordon Setters, Collies, Bulldogs and Boston Terriers; Mr. N. H Hickman, Fox Terriers; Mr. Philip M. Wand, English Setters; "Joe" Bradshaw, all otber breeds. In the main, the awards were well received.

Wire haired Fox Terriers were the banner entry, 47 entries with six dogs. Wandee Coastguard was the premier of the class getting two specials. Wandee Lucretia headed the matrons. Among the youngsters of merit were Humberstone Actress (who somewhat resembles Lucretia), and Humberstone Barkley Bess, a neat, compact little bitch. Humberstone Rattler reserve winners is ao even young dog full of character and quality. Wandee Vangnard, a young dog that is a comer, was absent, ill in his kennel.

In smooths, there were 34 entries represented by 12 dogs. Norfolk Trueman keeps his form splendidly and was first in winners class easily. Waodee Marigold, winners bitches, romped through five classes in a stylish manner. She shows much Sabine Result quality and looks as if she would wear well. Endcliffe Pearl was second all through to Marigold and is a sweet, all round one. Mr. Hickman handled his classes with the aptitude and skill of a veteran.

Cockers were a good averaging class, most of them being familiar dogs to the fancy. In winners black we preferred Black Silk II over Major Domo. Redlight (formerly Brownie) was placed over Victory A. in solid colors other than black for the tri-color. Both dogs are well known and were down in nice shape. There were 30 Cocker entries and 19 benched.

Collies with 24 entries and 15 dogs were a fair class. Old Hall Sandy and Robert Bruce were the class of the dog eotries whilst Brandane Dollie and Tranwyn Tip Top led the matrons. The quartette are well known benchers. We regretted to see Montez Tyche, a sweet little bitch, too much out of coat to do better than a third.

In Pointers (7 entries, 4 dogs) Top Notch Mason's King was the best. He won two specials also. The special award for best American breed in the show was the subject of much criticism. A large majority believing that Cato Jr. should have been given the cup.

This dog, while he is a good showing dog, was brought out here from New York, last spring, by a local dog handler to fill a commission for Mr. W. R. Whittier. The dog was delivered on a showing that he was thoroughly broken to the gun and a good field dog. Both Mr. Mason and the local handler assured Mr. Whittier that such was the case. One or two trials proved that the dog was half broken and gun shy, in fact a "lobster" in the field for the price, $250. Mr. Whittier had him for two months and being thoroughly dissatisfied with the dog's failure to come up to the guarantee given he notified the handler "to make good." This was done shortly afterwards when Mr. H. M. Papst gave Mr. Whittier a sum of $250 for the Pointer. The win at San Mateo and Oakland of this dog is supposed to be a good send off for his easy disposal in the northern circuit. So apparent was the award as a cut and dried affair that one of the judges demurred against going into the ring, saying: "What's the use, its all arranged." The judges were Messrs. Hickman, Cranfield and Chute. Mr. Hickman did not judge willingly.

In Bull Terriers Edgecote Peer, looking as well as ever and Ch. Banjo were one two in winners. Silkwood Royal alone in puppies will do well in more company. Bess, a litter sister of E Peer, first winner, is full of quality and a very even bitch. There were 18 entries with 10 dogs in.

English Setters were a very good lot, Ch. Cato Jr. was easily the pick of the dog class as was Ch Laura L. in bitches. Palo Alto, an excellent young dog, has improved very much since the spring show. Setters had 19 entries with 14 benched

Boston Terriers had 21 entries and 9 dogs benched. Boston Jack was first winners with Oakside's My Lady's Boy reserve. The latter is a very nice type. Glenwood Enchantress and Glenwood Fiancee were the quality of a fair class in bitches.

In Dachshunde (14 entries, 9 dogs) Dougie E. and Queen Victoria outranked the balance. A good word might be said for Glenwood Fraulein, however.

St. Bernards (6 dogs in and 12 entries), American Foxhounds (9 entries, 7 dogs), English Foxhounds (10 entries, 8 dogs) were a fair class of entries. Ch. Lester C seems to be going back just a bit.

Gordons (4 entries, 3 dogs), Irish Setters (3 entries, 3 dogs), one Irish Water Spaniel, Field Spaniels (4 entries, 3 dogs) were hardly worthy of extended notice, save the Irish Setter Toronto Pat, which was a more than averaging good one.

Great Danes (13 entries, 7 dogs) were well represented by Rupert of Hentzau, Cunningham's Ruy Blas and Princess Harlequin, a bitch that has improved to a degree.

Greyhounds were a very classy lot (8 entries, 7 dogs), all old familiars save McVey, first winners and special, a typical specimen.

Three Airedales (3 entries) were a bit better than usually seen here. Irish Terriers (5 entries, 3 dogs) were also good.

Bulldogs were represented by 4 dogs in 11 entries. Ivel Damon and Harry Lacy were the only ones worthy of notice and they are too well known to mention further.

The balance of the breeds, on the whole, were a fair showing as follows: Yorkshires (5 entries, 3 dogs), English Toys (4 entries, 3 dogs), Japs (7 entries, 1 dog, absentees cut down the number), Pugs (3 entries, 3 dogs), Poms (6 entries, 6 dogs), Maltese Terriers (1 entry, 1 dog), Italian Greyhounds (2 entries, 2 dogs), Toy Poodles (1 entry), Mastiffs (1 entry), Newfoundlands (1 entry), Old English Sheepdogs (1 entry), Dalmatians (1 entry), French Bulldogs (1 entry). A total of 234 entries and 184 dogs as compiled from the catalogue.

This show will be notable in one respect, and that is it was the making of ten oew champions, viz.: Ch. Harlequin, Ch. Rupert of Hentzau, Great Danes; Ch. Miss Frivolity, Ch. Redlight, Cockers; Ch. Brandane Dollie, Collie; Ch. Edgecote Peer, Bull Terrier; Ch. Ivel Damon, Bulldog; Ch. Boston Jack, Ch Glenwood Enchantress, Bostons; and Ch. Dougie E, Dachshunde.

AWARDS.

ST. BERNARDS (Rough Coats)—Novice dogs—1 Sidney J Ackerman's Glenwood Booze, 2 E Buchman's Prince. Limit dogs—1 Glenwood Booze. Open dogs—1 Mrs Chas Newman's Ch Lester C, 2 Glenwood Booze. Winners, dogs—1 Ch Lester C, res Glenwood Booze. Novice bitches—1 H Bowie's Linda de Chamounix. Limit bitches—1 Mrs F F Lueck's Cascade, 2 Linda de Chamounix. Open bitches—1 Cascade, 2 Linda de Chamounix, 3 Wm Carroll's Lady Nell. Winners, hitches—1 Cascade, res Linda de Chamounix.

ST. BERNARDS (Smooth Coats)—Open dogs and bitches—E D Connolley's General B, absent.

MASTIFFS—Open dogs and bitches—1 Margaret Nicol's Don.

NEWFOUNDLANDS—Open dogs and bitches—1 S R Calvin's Frank.

GREAT DANES—Open dogs—1 Mrs L S Adams' Rupert of Hentzau, 2 I L Cunningham's Ruy Blas, absent H R Brown's Beau Brummel II. Winners, dogs—1 Rupert of Hentzau, res Ruy Blas. Novice bitches—1 E M Muller's Queen Lil, 2 Nick Shaaf's Carla II Limit bitches—1 Mrs C G Saxe's Princess Harlequin, 2 J L Cunningham's Carlotta, 3 Queen Lil, v hc S Baroett's Jane, h c Carla II. Open hitches—1 Cunningham's Carlotta, 2 Queen Lil, absent H R Brown's Prima Donna. Winners, bitchcs—1 Princess Harlequin, res Cunningbam's Carlotta.

GREYHOUNDS—Novice dogs—1 J H Rosseter's Sheridan. Novice bitches—1 J H Rosseter's Rose of Alameda. Limit dogs and hitches—1 J H Rosseter's Roman Athlete, 2 J H Rosseter's Fiery Face, absent J Sweeney's Richard Anton. Opeo dogs and bitches—1 J Sweeney's McVey, 2 J H Rosseter's Rocker, 3 J H Rosseter's May Hempstead. Wioners, dogs and bitches—1 McVey, res Roman Athlete.

AMERICAN FOXHOUND—Novice dogs—1 Mrs J J Killallee's Don Carlos, absent F P Howard's Fatty. Novice bitches—1 W B Lawrence's Fly, 2 T Gale Perkins' Queen, absent F P Howard's Juno II. Limit dogs and bitches—1 Queen, absent F P Howard's Fiddle. Open dogs and bitches—1 Queen, absent F P Howard's Hera. Winners, dogs and bitchss—1 Don Carlos.

ENGLISH FOXHOUNDS—Puppies, dog and bitches—1 San Mateo Hunt Club's Romulus, 2 San Mateo Hunt Club's Cheerful. Novice dogs—1 San Mateo Hunt Club's Racer, 2 San Mateo Hunt Club's Vagabond. Novice bitches—1 San Mateo Hunt Club's Buttermilk, absent San Mateo Hunt Club's Volatile. Limit dogs and bitches—1 San Mateo Hunt Club's Rockwood, absent San Mateo Hunt Club's Philapeus. Open dogs and bitches—1 San Mateo Hunt Club's Balron, absent San Mateo Hunt Club's Graceful. Winners, dogs and bitches—1 Balron, res Graceful.

POINTERS—Novice dogs—1 Mrs C F McCarthy's True. Limit dogs—1 H M Papst's Top Notch Mason's King, 2 S Hamilton's Lady Ruffle's Rip, 3 Ray Colvin's Jack. Open dogs (under 55 pounds)—1 Layy Ruffle's Rip, 2 Jack. Open dogs (55 pounds and over)—1 Top Notch Mason's King. Winners, dogs and bitches—1 Top Notch Mason's King, res Lady Ruffle's Rip.

ENGLISH SETTERS—Novice dogs—1 Mrs Ida L Moulton's Palo Alto, 2 R J Raetz's Harvey, 3 Brown and Gilbert's Duke Gladstone, res J M Robinson's Baldy. Limit dogs—1 Palo Alto, 2 C D Carman's Wad, 3 C Steinback's Dan Patch, absent P Wilkerson's Warte Nichte. Open dogs—1 J M Golobeck's Ch Cato Jr, 2 Wad, absent J Broder's Starr. Winners, dogs—1 Ch Cato Jr, res Palo Alto. Limit bitches—1 A Stange's Nellie, 2 Tbos J Blight's Tnphill's Judith, absent Miss Burfiend's Flora B. Open bitches—1 C C Lee's Ch Laura L, 2 Tuphill's Judith, 3 W Styan's Queen, res J M Golobeck's Theodora Gladstone. Winners, bitcbes—1 Cb Laura L, res Nellie.

IRISH SETTERS—Puppy dogs and bitches—1 G O Peck's Plain Bess, 2 M L Linoberg's Red Lady. Novice dogs and bitches—1 C F McCarthy's Mike, 2 Plain Bess. Open dogs—1 F S Johnson's Toronto Pat. Open bitches—1 Dr H B de Marville's Biddy, 2 Plain Bess. Wioners, dogs and bitches—1 Toronto Pat, res Biddy.

GORDON SETTERS—Novice dogs and bitcbes—1 C F McCarthy's Topsy, absent C F Munnigan's Lady Landseer. Open dogs and bitcbes—1 F P Clark's Homestead Boy, 2 A Stuart's Doc. Winners, dogs and bitches—1 Homestead Boy, res Doc.

IRISH WATER SPANIELS—Open and winners dogs and bitches—1 Wm Bay's Mike.

FIELD SPANIELS—Limit dogs and bitchcs—1 L C Clark's Pompey, 2 Brown and Gilbert's Dolly. Open dogs and bitchos—1 Pompey, 2 J R Stuart's Judge Casey.

COCKER SPANIELS (any color)—Puppy dogs—1 N Macfee's King Dodo, absent Jos D Grant's Mepals Omal. Limit dogs (black)—1 Mrs C Herman's Major Domo, 2 King Dodo, 3 Mrs Phil C Meyer's Glenwood Havoc. Open dogs (black) 1 Major Domo, 2 J Hervey Jones' Black Silk II, 3 King Dodo vhc Glenwood Havoc. Winners, dogs (black)—J Major Domo res Black Silk II. Novice dogs (other than black)—1 Mrs. Phil C Meyer's Glenwood Lucky, 2 Miss A Farno's Smudge, 3 O H Hicker's Rollick. Limit dogs (any solid color except black)—1 A Wolfen's Redlight. Limit dogs (Parti-colors)—1 Miss A Farno's Teddy Roosevelt, 2 Glenwood Lucky, absent Delverton Kennels' Delverton Domino. Ooen dogs (other than black)—1 Miss A Farno's Victory A, 2 Glenwood Lucky. Winners, dogs (other than black)—1 Redlight res Victory A. Puppy bitches (any color)—1 Miss H. Foorman's Glenwood Judy, Miss A Farno's Bonnie Bess Novice bitches (black)—1 E Feld's Beauty. Limit bitches (black)—1 Browo and Gilbert's Wiggles, absent Mrs. P C Meyer's Glenwood Maizie Open bitches (black)—1 J Hervey Jones' Miss Frivolity, 2 D P Cresswell's Bonnio Black Bess, absent Glenwood Maizie. Winners, bitches (any solid color other than black)—1 A Wolfen's Plumeria Cleo, 2 J Hervey Jones' Little Maid. Limit bitches (Parti-colors)—Absent Delverton Kennels' Delverton Dolores. Winners, bitches (otber than black)—1 Plumeria Cleo res Little Maid.

COLLIES—Puppy dogs—1 Helen Foorman's Teddy. Novice dogs—1 Mrs L W Seeley's Old Hall Sandy, 2 Dr O N Orlow's Borda Lad, 3 W P Burnham's Sunset Marvel, absent Chas S Rosener's No-Me. Limit dogs—1 Old Hall Sandy, 2 Mrs A H Coney's Robert Bruce, 3 R Mohr's Sunset King, absent H T S Green's Yorick. Open dogs—1 Old Hall Sandy, 2 Robert Bruce, 3 Hy Dernham's Sir Thomas, res Sunset King. Open dogs (American bred)—1 Old Hall Sandy, 2 Robert Bruce, 3 Sunset King. Winners, dogs—1 Old Hall Sandy, res Robert Bruce. Puppy bitches—1 Mrs L S Adams Jr's Heather Down. Novice bitches—1 W C Bogen's Tranwyn Tip Top, 2 M F Blanchard's St Clair Jane. Limit hitches—1 Tranwyn Tip Top, 2 S Burnett's Wag, 3 Mrs J P Norman's Montez Tyche. Open hitches—1 W P Burnham's Brandane Dollie. Open bitches (American hred)—1 Tranwyn Tip Top. Winners, hitches—1 Brandane Dollie, res Tranwyn Tip Top.

AIRDALE TERRIERS—Open dogs—1 Robt C Coleman's Buster Bill. Open bitches—1 Robt C Coleman's Lady Sarah Wilson, 2 E M Tiddd's Gussie.

OLD ENGLISH SHEEPDOGS—Open dogs and hitches—1 Francis Carolan's Boh.

DALMATIANS—Open dogs and bitches—Absent P C Meyer's Glenwood Adonis.

BULLDOGS—Novice dogs—1 M Weiner's Carbine. Limit dogs—1 Mrs C H Harley's Ivel Damon, 2 L S Greeneharm's Harry Lacy, absent Carbine. Open dogs—1 Ivel Damon. Winners, dogs—1 Ivel Damon, 2 Harry Lacy. Novice bitches—Absent H M Papst's True Blue. Limit, open and winners, bitches—1 M Wiener's Canfield Rush, absent True Blue.

BULL TERRIERS—Puppy dogs—1 Miss L. Cadwallader's Silkwood Royal. Novice dogs—1 Mrs. C. F. Jackson's Woodcote Imp. Limit dogs—1 Ed Attridge's Edgecote Peer, 2 Woodcote Imp. Open dogs (Over 30 pounds)—1 Edgecote Peer. Open dogs (Not over 35 pounds)—1 A. McBean's Ch. Banjo. Winners, dogs—1 Edgecote Peer, res Ch. Banjo. Puppy bitcbes—1 Mrs. F. W. Kelly's Bess absent J. C. Bone's Hawthorne Magnet, Phil J. Fay's Woodcote Empress. Limit hitches—1 Ed Attridge's Edgecote Belle, absent Ed Attridge's Edgecote Queen. Open hitches (Not exceeding 30 pounds)—Absent J. C. Bone's Hawthorne Snowflake. Open bitches (Over 30 pounds)—1 Edgecote Belle, 2 Phil J. Fay's Woodcote Queen, absent Edgewood Queen. Winners, hitches—1 Bess, res Edgecote Belle.

BOSTON TERRIERS—Novice dogs—1 Mrs. G. L. King's Oaksides My Lady's Boy, 2 Mrs G L. King's Oaksides His Royal Highness Limit dogs—1 Oaksides My Lady's Boy, 2 W. H. Deming's Snowdrop II, 3 Oaksides His Royal Highness. Open dogs—1 R. Jose's Boston Jack, 2 Oaksides My Lady's Boy, 3 Snowdrop II, res Oaksides His Royal Highness. Winners, dogs—1 Boston Jack, res Oaksides My Lady's Boy. Puppy bitcbes—1 Miss V C. Lewis' Lady Bettie. Novice bitches—1 Mrs P. C Meyer's Glenwood Fiancee, 2 Lady Bettie, absent Mrs. P. C. Meyer's Glenwood Estelle. Limit hitches—1 Mrs. P. C. Meyer's Glenwood Enchantress, 2 Glenwood Fiancee, 3 Miss V. C. Lewis' Lady Babbie, absent Gleowood Estelle. Open bitches—1 Glenwood Enchantress, 2 Glenwood Fiancee, 3 Lady Babbie, absent Glenwood Estelle. Open bitches—1 Glenwood Enchantress, 2 Glenwood Fiancee, 3 Lady Babbie, absent Glenwood Estelle Winners, bitches—1 Glenwood Enchantress, res Glenwood Fiancee.

DACHSHUNDE—Novice dogs—1 Col W S Martin's Snook, 2 J Keating's Eltel Fritz. Limit dogs—1 Phil M Wand's Dougie E, 2 Snook. Open dogs—1 Dougie E, 2 Col W S Martin's Rex M. Winners, dogs—1 Dougie E, res Rex M. Novice bitches—1 J Bergman's Queen Victoria, 2 Mrs M S Wilson's Wiley, absent Mrs M S Wilson's Whalley. Limit bitcbes—1 Queen Victoria, 2 P C Meyer's Glenwood Fraulein. Open bitches—1 Queen Victoria, 2 Glenwood Fraulein, 3 S Barnett's Mejula. Winners, bitches—1 Queen Victoria res Glenwood Fraulein.

IRISH TERRIERS—Novice dogs and bitches—1 J J Douglas' Mr Dooley, absent H M Papst's Rose of Killarney. Open dogs and bitches—1 J J Douglas' His Lordship, 2 W S Martin's Endcliffe Peddlar, absent Rose of Killarney. Winners, dogs and bitches—1 His Lordship.

FOX TERRIERS (Smooth coats)—Puppy dogs—1 Francis Carolan's Crossways Bunch. Novice dogs—1 W W Stettheimer's Tallac Chuck, 2 M Newhall's Almaz, absent J H Fleming's Veracious. Open dogs—1 H M Papst's Sabine Brightlight Veteran dogs and bitches—1 Wandee Kennels' Norfolk Trueman. Winners, dogs—1 Norfolk Trueman, res Sabine Brightlight. Puppy bitches—1 Wandee Kennels' Wandee Marigold, 2 J Raoul Duval's Flirt Novice hitches—1 Waodce Marigold, 2 P C Meyer's Endcliffe Pearl, 3 Irving C Ackerman's Warren Corinne. Limit bitches—1 Wandee Marigold, 2 Endcliffe Pearl, 3 Wandee Kennels' Wandee Seabrceze. Open bitches—1 Wandee Marigold, 2 Endcliffe Pearl, 3 Warren Corinne. Open bitches (American hred)—1 Wandee Marigold, 2 End-

cliffe Pearl, 3 Warren Corinne. Winners bitches—1 Wandee Marigold, res Endcliffe Pearl.

FOX TERRIERS (Wire haired)—Puppy dogs—1 Mrs Ida L Moulton's Humberstone Zeno, 2 Mrs Ida L Moulton's Humberstone Banjo, 3 Miss Cora Saroni's Humberstone Brittle. Novice dogs—1 Irving C Ackerman's Humberstone Rattler, 2 I J Buunds' Humberstone Bristles II, 3 Humberstone Brittle, res W E Williams' Bobs. Limit dogs—1 Wandee Kennels' Wandee Mearns, 2 Humberstone Rattler, 3 Humberstone Bristles II, res Humberstone Brittle Open dogs—Wandee Mearns, 2 Humberstone Rattler, 3 Humberstone Bristles II, res Humberstone Brittle. Veteran dogs and bitches—1 Irving C Ackerman's Ch Humberstone Bristles, absent I C Ackerman's Maggie the Maid. Winners, dogs—1 Wandee Mearns, res Humberstone Rattler. Puppy bitches—absent W W Stettheimer's Tallac Assessment, Wandee Kennels' Wandee Flirt Novice bitches—1 Wandee Kennels' Wandee Rambler, 2 I C Ackerman's Humberstone Barkby Bess. Limit bitches—1 Wandee Ramble, 2 P C Meyer's Humberstone Actress, 3 Humberstone Barkby Bees. Open bitches—1 Wandee Kennels' Ch Wandee Lucretia, 2 Humberstone Actress, 3 Humberstone Barkby Bess. Open bitches (American bred)—1 Humberstone Actress, 2 Humberstone Barkby Bess. Winners, bitches—1 Wandee Mearns, res Wandee Ramble.

YORKSHIRE TERRIERS—Novice dogs and bitches—1 W P Feeney's Royal Gem, 2 Mrs Francis Carolan's Crossways Rosette, absent Mrs A A Roi's Daisy. Open dogs and bitches—1 Royal Gem, 2 Mrs Francis Carolan's Merry Module.

ENGLISH TOY SPANIELS—Novice dogs and bitches—1 Miss Irene Mack's Rufus. Open dogs and bitches—1 Rufus, 2 Mrs A A Roi's Pansy, 3 I C Ackerman's Humberstone Trilby.

JAPANESE SPANIELS—Novice dogs and bitches—1 R. Robinson's Jyp, absent Mae R. Perkins' Fuji Yama.

PUGS—Open dogs and bitches—1 S E Moore's Nigger, 2 S Barnett's Pug, 3 T H Siddall's Play Boy

POMERANIANS—Open dogs and bitches—1 Miss G Bernstein's Beauty, 2 J R Rand's Dewey.

MALTESE TERRIERS—Open dogs and bitches—1 Mrs A A Roi's Margie B.

ITALIAN GREYHOUNDS—Open dogs and bitches—1 S A Cummings' Duke II, 2 S A Cummings' Dude.

TOYS (POMERANIANS)—Open dogs and bitches—1 W. H. Crocker's Lonnie, 2 W. H. Crocker's Lizzie

SPECIAL AWARDS.

Wandee Kennels' Wandee Coastguard, cup for best in the show.

Jas. Sweeney's Greyhound McVey, cup for best owned in San Mateo county. Mrs. P. C. Meyer's Boston Terrier Glenwood Enchantress reserve.

H M Papst's Pointer Top Notch Mason's King, cup for best American bred in show.

Mrs Chas Newman's Ch Lester C, cup for best St Bernard.

Mrs C G Saxe's Princess Harlequin, cup for best Great Dane

E I Attridge's Edgecote Peer, cup for best Bull Terrier.

W P Burnbam's Brandane Dollie, cup for best Collie.

Mrs Al Cooey's Robert Bruce special for best of opposite color.

A Wolfen's Cocker Spaniel Redlight, cup for best spaniel.

H M Papst's Top Notch Mason' King, cup for best Pointer

J M Golobeck's Cato Jr, cup for best English Setter.

Mrs P C Meyer's Glenwood Enchantress, cup for best Boston Terrier.

Wandee Kennels' Wandee Coastguard, cup for best Fox Terrier.

Mixed Special, S. A. Cumming's Italian Greybound Duke II.

Field Trial Notes.

There were thirty starters in tbe Nebraska Field Trial Derby. Tbe judges were: E. D. Magoon, Muskegon, Mich., and H. McCarthy, O'Neill, Neb. Birds were fairly plentiful in certain sections of tbe grounds, while in some tbey were scarce—so much so that many dogs had no opportunity on game.

Lakefield Countess, the Derby winner, has much quallty and is a racy built one. She handled game in a masterly manner and showed elegant style. For a young dog she works ground excellently. Sbe was handled by J. Gude and is owned by H. Cleveland (Lakefield Kennels) she is a black, wbite and tan by Lady's Count Gladstone-Ora.

Burbank, second, is a bandsome black and wbite Pointer of quality. He won by good work on birds and hunting to the gun. He is by Dr. Daniels-Mistress Senator's Nell (Nellie Bang) and is owned by J. W. Flynn of San Francisco. He was handled by W. R. Coutts. He is regarded as not only a bench winning dog but is the making of a great quail dog.

Hard Cash, third, is a bandsome Pointer resembling Burbank very much in manner of going, he took in more country in his casts and reacbed out furtber, however. He has a good nose and is stylisb, but was somewhat off in bis last heat. Er Shelley, his owner, handled him. He is a wbite and liver by Young Jingo-Brown's Bella Pointer.

Lakefield Belle, fourth, has good range, speed and style, but a bit faulty on bird work. She is owned by Lakefield Kennels and was handled by J. A. Gude. She is a litter sister to Lakefield Countess.

Green River Kate (Lad of Rush-Gorham's Dorothy) and Odessa (Lorillard's Jack-Dolly Manners) divided fifth. Kate is owned by Garnett S. Zorn and was handled by Ed Garr. She showed every indication of steadiness but was unlucky in finding birds. She is a racy, slim built little bitch of good quality. Odessa won on class work only as she chased the only birds found in the heat. Geo. Gray owns her and handled her.

Of the California dogs in the Derby the *American Field* says: Robert Bruce (J. W. Flynn's Pointer by Bang Up-Miss Rip) is a wise one for his age and is one of the best looking Pointers we have seen in trials in recent years. He has a capital head, evenly marked with liver; bone and feet are excellent and was an attractive mover when be broke away from trailling his trial mate.

Ladylike (Jos. E. Terry's English Setter bitch, white and orange, by Orion-Terry's Lady) whose name does not belie her, is a very smooth running Setter, thoroughly honest and a good worker all round. She runs much like her illustrious mother Terry's Lady. She is a trifle snipy and her color is a faded lemon. We look to see her perform well on quails.

Rival (also owned by Jos. E. Terry) an orange and white dog by Orion-Terry's Lady, is only a fair sort. He stands up well, moves freely, but appears to possess a faint heart. He pointed a single and was steady to shot.

In the All-Age, Baby Ale (Jingo's Coin-Fanny Ale) was the winner in a class of thirty-six. She is a handsome, racy built Pointer, in action bas a superior style. She is owned by Geo. Cooper, and was handled by W. D Gilchrist.

Victor Okaw (Lady's Count Gladstone-Ortiz Vic's Vic, owned by Dr. N. B. Pautler) second, is a swift and merry goer, a bit lacking in running and point work, but is promising as a dangerous dog in future trial competition. He found more birds, however, than any dog in the stake. He was handled by W. J. Wilson.

Alpine Lad (Lad of Jingo-Fannie Flash, owned by Chas. W. Proctor) third, a well known winner at previous trials is claimed to be one of the remarkable Pointers of recent years. He was handled by Ed Garr.

Natalie, a white and liver Pointer bitch (Young Jingo-Rip Rap's Nettie, owned by J. Hayward, Jr.) is a handsomely built one, and while not being in the front rank in range or speed, is a most useful dog in the field. She has splendid style and great bird sense. She was handled by J. H. McPharlin.

Pioneer (Count Whitestone-Bonnie Doon, owned by A. M. Masten, E Shelley handler) was regarded as the classiest dog in the stake, but did not do the bird work that would have put him up a peg or two.

In mentioning the California dogs in the All-Age, our contemporary states:

Kilgariff is a dog that might do for a shooting dog, but he certainly exhibited few field trial qualities. To begin with he is not built on speed lines and he does not seem to care about hunting "poultry" as Mr. Coutts puts it. He is big and lumbering and gallops like a Clydesdale stallion. In colder weather he may exhibit qualities not brought out here.

Terry's Lady ran much like Count Whitestone, and at a distance reminds one of that dog. She had no opportunity on birds and might have been given a second try, but the judges thought differently. Her work here is no criterion to go by, as she was suffering from a swelling over her left eye, which had kept her in the kennel for almost three weeks. She has proven her sterling qualities upon more than one occasion, and it need cause no surprise if she should prove a winner in some of the quail trials.

The winners of the Subscription Stake were: Victor Okaw, first; Alpine Lad second and Von's Jack, a white and liver Pointer, third (Jingo's Boy-Cook's Bessie, owned by Oswald Von Lengerke, handled by Ed Garr). McKinley went out in the second series.

PACIFIC NORTHWEST TRIALS.

La Conner, Wash., where a tract embracing some 4000 acres covered with stubble fields has been secured, is to be the scene of the Pacific Northwest trials this year. Previously the club's trials came off at Whidby island, where there is plenty of quail, but there is only a limited area in that section on which handlers could work their dogs. This necessitated the use of the trial grounds to a great extent for training. Under the circumstances another trial grounds was decided upon for this year. The new grounds are reported to contain birds in sufficient numbers for the club's purposes, much greater in extent than at Whidby island and easily reached from La Conner.

It is a fine stroke of diplomacy for a show official to place a blue ribbon on a dog—that did not show in his class in the ring—when he is sent home. It lets down the exhibitor easy if he is a novice and primes him up for another show. It don't count temporarily, what the consequences may be when the deluded exhibitor gets wise is another thing. He may be utilized for the time being that is all that is necessary.

A good litter of Bull Terrier puppies is the one by Scrapper out of Dainty recently whelped. There were 10 puppies (5 dogs). Scrapper is by Ch. Woodcote Wonder out of Nancy. Dainty is by Rowdy out of Peggy, and is owned by Mrs. L. Shearer of this city.

AT THE TRAPS.

The Golden Gate Gun Club will wind up the club blue rock season for '04 at Ingleside tomorrow.

This shoot will decide the ownership of six club medals—two in the champion class, and two each in the first and second classes.

The disposition of a purse of $150 will also be known after the closing race in this event. There will be five purses of $30 each for the the wioning guns—only shooters that have shot every month in this event are eligible for the money.

The re-entry shoot, under sealed conditions, will also be decided tomorrow.

The Anderson Gun Club will hold a blue rock tournament at Anderson, Cal., tomorrow. The program includes 20 target events and also an open to all merchandise shoot.

The Union Gun Club final blue rock shoot for this season took place at Ingleside on the 11th inst. The main feature of the day was the contest for the club first class medal and the second class medal. The winners of the first class medal at previous shoots were: M. J. Iverson, C. C. Nauman, E. Gamble, A. M. Shields and D. Daniels. The tie shoot-off for August between A. M. Shields and M. J. Iverson was won by Shields who shot at 28 targets and scored 22. Iverson shot at 27 targets and broke 17. The race between the six winners was won by Nauman who broke 24 out of 25 targets The other scores were: Iverson 22, Gamble 21, Shields 19; Daniels withdrew after breaking 17. For the second class medal the previous monthly winners were: H. P. Jacobsen, F. Walpert, "Slade," A. M. Shields. H. P. Jacobsen won the medal for September with a score of 23 out of 28—the two wins gave him the medal permanently. The final medal shoots were at 18 yards.

The winning guns in the club shoot were: First money, E. Holling, E. J. Forster and D. Daniels. Second money W R. Murdock, J. Burfiend, E. Klevesahl, F. Knick and M. J. Iverson. Third money, E. E Gamble, Dr. Hutton, "Slade," A M. Shields, Dr. Clyde Payne and C. C. Nauman, Fourth money, C. Frankel and Jos. Pisani. Fifth money, L. Cuneo. Sixth money, H. H. Klevhsahl.

Singles and doubles—Purse divided between Nauman, S Holdsclaw, E. Gamble, D. Daniels, C. A. Haigbt, F. J. Stone, H. P. Jacobsen, and E. Holling.

In the handicap, open to all event, 20 to 25 targets, the high guns were Gamble, Murdock and Cuneo.

A summary of scores of the events for the day are as follows:

	Club Shoot 25 targets	Medal Shoot 23 to 31 targets		Added Money Race 20 to 25 targets		Open to All 5 pairs, 10 singles	Reverse Angles 20 targets

GOSSIP FOR SPORTSMEN.

DEER WANTONLY KILLED.

The forest fires in the Big Basin and Boulder Creek country have driven the wild game, such of the fleeing creatures as survived the flames, from the safety of the hills into districts where they are unable to find the refuge that they would otherwise.

This situation bas been taken advantage of by pot hunters and some others, who pose as sportsmen, who bave been after the stricken deer and other wild game. Quite a number of deer have been killed since the forest fires started, the bewildered animals had as much chance for their lives as do the cattle in a shambles. Such practices are reprehensible to a degree and known individuals indulging in sport (?) of this character should be ostracised by sportsmen. Game Warden Reed of Santa Cruz county has used his utmost efforts to restain a number of game looters and has, we are pleased to note, met with some little encouragement.

Santa Cruz county streams were stocked last week with 100,000 trout fry from the Government batchery on the McCloud. There are thirty-two good trout streams in the county and this distribution of young trout will be much appreciated by anglers.

MIDNIGHT MARAUDERS.

Word comes from Santa Clara county that a rancher who conducts an orchard in the mountains near San Felipe was puzzled recently by the queer appearance of some of his trees. On investigation, he found that a patch of young prune trees were being, apparently, stripped of leaves and young shoots night after night. He directed one of his ranch hands to remain in watch one night in the endeavor to discover the cause of the depredation. The watchman accordingly selected a convenient hiding place, and armed with a heavily loaded shotgun awaited developments on the night of the 9th inst. Soon after nightfall the sentry was surprised to see a large band of deer, bucks, does and younger ones, enter the prune orchard. The deer immediately began feeding on the young and tender leaves of the prune trees. The watchman opened fire at once when he saw what the

deer were after and succeeded in bringing down two big bucks before the bunch of marauding deer got away. Needless to say, that particular raocher has taken the precaution to prevent further raids on his trees and that he will encourage the visits of sportsmen in his vicinity until close season.

All Round Guns.

Where weight is of no object there is no gun whatever that equals the nll-around 12 gauge, and for all purposes, day in and day out, for use at from duck to snipe, and trap shooting, no gun of smaller calliber can ever hope to equal it, while to excel it, one must perforce go to a 10 gauge and so on up the scale, but a saving of weight on gun and ammunition may make of a day's shooting work or pleasure and then is when the small bores shine.

Send for the "Art Catalog" of the Ithaca Gun Company, Ithaca, New York. It contains information that will he appreciated by any devotee of the gun.

A High Class Low Priced Gun.

It would be well for sportsmen to bear in minn now that the fall shooting season is close at hand that the Increased popularity of the new armor steel 825 L. C. Smith gun testifies to its merits. This gun is sold through dealers only and a catalogue may he obtained by addressing the Hunter Arms Co., Fulton, N. Y.

Smokeless Averages Reported.

Batavia, Ill., August 28th, Mr. J. S. Boa, first general average, 148 out of 155, shooting "E. C." Second general average, Mr. J. Hannagan, also first amateur average, 140 out of 155, shooting "Schultze." Third general average, Mr. S. T. Kinney, and second amateur average with 138 out of 155, shooting "Du Pont."

Waterbury, Conn., Mr. L. H. Schortemeier of New York City, first general average, shooting "E. C." No. 1.

Grnnd Rapids, Mich., August 24th to 26th, W. R. Croshy, first general average, 580 out of 600, shooting "E. C." Second general average, Mr. R. O. Heikes, 556 out of 600, shooting "Infallible." Third general average, Mr. C. A. Young, 550 out of 600, shooting "Du Pont." Second amateur average, Mr. B. Call of Montpelier, Ohio, 539 out of 600, shooting "Du Pont." Third general average, Mr. H. Scane of Ridgetown, Ont., 523 out of 600, shooting "Du Pont."

Raleigh, N C., August 23d and 24th, Mr. J. M. Hawkins, first general average, 370 out of 400, shooting "Du Pont." Second general average, Mr. G. L. Lyon, Durham, N. C. and first amateur average, 365 out of 400, shooting "Schultze." Third general average, Mr. G. N. Collins, Due West, S. C, and second amateur average, 363 out of 400, shooting "Du Pont." Third amateur average, Mr. W. T. McCormick, 361 out of 400, shooting "Infallible."

Binghamton, N. Y., August 23d and 24th, Mr. Wm. Heer, first general average, 382 out of 400, shooting "E. C." Second general average, Mr. C. O. LeCompte, 371 out of 400, shooting "Infallible." Second amateur average, Mr. A. A. Brown, 367 out of 400, shooting "Infallible." Third amateur average, Mr. H. G. Pompelly, 364 out of 400, shooting "Du Pont."

Renovo, Pa., August 23rd and 24th, Mr. J. A. R. Elliott, first general average, 332 out of 360, shooting "Schultze." Second general average, Mr. E. D. Fulford, 316 out of 360, shooting "Schultze." Third general average and first amateur average, Mr. Clyde Dechant of Renovo, Pa , 312 out of 360, shootiog "Infallible."

Chattanooga, Tenn., August 23d and 24th, Mr. J. S. Fanning, first general average, 388 out of 400, shooting "Infallible." Second general average, Mr. C. G. Spencer, 385 out of 400, shooting "Du Pont." First amateur average, Mr. Lee Moody, Bossemer, Ala., and tied with Mr. F. C. Riehl for third general average, 380 out of 400, shooting "Infallible." Second amateur average, Mr. Ed Brady, Memphis, Tenn., 379 out of 400, shooting "Du Pont." Third amateur average, Capt. Andy Meaders of Nashville, Tenn., Messrs. R. C. Sauls of Chattanooga, Tenn., and Gentry Williams of Birmingham, Ala., tied with 376 out of 400, shooting "Infallible."

Tarentum, Pa., August 25th and 26th Mr. E. D. Fulford, first general average, 309 out of 340, shooting "Schultze." Second general average, Mr. J. R. Hull, 304 out of 340, shooting "Schultze." Third general average and first amateur average, Mr. J. A Curry, Tarentum, Pa., 279 out ol 340, shooting "Du Pont." Second amateur average, Mr J. A. Stoops of Fenelton, Pa., 272 out of 340, shooting "Du Pont." Third amateur average, Mr J. Griener of Tarentum, Pa., 263 out of 340, shootlog "Du Pont."

A Recent Publication.

A valuable hook of comprehensive up-to-date information and one which should he in the library of every devotee of the rifle is "The Rifleman's Handhook for Military Riflemen" by J. G. Ewing, Assistant Inspector General of small arms practice, Delaware National Gunrd, a fully illustrated book of sixty-three pages, published by the Laflin & Rand Powder Company.

The rudiments of rifle practice with the Krag rifle are explained in a very extensive manner, chapters being devoted to the mechanism of the arm, aiming drill, indoor gallery work, outdoor shooting conditions affecting the flight of the bullet, the Hudson table of wind allowances, general observations, etc.

There are many members of the National Guard who are taking up shooting with the national arm, with a sincere desire to improve, and the information in The Rifleman's Handbook is presented in a practical form, which should aid greatly in prompting the general efficiency of our guardsmen in the important department of the intelligent and effective use of the [illegible] copy of this work in the hands of every militiaman in the United States would assuredly lighten the labors of our instructors of rifle practice.

Major J. F. Guilfoyle, inspector of small arms practice, United States Army, testifies as follows to its value: "This little book has my heartiest approval and good wishes. It will be an excellent supplement to the firing regulations and will tend to stimulate interest in that important accomplishment 'how to shoot.'"

Fred Gilbert in New England.

Fred Gilbert has been making a little trip through New England shooting at various places, and with the "Old Reliable" Parker gun has made some very creditable scores. The following are a list of his recent victories. Mr. Gilbert started for the west after shooting at Springfield on Labor Day. During these shoots Mr. Gilbert made a total run of 235 straight without a miss.

August 22, Pittsfield, Mass., shot at 150, broke 148; August 23, Fitchburg, Mass., shot at 100, broke 96; August 24, Henneker, N. H., shot at 110, broke 106; August 25, Auburn, Me., shot at 150, broke 146; August 27, Portland, Me., shot at 200, broke 188; August 29, Lawrence, Mass , shot at 200, broke 194; August 30, New Framingham, Mass., shot at 135, broke 135; August 31, Newport, R. I., shot at 150, broke 147; September 1, Danbury, Ct., shot at 125, broke 122; September 3, Norwich, Ct., shot at 200, broke 198; September 6, Springfield, Mass ,shot at 200, broke 183.

Excellent Targets.

At the annual prize shoot of the Golden Gate Rifle and Pistol Club, at Shell Mound Park, the first, second and third prizes were won by Mr. F. V. Kington, George E. Frahm and A Henke, with the respective scores of (possible) 100, 97 and 96 at fifty yards. The three prize winners used the Union Metallic Cartridge Company's ammunition, Messrs. Kington and Frahm using their 38 S. & W. special and Mr. Henke using a 22 long rifle.

Citrus Belt Notes.

One of the most successful shoots ever pulled off in Southern California, was given at Riverside, Cal., on Friday the 9th instant, by the Riverside Gun Club, too much praise cannot be given the committee having the shoot in hand, nothing was left undone hy these gentlemen to make the event one to he remembered. This was greatly appreciated by all the contestants as well as the visitors of the day The grounds are splendidly located and with excellent weather in addition to the faultless arrangements for the day's pleasure, a happier lot of shooters never congregated to test their skill and markmanship with the gun.

There were twenty-two contestants, twenty of whom used the Union Metallic Cartridge Company's "Magic," "Monarch" and "Majestic" shells. The longest straight run of the day was made by Mr. Jas. L. Davis of Riverside, killing 45 birds, and using U. M. C. "Majestic" shells. Mr. Davis also won the high average, securing 93¾%. Mr. S. R. Smith of Los Angeles won second average with a percentage of 86 2-7, he also used U. M. C. "Magic" shells.

Hot Ones.

At the Union Gun Club shoot at Ingleside, September 11th, the highest scores shot in the regular club event were made with U. M. C. "Magic" shells by Edg. J. Forster, Dan Daniels and Emil Holling, who each scored 23 out of 25 at 16 yards. The best score in the medal race was shot by C. C. Nauman, 25 out of 27; at 16 yards, he used "Magic" shells. Mr. Nauman also won the first class medal, on the shoot-off at 18 yards, 24 out of 25 He also won the club high average prize for the season of seven shoots—"Magic" shell, of course.

H. P. Jacobsen won the second class medal—23 out of 28 at 16 yards and 19 out of 25 at 18 yards in the final shoot. He shot a Remington gun and 'Magic" shells. Of thirty-one shooters who participated in the shoot, all used U. M. C. paper shells but threo.

High Class Paper Shells.

Winchester "Leader" shells continue to lead in the winninga and high averages of the important tournaments throughout the United States, as will be noted below.

At the big Binghamton, New York shoot, Jack Fanning, the well known Californian, captured the first high average with Winchester "Leader" shells, on 97%. The second high average was taken hy C. G. Spencer on 96½% with Winchester "Leader" shells.

At the State Tournament, held at Raleigh, N. C., J. M. Hawkins, shooting a Winchester "pump" gun and the "Leader" shells, captured the first high average on the score of 370 out of the 400 shot at.

At the Kentucky State Shoot, held at Cerulean Springs, Ky., Harold Money, shooting a Winchester "pump" gun and the "Leader" shells, won the first high average with the score of 337 out of the 350 shot at.

At the Batavia, Ill., tournament, Mr. John S. Boa, shooting a Winchester "pump" gun and the "Leader" sholls walked away with the high average medal on the score of 148 out of the 155 shot at.

The first, second and third high averages at the Clarksville, Ia , tournament were captured by shooters that used the Winchester "Leader" shells. R. L. Silmer, first, 178 out of 200 shot at. Honry Stege aod Lee Graham tied for second avorage on the scores of 170 out of 200 shot at, and E. B Shilladay took third average with the score of 164 out of a like number shot at.

New York not in doubt. Tho latest shooting news from Now York gives addod force to the oft repeated saying, "As goes New York so goes the Union." The sweeping success of Winchester "Leader" aod "Repeater" shells at the New York State Shoot held at Buffalo, demonstrates again that there, as well as in all places where trap shootiog is done, that Winchester make of shells lead in popularity, efficiency and successful shooting. The high expert averages, first and second, for the three days shooting in the open events, were won by Fred Gilbert and J. A. R. Elliott with scores of 459 and 452 targets out of 480 shot at. The high amateur averages, first, second and third, for the three days shooting in the open events, were woo by E. C. Griffith, F. D. Kelsey and C. W. Hart with scores of 446, 444 and 443 out of the 480 targets shot at. The high amateur average for the State of New York Championship Medal, was won by C. W. Hart. The Canadian Challenge Trophy was captured by T. Upton, and the longest straight run was made by J. A. R. Elliott, 116 without a miss. Seven out of the eight merchandise prizes, as well as all of the above events were won by shooters who used the Winchester "Leader" and "Repeater" shells.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelnead in tidewater.

April 1-Nov. 1—Trout season open

Sept. 1-May 1—Open season for shrimp.

Jan. 16—United States Field Trial Club. Grand Junction, Tenn. W. B. Stafford, Secretary-Treasurer, Trenton, Tenn.

THE FARM.

Large Yield of Alfalfa.

Mr. J. W. Snowhall, one of the pioneer residents of Grafton, Yolo county, writes tbe Woodland *Mail* as follows:

"I see occasionally in the county papers accounts of large yields of produce from our rich Yolo county land, and bave concluded to tell a story myself of wonderful productiveness of our soil, and for fear some persons may he incredulous and tbink it a big yarn, I can only say to sucb come over and see for tbemselves and interview the man that gatbered and boused the crop.

"I have a small field of six acres that I planted to alfalfa in April, 1903, and this year I bave cut and barvested four crops of bay from it. The first was cut about tbe middle of May and yielded fourteen large two-horse-wagon loads of over a ton to the load; the second crop was cut ahout June 20th and yielded eleven tons, large tons at that; tbe tbird cutting was done July 30th and yielded nine tons, and I bave today finisbed bauling tbe fourth cutting and put in eight large two horse-wagon loads in the barn, making forty-two full tons of hay from six acres of measured land, or seven tons to tbe acre, and, from appearances, I sball bave another crop to cut before frost comes, from tbis land.

"I attribute the large and fine stand of alfalfa on this land to the fact tbat I bave never pastured tbe land. There is not a sign of foxtail or any other grass in tbe field, no bare spots, a perfect, uniform stand of alfalfa. It has never bad any irrigation except tbe rains from Heaven. It is situated on the Sacramento river where, when the river is bigb in the spring and winter it gets sub-irrigation, the water, say four montbs in the year, stands from one to two feet helow tbe surface and never over ten feet to water. Thus the alfalfa, being a deep-rooted plant, always ohtains a liberal supply of moisture from helow.

"I find that alfalfa in our dry summer climate will not bear tramping and pasturing with stock, especially during the spring season when tl.e ground is soft; this pasturing brlnging foxtail and otber foul growth, which in time will kill out tbe alfalfa and render it unprofitable."

Pure Breed or Cross Breed Sheep.

As I am a breeder of recorded Shropsbire sbeep, I would naturally be presumed to take tbe side of the pure bred.

The question means wbicb is the most profitahle from a purely wool and mutton basis It is not my purpose to take tbe side of either in tbis article. Eitber one will serve tbe good sbepberd well, and neitber one will do tbe poor sbepherd any good, altbough be migbt get along a little better witb the grade or cross bred.

I do not like tbe term cross bred, unless you mean by it just one cross of two pure breds. This will sometimes give fine results and sometimes it will not. It is according to tbe general make-up of the two breeds crossed. If you breed the offspring of tbis cross back to either one of tbe two breeds it would be termed grading up, and I think it proper to do tbis until you have a fixed type in your flock, wbether you commence witb a pure hred sire on common mixed blood ewes or not. What good qualities tbe pure hreeds possess are brought about by line breeding, selection and good feeding, and to tbe shepberd that will give tbem good feed and care tbey will pay as well or better than the bigb grade. The grade that comes from indiscriminate crossing of the different breeds should not be tolerated. Seven or eigbt crosses in one line makes practically as good a sbeep for wool and mutton as a pure bred. Perhaps tbey may retain a little more bardiness, or ratber the ability to endure a little more bardsbips.

The pure breds can be made bardier in time by gradually inuring tbem to more bardsbips, but wben you get tb ougb you will not bave so good a sheep. So it comes to tbis, that in a general way the best care pays best, no matter if it he pure bred or a grade. Wbat we are all after is the sheep tbat will bring the most for its mutton and wool, compared witb feed and time consumed; likeness in a clip of wool always brings top prices in its class; likeness in a carload of sheep or lambs does likewise. Therefore, keep full bloods or bigh grades. If I were asked of wbat breed, of course I would say Shropsbires.—*Corr. Rural World.*

Patrons of creameries are always complaining about tbe returns received from tbe milk they take to the weigh-scale It must be remembered tbat the Babcock test shows the butter fat in tbe milk delivered and not the amount of butter which can he made from it. One hundred pounds of butter contains much less than 100 pounds of fat. Tbe amonnt of the latter required for 100 pounds of butter varies of course with the water, salt and other ingredients which the maker incorporates in it. By proper manipulation it is possible to make 100 pounds of butter from 80 pounds of fat as shown by the test. It may under other circumstances require 90 ponnds of fat to make 100 pounds of butter. Tbe test cannot therefore show the amount of butter to be produced from 100 pounds of milk, but simnly sbows tbe amount of fat which it contains, leaving tbe question of the quaintity of butter to be determined by tbe maker.

Sober up on Jackson's Napa Soda.

INTERNATIONAL COMPOUND ABSORBENT

CURES CURBS WHILE YOUR HORSE RACES or WORKS.

Quickly Stops Pain and Soreness. Cures Curbs, Inflammation of the Tendons, Inflammation of the Coronary Cushion, Soreness of Tendons, Wind Galls, Capped Hocks, Enlarged Glands, Sprains, Bog Spavin, Bone Spavin, Splint, Shoulder Lameness, Etc. It is a remarkable Leg Strengthener. Price $2.00 per Large Bottle. If it ever fails we will Promptly Refund the $2.00. If we ever refuse we hereby agree to pay you $100 in cash. Ask Dealers for it. Danger in Feeding New Hay.

This is the season of the year when most horse breeders are forced to begin the use of new hay with their horses, says the *Breeders' Gazette*. As a rule the change is associated with digestive troubles of more or less severity and therefore he is wise who makes it a point always to have enough old hay to last his horses well into the cold season, perhaps as far along as the New Year. The hunting horses of England and the other high-priced horseflesh of that country, leaving out of consideration the race horses, are never allowed to eat hay that is not at least one year old and much that is two years old, yet bright and sound, is fed in preference even to that of a year's less age. One reason is that countless millions of insects lay their eggs on the stems of the grasses from which hay is made, and these eggs do not lose their vitality during the ordinary hay-curing process. When taken into the warm, moist regions of the equine stomach these eggs are hatched out and create disturbances, causing colic and other troubles in the digestive tract Hence the best thing is to have old hay to feed until the new shall have cured in stack or mow or at least to have enough of the old to mix with the new, enlarging the proportion of the new until the horses have become thoroughly accustomed to the change and until the bulk of the deleterious agents have been dried out to the death. Many a man has been at a loss to know what was the matter with his horses at this time of the year and the sole cause of the indisposition complained of has been the change from old to new hay. More especially is this true often of horses that are being got ready for showing. A sudden change from the old to the new hay often sets such horses to scouring, and founder not infrequently is a result. And not alone are the insects' eggs to be feared, but equally so the fermentation which is going on in new hay for a long time. On the saccharine character of the grass stems much of the feeding value of the hay depends, and the more sugar there is present the greater the amount of fermentation there will be during the process of perfect curing. New hay should never be used for show horses if it is possible to obtain old.

Holsteins for Beef.

Norman J. Coleman, former Commissioner of Agriculture was interviewed while in Washington, as to what impressed him as the most striking features of the fairs which he visited while on a recent Western trip, and said: "If I was to single out one particular impression I should have to speak of the prominence into which the Holstein cattle are coming. The Holstein, you know, is emphatically the all service animal for our American farms. There is a rare combination of the milking superiority with beef production. These cattle mature early and they put on flesh with great rapidity. Wherever I went I found the show of Holsteins one of the great features, and they seemed to attract more attention from the average farmer that the other classes. Of course the Jersey, for small places, has its sphere as being economical and giving rich milk. The Shorthorns are without superiors for beef cattle, but between these extremes there is a wide field for an all service and the Holstein seems to meet that want. The Devons are good milkers and good beef cattle but they are slow maturing. Farmers seem to think Holsteins come nearer what they have have been looking for, and everywhere I found the Holsteins attracting a great deal of attention.

A rapid milker gets more butter fat than a slow milker, although both of them may have the same quality of milk.

Jackson's Napa Soda untangles the cet.

Poultry Points.

If poultry is confined it should have meat or milk.

A healthy ostrich will eat three dozen oranges at a meal.

It is said that Texas stands first as a turkey-raising State, and Missouri next.

Chickens are easily dry-picked when you know how. It is easily done, without breaking the skin.

Hens will neither lay nor set if they are overfed. They sit around and wait for feeding time to come.

Young chicks should not be kept in a coop that is too close. Brooders and coops need to be warm, but not close.

Failure in poultry raising comes from lack of knowledge and lack of judgment Those engaged in it should post up.

To make hens profitable means must be used to induce them to lay out of season, when eggs are scarce and high.

It pays to treat young poultry well. It takes only a few weeks for them to become marketable, or to be ready for the table.

Fowls are fond of freshly turned soil, and it is good for them. If the yard is too small to plow, it should be spaded or dug in some way.

Some persons aspire to the care of poultry who have not room enough. Poultry raising cannot be made profitable in grounds that are crowded.

Because a person has the chicken fever, is no reason why the fowls should be made to suffer with him because of poor quarters and improper care.

A good start is a large part of the success so much to be desired. But it is not all Half is in the breed, the second half is in the care and the feed.

Plenty of fresh water needs to be in the troughs early in the morning. The poultry often go to the drinking trough the first thing after coming off the roost.

Without the egg trade, there is a time of the year when the country merchant would have little to do, and when there would be little for the ordinary family to eat.

A writer advocates not to kill the young cockerels. He claims that it pays to raise the whole flock together. When grown they will pay for the raising of the whole flock.

The easiest way to furnish milk to fowls is as a drink. It may be made into a mess with meal or bran, or may be baked into cakes. The fowls seem to enjoy it most when taken from the troughs.

Chicken houses may be made too tight. There should be plenty of fresh air. Have doors and windows that can be left open at night. The odor from a tightly closed house in the morning is very offensive.

If you have a garden, the long-legged, high-flyers should be thinned out. Short-legged, heavy-set, such as cannot get over the fence easily, are the ones to keep Gardens and chickens do not get along well together.

No one can expect to raise a good crop, unless he plants well, cultivates well and harvests well. This is true of poultry raising. The seed—the eggs—must be vigorous, well selected and fresh, and adapted to the harvest desired.

Many chicks die from being kept too warm in brooders, at night. In the morning they take cold from being steamed. If they stand apart they are warm enough, or too warm They are not too cold unless they huddle together.

The *American Kitchen Magazine* says that the first turkey eaten in France was served at the wedding banquet of Charles IX. The Mexican birds were taken to Europe and then brought to America as domestic birds. They are supposed to be natives of America.

Turkeys need special care during the first few weeks after they are hatched. They must be kept out of the wet grass, and taken out of the rain, and carefully fed cracked corn, bran and scraps. If they have no range they should have a little meat.

Dr. Spencer's English Dyspepsia Wafers

Relieves and cures Indigestion, Heartburn, dyspepsia and all Stomach complaints.

Price 50¢ per box.

British Pharmacal Co. Ltd. Distributors Milwaukee, Wis.

CAN YOU ENJOY A SQUARE MEAL?

Do you sit down at the table with a fine appetite intending to enjoy your meal immensely and after a few mouthfuls give up in despair? That's a typical "well along" case of indigestion or dyspepsia. Hundreds, yes, thousands are in the same boat and are willing to do almost anything to be as they used to—healthy, well and strong with a good sound stomach.

You cannot force your stomach to do work that it is unwilling to do. It has been tried time and time again, with the same results always. The stomach is a faithful organ, but when pushed beyond, and exerted to the utmost, it rebels. Some stomachs are stronger than others, but all have their limit and when the limit is reached it is unwise to attempt to force it into doing further work.

The best and quickest cure offered to that big army of sufferers is

DR. SPENCER'S ENGLISH DYSPEPSIA WAFERS.

If you haven't heard of this cure before, you have been needlessly suffering, for this medicine *will* cure you—cure you as sure as there's a sun above. Would you spend 50 cents if you thought there was some hopes. We know you would, and therefore tell you sincerely that D. S. E. W. *will* cure you.

The curing powers of these wafers are very simple to understand. They are natural in their workings and effects, taking up the work of the worn and wasted stomachs, digesting the food thoroughly and completely.

THE ENTIRE LA BELLE STUD AT AUCTION

Property of the Estate of the Late HON. WM. C. WHITNEY,

At MADISON SQUARE GARDEN, NEW YORK, MONDAY EVENING, OCT. 10, 1904,

COMPRISING EIGHT GREAT STALLIONS AND EIGHTY FAMOUS BROOD MARES.

The Most Important Sale of Thoroughbreds Ever Held in America.

UNDER THE MANAGEMENT OF

FASIG-TIPTON CO. OF NEW YORK.

The Sale Includes

MEDDLER (IMPORTED), FOALED 1890. Purchased in England by the late Mr. W. H. Forbes for $75,000 at three years of age at public auction. His get have won more than $180,000 in 1904, a sum much larger than is credited to any other sire in the world.

HAMBURG FOALED 1895 Purchased by Mr. Whitney for $60,000 as a sire. HAMBURG was winner of 16 races and $64,525. He is third on the list of winning sires in 1904. He is the only sire to get two winners of the Futurity. His get won $80,479 in 1903, and have won $89,720 to date in 1904.

YANKEE FOALED 1899. YANKEE won the Futurity, etc., and $41,728 at two years of age.

SANDRINGHAM (IMPORTED), FOALED 1896. By the great St. Simon. SANDRINGHAM is a full brother to Persimmon (Derby, St. Leger, Gold Cup at Ascot, etc., and sire of Sceptre, winner of the 1000 and 2000 Guineas, Oaks, St. Leger, etc.)

NASTURTIUM FOALED 1899. By imp. Watercress. NASTURTIUM won the Flathush, Double Event, etc., at two, and was bought for $50,000. He is a grand individual and should make a great sire.

BALLYHOO BEY FOALED 1898. By Kingston (winner of 89 races and $139,562, and the premier sire of 1900). BALLYHOO BEY won the Futurity and Flathush Stakes

KILMARNOCK FOALED 1897. By Sir Dixon. KILMARNOCK was a superior stake winner in this country at two and three, capturing the Withers Stakes, etc., and at four won the Alexandra Plate (3 miles) in England, and the Prix du Conseil Municipal Stakes in France.

BLACKSTOCK FOALED 1899. BLACKSTOCK was a winner at three and a stake winner at four. He is certain of success as a sire.

Together with Eighty of the Greatest Brood Mares in America in Foal to the Above Stallions.

Sale at Night by Electric Light. Catalogues on application to

WM. EASTON

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1904

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES CLOSE OCTOBER 15, 1904.

ONLY $2 TO NOMINATE MARE

$250 for Trotting Foals. $1750 for Pacing Foals. $800 to Nominators of Dams of Winners and $200 for Owners of Stallions. Money Divided as Follows:

$3000 for Three-Year-Old Trotters.
200 for Nominator of Dam of Winner of Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
200 for Nominator of Dam of Winner of Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$1000 for Three-Year-Old Pacers.
200 for the Nominator of Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator of Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—$2 to nominate Mare on October 15, 1904, when name, color and description of Mare and Stallion bred to must be given. $5 February 1, 1905. $5 September 1, 1905. $10 on Yearlings February 1, 1906. $10 on Two-Year-Olds February 1, 1907. $10 on Three-Year-Olds February 1 1908.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace. $35 to start in the Two-Year-Old Trot. $35 to start in the Three-Year-Old Pace. $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3), and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before February 1, 1905, her Nominator may sell and transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of Mare must be given, also the name of the horse to which she was bred in 1904.

Entries must be accompanied by the entrance fee.

Should the amount of entrance money received be in excess of the amount of the Stakes the excess will be added, less the cost of postage stamps, printing and advertising, to the Stakes for the Three-Year-Old divisions in proportion to the amount offered in each division.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. Hoppies will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each Division than there are starters.

Entries open to the world. Membership in the Association not required to enter, but no horse will be allowed to start until the owner has become a member.

Write for Entry Blanks to

San Francisco, Saturday, October 1, 1904.

OUR STATE FAIR, owing to a combination of circumstances, many of which could very easily have been avoided, is in very poor standing at the present time with the people who have been its best patrons, and there is a feeling among quite a large number that its last exhibition has been held. The California State Agricultural Society has been one of the State's greatest institutions, and has done a vast amount of good work in establishing and building up some of our leading industries. Because mistakes have been made in the past, however, is no reason why the State Fair should be permitted to die or even lapse for one year. Other institutions have passed through worse ordeals and lived to become greater and more prosperous than ever. Oregon's State Fair furnishes an instance. Time was when it was so poorly managed that it failed to pay its purses and premiums, but a new management was placed in control and it is now the greatest fair held west of the Rocky mountains. Several years ago the directors of the California State Agricultural Society imagining that the public would rush to see a two weeks running meeting conducted on the same lines as the metropolitan jockey clubs, made running races and bookmaking the leading features of our State Fair. The big sums paid for the privilege of conducting a syndicate book (nearly $20,000) led the directors to believe they had found a road to wealth for the State institution, but it turned out to be anything but the bonanza their fancy had painted and this year the fair ran behind in its accounts several thousand dollars, many purses and even stakes remain unpaid and the suspension of the State Agricultural Society and its officials has been asked of the National Trotting Association, of which body it has been an honored member for many years. All these conditions are bad enough, but they can all be remedied and the association again placed in good standing and good repute, We believe that every claim made against the State Agricultural Society will be paid. It owns a very valuable piece of property and has on its board of directors gentlemen of probity and wealth who will do everything in their power to meet all claims. It is one of the State's leading institutions and should continue to be. The Governor of the State, the Legislature and the Board of Directors can surely evolve some plan by which the association can settle all its indebtedness and start anew to make the annual exhibits of the institution of great benefit to the people of the entire State. Such states as Ohio, Missouri, Iowa, Indiana, New York, Oregon and many others that might be mentioned consider their State Fairs great instruments of good to the commonwealth. They all have racing as the principal amusement at their meetings, but it is a side issue and is devoted principally to contests between harness horses which are the horses of the farmer, the business man and in fact the whole people. The energy of the directors of these institutions is principally devoted to giving an exhibit of the resources of their respective States and they find that it pays. California should not be behind any State in the union in its annual agricultural and stock exhibit. Our State Fair does not need killing, but it does need reorganization and redemption. The opportunity exists to make it what its founders intended it—a great annual exhibit of the choicest products of the grandest section of America; a place where the farmer, the fruit grower, the live stock breeder and the manufacturer can show what he has accomplished and learn how he can improve his methods. It is a work that the States officials from the Governor down, can afford to devote time and thought to. Like any other institution of learning it should be on a plane above party politics and graft and its directing board should be selected from the very best men the State affords, men who are interested in improving and upbuilding every honorable industry that can be followed in this land of great and numerous opportunities.

YOUR MONEY IS IN THE BANK, and if you win any division of any of the Pacific Breeders Futurities, you are sure of getting the amount won. The Pacific Coast Trotting Horse Breeders Association has on deposit to the credit of the winners of its stakes enough money to pay them all, and the same course will be pursued with Stake No. 5, nominations for which will close October 15th. This new stake is for the foals of mares bred this year, and has a guaranteed value of $7000, or $1000 more than any of the previous stakes. We suggest to every breeder who intends making an entry in this stake that be make more than one if he owns more than one mare. If there could be 600 nominations received for Stake No. 5, the value of the stake would reach very close to $10,000. The stakes already closed will exceed the guaranteed valuation of $6000 and one of them will be worth nearly $8000. Now, if the nominations in Stake No. 5 can be made large enough we will have a $10,000 stake for the Pacific Coast colts and fillies foaled in 1905 to trot and pace for when they are two and three-year-olds This would give the three-year-old trotters a stake of nearly $5000 to compete for, and in any event this division will have a race for $3000 which makes it well worth striving for. The fact that all the stake money is deposited in reliable banks to the credit of the stake and that it will draw interest until the month of the race, is a feature of this stake that breeders should consider. The money is safe and the money will be paid to the winners. Every person on the Coast who is interested in harness horses should do a little missonary work and secure one or more entries to this stake. Nothing helps the business more or arouses interest in harness horses like colt stakes of large value. By the conditions of this stake the owner of the stallion that sires the winner of either three-year-old race is paid $100, and the person who nominates the dam of the winner of any division gets $200. From the way nominations are already coming in there is every prospect of the list being larger than any previous stake has received. Let all get in and make it the best stake ever trotted or paced for on the Pacific Coast. Remember nominations close October 15th. Read the conditions in the advertisement in this issue.

THE WHITNEY SALE which is announced by the Fasig-Tipton Company to be held in New York on Monday evening, October 10th, will close out the entire La Belle Stud, one of the world's greatest breeding farms. There are eight stallions and about 80 mares to be sold. Imp. Meddler, foaled 1890, and purchased in England by the late Mr. W. H. Forbes for $75,000 heads the list. He is the leading money winning sire of the year, his get having $183,075 to their credit up to Sept. 20th. He is by Imp. St. Gatien out of Busybody, winner of the Oaks, Thousand Guineas, etc. No other sire in the world heads such a list of winners as he. Colonial Girl, Stalwart, Tanya, Goldsmith, Mercury, Mineola, Previous, Hot Shot and other big winners were all sired by Meddler. The next stallion is Hamburg, the greatest of American bred stallions and sires. Marcus Daly paid $40,000 for him and sold him to Mr. Whitney for $60,000. He stands third in the list of winning sires, his get having won over $100,000 this year. Hamburg won sixteen races and $64,525. He is the only sire of two winners of the Futurity—Hamburg Belle and Artful. The other stallions are Yankee by Hanover; imp. Sandringham, full brother to the great Persimmon; Nasturtium, greatest son of Watercress; Ballyhoo Bey, winner of the Futurity; Kilmarnock, winner of stakes in America and England, and Blackstock a frequent stake winner and great race horse. The broodmares are probably the greatest collection in America. A few advance catalogues of this sale can be had at this office.

CATALOGUES of the thoroughbred Jersey Cattle, the entire prize winning herd owned by the late Henry Pierce, will be issued soon. This catalogue is to be the handsomest thing in its line ever printed in California, and will contain many beautiful half-tone engravings made from photographs of the stock. There are 75 head of registered bulls, cows and calves they are to be sold at auction without reserve by Fred H. Chase & Company, the leading live stock auctioneers of this Coast, on Thursday evening, October 25th. There is no better investment for any farmer than a well bred Jersey, be it bull, cow or heifer. One of these cows or heifers, bred to first-class Jersey bull year after year will soon produce a young herd that will be worth much to its owner and be a continual source of profit. The bull calves can be registered and sold for good prices, while the heifers will produce enough milk and butter to pay a good profit annually. It does not cost any more to keep a full-blooded Jersey than the common scrub cow which is so common on the average California farm. This sale will furnish the opportunity to secure high class stock at your own price. Send to Fred H. Chase & Company for a catalogue.

IT IS EVIDENT that the world's champion trotter, Lou Dillon 1:58¼ is herself again, as on Thursday of this week in a workout at the Cleveland track she stepped two heats in 2:02 and 2:03, the fastest two consecutive heats ever stepped by a trotter. In the first heat she went to the half in 1:01 and came home in exactly the same time. She went to the half a little slower the second heat—1:02¾ and then finished like a runaway in 1:00¼, the last quarter in 30 seconds a two minute clip. The Santa Rosa mare is indeed a wonder, and her trainer, Millard Sanders, says she is faster now than ever before in her life. The two heats were given her as a preparation for her race at Memphis two weeks hence when she will meet Major Delmar again for the $5000 gold cup, the first race for which she won so decisively last year. Major Delmar has been showing great form recently and has trotted four exhibition miles in better than 2:03 each time without a wind shield or a runner in front. But fast as he is there is only one Lou Dillon and if she is in good form at Memphis the race will be a repetition of last year's contest between the two greatest trotters on earth—the one California bred and the other by a California bred sire.

SOME VALUABLE STAKES CLOSE TO-DAY with the Westchester Racing Association of New York. One of the most important is the Ninth National Stallion Race with $5000 added, the entries for stallions to close and name October 1, 1904 The Westchester Racing Association adds $5000 and the remaining 50 per cent of the stallion entrances of which $1200 to the second and $600 to the third. The nominator of the winner to receive $1000 out of the subscriptions and starting money. Of the subscriptions for stallions the nominators of the sires of the first, second and third horses shall receive 25, 15 and 10 per cent respectively. The distance is five furlongs of the Eclipse Course. The Ninth Matron Stakes for mares covered in 1904, foals of 1905, to be run at the autumn meeting of 1907, will close December 15, 1904. All entries to be made to H. G. Crickmore, Clerk of the course, Westchester Racing Association, Windsor Arcade, Fifth Avenue, New York, N. Y. See advertisement for further particulars.

GUERNSEYS are very popular with dairymen in the Eastern States and in our California climate are great milk and butter producers. Peter C. Kellogg, the live stock auctioneer of 107 John street New York, announces in this issue a sale of the entire Spottswood Farm Herd at Broad Axe, Montgomery county, Pennsylvania. The sale will take place Wednesday, October 19th, and catalogues of the sale will be sent out October 10th. This herd, which is one of the best in the United States, consists of three importations and their increase, numbering one hundred head all told. Send to Mr. Kellogg at his address, given above, for a catalogue and you can arrange with him by letter or telegraph to buy for you should desire to offer a certain price for any of the animals to be sold.

SENATOR B. F. LANGFORD of San Joaquin county, died at his home near Lodi, last Monday. He was one of the builders of this commonwealth, and had been kept in the Senate of California for a longer period than any senator in this State's history. The sobriquet of "Honest Ben" Langford was given him by his constituents and the title was not misplaced. Senator Langford bred many good horses, both thoroughbreds and trotters, and was a great lover of speed contests at the State and district fairs. The State has lost an honored citizen whose passing will be noted with deep regret.

MR. FRANK H. BURKE of this city, who is taking in the last of the Grand Circuit meetings in company with his better half, has our thanks for many clippings from the daily press of Columbus and Cincinnati giving accounts of the fine racing held at those two points. They are greatly appreciated, and it is nice to be remembered by those far away.

A RECORD that has stood for thirty-nine years is Dexter's race record of 4:56¼ at two miles to wagon. It could be easily lowered by many trotters and some enterprising association should arrange a two mile trot so that a record for this distance to wagon may be made.

Oregon State Fair Racing.

The harness racing at the Salem track this year was not quite up to last season's performances over the "lone oak" track. Not that the horses were of poorer class although there was no Sweet Marie there this season) but the track was in such poor shape that fast time was impossible over it. Summaries of the first three days racing were printed in these columns last week. While the two-year-old trot which opened the program did not produce a 2:30 performer, it was remarkable for the fact that of the five starters four were by Zombro 2:11. It was won by the bay colt, Lonzo, owned by C. Byron of Lafayette, Oregon. The first heat went to James Erwin's Pricella J. by Bonner N. B. in 2:35 and then Lonzo took the necessary two heats in straight order, the second in 2:31½ being the fastest of the race. Had the track been good Zombro would have had one more 2:30 performer. John Sawyer drove the winner which was sold the week after to Mr. P. J. Mann at a good price.

Will Durfee has pretty fair luck during the meeting, winning the 2:20 pace and the Consolation of the Greater Salem Stake with Cavalier by Welcome, and might have won the Greater Salem Stake with him had the starter not given him the word when Cavalier was lengths behind his field and on a break, which caused him to be distanced. Mr. Durfee also won the 2:13 trot with Rita H , drove Gyr Falcon by Zombro to second place in the 2:20 trot, won third money in the three-year-old pace with Van De Vauter Stock Farm's Jules Redel and won the free-for-all trot with Coronado. In the $2000 trot he started Briney K., but the brown gelding could not trot a little bit in the cuppy going and he was last in the summary.

Henry Helman brought out a good one in the 2:25 pace which he won with Byron Lace, a bay stallion by Lovelace. Byron Lace won his race in straight heats in 2:15 and 2:15½. Helman also won the two-year-old pacing stake with another son of Lovelace which has been named Lord Lovelace. This colt is owned by E. B. Tongue son of the late Congressman Tongue of Hillsboro.

Queen B , the bay mare by Count, which L. B. Lindsay of Spokane won the $2000 pace with, was a big surprise. She sold in the field for $3 against $25, and after the favorite Hassalo had taken a heat, won the next three very handily. Although her best time in the race 2:14¼ does not seem fast for such a stake, the condition of the track made her quite as good as 2:10. She is a good looking mare with a nice way of going, but wore a "bird cage" in the shape of a large wire screen over her face to prevent the clods from striking her head.

Will Hogoboom of Walla Walla won the three-year-old pace on Thursday with Bessie R., a nice filly by Francisco, son of his Electioneer horse Caution. The heats were in 2:22½ and 2:21¾, excellent time for the track and as good as 2:15 over our California tracks.

When the veteran I C. Mosher won the $2000 stake for 2:17 class trotters with Red Skin, owned by Mr. S. S. Bailey, the victory was a very popular one, although the home horse The Commonwealth had a heavy backing in the pools and in the grand stand. It was a hotly contested race and when Red Skin made a break in the last heat the excitement was intense as he dropped so many lengths behind that fears were expressed that he would be distanced. The Commonwealth found the track too heavy for him, however, and Red Skin overhauled him in the stretch and beat him out. Mr Mosher also won the 2:30 trot, and in it gave the mare Athlene by Cour de Alene a record of 2:19½.

The best race of the meeting from a time stand point was the 2:11 pace, which Kelly Briggs won in straight heats in 2:10½ and 2:13 Frank Wright, whose driving throughout the circuit has been first class, had the Bayswater Wilkes gelding in fine shape, and 2:07 would not have stopped him had the track been fast.

The free-for-all trot was won by Coronado in fast time for the track although it was seconds slower than his record. Mack Mack, Henry Helman's good McKinney horse, got the first heat in 2:14½ but was unsteady in the next two when reaching the stretch.

The racing throughout the week was clean and good, and had the track been in good shape many more records would have been lowered. The summaries of the last three days racing follow:

THURSDAY, SEPT. 16.

Pacing, Inland Empire Stake, for three-year-olds, $500.

Bessie R , b f by Francisco	(Hogoboom)	1	1
Queen Director, b f by Montana Director	(Green)	2	3
Jules Redel br c by Westfield	(Durfee)	4	2
Loveless, b f by Lovelace	(Helman)	3	d
Sunny Jim, b c by Ladis	(Misner)	d	

Time—2:22½, 2:21¾.

Trotting, Lewis and Clark Stake, for 2:27 class, $2000.

Red Skin, ch g by Red Cloak	(Mosher)	4	1	1	1
The Commonwealth, b s by Shadoland Onward	(Lindsey)	1	2	3	2
Lady Madison, by James Madison	(Ward)	5	3	2	ro
Belindi b m by Chehalis	(Rutherford)	2	4	4	ro
Briney K., b g by Strathway	(Durfee)	3	5	5	ro

Time—2:16¼, 2:17, 2:17, 2:21.

Running, six furlongs—Sallie Goodwin 110, won; Urbano 110, second, Bud Wado 110, third. Time, 1:14.

Running, Oregon Derby, 1¼ mile—Moor 109, (Alarie), won; Col. Anderson 101, (Kent), second; The Stewardess 102, (Clark), third. Time, 2:06¼. Illowabo, Instructor, Col. Van ran.

Running, one mile—The Pride 113, won; All About 113, second; Connell 113, third. Time, 1:42¼. Postmaster, Prestolus, Lady Rice, Gypsy Bell, Scherzo ran.

FRIDAY, SEPT. 17.

Pacing, Consolation purse to Greater Salem stake, $500.

Cavalier, br g by Welcome	(Durfee)	2	1	1
Starkey, br g by Chehalis	(Riley)	1	2	3
Prince Charles, ch h by Chas. Derby	(Helman)	3	4	2
Derbertha, ch m by Chas. Derby	(Zahner)	5	3	5
Tidal Wave, ch h by Nutwood Wilkes	(Mosher)	4	5	4
Economizer, b m by Chas. Derby	(Silva)	6	6	6

Time—2:13¾, 2:15¼, 2:18¾.

Trotting, 2:30 class, purse $500

Athalene, b m by Cour de Alene	(Mosher)	1	1
Kitty Clover, br m by Pricemont	(Lynch)	2	4
Satio Royal, ch h by Bonner N. B.	(Lindsey)	5	2
Bessie Jones, blk m by Capt. Jones	(Helman)	4	3
Seattle Maid, b m by Nutwood Wilkes	(Green)	3	5
Gyr Falcon, blk h by Zombro	(Childs)	6	d

Time—2:24¼, 2:19½.

Running, five furlongs—Hogarth 105, won; Gaucho 106, second; Gad 111, third. Time—1:01¾.

Running, five and a half furlongs—Cerro Santo 119, won; Bummer 114, second; Titus 115, third.

Running, one mile—Miss Vera 105, won; Peozance 105, second; Duke of Richelieu 112, third. Time—1:41½.

SATURDAY, SEPT. 18.

Pacing 2:11 class, Rural Spirit Stake, $1000.

Kelly Briggs, br g by Bayswater Wilkes	(Wright)	1	1
Leroi b g by Altamont	(Lindsey)	2	2
Zolock, blk h by McKinney	(Delaney)	8	3
Oma A., b m by Dictatus	(Mosher)	3	5
Francisco, b g by Caution	(Lynch)	4	6
Jonesa Basler, br h by Robert Basler	(Walton)	7	4
Sam Bowers, ch g by Joe Simpson	(Lance)	5	7
Vissloo, br g by Vanquish	(Heller)	6	8

Time—2:10½, 2:13.

Trotting, free-for-all, purse $500.

Coronado, blk h by McKinney	(Durfee)	2	1	1
Mack Mack, b g by McKinney	(Helman)	1	3	3
H. D. B , b h by Arthur Holt	(Wright)	3	2	2
Helen Norte, b m by Del Norte	(Rutherford)	dis		

Time—2:14½ 2:15½, 2:15½.

Running, five furlongs—Urbano, 107, won: Agnes Mack, 107, second: Vaughn, 103, third. Time 1:01¼. Aurora B., the favorite Ione, Pencil Me and Zadoe also ran.

Running, six furlongs—Scherzo, 106, won; Albermarle, 109, second; Myrtle H., third. Time—1:14.

Oakwood Park Sale.

Nearly two thousand people were at Fred H. Chase & Co's salesyard at 1732 Market street, this city on Monday evening of this week to see a consignment of horses from Mr. John F Boyd's Oakwood Park Stock Farm sold to the highest bidders. Thirty-two of the thirty-three catalogued were brought into the ring and the bidding was lively from the start. Good values were received as the horses were not in many instances bred on lines that harness horse buyers and breeders are looking for as many were out of thoroughbred and short bred mares. Some well bred ones were offered, however, and these generally brought fair prices. The highest priced animal of the sale was the four year-old mare Greggins, a full sister to Algregor 2:11, W. W. Foote 2:15¼, etc. by Steinway out of Maggie McGregor by Robert McGregor. She went to the bid of Capt. Williams of Palo Alto for $350. Capt. Goodall, of this city paid $170 for a chestnut gelding, full brother to his pacer Rajah 2:10½, and W. A. Rogers of Walnut Creek paid $510 for a team, a mare and gelding by Chas. Derby. Mr. C. K. Harley, of this city, secured a handsome three-year-old black stallion by Chas. Derby out of Lydia Bright by Triumver 2546 for $200 Fred Hahn's bid of $205 secured him a mare by Chas Derby out of a mare by Leo Wilkes, that is a fast pacer although never worked for speed. The thirty-two head sold brought a total of $4485, an average of $140, which was a good showing for the class of horses offered. The record of the sale is as follows:

Bay mare, foaled 1900, by Charles Derby, dam by Joe Daniels, to Gus Lindauer for $105.

Bay gelding, foaled 1900, by Duke, dam a carriage mare, to J. H. Jones for $80.

Bay gelding foaled 1901, by Chas. Derby, dam by Grinstead, to Schraeder Bros for $55.

Brown mare foaled 1900, by James Madison, dam by Joe Daniels, to Alex Truman for $165.

Brown gelding, foaled 1900, by James Madison, dam Clara by Buccaneer, to Jasper Paulsen for $180.

Bay gelding foaled 1896, by San Savior, to Ashton & Gardiner for $85

Bay mare, foaled 1899, by Ras Alulu, dam Miss Douglas by Joe Daniels, to Ashton & Gardiner for $85.

Bay mare, foaled 1901, by Chas. Derby, dam Nota Bono by Tako Notice, to P Gordon for $70.

Bay gelding, foaled 1901, by Charles Derby, dam May by Anteeo, to Western Meat Company for $135.

Shusan, b m foaled 1901, by Charles Derby, dam Susie Mambrino by Mambrino Boy, to J D. Smith for $135.

Bay gelding, foaled 1900, by Steinway, dam Proserpine by Diablo to Gus Lindauer for $105.

Greggins, b m by Steinway, dam Maggie McGregor by Robert McGregor to Capt. C. H. Williams for $350.

Clyte 3d, br m by Chas. Derby, dam Clytie 2d by Nutwood, to R. Lencie for $65.

Bay mare, foaled 1900, by Charles Derby, dam by Joe Daniels, to J. Kilne for $95.

Chestnut gelding, foaled 1901, by Charles Derby, dam Edon by Gen. Benton, to Captain H. W. Goodal for $170.

Black gelding, foaled 1900, by Charles Derby, dam Miss Durham by Prince Red, to American Milling Co. for $140.

Bay gelding, foaled 1901, by Charles Derby, dam Abanteeo 2:27½ by Anteeo, to Capt. C. H. Williams for $200.

Brown gelding, foaled ——, by Charles Derby, dam Lucy E. by Black Walnut, to W. A. Rogers for $255.

Simmerling, blk m 1901, by Charles Derby, dam Chipper Simmons by Mambrino Boy, to W. A. Rogers for $255.

Imagol, b m 1901, by Charles Derby, dam Idol Belle by Idol Wilkes, to C. A. Mitchell for $85.

Onannie, br m 1901, by Owyhee 2:11, dam Nannie Smith by Red Wilkes to J. S. Anderson for $130.

Dopella, — mare, 1901, by Charles Derby, dam Peronella by Prince Red, to V. Verhilac for $105.

Slender, ch m 1900, by Charles Derby, dam Slight 2:28 by Electioneer, to Chas. Berlina for $135.

Bay mare, foaled 1899, by Ras Alula, dam Lilly by Milner to Jasper Paulsen for $80.

Bay gelding, foaled 1902, by Geo. W. Archer, dam Brilliantshine by Charles Derby, to Capt. C. H. Williams for $145.

Black stallion, foaled 1901, by Charles Derby, dam Lydia Bright by Triumver, to C. K. Harley for $200

Clemency, gr m 1900, by Charles Derby, dam Clementine by Yosemite, to B. Conds for $80.

Brown Belle, br m 1901, by Charles Derby, dam Black Belle by Nephew, to B. Lane for $165.

Rowline, ch m 1901, by Owyhee, dam Caroline by Yosemite to Capt. H. W. Goodall for $175.

Deroll, b m 1901, by Charles Derby, dam Nellie Emmoline by Leo Wilkes, to Fred Hahn for $205.

Chestnut gelding, foaled 1901, by Charles Derby, dam Ada F. by Antevolo to A. E. Perley for $125.

Asquetto, — m 1901, by Charles Derby, dam Coquette by Wilton, to Jasper Paulsen for $125.

Tiverton 2:07.

Tiverton's victory in the Charter Oak was no great surprise to those whose judgment has led them to carefully study the Galileo Rex gelding. His Buffalo race demonstrated that all he needed was a slice of good luck in his races to make him a most formidable competitor of the best trotters in training. He was very unfortunate at Readville, in the race for the Massachusetts purse, and recent events seem to show that he really choked down in that contest. In the Roger Williams he trotted a truly wonderful race, a combination of circumstances and not his own shortcomings depriving him of first money despite the fact that he trotted the first three heats in 2:07, 2:07½, 2:06¾. In the Charter Oak he drew last position for the getaway, yet at the quarter, in 31½ seconds, was in the lead. Later in the mile his tongue and the bit got into a tangle and it was with difficulty Billy Andrews prevented him from choking down again. The next two heats are history. He won the second round from Doctor Strong by a narrow margin. But Spear, who drove the gray gelding, says that Tiverton beat him the third heat with ridiculous ease. Tiverton is owned by Mr A. B. Gwathmey of New York, and is by Galileo Rex, dam Folly by Arragon son of Downing, second dam by Pendennis son of Swigert.

A Card to Trainers and Horse Owners.

At the close of the season of 1903 we, having received testimonials unqualifiedly endorsing and recommending the use of Campbell's Horse Foot Remedy from the great trainers—Geers. McDonald, Snow, Hudson, Spears, McGuire, Salisbury, Curry, Benyon, McCoy, Miller and many others no less celebrated, whose names, for want of space, we do not mention, published an illustrated page in the special numbers of racing journals.

Our purpose in doing this was to place Campbell's Horse Foot Remedy before horse owners who have not given it a trial in such a manner that its merit as a hoof grower and reliable cure for diseased and sore feet could not be questioned, if owners were at all disposed to be influenced by the advice and recommendation of those whose success in the horse business is a conceded fact. We believe that the advice of men to whom are entrusted the most valuable horses on the turf, because of their honesty and knowledge counts. These men cannot afford to, and they do not permit, "fake testimonials."

A glance over the summaries of the races in the Grand Circuit of 1904 shows that the "man behind" the winners, in most cases, is a trainer who uses Campbell's Horse Foot Remedy, or has used it in fitting his stable for this work.

The success such trainers are meeting proves that they know their business, and that their advice should be given weight.

We are confident that no stable can afford to be without this remedy, and solicit a trial, assuring you that if results are not satisfactory we will refund cost of remedy on receipt of a letter to that effect, no matter from whom purchased.

Nearly all dealers in harness and turf goods carry "Campbell's Horse Foot Remedy" in stock.

JAS. B CAMPBELL & CO.,
412 W. Madison St., Chicago, Ill.

Thomas W. Lawson's famous show horse, Flying Cloud, is dead. The end came very suddenly, and the veterinary surgeons are unable to state the cause. The stallion, for which Lawson paid $12 000 before he was trained, was 9 years old, and had a record of having never been beaten at a horse show. He won the championship single, double and tandem at several great shows, including those at Boston and New York.

Jackson's Napa Soda does not tangle the feet.

Notes and News.

Name your mare in Breeders Futurity No. 5.

Bad News travels fast. He has taken a pacing record of 2:08¼ this year.

Alta McDonald will drive Sweet Marie 2:06¼ in the remainder of her races this year.

It is claimed that 50,000 visited the Indiana State Fair one day during fair week this year.

Diablo 2:09¼ will be returned to Woodland for the season of 1905. He has been at Salem, Oregon, for two years.

Princess Derby reduced her record to 2:13¼ at the Libertyville meeting. This record was made in the third heat.

Don't let October 15th pass without making an entry in Breeders Futurity No. 5 for foals of mares bred this year.

Bert Webster, who went East with the Salisbury string has been doing some of the driving for the stable recently.

About 75 horses are now stabled at Pleasanton track and stable room will doubtless be at a premium before the end of the year.

Secretary Jewett will appeal to the stewards of the Grand Circuit to furnish a uniform program all the way down the line next season.

The fastest two four-year-old pacers of the year are Irish 2:08¼ by Monterey 2:09¼, and Owyho 2:09¼ by Owyhee 2:11. All are California bred.

Anderson's Nightingale 2:10½ winner of the Charter Oak in 1892, is now a great brood mare, being the dam of Barongale 2:11¼ and Gale 2:21¼.

El Moro 2:13½ by Longworth and West Wilkes 2:13½ by Norman Wilkes, were driven a mile to pole at Empire track September 17th in 2:14½.

In all probability Lord Derby 2:05¾ will not be raced after this year. He has gone wrong again and will doubtless be retired to the road by Mr. Smathers.

The Beau Ideal, which C. J. Hamlin at one time selected as the future head of the Village Farm stud, took a record of 2:15¼ at the recent Syracuse meeting.

Nutwood Wilkes 2:16½ has seven new standard performers to his credit this year. Nearly every one of his get that has started has taken a standard record.

Monroe 2:10½ by Seymour Wilkes 2:08½ may soon share with Dan T. 2:07¼ by Crawford 2:07¾ the honor of being a 2:10 trotter gotten by a 2:10 pacing horse.

When Lou Dillon trotted a half mile in 58¾ seconds at Glenville September 17th she covered the first quarter in 28¾ seconds and the next quarter in just 30 seconds.

Monte Carlo 2:07¼ trotted a mile to wagon in 2:08¼ at Empire track week before last, driven by his owner, Mr. Brayton Ives. No pace maker accompanied the son of Mendocino.

According to the *Rural Spirit* there were 645 tents pitched on the camp ground of the Oregon State Fair, and these were occupied by 3225 people, nearly all farmers and their families.

Baron Grattan's deciding heat in the 2:14 pace at Providence, time 2:07¾, is the fastest seventh heat on record for pacers, the former record being 2:08¼ held by Sherman Clay and Giles Noyes.

An advertiser desires to lease a barn containing five or six box stalls, that is located near Golden Gate Park. Anyone owning such a place can find a good tenant by answering the advertisement.

Col. J. C. Kirkpatrick, Mr. and Mrs. Frank H. Burke and Mr. and Mrs. J. De La Montanya, of this city, were among the Californians who watched the Grand Circuit races at Columbus last week.

Forty-six 2:10 trotters have been bred in California, which is a pretty good record for one State, especially when it is to be taken into consideration that this is nearly one-fifth of all the trotters in the 2:10 list.

There were several high-class three-year-olds in training this year that had no stake entries. More's the pity, as they could have earned considerable and been sold for large amounts had they been staked.

Eighty-seven head of Nevada range horses were sold at auction at Hollister last week at an average of $70 a head. The highest price of the sale was $310 paid for a matched span, Mr. Robert I. Orr being the buyer.

Thos. Smith of Vallejo has sold the black mare Daisy S. to Mr. J. H. Herbert of Denver, Colorado. Daisy S. is by McDonald Chief 3583, and is the dam of Tom Smith 2:13¼, Little Mac 2:27½ and Sweet Rose 2:28¾.

H. H. Dunlap, who recently purchased a hotel at Nevada City and moved his string of horses there from Pleasanton, has sent the horses back as he finds the Pleasanton track much superior as a place to train them.

While the mile in 2:13¾ to saddle ridden by Mr. Billings on Charley Mac at Cleveland is not a technical record, it is believed that Mr. Billings will give him an actual record lower than that mark when he reaches Memphis.

Alta McDonald was awarded $1000 out of Sweet Marie's winnings for driving her to victory at Providence, but it is said he gave half of it back to Mr. Smith, the lessee of the mare, as he thought the "fine" was excessive.

It was a great pity that Marengo King, son of McKinney and By By by Nutwood, died before he reduced his record of 2:29¼. He had worked several heats below 2:14 and could have been a 2:15 performer for By By had he lived.

Swift B. got third money in the 2:15 trot at Libertyville, Illinois, two weeks ago. The heats were five in number and from 2:12½ to 2:15¼. Swift B. was third in every heat, so he must have gone a good race as there were seven starters.

Geo. H. Ketcham, of Cresceus' fame, won the free-for-all trot at Murfreesboro, Tenn., September 9th, with Dorothy Redmond, taking a half-mile track record of 2:12½, which is the fastest heat trotting ever recorded on a half-mile track, south of the Ohio river.

News comes from the East that the fastest three-year-old trotter in sight is Grace Bond 2:14½ by The Bondsman. It is said that she is capable of a half in one minute. She recently trotted an eighth in 13½ seconds. She is engaged in the Kentucky Futurity.

Good prospects are still bringing good prices. Rosalee Wilkes, that took a record of 2:21¼ on the 10th of September at Middleton, Pa., has since changed hands for $5000. She is said to have shown her purchaser a mile below 2:10 before he paid over the money.

The chestnut colt El Carmel, foaled 1902, by Monterey 2:09¼, dam the thoroughbred mare Attraction by Hyder Ali, owned by Dr Perrin of San Jose, is showing great speed at the trot, having already been driven a quarter in forty seconds with only a few weeks' work.

The only payment due before January 2, 1905 in any of the Pacific Breeders Futurity Stakes is a payment of $5 due on November 1st in Stake No 4 for foals of this year. Entries to Stake No. 5 close on October 15th with a payment of $2 each for entrance fee on mares nominated.

Mr. A B. Gwathmey of New York, owner of Tiverton 2:07, offers to match him against Sweet Marie 2:06¼ for $10,000 a side. If such a race is made there will be a big crowd to see it, and betting would be about even, although we think the California mare would have the call.

Says the *American Sportsman* of Cleveland: "M. S. King worked the black mare Reydlette by Rey Direct 2:10 a mile in 2:20¼, one in 2:19½, with a final quarter in 31¾ seconds. This mare is a promising trotter, Mr. Devereux having landed her a winner on Saturday in the matinee.

Mr. L. R. Palmer the well known merchant of Walnut Creek, Contra Costa county, will spend a vacation of a few weeks at Pleasanton this month. He will take three of his horses with him, among them a sister to Ben F. 2:09¼ and educate them a little on the Pleasanton track.

An exchange says that Ben Walker, who trained the Salisbury horses at Pleasanton two years ago, has signed a contract to train for C. B. Knox, the gelatine manufacturer, next season, and has been given authority to invest $25,000 in horses that can win money on the Grand Circuit.

George G.'s race at Cincinnati last Monday when he was second to Tiverton all three heats in 2:08¼, 2:09¼ and 2:08¼, is the best race he has trotted this year. Geers is gradually getting the hang of the Homeward gelding and will doubtless make a good race horse out of him next year.

Eula Mac, the McKinney mare out of Balance All by Brigadier that won the Occident Stake of 1900 and took a record of 2:17½, is winning many matinee races at the meetings of the New York Driving Club this season. She pulled a wagon and beat a good field in 2:16½ and 2:16¾ her last time out.

Talk about shipping coals to Newcastle. It is announced in British exchanges that at the Crewe Horse Repository in England some time in October fourteen hackney mares, many of them important prize winners, will be sold from Plymouth Hackney Stud of Eben D. Jordan, Boston, Mass.

The California horses that have been racing on the Grand Circuit have won about $75,000 net up to this time. Sweet Marie leads them all with about $20,000 to her credit, and Consuela S. comes next with nearly $15,000. Stanley Dillon has won close to the $10,000 mark and Aristo about half that sum.

Galileo Rex 2:12¾, sire of Tiverton 2:07 one of the gamest trotters ever raced, is very closely inbred to George Wilkes Galileo Rex is by Billy Sayre, and he is by a son of George Wilkes out of Tansy by George Wilkes. In addition Dewey Eve, the dam of Galileo Rex is also by George Wilkes.

T. W. Barstow has for sale a grandly bred colt coming three years old. He is by Nearest 2:22 (own brother to John A. McKerron 2:04½) out of Princess Airlie. Read the advertisement in this week's issue and study his blood lines. He is one of the best bred Wilkes stallions ever foaled in California.

Had Sweet Marie not made a break in the first heat of her race at Columbus, she would doubtless have lowered her record of 2:06¼ as she equalled that time in the third heat which she won rather handily. George G. won the first heat in 2:06¼ and Sweet Marie, after her bad break at the half, was a close second.

It is expected that Major Delmar and Lou Dillon will meet again at Memphis this year in the gold cup race. Mr. Smathers is very anxious that the weather and track shall be good as he believes he can beat the great California mare this year. With both horses in good shape, however, Lou Dillon will be the favorite.

Will the party at Eureka, Humboldt county, who wrote Mr. R. P. M. Greeley of Oakland about his mare Winnie Wilkes please send Mr. Greeley his address. The letter was neatly type-written and asked a number of questions which Mr. Greely would like to answer, but the writer forgot to sign his name to the letter.

Before 10,000 persons at Allentown, Pa., September 23d, Prince Alert established a new mile pacing record over a half-mile track of 2:03½ without a wind shield at the Allentown fair races. He made the same time at Bethlehem, Pa., on September 19th last year, but a shield then was used. His time by quarters was :29½, 1:00, 1:31, 2:03½.

Miss Georgie 2:11¼ by McKinney, dam by Nutwood Wilkes, has partially recovered from the curb which bothered her early in the season, and is being raced again. Ted Hayes started her at the new Libertyville track, near Chicago, September 16th. She won the first heat in 2:11½ and took second money in the race The Broncho won the next three heats in 2:10½, 2:11½ and 2:12¾.

The three record breaking performances made by Mr. Billings' horses at the Gentlemen's Driving Club matinee at Cleveland on Saturday, September 17th, were particularly pleasing to their owner as it was his forty-third birthday. These were: Lou Dillon's half mile to sulky in 58¾ seconds, Hontas Crook's and Prince Direct's half mile to pole in 1:00¼, and Charley Mac's mile to saddle in 2:13¾.

Keeping pace with the widespread movement for larger prizes at horseshows, the National Horse Show Association has raised its offerings to $35,000 for the exhibition to be held at Madison Square Garden in the week beginning November 14. This is an increase of $5000 over the total sum distributed last year, and is said to be the largest amount ever offered by a horse show association in this country.

Ribbonwood 2:09 the champion pacer of Australasia has been sold by Mr. D. J. Price to Mr. A. D. Playfair of Sydney for $5000. Ribbonwood is now in the stud at a fee of twelve guineas, or something over $60. Before selling him Price tried to get a match with Almont 2:12 the Australian pacer, but could not although he offered to allow Almont a flying start, Ribbonwood to go from a standing start.

The two-year-old pacer Billings, jointly owned by J. H. Thayer, of Lexington, Ky., and Ed Gaylord, of Denver, Colo., and in the stable of the former, created a sensation recently by pacing the Lexington track in 2:12½, the fastest time ever made over the course by a colt of that age. He covered the last half in 1:05. Billings is by Birchwood 2:15, dam by Princeton, and was named in honor of C. K. G. Billings.

Mr. A. B. Spreckels' stallion Cupid 2:18, own brother to Sidney Dillon, is the sire of five standard performers—four trotters and one pacer All have records below 2:17, the fastest being Venus II, 2:11¼. Probably not over seven or eight of Cupid's get have ever started in a race, and the showing made is remarkable. Cupid and Sidney Dillon, for the opportunities they have had, are most remarkable sires.

Ray Mead's mare Carrie B., that took second money in her race at Salinas this year, is a very promising pacer. She is by Alex Button, dam Carrie Malone (full sister to Charles Derby) by Steinway; second dam Katie G. (dam of five in the list) by Electioneer. Carrie B. raised a colt this year, and after weaning it paced a mile in 2:16½ with a few weeks' work. She is in foal to Searchlight 2:03¼ and has been named in Breeders Futurity No. 5.

It seems that the Associated Press account of the race won by Bonnie Russell at Empire track, New York, in August, in which it was stated that Bonnie Russell won a heat in 2:07¼, was not correct. Bonnie Russell's fastest heat was 2:10½, and he lacks a half second of being one of the new 2:10 performers of this year. All the papers published on this Coast which received the account of this race by telegraph had the time wrongly stated as 2:07¼.

The sale of Oakwood Park horses at Chase & Co's yards last Monday night, finishes a very fair index of the market in San Francisco at the present time for the class of horses sold. A large majority of the buyers will put their purchases to work drawing light grocery wagons and business buggies. Very few horses were bought by breeders or parties who intend training. The average price $140 is about the figure that light drivers and expressers can be expected to bring in this market.

The Dam of R. W. P.

The statement that the trotter R. W. P. is a son of Maud Fowler 2:21½, dam of Sonoma Girl, is a mistake. Mr. S. B. Wright of Santa Rosa informs us that the dam of R. W. P. was sired by Rosewood, a son of Nutwood. She was a good roadster, but having lost her sight her chief value now is as a brood mare. Mr. Wright has recently purchased from W. H. Lumsden of Santa Rosa the old brood mare Evelyn by Nutwood. She is 21 years old and appears to be safely in foal. She was bred to Sidney Dillon this year. Evelyn is the dam of Ole 2:11, Roblet 2:12, Tietam 2:19, Maud Fowler 2:21½, Nick Russell, trial 2:14, McPherson that was separately timed in 2:14½ in a race and Major Dillon a yearling by Sidney Dillon. Mr. Wright has also purchased the mare Maud Patchen 2:26, record made to high wheel sulky as a three-year-old. She was sired by Idaho Patchen 2:26½ and her dam is Lady Moor, dam of John A. 2:12 and Arthur W. 2:11½ by Grand Moor. Idaho Patchen was sired by Henry B. Patchen 168 (son of Geo. M. Patchen 30), and his dam was Kate Waller by Lushy, son of Ericsson 130, son of Mambrino Chief II. Maud Patchen is not a registered mare owing to the fact that her sire was not registered.

A Handsome Oregon Stallion.

One of the handsomest stallions led into the show ring at the Oregon State Fair was the standard and registered horse Nocturno 33,413 owned by Editor Westgate of the Albany *Herald*. Nocturno is a beautiful black, and a show horse in any country. He is five years old, and was sired by Alfonso 9700 (son of Baron Wilkes and Alma Mater), his first dam Dark Night 2:25½ by Fieldmont 5050 (son of Almont and Maggie Gaines by Blood's Black Hawk), second dam Night by Herod 510 (an inbred Black Hawk that produced several in the list), third dam by Edwin Forrest 49 and fourth dam by Saladin, a son of the great thoroughbred race horse and sire American Eclipse. The blood lines in Nocturno are just what one would look for to produce the handsome, stylish trotter with speed. It is the Hambletonian-Morgan-thoroughbred mixture, such as is found in Dan Patch 1:56¼, Major Delmar 1:59¾, Sweet Marie 2:06¼, Tiverton 2:07, the great three-year-old Alta Axworthy 2:10½, and the champion yearling pacing colt Paul D. Kelly 2:20¾.

Bertha Has a New 2:10 Performer.

Owyho, the four-year-old son of Owyhee 2:11 and Bertha by Alcantara, won the third heat of the 2:17 pace at Readville September 13th in 2:09¼, making the first 2:10 performer for his sire and the third for his dam. Bertha's three in the 2:10 list are Don Derby 2:04½, Diablo 2:09¼ and Owyho 2:09¼. Besides these she is the dam of Demonio 2:11¼, Elf 2:12½, Arner 2:17¾, Ed Lafferty 2:16½ and Jay Eff Bee that took a record of 2:26½ as a yearling. Her daughter Derbertha was a good second in 2:14½ in a race this year and could take a mark that low very easily. Bertha has seven with race records, all below 2:18, five of them in the 2:15 list and three in the 2:10 list. She is without any question the greatest dam of pacers living or dead. She is twenty years old, having been foaled in 1884 and looks good for several years yet. Her last foal was by Searchlight 2:03¼.

Large Importer and Breeder.

Attention is called to the advertisement of Oakwoods Farm, Stockton, Cal., of which Mr. Francis I. Hodgkins is proprietor. This farm is the largest importing and breeding establishment in California that handles draft and coach horses. At the head of the stud is Joubert 40093, a magnificent imported Black Percheron weighing 2100 pounds. He is one of the most noted sires that ever left France. Mr. Hodgkins has recently sold to the Petaluma Belgian Horse Company of Petaluma, the imported Belgian stallion Escape 1299, winner of the first prize at Liege in 1902, also winner of two first prizes at the International Live Stock Exposition in 1903, and considered one of the finest Belgians ever imported to America.

Made a Good Showing.

The Salinas Driving Club which was organized this year for the purpose of holding a fair and race meeting in lieu of the Monterey County Fair, the appropriation for which was cut off by Governor Pardee, held a directors meeting one day this week and received the reports of its secretary, J. D. Kalar, and its treasure, J. B. Iverson. These reports showing that all the indebtedness of the club had been paid, upon motion the club was declared dissolved and its existence ended. The club held a fine fair and race meeting and its officers all deserve much credit for enterprise in carrying it through.

Draft and Coach Horses.

California breeders during the past year have awakened to the fact that draft horses suitable for work in the cities are not in supply equal to the demand. The growth of California cities has been rapid during the past five or six years, while the breeding of draft horses which reached a very low ebb ten years ago has not been revived until this year when the prices offered for good drafters has aroused the farmers to the fact that it pays to raise them. It will take five or six years to make the draft horse supply in California equal the demand, even though every mare in the State, suitable for the purpose, is put to breeding. Good stallions are necessary and up to this year there have been very few high-class horses of the draft breeds in this State.

C. O. Stanton, representing Singmaster & Sons, importers of heavy draft and coach horses and proprietors of the Maplehurst Ranch of Keota, Iowa, arrived in San Jose on the 8th inst. with twenty head of stallions, consisting of Percherons, Belgians, Shires and French coach horses, ranging from two to six years old. They are all registered and selected from the best stock and best individuals among those imported and raised by Singmaster & Sons. They are all splendidly developed and have plenty of bone and substance, offering to the breeders on the Pacific Coast who wish to secure high-class sires of this

One of the Imported Belgians.

description, a rare opportunity. It is importations of this description that greatly improve the strain of horses in whatever part of the country they are taken for breeding purposes. Among the lot brought out here by Mr. Stanton are a number raised at the Maplehurst Ranch all from high-class imported sires and dams and these animals are in every respect equal to those imported. They are all registered but will be sold for less than those that were brought here from the old countries. It is the intention of Singmaster & Sons to make the branch established by Mr. C. O. Stanton at 127 East St. John street, San Jose, a permanent institution. Mr. Stanton is thoroughly posted on the business in which he is engaged and customers who are looking for horses of this description are invited to call at the place or write for particulars. On our front page this week are reproduced from actual photographs taken last week at San Jose by artist S. P. Hill, pictures of a few of the stallions that Mr. Stanton now has in the Singmaster barns.

Hans is No Marvel.

Hans, the trained horse that is creating such a sensation in Germany, is having pages written about him in the American magazines and Sunday papers that is the veriest rot. All his wonderful intelligence in answering questions is manifested by pawing with one foot, and the number of strokes he makes is dictated by a secret sign from his master. He is undoubtedly a very intelligent and well trained horse, but all the sensational stories about his being able to solve problems or answer questions that require reason is all bosh.

Made a Good Season.

The handsome and fast stallion Limonero 2:15¾ by Piedmont, dam by Electioneer, owned by Mr. Harrison G. Arms, made a good season this year at Los Angeles. We believe that every foal sired by Limonero to date is a bay with one exception and that is a chestnut filly. That he will get speed of a high order is certain as he has all the qualifications for a sire. From the sixty mares bred to him this year should come future stake winners and they will if entered in them by their owners.

Strike!—If they don't give you Jackson's Naps Soda when you ask for it.

San Francisco Driving Club.

Members of the San Francisco Driving Club will enjoy an afternoon's sport at Tanforan track on Saturday next, October 8th. The following events have been filled:

First race, 2:35 class—P. Pinnella's Patsy P., W. O'Kane's Billy M., H. Werner's Chatterbox, J. Gleason's Jennie, J. Donovan's Jim, A. Wolff's Lawrence W.

Second race, 2:30 class—H. Werner's Old Glory, R Green's Don L , W. O'Brien's Toughy A., R. Miller's Senator Hearst, V. Verbilac's Bessie, T. Corcoran's Mission Boy, J. Donovan's J. J. D., F. Jensen's Tehama Boy.

Third race, 2:20 class—D. Roberts Even Dale, C. Mitchell's N. L. B., A. Hoffmann's Kitty D., H. Simi's Erosmont, H. Miller's Lady Falrose, J. O'Kane's Sandow.

Last Day at Columbus.

Pacing, 2:08 class, purse $2000.

King Direct, blk h by Direct	(Geers)	2	2	1	3	6	2	1	1
Black Pet, blk m by Amsterdam	(Snow)	7	7	4	2	1	1	3	2
Larrie Ginter, b h by Medyone	(Lucas)	1	1	3	6	5	4	4	4
Dr Madera, ch g by Simmons	(Hudson)	5	5	2	1	2	3	2	3

Pinchem Wilkes, Ben F. and Bob also started.

Time—2:09, 2:07¾, 2:08, 2:08, 2:09, 2:10¼, 2:07¾ 2:09¼.

Pacing, 2:04 class, purse $1500.

Nathan Strauss, b g by Director	(Thomas)	1	1	1
Laconda, b h	(Snow)	2	2	2
Gallagher, b g	(James)	4	3	4
Little Squaw, blk m	(Ceideburg)	5	4	5

John M, and Harold H. also started.

Time—2:04¾, 3:05¼, 2:05¼.

Trotting, 2:09 class, purse $1500, each heat a race.

Jim Ferry, g g by Orange Wilkes	(Wright)	2	2	1
Agniola, b m by Gregory the Great	(Ames)	1	3	7
Snyder McGregor, ch g	(Benyon)	7	1	8
The Roman, b g	(Snow)	6	5	2

Ida Highwood, Palm Leaf, Marian Wilkes and Tuna also started.

Time—2:08¼, 2:07¼, 2:10

Pacing, 2:13 class, purse $1000.

Wild Brino Jr , b h by Wild Brino	(Bedford)	9	3	1	1	1
Lady Bell Brook, br m by Silent Brook	(King)	7	1	3	4	2
Don N., r g by Little Joker	(Valentine)	1	10	2	7	6
Billy J., b g	(Stenee)	4	2	9	2	4
Albrino, b h	(Porter)	2	4	5	6	3
Lyddite, b m	(J. Wilson)	10	9	4	3	5

William M., Online, Master Boy, Marguerite W., Rosewood and Ginger also started.

Time—2:08¼, 2:10¾, 2:09, 2:11¼, 1:11¼.

To Educate Educator's Colts.

M. Henry of Haywards expects to take several youngsters to Pleasanton next week to be trained during the winter. A two-year-old pacing colt by his tallion Educator, dam Thera by Albion, is a very attractive looking as well as a fast colt, and a yearling filly by Ed Kyle (son of Educator) out of the dam of Emma Abbott 2:17¾ is very promising All the Educator colts and fillies are well proportioned and handsome, and have speed at either trot or pace.

No Friction in the Association.

Major P. P. Johnston and J. D. Grover have tendered their resignations as members of the Board of Directors of the Kentucky Trotting Horse Breeders Association. Contrary to daily newspaper reports, there is no friction in the association. Both gentlemen resigned in order to devote more time to their private business affairs.

Will Clark, the fast trotting gelding by Strathway that W. W. Mendenhall sold last spring to W. P. Clark, Jr. for a long price, and that took sick after reaching Denver, has rounded to and was started at the Libertyville, Illinois, track two weeks ago. He finished fourth in the race in which five heats were trotted around 2:20 with the fastest in 2:18. Will Clark was christened Pathway by Mr. Mendenhall, but as he had never started Ted Hayes, Mr. Clark's trainer, concluded to name him for his employer.

The Manufacturer's Risk.

Our readers have an opportunity offered regularly in our columns to test the merits of Craft's Distemper & Cough Cure at the manufacturer's risk. As one's horses and other live stock are exposed continually to the germ diseases, it is a reasonable thing to purchase a bottle of this liquid treatment and keep it on hand both as a tonic to prevent disease and as a ready sure treatment in case one's stock is attacked by the disease. No reader of this journal need be without this valuable remedy. If not accessible to a druggist or an agent, one may send the price and receive a bottle prepaid direct from the manufacturers, Wells Medicine Co., 13 Third street, Lafayette, Ind.

Among the drivers who have teamed Prince Alert during his long and varied career are Curt Gosrell, John Lackey, "R ub" Rush, Barney Demarest, B. T. Birney, Ben Walker, Dave McClary, Mart Demarest, Jack Curry, John Cheney, and last of all Alta McDonald, who drove him what is probably the greatest mile of his career at the recent Syracuse meeting.

Good For All External Troubles.

Elkton, Va., Dec. 6, 1902.

The Lawrence-Williams Co., Cleveland, O.:

I have used Gombault's Caustic Balsam very successfully for a number of years on my horse for swelling, stiff joints, abscesses, etc. I consider Gombault's Caustic Balsam the most valuable external remedy and liniment I have ever seen or used, and keep it on hand all the time. W. S. SOUTHALL.

The Coach Horse.

The large-sized horse of finish and action is called a coach horse or a coacher, and the name will serve to identify him as a separate type, but it is none too discriminative as to the use to which the horse is to be put. The natural definition of a coach horse is one that draws a coach, but as a matter of fact there are not enough coaches in this country—either road coaches or drags or Berlin coaches—to use up in their horsing the output of one small market place. Four-in-hand coaching is a delightful sport, the rarest on land and has only one comparable to it on water, which is yachting, but it is indulged in very limited degree in this country. It is a very costly sport. The Berlin coach, which is a panel body four-passenger vehicle, is somewhat in use in cities, but the landau or the extension brougham is much more in evidence. But there is a variety of vehicles in fashionable use which demand what is called a coach horse, or what is now more commonly known in market parlance as a heavy harness horse. Without entering further into the discussion of this subject, it can be summarized in the statement that the demand of the market has changed from the 16.2-hand coach gelding to horses of substance and finish ranging from 15 to 16 hands. Nevertheless, the sires of the so-called coach breeds must be used to produce these heavy harness horses, and for custom's sake we shall probably go on calling them coach horses.

Much demand has been made on farmers to produce this class of market geldings. Values have ruled high for years while horses of show form and action reach demoralizing values when the whim of some rich horse show exhibitor is in question. This is the exception that proves the rule. as in breeding for heavy harness horses the breeder may produce a sensation and be richly rewarded; but, independent of that possibility, there is a strong, steady and enduring market for horses for heavy leather, to pull the coaches, body breaks, landaus, victorias, opera 'buses, Stanhope phaetons, T carts, dog carts, park gigs, tandem carts and the vehicles of various other types in favor with the rich and fashionable people.

In selecting a stallion to produce horses suitable for such vehicles the qualities sought in the offspring should be manifest in marked degree in the sire. These are essentially beauty of form, style and finish, and action. The form is of prime importance. Much of our heavy leather is now filled by the merest misfits—lean, lank, greyhound-quartered horses, with straight shoulders and straight necks, pinched, cut-up flanks and spindle shanks. The horse in his substance must bear some sort of proportion to the vehicle which he draws. The graceful spirituelle form and refined finish of our highest type of roadsters is exactly fitted to the cobweb construction of our road wagons. The heavy wheels and gears and the paneled bodies of our closed carriages demand horses of a different stamp. Take, for instance, an extension brougham or a Berlin coach. They will weigh from 1000 to 1300 pounds, which is about as much as the average farm wagon with bed. Is it not absurd to think of harnessing a light and graceful roadster that just fits a skeleton road wagon to vehicles of that weight and construction? The sense of proportion between horse and vehicle must be preserved, hence we must require substance in a coach horse. Substance is not mere height. A lathy-built 16 2-hand horse is not a coach horse. He must carry his weight wide out. He must be of rotund, sturdy build—carty, if you please, in his quarters, so long as they are finished well and he is not carty in his head and neck. He must have a wide-spread frame, his middle must be well-ribbed, his back closely coupled, his quarters wide and well turned, and especially must the croup be level and not drooping. A horse that carries his tail between his legs on pacing hindquarters lacks seriously of filling the bill for heavy leather. Now with all this substance—no matter whether the horse be a coh or a 16-hand horse he must be round built—he must have style and finish, and there is the rub. We can get the clean neck with well whittled out throttle, bony, refined head, bright, alert ear and bold eye in a horse of thoroughbred or trotting blood, but the body, the substance required for coach or carriage work, ordinarily is not found in conjunction with it. This is one modern day problem of horse breeding—the union of refinement and finish with sufficient substance for carriage work. Be not deceived. It is a problem and one that has commanded the attention of thousands of bright minds. That it has been satisfactorily solved in a measure is palpable to those who are acquainted with the foreign-bred coach breeds and the hackney in their best estate, but that all representatives of these breeds have been raised to that high estate is no more true than that it would be true to say that all draft horses are ideals in form, weight and quality.

The short-cut to carriage horse breeding in America lies through the use of foreign-bred coach sires on our native mares of blood and finish. Doubtless if our breeders a century ago had turned attention to the founding of a breed of coach horses, we should have had it in rare perfection by this time; but they did not. They elected to breed for speed and secured it. Other men in foreign lands, where the heavy types of vehicles have been in use for centuries, have sought to produce horses to fit them and have succeeded. We are now availing ourselves of the fruits of their labors. By the union of that blood with our own we supply the deficiencies of form, substance, bone and action in our light-made horses and at the same time increase the quality and finish of the foreign-bred horses.

Having in view these requirements, coach stallions in a ring should be examined in their light. Size and substance must be sufficient, bodily excellence must be pronounced, bone must be ample—for it is absurd for a horse with bone no larger than a woman's wrist to be hitched to a heavy carriage—and action must be of the character demanded by the market. The highest stepping breed of horses is the hackney. This action has been bred for and cultivated as in no other breed. And it happens that action on that order is in the highest favor in the market today and likely will continue to be. But this does not argue that all carriage horses must have the high action of the park horse. We have different uses for heavy harness horses, and action cuts much figure in classifying them. In the park horse, to park gig or dog cart or Stanhope phaeton, it is the passing show and the higher he can put them up and follow with his hocks the better price he will bring. But we have much road work to be done—station work, country calling, driving between city and park or country place, and the like. High stepping is of no advantage for this work. Substance and form there must be and some pace. A horse for this work must be able to step along at from 14 to 16 miles an hour when called on, but he will oftenest be driven at 8 to 10 miles an hour and should have the endurance to hold that pace for some hours. When it comes to town work, where the horses stand in shopping or calling for an hour at a time or more, conformation and finish are the chief requisites. Pace is not a prime requisite nor action, but the horse must look well standing and going. These are definite types required by the trade and recognized in show ring classifications.

The stallion of the coaching breeds must not be expected to show the action of the hackney. In at least two types of carriage horse that extravagance of action is not demanded. The action of the coach horse should be clean, free and attractive. There should be a springiness of step, a bouyancy of bearing, and a prompt trappy trot. If this trot approaches the flashness of the hackney step it is no detriment to a horse, but a coach stallion that happens to possess such action should not be set above another of less brilliant step but greater bodily excellence and finish. Form, quality and finish are of more importance in a coach stallion than high stepping. Many a judge, blinded by flashiness of action, has made a serious mistake in his awards, overlooking the more substantial requisites in the stallion which is designed primarily to improve the size, substance, form and bone of our lighter native stocks. As a matter of fact the demand for excessive action is rather limited. Show horses and park horses require it, but the greater number of coach or heavy harness horses are devoted to more serious work, and a big and beautiful horse is demanded, with finish and a top-lofty style and attractive action, rather than the step that "touches chine with knee" at every stride.—*Breeders Gazette.*

The Smith Case.

The following statement of the Robert Smith-Sweet Marie suspension at Providence is from the editorial columns of *Sports of the Times* of New York:

"It is a great pity that Secretary Albert H. Moone, who is secretary of the Providence Association as well as secretary of the Grand Circuit, was not more explanatory and specific when he sent out the telegram last week that Mr. Smith had been disqualified from racing for the balance of the season by the stewards of the Grand Circuit. This opens up an aspect of the case to which no known trotting rules will apply and involves the possibility of a conflict between the Grand Circuit stewards and the National Trotting Association, which cannot benefit either body and may injure both.

What are the facts? At the Providence Grand Circuit meeting R. A. Smith, the driver and lessee of the trotting mare Sweet Marie, was taken out after the second heat and Alta McDonald put up, who went on and won the race. The judges allowed Mr. McDonald $1000 out of the purse and suspended Mr. Smith for the balance of the season, the natural presumption being that they acted under Rule 27, Sec. 6, which says:

Sec. 6. If the Judges believe that a horse is being or has been ridden or driven in other respects improperly at any time during the continuance of the race, with a design to prevent his winning a heat or place which he was evidently able to win, or to perpetrate or aid a fraud, they shall have the power to substitute a competent and reliable rider or driver for the remainder of the race, who shall be paid at the discretion of the Judges, not more than 50 per cent of the amount awarded the horse in the race, and the member may retain the amount paid from the purse, if any, which said substituted rider or driver may win, and if the result of the race shall demonstrate that a fraud was being perpetrated, all the guilty parties so implicated, together with the horse, shall be suspended for not less than one year or shall be expelled. The Judges may waive distance (except for fouls) as to any horse for which they have substituted a rider or driver.

It will be seen at a glance that while the judges inflicted the full cash penalty, $1000, being the net half of the purse, they fell short on the suspension which was only for the balance of the season. Mr. Smith promptly protested the decision and declined to receive his share of the purse money minus the $1000. In the meantime it had dawned upon the authorities of the Hartford Association and all well informed horsemen, although the judges appeared to have ignored the obvious fact, that if Mr. Smith was suspended so was the mare by the above rule, and that she could not start in the great $10,000 Charter Oak Stake, or if she did protests would at once follow and the stake would be held up and the success of the meeting threatened. The judges had in their decision been absolutely silent on the status of the mare. What threatened to be a very serious tangle was suddenly cleared up when Secretary Moone went personally to the office in Hartford of the National Trotting Association and withdrew the suspension of Smith. Up to this time it is clear that Mr. Moone believed that the judges had acted under this rule, that the judges had reconsidered the original decision and that he at once personally notified Secretary Gocher so that Sweet Marie could take part in the race. Sweet Marie started and was beaten, though she had the benefit of a first-class professional driver who, however, could not do as well with her as her discarded driver.

Now comes the anti-climax. The stewards of the Grand Circuit hold a meeting and confirm the original sentence of the judges with regard to Smith, but expressly exempt Sweet Marie, who is not barred. As there are no rules in the N. T. A. code which apply to incompetency, which we are told was the ground for the severe sentence of the judges, we must dismiss this reason. If they tried to enforce the rules of the N. T. A., and it looks as if they did, as the sentence was duly registered in the office of that association, then they must have realized that they had either gone too far or not far enough, hence their reconsideration, which enabled Secretary Moone to withdraw the suspension at Hartford. Now the stewards have gone over the heads of the Providence Association, the judges and the N. T. A., and have issued a sentence which, while it may be perfectly equitable, cannot be sustained under the rules of the associations of which the Grand Circuit organizations are members. It the question of incompetency is to raised and to be a sudden bar to the occupations of drivers, and other men connected with the turf, the stewards would do well to apply it to their own officials and it is very questionable whether the starters or the judges would get a favorable verdict, yet no one doubts their honesty.

Now what is the possible result of this imbroglio? Clearly, according to the existing law, if Mr. Smith is disqualified so is the mare. It is all very pleasant to say that the mare can start and we will even suppose that Mr. Smith is quite willing that she shall do so and that a professional driver in good standing shall drive her, but in every race she starts in at Columbus, Cincinnati and Memphis, for instance, she may be protested by other owners of starters and the purses held up. It will not do to say that the specific dictum of the stewards supersedes the rules of the N. T. A., for these associations were members of the N. T. A. before the Grand Circuit was made a corporation, and advertised all their meetings under N. T. A. rules. But supposing all the starters pledged themselves not to protest, the danger is not over, for a heavy bettor could wait till the race had started and could raise the question of the mare's eligibility in the race, which would again hold up the purse and raise pandemonium in the ring. As a straight question of turf law, common law equity, commonsense and their own conditions the associations so far as this season is concerned must obey the rules of the N. T. A., and those rules clearly say, that if Mr. Smith is disqualified so is the mare, the stewards to the contrary notwithstanding."

The Best Liniment.

W. F. Young, Springfield, Mass. Shabbona Grove, Ill.

Dear Sir:—We have given your Absorbine a test and think it is the best liniment we have ever used. Yours respectfully,

FLEWELLIN BROS.

Absorbine $2 per bottle, express prepaid.
Address W. F. YOUNG, P. D. F., Springfield, Mass.

HIDALGO'S GOSSIP.

Just think of it, five owners with over $100,000 to their oredit this season, at the East. In 1903 the late Hon. William C. Whitney was tho only one that had over $1000,000 written opposite his name; and in 1902, not a single owner in America had that much, hut there were more owners with from $50,000 to $80,000 chalked up to them than was ever known before in the history of American racing. This year it seems to he a rich man's game, so far as the Atlantic seahoard is concerned. Here are the exact figures: Herman B. Duryea, $172,737; James R. Keene, $144,823; E. R Thomas, $131,580; Sydney Paget, $111,017; Newton Bennington, $97,293.

These figures were compiled hy Chicago Racing Form up to and including Septemher 15th hut, on Saturday last, at Gravesend, Mr. Bennington's filly Beidame won the second Special, one mile and a half, the added money alone in which is $5000, exclusive of the sweepstakes (18 nominations), so that Mr. Bennington is now over the $100,000 mark and occupies a front seat among the good players. The above figures make over $570,000 for the first four men, not counting Mr. Bennington at all. That twenty owners of gallopers in America should each win upwards of $30,000 in ahout three-fourths of a season, is enough to make the hones of old Planet turn over in his grave near the Big Spring at Woodhurn station not far from Midway, in the state where old Joseph Shawham first taught mankind the art of converting corn into something else hesides hoe cake and pork.

Planet was the first great racehorse I had seen after I grew old enough to know a good horse from a had one. He won $31,105 at four years old and $22,850 at five, heing the largest individual winning horse in either of those two years. And here are Jim Arthur and Sam Hildreth each with over $31,000 opposite their names and not a first class horse in either harn, though each has several nags that take an awful lot of heating. Planet was "the traveling, conquering terror" of the Atlantic seahoard from 1858 till 1861, after which "the late unpleasantness" prevailed to such an extent that Southern horses dared not visit Northern tracks for fear of confiscation. It is hard to imagine a much more trim huilt or beautifully finished horse than Planet. His hind leg was as broad and flat as that of imp. Leamington and he had as much hetter temper as could he imagined.

When Peter Taylor and Ned Leonard took on the gray mare Comet, known in Oregon as the "Sim Oldham mare," they landed in New York and went over to Long Island to rest the old mare up at the Union Course. N. B. Young, commonly called "Bony," was there with Planet, Exchequer, Slasher and Fanny Washington. Taylor got talking about the old mare one day and telling what she had done and, after listening respectfully to him for a few minutes, Mr. Young said: "I'll tell you what I'll do with you, Taylor; I'll run Planet against your mare with anything from 85 to 105 pounds on each—he's four and your mare is seven—at one mile, for $1000 to $3000; and if she heats him I'll give you $10,000 for her, for I know right where I can go and win her out in her first start." This hold defi met with no response.

The value of racing prices has increased a good deal since then, to such an extent, in fact, that Barney Schreiher, who is eighth on the list, will prohahly close tho season with three times as much money to his credit as had Major Doswell when Planet and Fanny Washington were carrying all hefore them in 1859 and 1860. I rememher when Mr. Kenner's horse Panic, ahout the last of the Glencoes, heat Planet a three-mile dash at New Orleans, and then how Dr. Weldon's gray colt Lightning hy Lexington came out and heat them hoth at four-mile heats in the mud. Ahout four weeks after that I was hauled up hefore Goneral Beauregard for refusing to tako tho oath of allegiance to tho Confederate States of America. The little curly-headed Creolo told us (there were several dozen othors in tho room at the timo) we would have to leavo tho South in ten days, and if wo wore caught in any other Southorn city wo would bo imprisoned. So thore wore 283 of us marched down to the Jennings & Laughland wharf and put on board the steamer Bienvillo for New York and Havana. I left the Bienvillo at Havana and took the Quaker City for Aspinwall, whoro I found tho railroad roady to take me to Panama, and thence hy tho Goldon Gate, commanded hy Captain Dick Whiting, hack to dear old San Francisco. I was in New Orleans two years ago, on my way hack from England, and on walking down Canal street I pointed out to my wife tho huilding where Genora' Bourogard's clerk had handed mo a certificate to tho effect that I was a suspect hut had roported at [illegible], and that, having dono so, was entitled to protection hy the provost guard until April 21, 1861.

I shall never forget that walk from Beauregard's office down to the dock where the Bienville lay. The sidewalks were thronged with people and we got such kindly criticism as this when he passed along:

"Oh, the d—d mackerel-catchin' —— of ——. Hasn't any of you fellows got a rotten egg or two for them?"

"Look at the hloody pock-and-molasses Yanks. I hope the ship will sink and drown the hloody hastards."

"There goes yer codfish aristocracy, the bloody psalm-singin' —— of ——. Give me some taters and I'll homhard 'em."

Col. Boh Wheat, whom I had known in California and who was afterwards killed at Chickamauga, walked along side of me holding my right arm in his left and a hig navy revolver in his right. At the foot of Poydras street a demonstration was made to moh us. Big Boh raised his pistol and said: "Stand back men. If you are hrave men, you will not harm these poor devils for they are unarmed. My orders are to place them on hoard that steamer, and the first man that interferes with me will get shot!"

That settled it. We got ahoard the Bienville all right and twenty-two days later I was lying under the shade of a hig oak tree on Henry Williamson's ranch, with Bonnie Belle and old Maria Downing nibhling the grass alongside of me. And that was forty-three years ago last May. As old Colonel Gift once said to me, "Don't it heat thunder how long we live!" Well, it's all over now and thank God for it. I have lived past the patriarch's proverbial limit of three score and ten, and have lived to see a united republic and the hlue interwoven with the gray. God grant that the question of secession is settled, once for all.

One broad, unhroken continent,
One flag from shore to shore!
One hope, one heart, one love, one land,
One Union evermore!

Los Angeles, Sept. 27, 1904. HIDALGO.

Cincinnati Grand Circuit Meeting.

Sept 26—Pacing, 2:20 olass, purse $2000.

The Investor, Caloino, Lady Oail Hamilton, Kirkwood Jr. and Bonner also started.

Time—2:10¼, 2:09¼, 2:10, 2:11, 2:11, 2:12¼.

Government Experiment with Trotting Blood.

The Bureau of Animal Industry of the United States Department of Agriculture is ahout to inaugurate a series of experiments for the purpose of ascertaining the value of the American trotter as a source of heavy harness horses. Last winter Congress appropriated $25,000 to the Bureau of Animal Industry and the trial noted ahove will he held in connection with the Colorado Experiment Station. In announcing the trial D. E. Salmon, chief of the hureau says: "There is no hetter opportunity to he found in horse hreeding than to produce a type of heavy harness horse from the trotter, and the record of trotting bred horses in the show rings during recent years seems to indicate its possihility." The statement is one with which all students of hreeding will agree. European governments and private individuals have experimented with the hackney, the French and German coach horse and have developed ahout all the good there is in these particular breeds. It would be folly for this government to attempt to improve on the fixed hreeds already noted, the more so as there is a big field in connection with the American trotter that has never heen thoroughly developed. The average hreeder of the trotter in his haste to get speed has neglected breeding for size and appearance, although more attention has heen paid to these points in recent years than was the case when every hreeder was "speed mad." More than once it has heen pointed out that proper selection of the trotter would result in securing a fixed type. The American trotter is a versatile animal and he has succeeded in spite of neglect hecause of his sheer merit. This is particularly true in the show ring. The breeders have paid little attention to this phase of the hreeding question hut the dealers, more wise to the demand of the hour, have made selections which have won over all competitors. At first it was the fad to so disguise the trotter that he was mistaken for the hackney hut at last his success was so pronounced that it was found to be futile to disguise the fact that many of the hlue rihhon high steppers were not only trotting hred hut discarded race horses showing under assumed names. After the dealers so completely demonstrated the fact that the trotter is the show horse par excellent a few breeders reluctantly accepted the conditions hut still there has heen little if any attempt to hreed a type of show horses. More attention has heen paid to the selection of hroodmares in recent years yet the show horses have heen developed from the speed discards. Now that the government has taken up the question it is possihle hreeders will he educated to the point where they will find it advisahle to develop a hreed of heavy harness trotting hred horses of show ring calihre for which there is so much demand at the present time. The venture at the Colorado experiment station will be watched with interest, more especially hy those who realize that there is a great and profitable field ahead for those hreeders who will profit hy the experiment.—*Chicago Horseman.*

Dan Patch All Right Again.

When the news was telegraphed from the East that the great pacer Dan Patch 1:56¼ was suffering from strangulated hernia at Topeka, Kansas, every horseman in California felt that the days of the champion harness horse of the world were numbered and that his death would he a national calamity. When it was afterwards learned that an impaction of the howels was the ailment and that Dan Patch was improving there was general rejoicing as no horse has more friends or admirers than the son of Joe Patchen. This journal received on Tuesday of this week the following letter from Mr. M. W. Savage, proprietor of the International Stock Food Company and owner of Dan Patch:

MINNEAPOLIS, MINN., Sept. 23, 1904.

EDITOR BREEDER AND SPORTSMAN, San Francisco, Cal.—DEAR SIR: Yesterday at my farm I gave Dan Patch five miles of jog work. He has entirely recovered from his illness and is strong and vigorous. Impaction of the howels does not usually leave any had effects, and we expect Dan to he at the top of his speed at Springfield, Ill., Oct. 6th. He will also fill several other dates after the Illinois State Fair, and we helieve he will go some sensational miles hefore the close of the season.

You can imagine that I am extremely happy to report these conditions in view of the fact that Tuesday evening, Sept. 13th, Dan was given up as heyond hopes of recovery hy three veterinary surgeons at Topeka, Kan.

He arrived at my farm Tuesday, Sept. 20th, where he regained his strength very rapidly.

Very truly yours,
M. W. SAVAGE.

Dr S. A. Tuttle— Boston, Jan. 20, 1886.
Having used Tuttle's Elixir for speedy cuts on my mare, and enlarged cords and for bunches on horses, I think it has no equal; and having used your Condition Powders for my horse when he was scouring, and I could not get anything to stop him until I tried your Powders, and I think them the best Powder in the market, and I can't say too much in recommending them to any one having a horse out of condition.
JAMES N. STUART, 21 Haverhill St.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16 -Close season in tidewater for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tidewater.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 8, 9—Los Angeles Gun Club. 17th semi-annual tournament. Blue rocks Sherman grounds.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Sept 28, 29—Valley Fair Kennel Club. Initial show. Brattleboro, Vt. H. C. Rice, Secretary, Brattleboro, Vt.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas Mortimer, Superintendent.

Oct. 5, 8—Spokane Kennel Club. Spokane, Wash. W. K. L. A. B. Jackson, Secretary.

Oct. 10—Brunswick Fur Club. Foxhound show. Barre, Mass. B. S. Turpin, Secretary.

Oct. 12, 16—Walla Walla Kennel Club. Walla Walla, Wash. Geo. L. Mason, Secretary.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

Oct. 25, 28—World's Fair Dog Show, St. Louis, Mo. F. D. Coburn, Chief of L. S. Dept., St. Louis, Mo,

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Sept 30—British Columbia Field Trial Club. Steveston, B. C. Norman F. Tyne, Secretary-Treasurer, Vancouver, B. C.

Oct. 11—Pacific Northwest Field Trials Club. ————, Wash. F. R. Atkins, Secretary pro tem, Seattle, Wash.

Oct. 24—Missouri Field Trial Association. Sturgeon, Mo. L S. Eddins, Secretary, Sedalia, Mo.

Oct. 24.—Ohio Field Trials Club. Washington Court House, O. G. R. Haswell, Secretary, Circleville, O.

Oct. 25—Connecticut Field Trial Club. ————, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Oct. 31—Monongahela Field Trial Club. Ohiong, Ill. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 1—Sportsmen's Field Trial Club. Clare, Mich. Erwin C. Smith, Secretary, Midland, Mich.

Nov. 7—Independent Field Trial Club. 6th annual trials. Hntsonville, Ills. H. S. Humphrey, Secretary, Indianapolis, Ind.

Nov. 8—Western Beagle Club. Inaugural trials. Oregon, Ills. Reno B. Cole, Secretary, De Kalb; Ills.

Nov. 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Kennel Club. Field trials. Clay City, Ind. C F. Young, Secretary, Clay City, Ind Week following Ills. Ch. trials.

Nov. ——National Beagle Club. 11th annual trials. Grafton, Mass.

Nov. 15—Michigan Field Trial Club. ————, Mich. Chas. E. Sisson, Secretary, Muskegon, Mich.

Nov. 15—Central Beagle Club. 9th annual trials. ————. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 29—Virginia Field Trial Association. Martinsville, Va. C. B. Cooke, Secretary.

Dec. 3—Continental Field Trial Club 10th annual trials. Thomasville, N. C. John White, Secretary, Hempstead, L. I.

Dec. 12—Alabama Field Trial Club Huntsville, Ala. J. M. Kirkpatrick, Secretary, Huntsville, Ala.

Dec. 12—Pointer Club of America. 5th annual trials. C. F. Lewis, Secretary.

Dec. 17—Eastern Field Trial Club. Waynesboro, Ga. Simon C. Bradley, Secretary-Treasurer, Greenfield Hills, Conn.

1905

—— ——American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Am. Field Publishing Co., Chicago

Jan. 9—Pacific Coast Field Trials Club. Bakersfield. Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco, Cal.

Jan. 10—Georgia Field Trial Association. Albany, Ga. P. M. Essig, Secretary, Atlanta, Ga.

Jan. 10—Texas Field Trial Club. 3d annual trials. ————, Tex. T. A. Ferlet, Secretary, San Antonio, Tex.

Jan. 16—United States Field Trial Club. Grand Junction, Tenn. W. B. Stafford, Secretary-Treasurer, Trenton, Tenn.

English quarantine regulations as regards dogs are said to be responsible for the death of Champion Cairnsmuir Bull's Eye, one of the best wire-haired Fox Terriers ever seen in a show ring. Bull's Eye was owned by G. M. Carnochan of Riverdale-on-the-Hudson, and his owner shipped him last April to England with no other object in view than that of throwing down the gauntlet and showing Great Britain that America could produce for the show ring as good dogs as were raised in the old country. Cairnsmuir Bull's Eye was bred by Mr. Carnochan, and was whelped June 11, 1902, by Barkby Ben out of Cairnsmuir Marjorie by Matchmaker out of Allerton Flirt by Master Bristles out of Nell; Matchmaker by All Bristles out of Oronsay Value.

It is better not to inject water or any other liquid into the ears of a dog for canker. Have the ears well cleansed with absorbent cotton saturated with ether and fastened to the end of a small stick, care being taken not to injure the interior of the ear; then dust into the ear a small quantity of finely powdered boric acid; it answers best to blow the powder into the ear by means of a quill or small glass tube. Repeat this treatment twice daily for a week and then once daily until cured.

How I Killed a Grizzly.

[By Hidalgo.]

We had been out nearly a month. We had crossed the Colorado desert, followed for a way the old Salt Lake trail, and found gruesome relics of those fierce pioneer days. We had hunted the foothills of the grand old Rockies, and got our antelope where they still range in herds of hundreds; we had shot our bighorn sheep and some elk, and were happy and strong from the rough outdoor life. We had traveled 500 miles with pack horses, rarely stopping to put up the tents, and we were just fit. About the campfires we heard the stories of the old days of fights with Indians, of desperate times on the alkali desert, of prospecting disappointments, shootings and strange, exciting game hunts. One of the men had recently fought a grizzly and his arms and face were terribly disfigured by deep scars made by the bear. The year before a hunter was caught in his bear trap in the woods by both hands and not found until spring.

Bears are not at all common in Wyoming, and like all wild animals they will run from man in most cases unless cornered, when they will fight with all their tremendous strength. We saw bear tracks frequently, but had seen none of the great grizzly. Mornings in the snow about the camps in the higher mountains we found tracks of bear, mountain lions and wolves, but had not yet seen any of the animals themselves. When in the woods in company we never thought of them, but when alone one wondered at times what he would do if he should come on to a real old bear.

At last, one afternoon, I was alone some miles from camp at Two Ocean pass, thinking only of some big bull elk tracks which I was following in the snow. I was riding on a high ridge, heavily wooded and covered with down timber, when an opening in the forrest showed a little park away down in the valley. In the middle of this park of perhaps twenty acres was a clump of cedars, one big tree with branches clear to the ground, with a few little ones sprouting about it, and there I saw my first big bear. He was very busy working away on the carcass of an elk which we had killed there a few days before. For some time I looked at him, watching him through my German field glasses. He was simply tremendous. This was my chance. The stories of danger and escapes of hunters flashed through my mind. I could not decide to leave him; I was a hunter, and my plain duty was to try for him. I might never see another bear in my life. The longer I looked the less I liked the prospect, but I could never forgive myself if I went away without a try, so I made up my mind to go for him. I rode a half mile around on the ridge to get the wind right and put the clump of trees between us, and then down a thick hillside to the edge of the timber, where I dismounted and took my 8mm. Mauser from its scabbard. I started to walk to the trees and then stopped. I felt in my pockets, took out a coin—heads I go on, tails, back; heads it came. Go on it is; but wait, let's try for best two out of three; heads again—I must go on now; so stealing on through the soft snow, at last I got into the little trees, and I could hear him grumbling and growling over his feast.

Carefully moving, waiting for a good balance at each step, at last creeping under the branches I reached the big tree trunk; not a tremor, not a thought of fear, nothing but concentrated, hungry passion for the killing. With senses sharpened to the highest pitch I could hear anything; my eyes caught the slightest movement of every twig; I smelt the odor of the rotting carcass. At last I could see him, his nose buried in the elk's entrails, pulling out huge masses, gulping and gorging in the horrid stuff, tearing with his mouth and claws; growling, gurgling and spluttering in the clotted, bloody, rotting mass, only stopping to look around quickly with his bloodshot eyes, and to listen for a second now and then. Revolting and awful, there he stood, side to me, enormous at only twenty-five feet.

With the most deliberate and anxious care, I rose behind the tree, examined my rifle, felt for more cartridges, took out and opened my big clasp knife, put one foot on the lowest branch and one arm over a higher one. With electric speed my thoughts covered everything; I was ready to shoot and ready to climb the tree. I studied the branches for the best way; I sighted along the rifle barrel, steady as steel; I sighted again and again and selected with all my judgment the place where his heart must be. He was a little up hill, above my eyes and facing rather away from the tree. I fired and reloaded. I did not move; neither did the bear. What had happened? He stood as a rock. I saw no sign that he had even heard the shot. Should I shoot again? Of course, fill him full of lead. How long did it take to fire the second shot? An age, I know; but just as I was about to pull again, standing at the time with rifle sighted at his shoulder, he began to sink down; no swaying, no side motion, no struggle; he just sunk down on his legs until his body lay flat on the ground; not sidewise, but straight, with his nose between his paws. I waited and waited. The excitement was passing, the high tension loosening, and I got cold and shivery; at last he must be dead.

I placed my foot to the ground and let go of the limb with my hand, when my knees collapsed and I tumbled to the ground, shaking like an aspen leaf and scared to the utmost; my legs refused to support me and my hands were out of control. After the greatest effort of will power I got my little flask of whiskey and drank it empty as so much water, and in a moment regained my self command, when I went up to him cautiously, with finger on trigger and muzzle pointed. I poked him with the barrel. He was dead. My one shot pierced his heart and broke his backbone.

GOSSIP FOR SPORTSMEN.

HUNTERS IN A PREDICAMENT.

Seldom it is that, in this State, there is chronicled a story detailing the hardships and, in fact, dodging the Grim Reaper, of hunters by stress of weather. Such, however, was the experience, last week, of Jas. H. Strange and Wm. De Larose of Happy valley, Shasta county, who got lost in the mountains of Trinity county near Minersville during the heavy storm last Friday. The two were on a business trip to the northern part of Trinity, and while in Minersville they decided to go out on a hunting trip Friday morning. Despite the threatening weather conditions they believed they could make the trip safely. Shortly after they started they came onto a bear which was only wounded by their shots. After tracking the animal for a time they lost its trail and discovered that they also were lost.

The threatened storm had by this time broken forth in all its fury and the snow began to fall heavily. They were unfamiliar with the region and vainly tramped about all day long endeavoring to locate the town of Minersville.

Darkness finally came on and shortly De Larose succumbed to fatigue and cold and could go no further. Strange to say, they had but one match only in their possession and this slender chance for a fire and warmth was all that lay between them and much suffering, if not death for one or both ere daylight. Carefully they arranged a small pile of kindling wood which they split from a rotten log they discovered. The attempt to light the fire was, luckily, successful. Had the match gone out, De Larose declared afterwards that he is certain he would have perished before morning, for by this time the snowstorm was severe and the cold intense. The little blaze they started was finally nursed into a cheerful fire and with the aid of larger pieces of wood and dry branches they were fortunate in finding they soon had a bonfire going by which they huddled all night long. After daylight, on a renewal of their search for the little mountain town they had left the day before, they were lucky in locating it and then reaching shelter and comfort in due course. Neither hunter was much the worse for the adventure, but both believe they had a close call.

COAST RIFLEMEN ORGANIZE.

The Pacific Shooting Band, composed of all the prominent shooting societies and clubs of California, is organized. Delegates appointed by the shooting clubs of California met this week and effected the organization, in compliance with the expressed desire of the clubs they represent. Captain F. A. Kuhls, who was president of the national organization when the successful tournament was held at Shell Mound Park three years ago, was chosen temporary chairman, and T. J. Carroll was elected temporary secretary. At the next meeting, which is to be called by the chair, committees will be appointed to draft a constitution for the government of the new organization, which is to include all the clubs on the Pacific Coast and as far East as Denver, Col. The following delegates represented their respective clubs: San Francisco Schuetzen Verein—Captain Henry Stelling, Kaufman Wertheimer, Lieutenant Henry Meyer; Independent Rifles—H. Gaetjen Jr., C. Andrews, C. Iverson; California Schuetzen Club—Abraham Rahwyler, T. J. Carroll, Fred Levers; Germania Schuetzen Club—Herman Huber, Clarence M. Henderson, Charles F. Theirhach; Pacific Indoor Shooting Club—J. Kytka, Max Kolander, F. V. Kington; Golden Gate Rifle and Pistol Club—W. F. Blasse, G. E. Frahm, B. P. Jones; Turner Shooting Section—Joseph Strauh, D. Davidson, Charles Peach; Shell Mound Pistol and Rifle Club—H. P. Nelson, Henry Windmuller, A. M. Paulson; Gruetli Shooting Section—F. Werlen, G. R. Hauser, P. Simmen; Norddeutscher Schuetzen Club—A. Westphal, F. Thode, John Gefken; Sacramento Helvetia Rifle Club—Captain F. Rustaller, J. Gruhler, Jacob Meyer; Kriger Shooting Section—Charles Weggenmann, G. Braun, Fritz Kaiser; Eintracht Shooting Section—Captain F. A. Kuhls, L. Schmidt, C. Von Hartwig.

METHODS USED TO LURE BASS.

The native method for fishing for black bass of the large mouthed variety in many of the southern states, where the bass is called a trout, is with the "bob." This lure is usually made by tying a piece of the tail of a deer on a gang of three hooks, sometimes adding a strip of red flannel, so that the hooks are completely covered. This mode of fishing with the "bob" is akin to the "skittering" of the northern and eastern states, although the "bob" line is a short line, hardly more than five or six feet; while the "skittering" line is twenty feet or more long on the cast, and the bait is a live frog or a piece of the white pickerel belly and sometimes a dead minnow and even a colored rag. The bait is cast the full length of the line and then "skittered" back to the angler in a series of short jerks which alternately allow the bait to sink a few inches below the surface and draw it to the surface. The "bobber" of the south is paddled slowly along the edges of the water lilies or other vegetation, and when a bass takes the hook, it is landed incontinently into the boat. No reel is used, but a long cane pole is always in service. Dr. Henshall tells us that Bartram, the traveler, described bobbing as practiced in Florida nearly a century and a half ago.

In the majority of written articles on black bass fishing the artificial fly plays a very important part. Fly-casting is very attractive as a theory, and the

rising of the gamy small mouth black bass to a fly is a feature of nearly all the stories. According to a local expert with the rod who has fished for nearly every kind of fish that swims, the black bass does not, as a rule, rise to a fly, and the surest way to catch the bronzeback is to use some one of his favorite baits. Not that the bass will never take a fly, but except at certain seasons, and then it is usually the smaller bass, they are not apt to take a fly and almost any time they will take a bait when they refuse to rise to the fly. The bass is capricious and sometimes will not take anything in the shape, but according to this local angler it is a bait and not fly which will most often tempt him to "strike."

TIPS FOR ANGLERS.

Cork handles are softer and cooler to the hands.

In fly-casting aim for perfection and not for distance.

Field mice make good bait for large trout and bass.

Hard places to fish are just where you will find fish.

Helgramite, found under stones in brooks and rivers, is good bait for bass.

Throw bread or bones in shallow water to attract minnows. They will hover around.

Size of line in stream fishing, use G. or H.; for lake fishing, sizes F. and G. are the best.

A kinky line can be unraveled by towing it behind a boat or trailing in fast running water.

Be sure to unreel and dry your lines when you get through. Never leave a wet line over night on the reel.

Black bass run in pairs during the summer months. If you catch one look out for its companion.

Fish don't bite at all times to satisfy hunger. Sometimes they strike from greediness or viciousness.

Dry your flies by sticking them under you hat band or around it. A few dozen can be accommodated in this manner.

In fly-fishing have the wind at your back, the sun before you and do not let the line touch the water that is the spot for you fly.

In trolling for bass, row only to keep good motion of your bait. Row slowly, about three miles an hour. Make it swerve or spurt.

Rods for bait fishing should be six to ten feet long and weigh five to ten ounces; for fly-fishing, a rod seven to eleven feet long and weighing four to eight ounces is the proper caper. For trolling use a rod six to nine feet and weighing ten ounces or more.

DUCKS PLENTIFUL.

From nearly all the hay counties marsh districts comes the glad tidings for the duck hunters that birds are plentiful. The recent rains, if at all, scattered the birds temporarily. The ground everywhere was dry and parched and soaked up the downpour too rapidly to engage the time and attention of ducks more than a day or two at most.

Reports from the north, Alaska, British Columbia, Washington and Oregon are to the effect that mallard and sprigtails have not been in years so numerous.

Meanwhile preparations for the opening of the season on October 15th is now a pleasant and absorbing task with thousands of sportsmen. Shacks have been placed in order, boats and blinds overhauled, ponds baited, decoys furbished up and strung, and numerous necessary details looked after to ensure an enjoyable and successful shoot on the opening day.

Referring to decoys, we might suggest, that it is not a good plan to set out bright colored and newly painted decoys during the early days of the season. As a rule, new decoys are painted to imitate a bird in full winter plumage. The birds do not get in their best plumage until about the time for mating or near the end of the shooting season. Decoys that are dulled in color and design, even the old stagers that have on them a few scales of last season's mud are more in keeping with the appearance of the early birds than some of the gorgeous and immaculately perfect imitations that are much in vogue during the fall and early winter shooting days.

TROUBLE FOR SOUTHERN SPORTSMEN.

War has again broken out between the peat-land farmers about Anaheim Landing and the Balsa Chica Gun Club. Forty farmers have been forcibly ejected from the ranches at Anaheim Landing and others will follow. The trouble reached its height last spring, when the farmers decided that they had a right to interfere with the club's big dam, built to create a wild duck feeding pond.

The club is composed of wealthy Los Angeles men, who have large preserves in the locality. One night a body of armed farmers sought to blow up the dam and engaged in a pistol fight with the guards. Arrests followed.

The farmers then attempted to enjoin the club from maintaining the dam, alleging that it destroyed their celery fields. They lost and the club commenced ejectment proceedings, which will affect over one hundred families. The Superior Court of Orange county returned judgments against forty-two farmers, who were immediately ejected by deputy sheriffs. The ranchers in the neighborhood are raising a fund with which to take the case to the Supreme Court. The farmers are foreigners.

STRIPED BASS FISHING.

Salt water devotees of the rod have been getting some fair bass fishing recently at the various resorts. The impression prevails among the experienced anglers that the sport will pick up materially from now on.

In San Antone creek and its confluents the striped beauties are becoming quite numerous and evidently of a larger size than usually found in those creeks. Last Sunday Al Hudson landed a 23 pounder. Besides this fish numerous other and smaller fish have been taken by different anglers.

In the "straits" the outlook has been good for a week. Various members of the Pacific Striped Bass Club have been getting a few fish. Last Sunday, we believe, the largest fish taken in the "straits" during the day scaled 15½ pounds.

At Rodeo and San Pablo the striped bass have been very much in evidence. The total catch at the latter fishing ground last Sunday was 38 fish.

Reports from Crockett are to the effect that many striped bass are taken at that point daily. The fish are caught from the wharf by bait anglers and are also taken by fishermen in boats who troll in the eddies along the shores of Carquinez straits. The best results on the trolling lines were accomplished with No. 4 spoons, upon which fish weighing 15 pounds and more have been taken.

ENLARGED CLUB PRESERVE.

In addition to the large preserves already leased by the Santa Rosa Gun Club at Merazzo, they have secured another tract of 800 acres at that place and will shoot on it this winter. O Frank Leppo and County Clerk Fred L. Wright of Santa Rosa went over to Merazzo last week to complete the negotiations whereby the gun club would secure the property of Andrew Ferena for a preserve. The tract acquired is a splendid hunting ground for ducks and geese, and the local sportsmen have long wished to have it in their possession.

Reports from Point Reyes are to the effect that the recent rainstorm, as we premised, brought in a run of salmon and steelhead. Mr. S. A. Wells saw a number of fine big fresh run salmon on the Paper Mill last Sunday.

Meanwhile rods and tackle are getting a good overhauling and the sixteenth of October is awaited with pleasant anticipation.

DOINGS IN DOGDOM.

A GOOD NICK.

Mr. Albert Betz, the popular secretary of the Pacific Coast Field Trials Club was recently presented by Judge Chas. N. Post of Sacramento with a high class English Setter puppy two months old. The pup is one of a litter of six out of that quality bitch Merry Heart by Fairlaod Dude a handsome straight bred Llewellyn owned by W.S.Baughn Ridgeville, Indiana. Dude it will be remembered was at Gabilan Kennels, Hollister for a few months, but is now back in Indiana. Merry Heart's career and the performances of her ancestors are both notable and too extensive for elaboration here, she is regarded as one of the best English Setter bitches on the Coast today. So well are these puppies thought of that the balance of the litter will be retained by Mr. Post and Jos. E. Terry, by whom they will be developed for future field and field trial work.

A DOG FOR FALL SHOOTING.

Dr. C. E. Wilson offers this week, in the kennel advertisement column, an opportunity for the purchase of a fast and stylish, well bred English Setter. The dog is broken on California quail, "bobwhites" and prairie chickens and should make a most desirable dog for this season. His sire Clipper W. is a well known field trial dog and a classy worker to the gun

ENGLISH DOGS MUST BE REGISTERED.

On the first of August the new regulation of the English Kennel Club came into force decreeing that all dogs, whether exhibited at kennel club or licensed shows, must be registered. It may here be remarked writes Fred Gresham, that up to about six years ago the greater part of the dog shows that were held in various parts of the country were not controlled in any way by the Kennel Club, with the result that all sorts of objectionable practices could be perpetrated by exhibitors if the latter were disposed to adopt them. It was to obviate these that the authorities who look after the interests of those who keep valuable dogs, established a system of granting licenses to all these unrecognized shows and putting them on the same basis, to a certain extent, as those for which the rules of the club were granted, inasmuch as they were brought within the provisions of Rule XII. of the Kennel Club, which deals with discreditable transactions on the part of exhibitors or breeders. Registration of the exhibits at these licensed shows, however, was not demanded, and the fact was overlooked that under the then existing circumstances there were other discrepancies the continuance of which were undesirable. To these we drew attention on more than one occasion, and suggested that universal registration should be enforced, and absolute control of licensed shows taken over by the kennel club.

Mr. John H. Schumacher, a prominent sportsmen and field trial enthusiast of Los Angeles, arrived in this city on Thursday on his return from a six months' trip in Europe. His stay here was brief for he took the evening train south the same day.

Olive oil is, as a rule, a much more safe aperient to use when in doubt than castor oil, which, when given by an ignoramus, gripes the dog and will frequently kill him as quick as a dose of poison. Never give a dose of oil or any such medicine unless you feel sure you know what you are giving it for. If you don't know what is the matter with the dog, don't give castor oil.

Talks to Dog Owners.

WALKING PUPPIES.

One of the greatest difficulties that beset the owner of an extensive kennel is the disposal of his young and growing dogs. A breeder on a large scale must naturally possess a considerable number of immature animals, a few of which he may feel confident will develop into something beyond the ordinary, but as has been observed above puppies often alter so wonderfully that it is not always easy even for an expert to discriminate between them. Consequently, an owner, when he feels that their blood is good, can scarcely be blamed if he shrinks from destroying the puppies which he believes will grow into valuable dogs; whilst if he lets other people have them there is a greater danger menacing him, inasmuch as his best puppy may get into the hands of a formidable rival. On the other hand, there is the knowledge that probably, if he decides to keep all his young stock on the premises, there will not be sufficient room to accommodate them; and, as overcrowding is a very fruitful source of disease and likewise is responsible for the degeneracy of many promising pups, their owner is compelled to try and find quarters for his young dogs elsewhere.

The best—in fact, the only—course to pursue is that adopted by most breeders upon an extensive scale, from masters of Foxhounds downwards, and that is to arrange with reliable persons to take charge of a pup or two until they are wanted. The chief difficulty is the matter of expense, upon which subject the ideas of some people who are willing to take in canine boarders are very generous as regards their own profits. Then, too, there is always a risk that the puppies will either be neglected or else overfed and pampered to such an extent that their health becomes seriously affected. It is difficult to say which of these two evils is the greater, but probably it is the latter, as few puppies are likely to be so ill-treated or ill-fed by a person who hopes to be paid for their keep as to be beyond restoring to health; whereas one which is spoiled by injudicious feeding and luxurious living is quite likely to be ruined in constitution and to be unfit for any sort of work hereafter.

A farm would be an ideal place to select, only agriculturists keep fowls and other stock and do not care about their getting worried by precocious puppies, who are often full of mischief. On the other hand, perhaps the worst person to place the pups in charge of is he, sometimes it is she, who, through sheer kindness of heart, will spoil the animal by ill-regulated feeding. So after all the best sort of home for the youngster is a cottage in the country where the fare is homely but nutritious, and practically unlimited freedom may be enjoyed. If the owner of such a humble abode is a sensible man, he will realize that he can earn a substantial addition to his income by walking puppies, and earn it easily too, if he carries out the instructions that are given him. Dog breeders, therefore, should lose no opportunity when they are in country places for looking out likely people for taking care of their puppies, as unless arrangements are made before hand, it often occurs that puppies are kept by far too long about their owner's kennel whilst a temporary home is being sought for them.

THE DISPOSAL OF SUPERFLUOUS STOCK.

What to do with his puppies or other stock when he decides to part with them is a difficulty which agitates the mind of many a dog breeder who possesses a valuable strain; as he is not unnaturally averse to running the risk of his blood finding its way into the kennel of a rival. Sometimes the decision is arrived at to destroy all the superfluous stock, this being a needlessly cruel and rather selfish way of settling the matter, but if carried out it certainly possesses the merit of being effective. Upon the whole, however, the better plan is to dispose of the animals without supplying the pedigrees, and, if possible, without letting their breeder's name be known, for then, unless the dogs turn out unexpectedly well, the chances of their causing their first owner much inconvenience, if any, in after life are very remote. A really good-looking dog of a popular variety is pretty sure to realize more than the cost of rearing him even if his pedigree and breeder are unknown, and few owners find their kennels so remunerative that they can afford to indulge in the expensive precaution of making away with all the animals they may not happen to want.

DESTROYING DOGS.

It is really remarkable to consider, when the state of civilization at which the country is supposed to have arrived at is remembered, the colossal ignorance that exists regarding the speediest and most painless methods for destroying dogs. Of course there are a certain number of inhuman brutes about who attach not the slightest importance to the sufferings of a dog that they mean to deprive of its life, so long as their object is accomplished: but happily there are others, and they are in vast majority, who desire that all unnecessary pain should be avoided. Unfortunately a number of these people are unable to arrive at a proper conclusion on the subject, and consequently most unwillingly they inflict the most horrible cruelties upon their victims. Perhaps a man who is entirely unacquainted with the use of firearms sets himself the task of shooting a dog with a gun, or maybe with a revolver, and what a horrible, ghastly mess he often makes of it; or it may be decided that the wretched brute shall be drowned, but the execution is likely to be bungled owing to the insufficiency of water, or to the dog being improperly secured, with lamentable results. If poison is used, there are men about who would be quite offended if they heard any doubt of their good sense of intelligence expressed, but these self-same people will inflict upon an old favorite the most awful agonies through their ignorance of drugs and their consequent neglect to provide a suitable one for the occasion. An educated man who deliberately administers such a poison as strychnine to a dog should be handed over to Mr. John Colam and the Society for the Prevention of Cruelty to Animals, who, it is to be hoped, would read him a lesson in practical chemistry which he would remember for the remainder of his life.

The lethal chamber is the best agent for taking the life of a dog, or anything else for that matter; but a luxury of this description is beyond the reach of most owners, and almost invariably so in cases of sudden emergency. For all ordinary purposes, therefore, Scheele's prussic acid may be recommended as providing a speedy and consequently almost painless death, as it acts almost instantaneously, and a most minute dose applied to the back of the tongue in a glass syringe is all that is necessary. This poison, however, is difficult to obtain, but, fortunately, a chemist is usually accessible and for the humble shilling most of them will be willing to bring the existence of an old favorite to a painless end. Chloroform, of course, if properly applied, is an effective agent to use, but in the hands of an amateur practioneer its effects are uncertain, the result being unnecessary suffering to the unfortunate victim. So, after all, Scheele's prussic acid is the best, the safest, and the most humane medium to employ.—*English Stock-Keeper.*

AT THE TRAPS.

A "wind-up" live bird shoot took place last Sunday at Ingleside. The rainstorm kept a number of shooters away. Three events were shot, a 15 bird race and two 6 bird pools. The scores made were the following:

Event No. 1, 15 pigeons, entrance $5, $20 added. birds extra, distance handicap, high guns—

Haight, C. A.	30 yds	—22221 12212 1222*—14
Murdock, W.	30 "	—222*1 12212 12111—14

A gun club was recently organized by the leading sportsmen of Mountain View, Santa Clara county. Dr. Cameron is president and Chas. Whelan secretary, and among the members are Dr. Chas. Gates, Louis and Emil Darriman, Mr. Distell, George Wheeler, Frank McCombs, Dennis Mercer, Paul Delmas, John Fay and others.

The club will hold an open to all live bird shoot on Thanksgiving Day.

The winners of club trophies of the Millwood Gun Club for the club blue rock season this year are the following. High average cup for the season, Captain W. Price who scored 87 per cent. R. Van Norden won second high average prize. The best scores in the freeze-out event for the year were made by Clarence Ashlin who won a handsome loving cup. In the third regular club event for the season C. Ashlin won first prize, R. Van Norden second, H. Wagner third and Mr. Johnson fourth prize. The club badge for the season was annexed by W. Price. In the fifth club event Van Norden won first prize and Collins Jr. won the second prize.

Fred Gilbert, the world's champion trap shooter and a representative of the Du Pont Powder Company, was in Wilmington, Del., as the guest of James T. Skelly, another representative of that concern, who has recently returned from San Francisco. Gilbert, while in that city last winter, gave exhibitions at the Wilmington Country Club and the Wawaset Gun Club, and the local shooters would like to see him give another.

Fish Hook Wounds.

Accidents from the use of fish hooks may be of several kinds; they may happen in a great variety of ways; and they may be from hooks of exceedingly small size, or injuries or other accidents may be caused by those of the larger proportions. Then the form of the hook inflicting the wound may be very different. As all fishermen know, some hooks are straight; some are curved in various ways; some are with eyes and some are without; while all common fishhooks are barbed at their distal ends. It is needless to say that the swallowing of a fishhook constitutes an accident of the gravest nature, and the majority of instances will demand the immediate attention of a surgeon. The only safe way to avoid such a mishap as this is never to thoughtlessly place small, loose hooks in one's mouth. A person so doing may suddenly cough, or laugh, or be startled in some manner, and thus cause the hook to be swallowed, or partly swallowed, often rendering an operation necessary in order to remove it again from the body.

Wounds caused by fishhooks fall into the class of injuries designated as punctured wounds in surgery. Those to be briefly noted here are the ones inflicted by the small, ordinary fishhooks in every day use by anglers all over the world. Of all parts of the body, the hands, including the fingers and thumbs, are most subject to wounds of this nature; then, next, we have the face and neck, the former taking in the eyes, nose and ears. Lastly, other parts of the body may be thus punctured, either through some of the clothing, or, if the person be naked, the wound is made without any such interposing material, as sometimes happens with boys in bathing and are hooked by some chance or other.

Some wounds are mere pricks, and cause but little pain or annoyance; but it is an entirely different matter when the hook enters so far that the barb is completely buried in the flesh, and, perhaps, stuck in some bone in the bargain. If the eye is the organ pierced, a surgeon or oculist should be sought at once, and, however long a time it may take in reaching one, the injured eye should be completely shielded from the light, bandaged with cold water dressings, to which some mild anodyne has been added. In extracting fishhooks from other parts of the body the principle is practically the same in all cases, and is by no means a difficult operation, if properly performed. Proceed in the first place to clean the hook from all attachments to the line, snood, jig, or gaff, or to whatever it may be fastened. If it has an eye, the operator next proceeds to file or otherwise cut the shank in two. The file in a pocket knife will often effect this, if properly employed, and quite rapidly. Straight hooks, without eyes, are most easily extracted, and in the quickest time, and, consequently, inflict the less pain. When rendered eyeless, and the barb is freed from bone, if it happens to be sticking in it, the next step is to thoroughly clean and apply some simple lubricant to the shank. Then after drawing the flesh a little tense, skillfully pass the barb through it, in the same manner as one could take a stitch with a curved surgical needle, pulling it quickly through after the point has pierced. The wound should then be treated with the ordinary cold water dressings, and a rapid recovery soon results.

Under no conditions should the operator attempt to cut the hook out with a knife. This happened to the writer once in a boat in Key West harbor some thirty-five years ago, and he carries the scar and a weakened thumb today in consequence. A large hook penetrated beyond the barb, at the outer base of the right thumb, and a naval surgeon of volunteers in the boat attempted to cut it out with his pocket knife. The hook had a straight shank, and no eye, making the excuse for such a piece of butchery less evident. The navigating officer in the boat, a practical man, and an old salt water fisherman, stood it as long as he could, when he took the knife away from the surgeon, and instantly performed the simple operation described above, much to the shame of the doctor and to the great relief of the injured one.

Mountain Sheep Hunting in Lower California.

Since the killing of mountain sheep has been made unlawful at all seasons in most of the localities where they now exist in this country, and so hedged about with restrictions as to practically preclude it in others, the hunting of this rarest and most prized of all American big game may be said to have become a thing of the past in the United States The sport would claim many more votaries, but for the fact that money and time entirely beyond the command of the average hunter are required to reach the districts in which the killing of the highorn is within the law.

To go to the famous sheep sections of Alaska—the Alsek and White rivers and the Cook's Inlet country—a month may prove too brief and $1000 may require husbanding to make both ends meet.

The sheep mountains of Lower California offer a more practicable and alluring hunting ground, says the Los Angeles *Times*. On climate, accessibility and expense incident to reaching it, this section has incomparably the best of the Alaskan districts, and in the matter of the sheep themselves, none the worst. The cream of the Mexican sheep country is in the vicinity of the 10,000-foot peak of San Pedro de Martir, almost opposite San Quentin, in Lower California, and 100 miles south of the head of the gulf of that name.

Pinto mountains lie a little to the north of west of the head of the Gulf of California and are the favorite sheep-hunting ground with the few who hunt in that section on account of the comparative ease with which they are approached and traversed.

The presence of so many sheep in the Pintos is an anomaly. There are no natural springs upon them and water only exists through the dry season in natural "tanks" in the rock in the bottom of deep canyons. At times these "tanks" are said to be dry, but the sheep are never absent. And in other countries, notably in Wyoming, sheep are supposed to water every day, and one of the favorite methods of hunting them there was to lie in wait at one of their favorite springs. Nor is the topography of these mountains along the lines that are supposed to conform to the classic taste of the sheep; they are too low, and the great rocks and crags are missing; in short, it is so much easier to sight and follow the game than in the haunts in which one has been led to expect he will find them that at first it seems as if all was not right.

But what the Pintos lack in roughness is more than made up by the mountains around San Pedro. Here are the real sheep mountains of tradition; soaring peak and bottomless canyon; cliff and talus, crag and escarpment, ravine and precipice. The live sheep has all the chance in the world to elude you and many a dead one has lain unretrieved in the inaccessible deoths of a dark canyon.

Fortunately sheep are plentiful on San Pedro, else their hunting would he a matter of the greatest difficulty. The foreman of one of the great cattle camps on the Colorado delta has shot several there with a revolver, and he tells of a Mexican family residing near the east base of the mountains that depends entirely for its meat upon the sheep killed by the son of the family, a lad of sixteen. The youngest, two years ago, became possessed of an old-fashioned Martini-Henry rifle, and though he had had no previous training with a gun, since that time wild mutton has been the mainstay of the family. The youngster has preserved the skulls and horns of the males and has them laid out in rows upon a great flat rock near his house. This rock is fully thirty-five feet square, but those who have seen it declare that it is covered as thickly as they can be packed with a most magnigcent collection of heads and horns. Around the rock are scattered the smaller horned heads of the females, and the bones of the animals are as thick about the place as those of cattle around a slaughter house. The lad knows nothing of the value of his stock of heads and a few boxes of ammunition or a new gun would undoubtedly purchase the whole lot. Not a bad chance for a speculation for some one to go in with a pack train and bring out a hundred or so heads and place them on the market. The returns should justify the expense many times over.

The Cocopahs are probably the most hunted of the Mexican sheep mountains, but are still good for the liveliest kind of sport. Here the Yuma people have hunted for years, and sheep heads are sometimes used for rocking chairs in Yuma. These mountains are a steep and fairly high range, rise from below sea level in places, and run from a point on the international boundary line a mile or two west of and about even with the junction of the Colorado and Hardy. This range, which is about fifty miles long, has two prominent groups of peaks of considerable height, those around Mayor, near the lower end of the range, and a group of unnamed summits some twenty miles south of the line. Sheep are found all through the range, but mostly in these higher mountains. Last summer a band of ten ventured down to a spring less than ten miles from Calexico, and three of them were shot by an Indian who chanced upon them with an old .44 Winchester, an incident unique in the fact that the animals were shot below sea level.

Sheep are often seen on Mayor, but the hunting is difficult, because of the impossibility of locating their watering places. It is possible to stop at a cattle camp, four miles out from the foot of this mountain, and seek the sheep in one-day jaunts, but the energy expended in reaching the localities where the animals are found will take out of the strongest the "snap" that is essential for this kind of hunting. There is no royal road to the mountain sheep, and in following them one can no more dodge hard work than he can taxes, but care in the choice of ground and in the expenditure of one's forces will often bring success and sheep where haphazard hunting would end in nothing but scratches, bruises and an overpowering weariness.

U. M. C. Wins.

The only 25 straight made at the Millwood Gun Club shoot last Sunday was made by Robert Van Norden. He shoots U. M. C. "Majestic" shells, a Winchester "pump" gun and "Du Pont" powder in Selby Factory Loads.

At Ingleside last Sunday, the wind-up live bird shoot for the year, every shooter participating used U. M. C. paper shells. The best runs were shot by C. A. Haight—14 out of 15 and two straight 6's. He shoots U. M. C. "Magic" shells.

Smokeless Averages.

Richmond, Va., September 5th. 6th, 7th, Mr. J. A. R. Elliott, Mr. J. S. Fanning tied for first general average, 553 out of 605, shooting "Infallible." Second general average, Mr. J. M. Hawkins, 552 out of 605, shooting "Schultze." Third general averge and first amateur Mr. R. L. Pierce, Whytheville, Va., 554 out of 605, shooting "Schultze." Second amateur, Mr. Ed Daniel of Lynchburg, Va., 538 out of 605, shooting "Infallible" and Mr. Daniel also won the State Individual Championship with "Infallible." Third bird amateur average, Mr. C. W. Hart, Buffalo, N. Y., 530 out of 605, shooting "Schultze."

September 9th, 10th and 11th, Burnside, Ill., W. R. Crosby, first general average, 517 out of 540, shooting "E. C." Fred Gilbert, second general average, 501 out of 540, shooting "Du Pont." T. A. Marshall third general average, 492 out of 540, shooting "Du Pont." L. C. Willard of Chicago, first amateur average, 491 out of 540, shooting "Du Pont."

Cleveland, Ohio, September 5th, Mr. John Prechtel of Cleveland, Ohio, first average, 130 out of 140, shooting "E. C." Second average, Mr. J. S. Bailey of Berea, Ohio, 121 out of 140, shooting "E. C." Third average, Mr. C. E. Doolittle of Cleveland, Ohio, 119 out of 140, shooting "E. C."

What Winchester Shells Are Good For.

J. H. Boa, shooting a Winchester "pump" gun and the "Leader" shell, captured the high average at the De Kalb, Ill., tournament on August 23d, with the splendid score of 191 out of the 200 targets shot at.

The Norwich Shooting Club, of Norwich, Conn., held their fourth annual target tournament on September 3d. Mr. Fred Gilbert was on hand and ground 198 targets out of the 200 he shot at into dust, having a run of 121 straight, and an unfinished run of 67. From Norwich Mr. Gilbert went to Portland, Me., to attend the target tournament of the Portland Gun Club, and at this tournament he again came out on top with the score of 189 out of the 200 shot at. As stated before Mr. Gilbert always shoots the Winchester "Leader" shell.

The second annual tournament of the Recreation Gun Club of Renova, Pa., was held at that place on August 23d and 24th, and was well attended. J. A. R. Elliott, shooting a Winchester "pump" gun and the "Leader" shell, gave the natives an exhibition of how to break inanimate targets with the above combination. Mr. Elliott won the first high average for the tournament with the score of 342 out of the 360 shot at.

In the match shoot between the Ewell Gun Club of Springfield, Tenn., and the Tracy Gun Club of Tracy City, Tenn., eight men to the team, 100 targets to the man, the Ewell Gun Club came out the victors with the score of 688. Every man in the Ewell team, without a single exception, shot Winchester "Leader" shells.

THE FARM.

New Live Stock Company.

A company to conduct stock ranches in Solano and Colusa counties, composed of Louis Titus and W. J. Hotchkiss of San Francisco, John H Spring of Fruitvale, and George W. Miller of Healdsburg, has just been organized. Joice Island of 2750 acres in Solano county will be devoted entirely to cattle. Toe Geddes ranch of 4000 acres southeast from Dixon, and the Hannan ranch of 4000 acres in Colusa county will be used for sheep These tracts of land, which are owned by Messrs. Titus and Spring, have been leased to the stock company.

Mr. Miller, who has many years of experience in the stock business, will be the manager, and will have headquarters at Suisun. Arrangements are now being made to repair the old levees on Joice Island and to construct new levees where it is found necessary. When this work is completed this will be one of the best cattle ranches in the State, as the place can easily carry from 500 to 600 head of cattle the entire year.

A good feeding animal should have a soft mellow touch with thick, heavy coat. A harsh, unyielding skin is an indication of sluggish circulation and low digestive powers. The character and finish exemplified by a clear, prominent yet placid eye, clear-cut features, fine horn and clean, firm bone, all go to indicate good feeding quality, a capacity to take on finish of the highest excellence and consequently to command top prices. Coarse-boned, rough animals are almost invariably slow feeders and difficult to finish properly. Certain size is necessary but it should be obtained without coarseness. The feeders are becoming foxy in regard to these things; the present demand exacts quality and finish rather than size. Besides these qualities and above all it is necessary to have vigor and constitution. Evidence of these is noted in a wide forehead, prominent brisket, broad chest, well sprung ribs, full heart girth and general robust appearance and without these points other excellence does not have its highest significance.

——o——

A great sensation at the live stock show at the World's Fair in barn eighteen are the zebrulas which are exhibited by Carl Hagenbeck, of Stellingen, near Hamburg, Germany, the famous and largest animal dealer in the world. The zebrulas are a cross of the zebra stallion with the horse mare, and are very handsome looking animals. They are used in Africa instead of the horse or mule as they are the only animals that stand the bite of the Tse Tse fly, which is sure death to the horse or donkey. The zebra hybrids are also bred by several breeders in south Russia, England and Germany, and everyone recommends them as being much hardier than the horse or mule. They are as gentle as a horse and can be handled the same way. It is thought by experts that the zebrula will be the most popular beast of burden of the future.

——o——

The pig, curiously enough, has more teeth than any farm animal. When it has got its set complete the pig possesses in all forty-four teeth. The horse has forty teeth, while cattle and sheep have only thirty-two teeth each. The forty-four teeth of the pig consist of six incisors, two canine, eight remolar, and six molar teeth in each jaw. Another peculiar fact about the dentition of the pig is that while the incisors or front teeth in the upper jaw bear a close resemblance to those of the horse, the corresponding teeth in the lower jaw closely resemble those of a dog. It is also worthy of note that the molars of the pig gradually increase in size from the front to the rear, the most backward of these grinders being ever so many times larger than those in front.

——o——

Lassitude overtakes the horse when oppressed by heat, the same as it does the man. The heat takes out the tension from all the tissues and enervates all the functions. In hot weather the horse cannot replenish rapidly enough to keep up a severe strain continuously, because the appetite and digestion are weakened and the relaxing effect of the heat is enervating. If it could be done, driving in the early part of the day or in the evening would be best; and the principal feed should be given at night, that it may be eaten at leisure and digested and assimilated before morning.

——o——

According to press dispatches the Missouri Agricultural College has recently been sending out notices to farmers in that State warning them against so-called creamery promoters. The methods of these promoters are said to be as follows: They locate in a town, organize a company, with several thousand dollars capital, and then sell the company an outfit. Investigation by the university showed that in many cases the outfits have been sold at a profit of several thousand dollars and that in most cases an outfit worth $2000 was sold for $4000.

——o——

Do you think it necessary to scald the utensils and vessels used for feeding or watering poultry? Know you not how easily typhoid and malaria germs are carried into the human body through the agency of the drinking water? Why then shall chickens not be as fully susceptible to disease from filthy watering pans as is the human family?

——o——

Few, if anything, are more healthful and nutritious for hogs than clover pasture. It is not always easily obtained, but is worth the effort to secure it, although there may be some failures.

——o——

Young sows should be bred the first time in the spring, so they will have the best conditions possible with their first litter of pigs. They should not be bred to farrow before they are a year old

——o——

It is a great mistake to throw away ashes of any kind. Hogs are very fond of them, and eagerly eat them and the charcoal they contain. These mixed with salt make a fine condition mixture.

——o——

A well fed, contented pig fattens more rapidly than a poor, squealing one. Plenty to eat and comfort are the necessary conditions to growth and contentment.

THE AMERICAN THOROUGHBRED
AND
BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D. Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy......$7
BOUND IN CLOTH, per Copy.......... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse, as I shall see that it is properly indexed. All orders for the book or for insertion of stallions' pedigrees to be addressed to

CAPT. THOS. B. MERRY,
Hotel Marlboro, Los Angeles.

FOR SALE.

ONE OF THE GRANDEST LOOKING AND finest bred young Stallions in California. He is 2 coming 3 years; chestnut with star, and one pastern white: good mane and tail; stands 15¾ hands high: all sound, not a blemish; well broken; never worked for speed: a trotter. Sired by Nearest 2:22 brother to John A. McKerron 2:04½ First dam Princess Airlie by Prince Airlie; second dam Minnie Princess, dam of Leonora 2:25 by Nutwood 2:18¾; third dam Belle by Paul's Abdallah; fourth dam Kate Crockett by Langford by Belmont: fifth dam Fanny by American Boy Jr. Prince Airlie by Guy Wilkes 2:15¼: first dam Chantilly (4-year-old trial 2:19½, dam of Chanty (2) 2:24, Cascade 2:14¾) by Nutwood 2:18¾; second dam Crepon (dam of Lovelace 2:20, Betsy Britton 2:20¾, Brilliantine 2:29¼) by Princeps; third dam Crape Lisse (dam of King Rene Jr. 2:17, Balzarine 2:27) by George Wilkes 2:22; fourth dam Tarlton mare, dam of Tarlton 2:30 Only reasons for selling is that I have another colt bred the same way and am overstocked. Address

T. W. BARSTOW, San Jose, Cal.

Ask for the Bulletins.

Every farmer, rancher, dairyman, poultryman, fruit-grower, or stockraiser should have his name on the mailing list at the California experiment station at Berkeley, so that he will receive regularly the bulletins published for his benefit. These bulletins are free for the asking, and are published results of experiments along the lines of interest in the above mentioned occupations. People indirectly pay for this work, and they should get the advantage of it by requesting the bulletins.

Next to corn hay is the most valuable single crop. Last year the hay raised in this country was valued at the enormous sum of $555,000,000 fully one-fifth of all the agricultural wealth produced during the year. We hear much of the importance of the wheat crop, but in the last three years it has averaged in value only $444,000,000, while hay has averaged $535,000,000. Cotton is called king in the south, but its greatest value in any one year was $469,000,000 The combined value of the oat, harley, rye and buckwheat crops of the country are $200,000,000 a year less than that of hay. The farmers of the land could better suffer total loss of the wheat or the cotton or the small grain crop than the failure of the hay crop.

—o—

Peter Jansen, the great sheephreeder of Nebraska, says that every man who intends to stay in the business should have a dipping plant and we would add that he can go broke very quickly by simply using Dr.Salmon's wonderful lime and sulphur hog wash instead of the commercial compounds which are now put out so cheaply. If the trade does not want wool that has been dipped in lime and sulpher no amount of hair snlitting as to whether it is injurious or not will make it desirable. It has heen the universal experience that the wools from sheep so dipped are subject to excessive shrinkage in manufacture, are difficult to scour and tend to make the touch of finisbed goods harsh.

—o—

Of the more than 28,000,000 persons engaged in industrial pursuits for a livelihood in the United States the percentage of agricultural laborers is the greatest. This percentage aggregates 66 in the South Central States, 54 in the South Atlantic and 41 in the North Central States. The large number of men engaged in mining in the Western States reduces the ratio to 29 in that section. The rapid subdivision of large farms and ranches into smaller holdings will doubtless maintain the above ratio indefinitely. The smaller holdings in the irrigated districts now being developed will also contribute to give stability to the present proportion of farmers.

—o—

One of the preservatives used by dairymen is called viscogen, composed of sugar, lime and water. It has the effect of making milk appear richer than it is, as the lactic acid turns the lime to a thick, white substance that assimilates with the milk, improving its looks without injuring its taste. It differs widely from the ordinary preservatives and adulterants added to milk but still in many cases unscrupulous people have used it to deceive customers regarding the richness of cream and wherever this has occurred the penalty for adulteration should be strictly enforced, although no injury to health is likely to result from such practice.

—o—

The proper way to treat any bull that is over a year old is to be gentle yet firm with him. Don't go into his stall or enclosure and maul him with a club or fork handle. Treat him as kindly as you would any other animal, but keep your eye on him and never place yourself in a position where he can get the better of you. Always he on your guard, and never attempt to lead him without a staff after he is a year and a half old. Do not be lured into believing there is no danger. It is the gentle bulls that kill men because they are not watching out for them.

—o—

A great deal of cream leaves the farm in fine condition for the creamery, but in being exposed to the sun on the road to the creamery or receiving station, the development of souring germs rapidly begins. In delivering a can of cream throw a wet blanket over the can and a dry cover over the wet blanket. The dry blanket prevents the evaporation of water from the wet blanket and will enable the farmer to deliver his cream only a few degrees warmer than when it left the farm.

—o—

A company has been formed in Arizona to engage in dairying on an extensive scale. The principal object is to manufacture cheese by Swiss experts of such fine quality as to make the Salt River valley famous, besides sterilizing milk for use in Phœnix and adjacent towns. The machinery for sterilization alone will cost $10,000. A large tract of land will be planted to alfalfa from which the cows will he pastured.

Race Course, Morris Park, Westchester, N. Y.

Office: 751 Fifth Avenue, "The Windsor Arcade," New York

THE NINTH

NATIONAL STALLION RACE

WITH $5000 ADDED

To Be Run For by Then Two-Year-Olds During the SPRING MEETING of 1906

ENTRIES FOR STALLIONS TO CLOSE AND NAME Saturday, October 1, 1904

Conditions for Entry of Stallions.

Nomination of Stallions to close and name by midnight of Saturday, October 1, 1904, by subscription of $50 each, or only $25 each for Stallions which have not sired a winner prior to December 15, 1904. Of the subscriptions for Stallions the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent and 10 per cent respectively. The remaining 50 per cent to the winner.

Conditions for the Entry of Foals of 1904, to Close and Name by Midnight, Thursday, December 15, 1904.

Foals of 1904, the progeny of Stallions duly nominated to be entered and named by midnight of Thursday, December 15, 1904. Colts and Geldings at $10 each, Fillies at $5 each, the only forfeit if declared by December 15, 1905. If left in after December 15, 1905, and declared by April 20, 1906, Colts and Geldings to pay $30 each, Fillies $15 each. If left in after April 20, 1906, Colts and Geldings to pay $60 each, Fillies $30 each. Starters—Colts, Geldings and Fillies to pay $100 each additional.

The Westchester Racing Association to add $5000 and the remaining 50 per cent of the Stallion entrances, of which $1200 to the second and $600 to the third. The nominator of the winner to receive $1000 out of the subscriptions and starting money. Of the subscriptions for Stallions, the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent and 10 per cent respectively. Colts to carry 122 lbs., Geldings and Fillies 119 lbs.

The produce of Stallions which have not produced a winner prior to December 15, 1904, allowed 5 lbs if claimed at time of entry. By filing with the Westchester Racing Association, prior to December 1, 1905, an accepted transfer of the foal's entry, the original subscriber shall he released from liability as to the engagement of the horse except for the original forfeit of $10 or $5.

LAST FIVE FURLONGS OF THE ECLIPSE COURSE

1907.

The Ninth Matron, for Mares covered in 1904, Foals of 1905, to run at the Autumn Meeting, 1907, will close Thursday, December 15, 1904, for which entry blanks will he duly mailed.

For information and Entry Blanks, apply to

Dairy Dots.

It is recommended that cows be fed straw sprinkled with brine before being turned into the clover, and it will prevent bloat.

The use of hand separators is on the increase. Dairymen haul the cream to the creamery instead of hauling milk both ways.

In judging butter, flavor gets 45 points; grain, 25 points; color, 15 points; salt, 10 points; package, 5 points.

As strange as it may seem, it has been demonstrated that there are more bacteria on a milk dipper, when washed and wiped, then when allowed to dry.

Ventilation should be provided for in every dairy barn. There should be some windows high up that never need to be closed except in extremely cold weather

The standard of butter fat in full cream cheese has been raised from 20 per cent to 30 per cent and the total solids in milk to 12 per cent average, the year round.

It is now generally conceded that it is better to grind grain for farm and dairy animals. It is better ground and more easily digested and assimilated than when eaten whole.

Intelligence is the solution of many if not all of the difficulties in dairying. The practiced eye, the cultivated taste, the educated judgment, are all necessary to the making of good butter and cheese.

We believe that a kicking cow can be cured by tying her leg for a long time. She learns not to move Standing still becomes a habit and she thinks she can not kick, and will not. We have known some bad kickers cured by hobbling their rear legs.

"Glazed butter" is the latest novelty described in the consular reports. It has long been the practice in Germany, it seems, to coat butter with a glass-like sugar covering. Butter so covered keeps fresh for a longer time than the ordinary product. It is first carefully kneaded and washed, then put into forms weighing one pound each, and placed in a cool room. The glazing is done by painting the surface with a hot sugar solution. The brush used is very soft, and the painting is done quickly. The sugar solution melts the surface of the butter and the sugar and melted butter form a sort of varnish, which protects the butter against deterioration from outside influences.

The albuminous matter in milk wets the very smallest globules and overcomes their gravity and they are as liable to sink as any way. Souring milk tends to thicken the fluid through which the common globules must rise and only adds to the resistance to be overcome in reaching the surface. Creams will cease to rise long before the milk gets thick from this very cause, and there is no good reason why milk should be allowed to get thick with acidity before the cream is taken off. But letting milk get thick before skimming is not the only bad feature about it. Souring milk destroys over one-half its feeding value as compared with feeding the same skim milk sweet. Skim milk is only more valuable than water by having nine pounds of sugar and cheesy matter in it, in solution about five of sugar and four of cheese. Sour the milk and the sugar is all changed into acid and has no feeding value. Milk sugar is one of the most valuable foods for growing stock and it is quite an item to feed the milk sweet. —*Texas Farmer.*

Prof. Thomas Shaw, formerly of the Minnesota Agricultural College, is authority for the statement that a sow owned by him—a Tamworth—farrowed on May 9th of this year a litter of nine pigs. She nursed three until May 19th and on that date farrowed another litter of nine healthy and strong pigs, of which she has six at the present time. Professor Shaw states that the sow was given but one service at the time of mating. His statement of the case is direct and positive, and he offers to substantiate it with the testimony of other witnesses.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, $1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Dr. Spencer's English Dyspepsia Wafers

Relieves and cures Indigestion, Heartburn, Dyspepsia and all Stomach complaints.

British Pharmacal Co. Ltd. Distributors Milwaukee, Wis.

Price 50¢ per box.

CAN YOU ENJOY A SQUARE MEAL?

Do you sit down at the table with a fine appetite intending to enjoy your meal immensely and after a few mouthfuls give up in despair? That's a typical "well along" case of indigestion or dyspepsia. Hundreds, yes, thousands are in the same boat and are willing to do almost anything to be as they used to—healthy, well and strong with a good sound stomach.

You cannot force your stomach to do work that it is unwilling to do. It has been tried time and time again, with the same results always. The stomach is a faithful organ, but when pushed beyond, and exerted to the utmost, it rebels. Some stomachs are stronger than others, but all have their limit and when the limit is reached it is unwise to attempt to force it into doing further work.

The best and quickest cure offered to that big army of sufferers is

DR. SPENCER'S ENGLISH DYSPEPSIA WAFERS.

If you haven't heard of this cure before, you have been needlessly suffering, for this medicine *will* cure you—cure you as sure as there's a sun above. Would you spend 50 cents if you thought there was some hopes. We know you would, and therefore tell you sincerely that D. S. E. W. *will* cure you.

The curing powers of these wafers are very simple to understand. They are natural in their workings and effects, taking up the work of the worn and wasted stomachs, digesting the food thoroughly and completely.

Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1904

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ENTRIES CLOSE OCTOBER 15, 1904.

ONLY $2 TO NOMINATE MARE

$250 for Trotting Foals. $1750 for Pacing Foals. $800 to Nominators of Dams of Winners and $200 for Owners of Stallions. Money Divided as Follows:

$3000 for Three-Year-Old Trotters.
200 for Nominator of Dam of Winner of Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
200 for Nominator of Dam of Winner of Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$1000 for Three-Year-Old Pacers.
200 for the Nominator of Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator of Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—$2 to nominate Mare on October 15, 1904, when name, color and description of Mare and Stallion bred to must be given. $5 February 1, 1905. $5 September 1, 1905. $10 on Yearlings February 1, 1906. $10 on Two-Year-Olds February 1, 1907. $10 on Three-Year-Olds February 1 1908.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace. $35 to start in the Two-Year-Old Trot. $35 to start in the Three-Year-Old Pace. $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3), and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before February 1, 1906, her Nominator may sell and transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of Mare must be given; also the name of the horse to which she was bred in 1904

Entries must be accompanied by the entrance fee.

Should the amount of entrance money received be in excess of the amount of the Stakes the excess will be added, less the cost of postage stamps, printing and advertising, to the Stakes for the Three-Year-Old divisions in proportion to the amount offered in each division.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent There will be no more moneys in each Division than there are starters.

Entries open to the world Membership in the Association not required to enter, but no horse will be allowed to start until the owner has become a member.

Write for Entry Blanks to

San Francisco, Saturday, October 8, 1904.

YOU HAVE BUT SEVEN DAYS to make up your mind whether you want some of that $7000 which the Pacific Coast Trotting Horse Breeders Association guarantees the Pacific Breeders Futurity No 5 to he worth. It is the largest stake offered this side the Mississippi river, and may he worth $10,000 if the entries are as numerous as they should be. The stake is for the foals of mares bred this year. There must have been three thousand or more mares hred to standard-hred horses on this Coast in 1904, and not less than five hundred of them should he nominated in this stake. They are owned from Puget Sound to San Diego and there is no telling now where the mares are whose produce will win the different divisions of this rich prize. They may he owned in Seattle or San Diego for all anyone knows. But they are on the Coast somewhere. A mare owned in Oregon produced the foal that won the two-year-old trotting division this year; one owned in San Jose produced the winner of the three-year-old trot; another owned in Dixon is the dam of the winner of the three-year-old pace, and another owned in San Bernardino produced the winner of the two-year-old pace. Reader, the mare that you are hesitating about nominating in this stake may produce a colt that will be able to trot in 2:10 as a three-year-old, and if it is not entered in stakes its earning capacity will not amount to much. How much did Mamie R., that magnificent little trotting machine owned by Mannie Reams of Suisun win this year? Not very much as she had no stake entries. Had she heen eligible to three or four good stakes she would have earned at least three or four thousand dollars for her owner, whereas she won but a few hundred. The Breeders Futurity is the cheapest stake in the country for the amount to be won. Read over the conditions in the advertisement in another part of this paper and see how few and how easy the payments are. If you know a good thing when you see it, if you hred a mare this year and if you would like to see a colt of your own hreeding pace or trot to the wire in front of his competitors, while the people in the grand stand jump to their feet and cheer him, dig up $2 now and send it along with the name and description of your mare and the name of the stallion she was hred to to the Secretary of the Breeders Association, 36 Geary street, before the seven days are up. Rememher, the envelope must he dated not later than October 15, so you had better mail the entry hefore noon that day to he sure. If you own a mare, show your faith in her hy naming her in this stake. If you own a stallion see that those who hred mares to him make nominations. Its the cheapest and hest advertising you can do.

SWEET MARIE proved herself the greatest race trotter of 1904 hy winning the classic Transylvania at Lexington on Thursday, decisively defeating her great rival Tiverton and five other high-class trotters in the fastest five-heat race ever trotted. Tiverton, though heaten, covered himself with glory hy winning the first two heats in 2:04¾ and 2:04½, the fastest heats of the year and the fastest second heat ever trotted. In hoth these heats Sweet Marie was very close at the finish, being beaten a length in the first heat and a half length in the second. She undouhtedly beat 2:05 in both heats, and then won the third heat in that time, the fastest third heat ever trotted, beating Tiverton hy a half length. No other trotter out this year has shown any such form as that displayed hy Sweet Marie and Tiverton in these three heats. The fourth heat was the actual test of supremacy hetween the two. The battle hegan when the word was given. The son of Galileo Rex out trotted the California mare the first eighth and took the pole from her. He led to the half and was in front going round the far turn, but when the three-quarters was reached Sweet Marie was the stronger of the two and she was in front turning into the stretch. Both were tired naturally as no such trotting had ever before been shown in a race between a field of horses, hut the California mare had a greater reserve of endurance and speed and won the heat in 2:08¼. The fifth heat was easy for her, the time being 2:09 and Tiverton finishing in fourth position, his driver seeing that it was useless to try and beat the mare and refusing to punish his horse hy driving him out. The greatest race ever trotted has heen won by the California bred and owned mare Sweet Marie. She is the property of William Garland of Los Angeles and is a hay mare eight years old. She was hred hy Frank G. Schumacher of Los Angeles, her sire is the great McKinney 2:11¼, her first dam Lady Rivers hy Carr's Mambrino 1789, second dam Susie hy Vermont 322, third dam hy Highlander, fourth dam by Owen Dale, son of Williamson's Belmont and fifth dam by Black Hawk Comet.

THE ENTIRE HERD OF JERSEYS owned hy the late Henry Pierce will be sold at auction by Fred H. Chase & Co., on Tuesday evening October 25th, at 1732 Market street, this city. This herd originated over 35 years ago, since which time, three direct importations from the Island of Jersey, and many from the best Eastern herds, including the great Saddleback Farm herd of New England, winner of all prizes there for years, comhined with years of the skill and experience of Mr. Henry Pierce in the breeding of this useful dairy stock, have brought the Yerba Buena Herd to its present high standing. It is the greatest prize winning herd of this Coast and during eleven annual competitions at the California State Fairs won $2828 in prizes. Kathleen's Roy of Yerha Buena, the bull that heads the herd was scored by Prof. Anderson of the University of California in comparison with four of the greatest hulls in America and was second only to El Toro of Yerha Buena also owned hy the Pierce Farm. Kathleen's Roy scored 65¼ points, El Toro 67, and of the other three bulls which were all prize winners at the great Madison Square Garden show in New York none scored over 63½ points. According to Professor Anderson Kathleen's Roy is the nearest to perfection he has yet seen. Beautifully illustrated catalogues, containing tabulated pedigrees of all the principal animals of the herd have been issued for this sale and can he had on application to Fred H. Chase & Co.

SANTA CRUZ CITIZENS, who are ahout the most energetic and enterprising people on earth, are organizing to secure the California State Fair for their heautiful city hy the sea, and if the Sacramentans don't wake up they may find the big State institution has moved away during the night. They are building a big fair ground and race track down at Santa Cruz which they say is going to be ahout the most complete and up-to-date place of its kind on the coast. There is to be a heautiful grandstand, an exhibition and parade ground where cattle and horses can be shown to advantage, and a mile track that will be of regulation shape and inoculated with the speed germ. There will he hundreds of good box stalls 12x14, all lighted hy electricity, and hlacksmith and harness shops on the grounds. Big tanks for hot water are to he located at convenient places, so that grooms who are caring for horses will not have to go to the trouhle of huilding fires to cook the various dopes they have to remove lameness and soreness from the muscles of their charges. In short, it is to he an ideal fair ground and training track. Work was hegun this week on the race track and it will be all ready for a fair next year—the State Fair if they can get it and a district fair anyway. With such an enterprising gentleman as Mr. F. S. Granger at the head of this enterprise it will be a great success.

A COMBINATION SALE of standard bred horses is to be held hy Fred H. Chase & Co. at 1732 Market street, this city on Tuesday evening, October 18th. Several hreeders have made consignments to this sale, among them the Estate of Jesse D. Carr of Salinas which will send about a dozen head of choice hroodmares and young horses that were reserved when the dispersal sale of this farm was held some months ago. They are by Boodle 2:12½, Boodle Jr., Dictatus Medium and other standard sires. Hon. W. A. Shippee consigns ahout fifteen head of mares, geldings, colts and fillies hy Hawthorn, Dictator Wilkes, Temescal and other producers, K. O'Grady of San Mateo sends several hy Hart Boswell and A. F. Baker of San Jose sends a couple of as royally hred ones as were ever consigned to a sale. The same evening Mr. Chase will sell a numher of two and three year old draft colts, all good individuals. The catalogues will he out soon. Send for one.

SIDNEY DILLON has heen consigned to the Old Glory sale by the estate of Henry Pierce, and the sire of the world's greatest trotter will leave California perhaps forever, although we helieve there will he more than one California hidder for the stallion when he is led into the auction ring in New York next month. That he is one of the most remarkable sires of trotters the world has yet produced is heyond question and the fact that of fifteen of his get that are old enough to train, one holds the world's record of 1:58½, and three have trotting records below 2:08 is sufficient proof of his great speed producing ahility. The news that he is to he sold in the east will be received with great regret hy every California hreeder, and it is to he hoped that some enterprising Californian will he ahle to make the highest hid for him and return him to this State.

Answers to Correspondents.

SUBSCRIBER. Eureka—Belle Irvington, standard and registered in Vol. 8, American Trotting Register, as follows: "Bay mare, foaled 1882 by Irvington 379 dam Fanny Congdon, by Ajax 727, grandam Kitty McCracken hy Black Hawk 767. Bred by E. P. Heald, San Francisco."

O. F. PIERCE, Hanford—The dam of Creole 2:15 was Grace hy Buccaneer, grandam Mary by Flaxtail. There is no horse registered hy the name of Alexander Patchen; you prohably mean Alexander 490 hy Geo. M. Patchen Jr. 31. The dam of Alexander was Lady Crum, said to he by Brown's Bellfounder. We can find no record of a horse called Victor by Buccaneer.

TWO SUBSCRIBERS, Santa Rosa—Nellie Fairmont, chestnut mare, foaled 1891, sire Fairmount (son of Piedmont 2:17) dam Nellie hy Hambletonian 725. She was hred hy the late James G Fair, and passed to the late A. G. Gurnett of Alameda county, who hred her to McKinney, the produce heing Zamhra 2:16½, champion five mile trotter, record 12:24.

C. L. BECKER, San Jose—The terms "half hrother" and "half sister" are always understood among horse hreeders to mean the produce of one mare hy different horses. Thus the gelding Endow 2:14¾ hy Cecilian and the colt Bon Voyage 2:15 hy Expedition, that won the two-year-old division of the Kentucky Futurity last Wednesday, are half brothers as they have the same dam. But two colts hy the same sire out of different mares are not called half hrothers.

Mr. Alex. Brown Buys Woodland Track.

The hest piece of news that has come to this office during the week is that the well-known Woodland race track property has heen sold to Alex Brown, proprietor of the Walnut Grove Stock Farm in Sacramento county, the home of those two grandly hred stallions Nushagak (sire of Aristo 2:08¼) and Prince Ansel 2:20. As our readers prohahly all know the Walnut Grove Farm is located on the Sacramento river and while it comprises some of the very richest land in California is suhject to overflow in wet winters. Last winter Mr. Brown was compelled to move his stock to higher ground. He has heen negotiating for the Woodland track for some time and finally consummated the deal this week. It is a fine property of ahout eighty acres of as good land as there is in Yolo county. While it is high and dry at all times it can he irrigated from a big ditch that runs alongside the track. There are a large numher of excellent stalls and a good grand stand, and the track is undoubtedly one of the hest and fastest in California. No better summer training track can be found in this State and during the rainiest season can he jogged on within forty-eight hours after a heavy rain. Mr. Brown will send his two great stallions there together with his string of horses which will he worked for speed by Chas. Spencer, one of the leading trainers of California. The purchase of this property hy Mr. Brown will mean much for Yolo county and will add to her wealth, as he is one of the leading horse hreeders of the State.

Harness Racing at Tanforan.

The last harness racing of the season in this vicinity will he given hy the San Francisco Driving Club at Tanforan Park this afternoon. The following program has been arranged:

First race, 2:35 class—P Pinnella's Patsy P, W O'Kane's Billy M, H Werner's Chatterhox, J Gleason's Jennie, J Donovan's Jim, A. Wolff's Lawrence W.

Second race, 2:30 class—H Werner's Old Glory, R Green's Don L, W O'Brien's Toughy A, R Miller's Senator Hearst, V Verhilac's Bessie, T Corcoran's Mission Boy, J Donovan's J J D, F Jensen's Tehama Boy.

Third race, 2:20 class—D Roherts' Even Dale, C Mitchell's N L B, A Hoffmann's Kitty D, H Simi's Erosmont, H Miller's Lady Falrose, J O Kane's Sandow.

Good Words for the Dexter Princes.

MAYFIELD, CAL., Sept. 28, 1904.

EDITOR BREEDER AND SPORTSMAN—It was with a great deal of satisfaction that I read today of Lisonjero's victory yesterday at Oakley Park, Cinn., in the 2:20 class over a field of six fast trotters, including the crack Stanley Dillon, in the excellent time of 2:09¼, 2:09½, 2:09½. On paper that looks like the performance of a race horse. It reads most as good as Eleata's winning of the M. & M. in 1901, when as a four-year-old she won that classic event in straight heats, the third being in 2:08¾. Both Lisonjero and Eleata are Palo Alto products and sired by Dexter Prince. The former's dam is Liska by Electioneer and the latter's by Nephew, next dam by Electioneer. It fell to my lot to handle both these good trotters in the days of their early development at the Palo Alto farm. I gave Eleata all the work she had before leaving the farm, but "Billy" Houser gave Lisonjero the most of his. The filly was broken in December of her yearling form and trotted a quarter in 0:35 the following April. That winter was my first experience with the Dexter Princes; the following two seasons I handled a good many by that great speed sire and saw others trained. To-day I believe Dexter Prince to be the greatest sire of natural and extreme trotting speed that ever lived and of many high-class race horses had they received the proper early education. There are a great many horsemen and others that have been "knocking" the Dexter Princes for years, claiming that they had bad legs and bad heads. That they would not stand to get to the races and that they would not race if their legs stood. All horsemen ought to know that a soft or green horse's legs will not stand the strain of stepping a 2:20 gait or better when they have not been seasoned to stand a 3:00 clip. The Dexter Princes' can step fast without any work, consequently when they are asked or allowed to do so and lameness or a filled leg results, the family is condemned. In regard to their bad heads, most families of trotters come to their speed so slowly that they have an opportunity to get into mental as well as physical condition to stand a fast clip by the time they have acquired the speed to go fast. But it is not so with the Dexter Prince family. I saw a yearling filly by Dexter Prince step a quarter to heavy cart in 37 seconds with her first shoes on only a few days. The strange sensation of flying over the ground at that unaccustomed rate of speed, bewildered and excited her and the performance was the ruination of one of the greatest trotting prospects I ever saw. I saw a two-year-old by same sire out of Flower Girl by Electioneer, next dam old Mayflower, trot a quarter in 0:35 only a few days out of the breaking barn and with his first shoes on. A good level-headed colt up to that time, and after that fast quarter as crazy as a bedbug and a puller of the worst kind. I worked a yearling filly called Festival, full sister to the above, a quarter in the fall of her yearling form in 0:35 and she never made a break nor pulled a pound. I saw a two-year-old colt by same sire trot a mile in March to heavy cart and heavy driver in 2:28. He was speed crazy and a hard puller for the same cause.

There has been trained over the Pleasanton track during the last year a pacer by Dexter Prince that looks to me to be the real thing; he is one of the sweetest gaited side-wheelers ever seen and wears absolutely nothing but the harness and the lightest of shoes. His name is Harold D. and has been trained by his owner H. H. Dunlap, up to July 1st last, when Mr. Dunlap removed to Nevada City taking his horses with him. At that time he could do 2:10 and a half in 1:02 with ease. In spite of all the unfavorable comments I have heard the wise ones make about this fellow because he is a Dexter Prince I believe he is the making of a 2:05 pacer and a race horse. So far he has been well trained.

The reason it is so gratifying to me to read of Lisonjero's very creditable performance is because when a two-year-old before he was ever worked or shod and shortly after recovering from a disease that left the lower portions of his legs scarred and disfigured (the same disease that scarred and disfigured Mendocino, Wildflower and many others at the farm), I tried to buy him, thinking that on account of the condition of his legs I could get him for less than he would otherwise would have brought. Five hundred dollars was the price asked for the two-year-old gelding with badly scarred legs and only broken to harness I thought it too much but believed he would make a great trotter. He trotted a mile in 2:21 at the farm in April of his four-year-old form having only been trained during the previous winter months, and sold the next month at the Blue Ribbon Sale in Cleveland for about $825, if I remember right. This was in 1901 making him now seven years old. He has proven himself to be a race horse and I look for him in time to materially lower his present record of 2:08¼. [illegible] 2:08½ was as high class a four-year-old trotter as ever turned round for the word and had she not "got too much of it" would have lasted longer and accomplished greater things. James L. 2:09¼ was a good, game, reliable race horse as ever went down the line Old Edith 2:10 got her record in a winning race when she was a hopelessly broken down cripple. Aster 2:12 was a consistent winner, his first year out, and got a record of 2:16 when only a few weeks out of the farm team, and had he been a sound horse after he came into Tom Keating's hands would have acquired a record way below 2:10 I believe that by natural speed endowment fifty per cent of the get of Dexter Prince should trot or pace in 2:10, if they had just the right kind of handling and care all the time. There are a couple of sons of Dexter Prince in California that will sire something sensational some day. I refer to Pilot Prince and Prince Ansel. The former is out of a great broodmare by Nutwood and the latter out of a great broodmare by Ansel 2:20, son of Electioneer, next dam the famous Mayflower. I would rather have a good bred Dexter Prince mare, for a broodmare, than one by any other sire and they are an outcross for Wilkes, Electioneer or any other trotting strain in the State.

C. C. CRIPPEN.

Sons and Daughters of Eveline.

The great broodmare Eveline by Nutwood that has produced a big family of fast ones is still living at Santa Rosa and is now in foal to Sidney Dillon, sire of the world's champion trotter. Mr. William H. Lumsden has recently sold Eveline to Mr. S. B Wright who owns her daughter Maud Fowler 2:21¾ and who raised Sonoma Girl. Mr. Frank S. Turner, Superintendent of the Santa Rosa Stock Farm, kindly sends us the list of Eveline's foals as follows:

1. Maud Fowler 2:21¾, bay mare, trotter, by Anteeo 2:16¼.

2. Tietam 2:19, bay stallion, trotter, by Anteeo; worked in 2:11¼.

3. Nick Russell, bay gelding, trotter, by Silas Skinner 2:17; showed a trial in 2:14.

4. Roblet 2:12, bay mare, pacer, by Robin 2:22¾.

5. Ole 2:11, bay gelding, trotter, by Silas Skinner.

6. Kenwood, bay stallion, by Robin 2:22¾, worked a quarter in 40 seconds as a yearling. Died when two years old.

7. Round Robin, bay gelding, trotter, by Robin, worked a trial in 2:24.

8. Fanlaline, bay mare, by Altamont 3600, has a trial of 2:22 trotting and 2:20 pacing. Bred this year to Sidney Dillon. Owned by W. H. Lumsden.

9. McPherson, bay stallion, trotter, by McKinney 2:11¼. Separately timed in a race this year in 2:13¾. Owned by W. H. Lumsden.

10. Kate, brown filly, not yet thoroughly broken, has trotted a quarter in 40 seconds.

11. Judge Dillon, chestnut colt, by Sidney Dillon. Just broken. Owned by F. S. Turner.

Eveline's daughter, Maud Fowler, is the dam of the great green trotter Sonoma Girl that has shown quarters below 30 seconds. A full brother to Sonoma Girl has been a mile in 2:22. Roblet 2:12, is the dam of Robin Stanley 2:29¾, and has a two-year-old pacer by Bonnie Direct 2:05¼ that has stepped a quarter in 34 seconds, and Kate Dillon by Sidney Dillon worked a quarter in 37¾ seconds at fourteen months old.

A Fast Four-Year-Old.

CARPENTERIA, Sept. 30, 1904.

EDITOR BREEDER AND SPORTSMAN:—I saw in one of your recent issues of the B. & S. an item about my colt Paloma. Whoever gave you the information in regard to his speed, gave it right as far as they went, but I wish to go into details a little further. His first training was as a four-year-old under Walter S. Maben for two and a half months and during that time he paced a mile in 2:20, a half in 1:08¾, a quarter in 32 seconds and an eighth in 15 seconds. I expect to place him in Maben's hands this year and he thinks he should go in 2:10. Paloma is by Almonada, his dam by Auctioneer Johnnie, son of Geo. M. Patchen Jr. 31, grandam by Gen. McClellan Jr., son of Gen. McClellan 144. He is very strong and active and should prove to be a very fast horse.

Yours truly, H. S. SPRAGUE.

Eugene, Oregon, Harness Races.

Sept. 20—Trot or pace, 3:00 class, purse $50—Rosenantha, r m, pacer by Lovelace 2-1-1, Robert Lawson 1-2-3, Neptune 3-3-2, Miss Arlyne 4-4-d, Pilot Lane 5-d. Time—2:40, 2:34, 2:43½.

Sept. 21—Trotting, free-for-all, purse $100—Sarah S. 1-1, Package 2-3, Lord Kitchener 3-2. Time—2:30, 2:29.

Pacing, purse $100—Prince Tom, blk g by Tom V 1-1, Pathmark 2-2, George D. 3-3. Time—2:24½, 2:21½.

Jackson's Napa Soda does not tangle the feet.

Some Walnut Grove Farm Youngsters.

Chas Spencer, trainer for Mr. Alex Brown's Walnut Grove Stock Farm, has about twenty head of young trotters at the Pleasanton track, nearly all by Nushagak and Prince Ansel, and two more promising sires are not in California judging from there colts already raced and those in Mr. Spencer's charge at the track. One of the handsomest two-year-olds that ever wore a trotting harness is a brown colt that has been given the name Peter Shields after the popular farmer and Superior Judge of Sacramento county. This colt is a lusty fellow with two white hind ankles and is most beautifully turned. He is by Nushagak (sire of Aristo 2:08¼) out of Adebala by Dexter Prince (sire of Lisonjero 2:08¼, etc.) second dam Addie W. by Whips sire of Azote 2:04¾, third dam the famous mare Addie, the dam of Woodnut 2:16½, Manon 2:21, and grandam of the great Arion 2:07¾. One would naturally expect a good looker from this breeding and Peter Shields fills the bill in every particular. He is a pure gaited trotter and will be heard from later on.

A black yearling that is a grand looker and will be kept for stud purposes on account of his royal breeding and good looks is by Nushagak, dam Bonnie Derby by Chas. Derby, second dam Bonny Red by Red Wilkes, third dam Bonny Belle, dam of five in the list, by Almont 33, fourth dam Alice Drake, dam of three, by Norman 25, fifth dam by Pilot Jr. 12. This colt comes pretty near having every popular producing trotting cross in his pedigree and has inherited great speed. He is just being broken.

Another highly bred one that carries a lot of good looks about with her is a two-year-old filly by Prince Ansel 2:20, dam Mamie Martin (her first foal) by Nushagak, second dam the great broodmare Francisca, dam of I Direct 2:12½, Sable Francis 2:15¼, Erasmont 2:22 and Guycesca 2:26, by Almont 33. This filly is not only good looking but fast, and like all the Walnut Grove Farm horses is a trotter.

The two-year-old colt El Rey by Nushagak that started in the Breeders Futurity at San Jose this year is rounding to and will make a grand horse. He was sick and lame when he started in that race but was separately timed all three heats better than 2:25 and came the last half of the last heat in 1:09 but was outside the money at that. He is a great bred one as his dam is Piocbe by Dexter Prince, and second dam Peko 2:11 by Electioneer.

From the looks of the string of colts under Spencer's care two facts are certain. First, the Nushagak-Prince Ansel cross is a big success, as it seems to produce good looking, well formed and fast colts both ways. Those by Nushagak out of Prince Ansel mares resemble their sire, while those sired by Prince Ansel out of Nushagak mares look very much like the son of Dexter Prince. Both stallions are impressive sires as their get plainly show. Second, Walnut Grove Stock Farm produces plenty of good feed or it could not show so many strong, well built and handsomely turned youngsters as Mr. Spencer has in his string. Good breeding and good feeding is doubtless the motto at Walnut Grove.

A Card to Trainers and Horse Owners.

At the close of the season of 1903 we, having received testimonials unqualifiedly endorsing and recommending the use of Campbell's Horse Foot Remedy from the great trainers—Geers, McDonald, Snow, Hudson, Spears, McGuire, Salisbury, Curry, Benyon, McCoy, Miller and many others no less celebrated, whose names, for want of space, we do not mention, published an illustrated page in the special numbers of racing journals.

Our purpose in doing this was to place Campbell's Horse Foot Remedy before horse owners who have not given it a trial in such a manner that its merit as a hoof grower and reliable cure for diseased and sore feet could not be questioned, if owners were at all disposed to be influenced by the advice and recommendation of those whose success in the horse business is a conceded fact. We believe that the advice of men to whom are entrusted the most valuable horses on the turf, because of their honesty and knowledge, counts. These men cannot afford to, and they do not permit, "fake testimonials."

A glance over the summaries of the races in the Grand Circuit of 1904 shows that the "man behind" the winners, in most cases, is a trainer who uses Campbell's Horse Foot Remedy, or has used it in fitting his stable for this work.

The success such trainers are meeting proves that they know their business, and that their advice should be given weight.

We are confident that no stable can afford to be without this remedy, and solicit a trial, assuring you that if results are not satisfactory we will refund cost of remedy on receipt of a letter to that effect, no matter from whom purchased.

Nearly all dealers in harness and turf goods carry "Campbell's Horse Foot Remedy" in stock.

JAS. B. CAMPBELL & CO.,
412 W. Madison St., Chicago, Ill.

Colville, Wash., Harness Races.

Sept. 20—Trot or pace, Farmers' horses, purse $50—Mingo Nell 1-1, Nellie 2-2, Maud Bowman 3-3. Time—4:06½, 3:40.

Sept. 21—Trotting, Gentlemen's Roadsters, purse $50—Kate Steiner 2-1-1, Anna W. 1-2-2, July 3-d, Mingo Nell 4-d, Lightfoot 4-d. Time—3:09, 3:10, 3:03½.

Trot or pace, 2:40 class, purse $200—Ringman, blk s by Lecana 1-1, Bonnie A. 2-2, Fenton 3-3, Kate Steiger 4-4. Time—2:47, 2:44¾.

Sept. 22—Trot or pace, 2:30 class, purse $150—Ringman 1-2-1-1, Bonnie A., br m by Chissen Wilkes, 2-1-2-2, Fenton 3-3-3-3. Time—2:37¼, 2:43¾, 2:37, 2:41¼.

Notes and News.

The Oregon State Fair made a profit of $2500.

It is rumored on the Grand Circuit that Jack Curry will winter a string of horses in California.

Stanley Dillon's 2:07¾ is still high-water mark for the year for a green trotter, and bids fair to stay so.

Jack Curry predicts that Prince Alert will "show up" all the pacing records when he etrikee the Memphis track.

The trouble with Lord Revelstoke 2:12¾, is said to be a curb which has bothered the son of Bingen for some time.

There will be no harnese meeting held at Los Angelee this fall as first intended. This has been finally decided upon.

Third payment of $5 each is due on Tuesday, Nov. 1st, on entries in the Pacific Breeders Futurity No. 4 for foals of this year.

An experienced trainer desires to fit horses for the eastern market and wants to meet some one with capital. See advertisement.

A eplendid pair of pacers from the Shippee ranch will be eold at the combination eale at Chase & Co.'s, on Tuesday evening, Oct. 18th.

Ethel W. 2:19¼, which was second to Doroathe in 2:13¼ at Indianapolis, ie one of tbe few trotters now racing which wears the hopples.

Marone, a three-year-old trotter by Cicerone, a son of Cecilian, was last week purchased by W. A. Clark, Jr., of Butte, Mont. Price $3,000.

If you want a registered Jereey heifer attend the Yerba Buena ranch sale in this city on Tuesday evening, October 25th. See advertisement.

McKinney 2:11¼ is now credited with 34 sons end daughters that have made recorde in 2:15 or better and 11 of them, six trottere and five pacers, are in the 2:10 list.

Mrs. E. W. Callendine recently sold to A. E. Mastin of Sacramento the two-year-old bay stellion Sir Carlton 36,367; by Nutwood Wilkes 2:16½, dam Lady Keating by Stam B. 2:11¼.

The rubber track, says a writer, will be the next big improvement. It would cost $100,000, but it would pay. It would last forever. Dust would have no effect on it or rain either.

Ed Geers has put four trotters and two pacere in the 2:10 list this season. They are George G. 2:06¼, Stanley Dillon 2:07¾, Alexander 2:09½, John Mac 2:09¾, Baron Grattan 2:06¼, and Bessie Drake 2:08¼.

But for an ailing leg that has bothered him some, Aristo 2:08¼ would have a lower record. The eon of Nushagak is said to be the grandest trotter on the Grand Circuit so far as appearance and style go.

Rifle 2:11¾, once the favorite of the late William B. Faeig, made bis record eight years ago, but ie still a pretty fair trotter and last week, at Allentown, Pa., won two heats in 2:14¼, 2:14½ over a half-mile track.

The Bondman, eire of Grace Bond (3) 2:09¼, is being prepared for a record at Lexington. This succeseful producing son of Baron Wilkee 2:18 is credited with a four-year-old trial of 2:11, but would not stand preparation for stiff racing.

The young etallion Axworthy was well represented at Lexington on the opening day of the Breeders' meeting. A three-year-old by him won eecond money in the Futurity and a four-year-old won the 2:14 class trot and took a record of 2:08¾.

Senator Bailey has announced his intention of dispereing his Kentucky stud. This will leave at Lexington only two large breeding establishments—Walnut Hall Farm and Patchen Wilkes Farm. Senator Bailey will continue his Texas farm.

There are eo many world's recorde in the light harness eport, eome horses holding eight or more, that the 2:15 trot at Libertyville can well be added to the list. Shady Beattie and Redlac trotted five heats to a draw, dividing firet and second money.

Oakwoods Farm, eituated two miles from Lathrop and ten miles south of Stockton on the main line of Southern Pacific Railway, has iseued a beautifully illustrated catalogue of its Percheron, Belgian and French coach horsee. Mr. Francis I. Hodgkine, the owner, will welcome correspondence in regard to them, and quote prices. See advertisement. The address ie Lathrop, Cal.

Golden Gate the son of Bay Bird, has been ehifted from the trot to the pace and last week worked a nice mile in 2:12½ at the lateral gait Trainer Brown had 18 ounces on him in front this year when racing him, and hae now reduced this to eight ounces. Golden Gate is a big gaited horse and the heavy weight naturally tired him Mr. Brown now thinke that he would have trotted better with much less weight and be may re-convert him to that way of going.

Funston 2:09 is the first 2:10 performer for Dictatus 2:17. He made the record on the second day of the Lexington meeting. Funston is the roan pacer that Sandy Smith purchased from Mr. Theurkauf of San Jose for an eastern party in 1901, paying $2000 for him.

Impetuous 2:13, one of Ethelwyn's daughters, has joined the great brood mare ranks. Her son, Hardwick by Directum, obtained a record before fire cut short his life, and her daughter, by Oratorio 2:13 is the dam of Rex Orator 2:23¾, a two-year-old trotter by Rex Americus.

Lieut. William Price of this city has purchased Mr. C. S. Neal's nomination in Breeders Futurity No. 4 and has named the chestnut filly May Belle Isle by Sidney Dillon, dam Palo Belle by Palo Alto 2:08¾. Mr. Neal's mare Lady Moor, dam of Arthur W. 2:11½ and John A. 2:12¾, failed to foal.

King Direct 2:07¾ holds the world's seventh and eighth heat records of 2:07¾ and 2:09½ for stallions. Only one horse, Baron Grattan, has equalled 2:07¾ in a seventh heat, and curiously enough both these pacers were driven by Ed Geers. Sherman Clay, a gelding, paced an eighth heat in 2:08¼.

Mr. R. P. M. Greeley of Oakland, will send his mare Hester Diablo to Pleasanton on the first of November to be worked for speed. She is four years old and by Diablo out of Winnie Wilkee 2:17½. No young trotting mare in California hae greater natural speed than this mare.

Owners of thoroughbred stallions should read the prospectus of Capt. Tom Merry's new Breeders Handbook which is to appear shortly. Every first-class stallion in America should be represented in the list of those whose pedigrees are to be printed in tabulated form in this volume. The advertisement appears elsewhere in this paper.

China Wilkes, the dam of Knight 2:22½, sire of Anaconda, is dead. China Wilkes was the dam of four standard performere, three of them in the 2:15 list—L. L. D. 2:08¼ and Oneone 2:11¼, both pacers, and and Jenny Wilkes 2:12½ and Knight 2:22¼ both trotters. China Wilkes was by Adrian Wilkes out of Mambrino Queen by Mambrino Patchen.

Don Piza 2:19¼ is the eleventh of the produce of old Lady Yeiser to become standard. In addition, another has a record of 2:32 ¾ Seldom has a broodmare prove so fertile as to speed production; in short, very few produce so large a family. Nearly all of the Lady Yeiser family are eidewheelers. A daughter produced Charlie Emsley 2:13¾.

The diepersal sale of the entire herd of thoroughbred and registered Jersey cattle from the Yerba Buena ranch of the late Henry Pierce will take place at Fred H. Chase & Co.'s salesyard, 1732 Market etreet on Tuesday evening, October 25th. Don't forget thie date. The stock will be at the yard on Sunday, October 23d, and inspection is invited.

Fred H. Chase & Co. wiil hold a combination eale on Tuesday evening, October 18th. Consignments from the Estate of Jeese D. Carr, Salinae, Hon. W. A. Shippee, Bellota, K. O'Grady, San Mateo and A. F. Baker, San Jose, are to be sold. There are many well bred horsee by such sires as Hawthorne, Hart Boewell, Boodle, Dictatus Medium, Red Nutt'e and othere to be offered.

One of the best etock farms in California with barns, box stalls, paddocks and everything necessary, and all in firet class condition is offered for sale. Thie is one of the best propertiee in the State and pays good interest on the price asked in pasturing horsee. The land is excellent and the location central and convenient. Address Stock Farm, care BREEDER AND SPORSTMAN.

Boralma won the Kentucky Futurity in 1899. Boralma ie by Boreal, son of Bow Belle, eon of Electioneer. Janie T. won the two-year-old division of the Futurity in 1897. Janie T. was by Bow Belle, son of Electioneer. The Merchant won the two-year-old division of the Futurity in 1898. The Merchant is hy The Conqueror, son of Egotist, son of Electioneer. Walnut Hall won the two-year-old divieion of the Futurity in 1900. Walnut Hall is by Conductor, son of Electioneer. Bon Voyage, winner of the two-year-old division this year ie by Expectation 2:15¾ son of Electioneer.

One of the sweeteet little fillies in thie State is a bay yearling that Worth Ober has been breaking for Col. J. C. Kirkpatrick at Pleasanton during the past month. The sixth time she was hitched up was on Saturday last and she stepped a quarter in 44 seconde with the last eighth in 21½ eeconds, without being urged in the least. She is a natural born trotter and ie doubtlese another "four leaf clover" for the Colonel. Besidee being a perfect beauty she is grandly bred being hy Stam B. 2:11¼, first dam by James Madlson, second dam Missie Medium by Rampart 2930 (eon of Almont 33 and Kate Thompson by Ericsson) third dam Belle Medium, the dam of Stam B.

Worth Ober has been working a big bay stallion by Silver Bow out of Grace by Buccaneer, at the Pleasanton track, and has him trotting better gaited than ever before. Thie handsome horse was bred and raised by Geo. Fox of the Mokelumne Stock Farm who disposed of him at hie closing out eale, T. Judge of this city being the purchaser. Mr. Judge afterwards eold him to Col. Kirkpatrick, who seriously contemplated making a high etepper out of him. Since Worth Ober began driving him, however, the stallion is improving both in gait and speed and he will doubtless be given a record next year. 2:15 is not beyond his reach.

A horse has to have eomething more than speed to bring a big price at any of the Grand Circuit towne. Daisy V., a pacing mare, was worked a mile in 2:10¼ at the Columbus track during the week of the meeting there and was then put up for sale by auction. She brought $300.

Although Bon Bon, the dam of Bonnie Direct 2:05¼ and Bonsaline 2:14¼, is dead, she will doubtlees have another 2:10 performer before long, as her son Bonnie Steinway hy Steinway is showing a very high rate of speed at Pleasanton. Mr. Griffith had Al Charvo drive him last Saturday and the handsome chestnut stallion paced a mile in 2:13¼ very hendily, the first half being in 1:07. Bonnie Steinway is a four-year old, nearly 16 hande high and weighe close to 1100 pounds. He has been in the stud this season, but will probably be raced next year.

An old-timer recorde that George Wilkee was a strongly made, emoothly turned and powerfully muscled horse. He lacked the airy grace, elegant style and prouder hearing of his older rival, Ethen Allen 2:25½, yet there was quality in his bone end a solidity to his fine grained muscles that good judges of horseflesh admired greatly. He was as handsome in conformation as Ethan Allen, but the latter wae the most etylish and best gaited trotter. From the deecription that those best qualified to judge give of George Wilkee, he inherited his conformation either from his dam or the dam of his sire. He bore but little resembiance in this respect to hie grandsire, old Abdallah.

The statement that Ed Mills and Fred Chadbourne had formed a partnership was premature. Mr. Chadbourne informed the BREEDER AND SPORTSMAN this week that the deal was not consummated and that he would be found during the coming winter and spring at the old stand at the Sutherland stables, Pleasanton, where he will be ready to train and educate trottere and pacers for the road or track, and on reasonable terms. Mr. Chadbourne has been a very euccessful man in educating horsee for the track, is very careful and painetaking and knowe how to teach them to go fast. He bas broke and trained some of the best horses that have been brought out in California during the past few yeare.

The two-year-old filly Mildred S. by Klatawah 2:05½, dam Ruth C. by Guide, second dam by a son of Gen. McClelland, third dam by Bel Alta and fourth dam by Tilton Almont, which Millard Sanders took East and sold at the Blue Ribbon eale in 1903, is trotting very fast for her new owner, Mr. Carl Silver of Cleveland. Her name has been changed to Okanis Pride and ehe has started in several matinee recee this year at the Glenville track. She has won two races to wagon and taken a matinee record of 2:19¼ On August 5th she trotted a mile to sulky in 2:14¼, last half in 1:05½. She is one of the most promising three year olde in the country, but unfortunately has no stake engagements. She was bred by Mr. Lou Crellin of Pleasanton.

Frank S. Turner of Santa Rosa thinks he hae another Lou Dillon in his fourteen monthe old filly Kate Dillon by Sidney Dillon. He etepped her a quarter in 37½ seconds this summer and then pulled her shoee off and she will run out for the rest of the year. Mr. Turner says what she will do to the two-year olds of 1905 will be "something awful." She only had three weeks work. Mr. Turner's mare Caritone by Antone (son of Dexter Prince and Grace B. by Stamboul) weaned her colt on August 1st and the other day stepped a quarter in 34 seconde and looks like a 2:10 trotter. She is in foal to Sidney Dillon. For the number exhibited Mr. Turner's standard bred colts and mares took a big proportion of prizes at the recent State Fair. Judge Dillon, Kate Dillon and Frank S., Jr. all got first in their clasees and Major Dillon and Caritone won second prlzes.

Jamee W. Rea is making one of the greatest dairy farms in California out of the Vendome Farm at Sen Jose and is expending many thousand dollare on barns and other buildings necessary to house his eplendid herd of Holeteins and handle their product. He has sent his good stallion Iran Alto 2:12¼ to Hi Hogoboom at Woodland who will have charge of the son of Palo Alto during the season of 1905. Iran Alto has every license tc be one of the greatest sires of speed ever bred in California and his get give proof of this statement whenever they are handled. What with politice, railroad building, dairy matters and a general mix-up in public affairs, Mr. Rea has found little time in recent years to devote to Iran Alto and hie get, and the reeult is few have been tralned, but whereve they are worked any they show great speed and are almoet invariably fine lookers. "Farmer" Bunch has two or three in hiestring now at Pleasanton that do a person good to look at both from their conformation and way of going.

When Kaplan, by Kremlin 2:07¾, paced to a record of 2:08½ at Readville he made both his sire and his dam Almera, by Kentucky Prince, a double 2:10 producer. Almera was sired by Kentucky Prince, out of Alma 2:28¾, a full sister to the old-time trotting champion Dexter 2:17¼, and the great sire Dictator. She ie comparatively a young mare, having been foaled in 1889, and as she is etill vigorous she has a splendid chance to surpass even the great Beautiful Belle as a producer. Her first five foals are Katbay 2:29¼, Kavala 2:19¼, Katavela 2:14½, Kaplan 2:08¼ and Kavalli 2:07¾ Since her first foal, Kathay, was dropped in 1894, ehe has produced a foal each year with one exception, and Trainer John Young ie authority for the statement that they were all capable of entering the list at an early age. All her foale are by Kremlin. Young has driven her two-year-old, a trotter, miles better than 2:30 in his work at Readville thie year. If all goee well Almera has a splendid chauce to break all records for brood mares.

Jim Thompson's Sugar Cane Patch.

As will be seen by the following from the pen of "Marque," the *Horse Review* writer, the fame of Jim Thompson's patch of sugar cane which he started last spring at Pleasanton has reached the Eastern country: "Col. J. C. Kirkpatrick of San Francisco, one of the most steadfast supporters of the trotter on the Pacific Coast, is following the Grand Circuit and taking a deal of satisfaction in watching his trotter John Caldwell 2:11¼. In speaking of how Caldwell happened to join his stable the Colonel said: 'You have heard the story of the naturalist who sought in vain for a four-leaf clover. Every one else could find one; but himself, never. Finally he toured the world in his search, but returned home disappointed. One morning he chanced to glance at a grass plot beside his own doorstep and there he found the object of his long search. So it was with myself in quest of a trotter,' continued the Colonel. 'James Thompson and I had our eye out for a good ono when East in 1902, but failed to locate the one desired. When we reached home—Pleasanton—about the first horse we saw was Caldwell.'

"Caldwell is one of the purest-gaited trotters on the Grand Circuit, and, while some are faster, he has raced consistently and gathered in a lot of money.

"Thompson, by the way, is a trainer with ideas of his own, as the following incident will show: In conversation with Monroe Salisbury the other day he stated that he had a fine crop of sugar cane growing at Pleasanton, and as soon as he got home he would begin to feed his horses with it. The seed he obtained from Memphis last spring. Mr. Salisbury regards sugar cane as the very best reviver for stale horses that have lost their appetite for hay and the usual grain. He first got knowledge of its benefit from the experience of Thompson with the pacer Clipper 2:06. This horse was a delicate feeder and grew stale and weak when worked hard. Thompson hit upon sugar cane, feeding it with the stalk while green. Its effect was almost instant, Clipper filling up and rounding into form rapidly. A cheap grade of sugar is being used with grain by the cavalry in the Philippines and found to be a very valuable food."

Robert A. Smith's Statement.

COLUMBUS, O., September 21, 1904.

Editor American Horse Breeder:

On account of the harsh treatment rendered me while driving my good mare Sweet Marie on the different tracks of the Grand Circuit this year I have decided to sever my connection with the Trotting Horse game.

The Stewards of the Grand Circuit saw fit to suspend me from driving over any of their tracks for the balance of the year, and gave $1000 of my money away to a gentleman who seemed to have more ability as a race driver than I did, when I was using my best endeavors to win. We cannot all be McDonalds, Geers, Hudsons and Snows; but thinking that I was capable of driving a good horse down the Circuit, I leased Sweet Marie and campaigned her for the 1904 season. I started her at Detroit, Buffalo, Empire and Brighton Beach, and won them all, except where they took me down and substituted Mr. McDonald.

Believing that my drives were satisfactory up to this time, and that that one would have been if they had allowed me to continue, I have concluded that no gentleman of means has any business driving races in the Grand Circuit if he wishes to be treated as a gentleman, and to exercise the rights of one. And for the benefit of my friends and those who bet on Sweet Marie, together with those against her, I wish to say that I gave them my best endeavors, and that at no time was I in collusion with anyone to race fraudulently.

I therefore retire from the Trotting Horse game, and if my friends wish to know where I am, I will say for their benefit that I am now travelling in Mexico.

Your respectfully,

ROBERT A. SMITH.

Philadelphia, Pa.

Seattle Results.

The harness races at Seattle were all on the dash system and while they did not please the public as well as heat races, good contests were had in nearly every race and Manager Van De Vauter deserves much credit for his efforts in arranging the program and furnishing such good racing. The results of the seven harness races decided during the meeting at Seattle are as follows:

Pacing, 1¼ mile dash, 2:14 class, $1250—Oma A., b m by Dictatus, (Hogoboom) won; Queen B., (Lindsey) second; Ollie M., (Erwin) third; Cavalier, (Durfee) fourth. Time—3:23¼.

Trotting, Northwestern Derby, 2 mile dash, 2:15 class, purse $1500—Red Skin by Red Cloak, (Mosher) won; The Commonwealth, (Lindsey) second; Coronado (Durfee) third; Belladi, (Rutherford) fourth. Time—4:41½.

Pacing, 1½ mile, purse $250—Jack Wilmot by Dr. Bunnell, (Childs) won; Helennes, (Lance) second; The Freak, third; Garvin Wilkes, (Prior) fourth.

Pacing, Puget Sound stake, 1½ mile, 2:11 class, $1500—Zolock, by McKinney, won; LeRoi second; Kelly Briggs third; Jonesa Basler fourth. Time—3:22.

Pacing, three-year-old class, $500—Bessie R., by Francisco, (Hogoboom) won; Bonnie M., second; Queen Director third; Jules Redel fourth. Time—2:37½.

Trotting, free-for-all, a handicap 1¼ miles, $500—Mack Mack, by McKinney, (Helman) won; H. D. B. second; Coronado third. Time—3:01½.

Pacing, Consolation, one mile, purse $300—Ollie M. by Westfield, (Erwin) won; Queen B. second; Francisco third; Sam Bowers fourth. Time—2:11½.

Last Three Days at Cincinnati.

Sept. 29—Trotting, 2:17 class, purse $1500.

Red Lace, br h by Allerton	(Grubb)	1	1	1
Swift B., b h	(Stetson)	3	2	3

Christina Simmons, blk m	(Snyder)	8	4	4

Argo Halle, Anglin Wilkes, Don N., Lolita, Kewanee John and Foxy Quillor also started.

Time—2:09¼, 2:07¼, 2:11.

Breeding of Bon Voyage 2:15.

Expedition, the sire of Chas. Marvin's two-year-old Futurity winner, is by Electioneer and out of a sister to the one time champion Maud S. The dam of Bon Voyage, Bon Mot, is a daughter of Erin, son of Belmont; and a little further on the pedigreee includes the mare that produced the champion stallion Kremlin 2:07¾. Bon Mot has shown herself a wonderful producer of colts that trot fast and early, and however much the friends of Expedition may take credit to that horse for the work done by Bon Voyage, they cannot overlook the fact that, as the Kentuckians say, "he had a great mammy." Bred to Cecilian, son of Electioneer, Bon Mot produced Endow, that made himself champion two-year-old trotting gelding with a race record of 2:14¾. Last season Marvin had out the two-year-old filly Bequeath. Her best record at that age was 2:23, but she could beat 2:20 a long ways, and did it in her work more than once.

And now comes Bon Voyage. He is by another horse than the sire of Endow and Bequeath, they being brother and sister, and yet he looks to be the best of the trio. It takes a good mare to produce three such two-year-old trotters as Endow, Bequeath and Bon Voyage, and when any matron not only does this, but throws speed of the highest order to the service of different stallions, she is far above the ordinary. Marvin has another of Bon Mot's colts in his stable, a weanling by Wiggins, and as that horse is a more noted sire of two-year-old trotters than either Cellian or Expedition, horsemen will be interested in seeing what his colt from Bon Mot will accomplish as a two-year-old. Wiggins is a son of Aberdeen, so that the weanling has different blood in the male lines of its pedigree from that carried by Endow, Bequeath and Bon Voyage. But it is race horse blood of the right sort.—*Henry Ten Eyck White.*

The Breeding of Briney K. 2:11.

SANTA BARBARA, CAL., Oct. 1, 1904.

EDITOR BREEDER—I saw in your last issue a statement in regard to the breeding of Briney K. 2:11, and that it was unknown. Briney K. was bought at Summerland, or rather traded for, as a two-year-old, by Wilkinson & Son. They gave for him an old revolver, $5 in cash and an old worn out horse. At the time he was owned by a stripling boy who told the Wilkinsons that he was by Fred Arnold out of a very fine mare owned by Forrester Brothers, and was raised by one of the Forresters on the Susquoc Rancho in the northern end of this county. At the time the colt was poor, weak and worn out. I have been familiar with him since that time. As soon as he gained in strength he commenced showing speed, and as a four-year-old was sold to Frank Keller for $500. I have often heard he was out of an Altoona mare, but I can't trace this to any certain person. The Forresters live below here somewhere and could no doubt give his breeding. As a two-year-old he showed both breeding and speed. The younger Mr. Wilkinson still lives in Summerland and is in the livery business. Yours,

D. F. OGLESBY.

The Occidental Horse Exchange will be sold at auction on Tuesday next, October 11th, on the premises. Everything is to be sold to the highest bidder without reserve. Fifty head of horses, harness, etc., lease and good will. Inspection is solicited on Sunday and Monday and attendants will show intending purchasers around.

Lexington's Big Meeting.

Lexington, Ky., October 4—Grace Bond, the splendid little Kentucky trotter, won the three-year-old division of the Kentucky Futurity, defeating Alta Axworthy, and establishing at least three world's records at the opening of the thirty-fourth annual meeting of the Kentucky Trotting Horse Breeders Association here to-day. She is disputing the fourth world's record with Fantasy, who made 2:08¾ in a race eleven years ago, hut under circumstances that always cast a shadow over the performance.

Grace Bond's time was 2:09¼, 2:09¼ and 2:09¾. These performances, registered in the first, second and fifth heats of the race, are the three-year-old trotting records for two heats, three heats and for a fifth heat. Fantasy's mile was made with a pacemaker and with the distance waived, and has always been considered a trial against time, instead of a race record.

Grace Bond won the first two heats, almost from wire to wire, Alta Axworthy, the favorite for the event, making strong hids for each in the stretch. Grace Bond led in the third heat, but broke 100 yards out, and Alta walked in. In the fourth Grace Bond tired at the three-quarters, and none of the others could get near the Axworthy filly.

When the fifth heat was called there was scarcely one among the 10,000 spectators but thought Grace had been pumped out, but she shot to the front and stayed there, although Alta Axworthy challenged her twice. The stake was worth $14,000, of which $10,000 went to J. Y. Gatcomb, owner of Grace Bond.

Sweet Marie 2:05

Winner of the Fastest Five-Heat Race Ever Trotted

Second money was $2000, and third $1000. Grace Bond won the two-year-old division of the Futurity last year. Summaries:

WEDNESDAY, OCT. 5.

Bon Voyage to-day clinched his title as the champion two-year-old trotter of the year in the $5000 junior division of the Kentucky Futurity hy heating a star field in straight heats. He did not lower Katherine A's race record of 2:14, hut his 2:15 is a new record for colt or gelding winners of that event. The final heat he simply jogged.

Bon Voyage was bred, owned and was driven to-day by Charles Marvin. By this victory Bon Voyage made his dam, Bon Mot, hold the world's record as a producer, she having previously thrown Endow, holder of the world's two-year-old gelding record, 2:14¾.

Not being satisfied with Charles E. Dean's efforts to win the 2:11 class pace with the favorite, The Broncho, the judges took Dean out of the sulky and put up Alta McDonald, who won the race with the mare in straight heats. The judges suspended Dean for a year. Miss Georgie by McKinney took fourth money in this race.

In the 2:14 pace, the California hred pacer Funston won the first heat in 2:09, but was heaten the next three hy Nancy H. in faster time.

The track was in good condition, but high winds prevented Major Delmar from starting against time. Summaries:

THURSDAY, OCT. 6.

Sweet Marie, daughter of the great McKinney, established her claim as the trotting queen of 1904 when she outstripped Tiverton in the classic Transylvania here to-day and added that rich trophy to five other great stakes she has won this season—the Roger Williams at Providence, the Ponkapoag at Readville, the Long Island at Brighton Beach, the Knickerhocker at Empire City and the Electric City at Buffalo.

After all her previous triumphs she waited until the arrival of October days to seal her greatness and revenge herself on Tiverton for his defeat of her in the Charter Oak stake at Hartford, the only race she has lost this year, hut where she earned her fame as one of the trotting rivals of the greatest stars. To-day was her most sensational race. She won the Transylvania for 2:12 class trotters, value $5000, the greatest event in turf history, in the three final heats, the first two going to Tiverton. Four world's records were made in the Transylvania by the lowering of the event record and making the fastest mile of the year on any track. When Tiverton won the first heat in 2:04¾ he lowered the event record and made the fastest trotting record of any horse this year. When he won the second heat in 2:04½ he again lowered these records and made the world's record for the fastest second heat in a race.

Sweet Marie won the third heat in 2:05. This established a world's record for the three fastest heats ever trotted in a race and her mark is a world's record for the fastest third heat ever trotted in a race. Sweet Marie won the fourth in 2:08½ and the fifth in 2:09, thus establishing a world's record for the five fastest heats ever trotted in a race. The average time for each heat was 2:06 11-20. The first three heats averaged 2:04¾.

Sweet Marie is a California production and is owned hy William Garland of Los Angeles.

In the hetting Sweet Marie was favorite for the race, but Tiverton was favorite for the first heat. Sweet Marie drew the pole. Tiverton took fifth position. Tiverton got the pole before the half was reached and held it to the finish, going under the wire a length ahead of Sweet Marie, the others straggling behind.

Tiverton never lost the pole in the second heat. He set the pace all the way around, and had half a length to spare when he went under the wire. Tiverton also maintained his lead in the third heat, and was half a length ahead of the bunch at the half, when Sweet Marie hegan to push him him. Rounding into the stretch Sweet Marie got even with him, hut lost her advantage and fell hack. McDonald fairly lifted the little mare along until she was even with her rival again before the distance flag was reached, and in a driving finish went under the wire a half length ahead of Tiverton.

Tiverton looked like a winner in the fourth, until the stretch was reached. He took the pole from Sweet Marie at the eighth and led around to the half, surrendering his position just hefore the three-quarters was reached. Sweet Marie easily won the fifth heat. Tiverton lagged two lengths behind all the way around and finished fourth. He could have finished better than fourth hut he already had second money, and Andrews was content to escape the red flag. Tuna and Kent were distanced in the first heat, and Anaconda found the pace too hot for him in the third.

The weather was clear, the air was cool, and a stiff hreeze was blowing, which only added to the greatness of hoth Sweet Marie and Tiverton in scoring such marvelous time with the odds against them. Fully 15000 witnessed the day's sport. The crowd wildly cheered Sweet Marie. Summaries:

Lou is in Shape.

A week ago last Wednesday at Cleveland, Lou Dillon trotted the two fastest miles she had ever shown in a workout, one of them in 2:02 and another in 2:03, and at the finish of both miles she was fighting for her head and was good and strong when the wire was reached and did not breathe hard enough to blow out a candle.

These two extremely fast miles show that the Queen was never in as perfect trim as she now is and it certainly reflects a great deal of credit upon Millard Sanders, her trainer. The first and last quarters of the first mile were trotted in 30 seconds each. A horseman a few days ago said that if she was started against a cannon ball he thinks that he would have to take a chance on Lou, as she has shown him more speed than anything he has ever seen.

A great many running horse owners and trainers who had their horses wintering at Montgomery Park went over to see Lou at Memphis last winter and spring and the majority of them were of the same opinion—if she was trained to run that she would he able to step a mile that would keep the hest handicap thoroughbreds in the East quite busy to beat her. Her conformation is a great deal more like a thoroughbred than a trotter, hut she has never made a break the past two years after heing turned around to step.

There is no doubt but if trained at the galloping gait that she would he able to run a mile right close to 1:40.

The Percheron Horse.

From the earliest dewn of civilization horses have heen the servants end companions of man. There is no douht ehout the fact thet the Arahians understood the principles of hreediog as we do now. Neerly ell of the modern nations of Europe trece the origin of their hest hreeds of horses to Arahia. This is true io respect to every hreed aod every kind of horse. The superiority of one hreed over enother todey is due to the larger amount of intelligence and greater care epplied hy one nation, or one race of people over others. There is no country in Europe that hes drawn from the Arahian source so extensively es the French. The history of the development of the horse has heeo co-extensive with the development of civilizetion. The French people heve heen endowed hy nature with the horse instinct. They have also shown themselves to he superior, not only in their ehility to raise eod train horses, hut the modern, scieotific principles of selection in hreeding were epplied most successfully hy the French. The feudal lords and early rulers in France took cherge of the husiness of hreeding Their expert horsemen selected and reteined the hest stellions and permitted these stallions to he only crossed with the choicest mares. These principles, which received the ettention and encouragement of France hundreds, perhaps thousends, of years ago, have heen retained up to the present time. Today it is impossihle to go to France and huy their hest stallioos hecause the French Government and the French people are united in their efforts to keep them at home.

There are severel different hreeds of horses in France hut the most admired of all draft hreeds is the Percheron. The Percheron horse is reised in a very small portion of Normendy celled Le Perche where the highest results has heen etteined. In this section of France the purpose of the hreeders has heen to produce the kind of a horse that could move the greatest weight most rapidly. For hundreds end even thousends of yeers the kind of stallions and kind of mares thet could do the the greatest amount of work have heen kept in this small country. The inferior ones, those who did not come up to the high stendard, those that were helow the averege of the hreed, were sold into commerce end were never permitted to reproduce their shortcomings.

In meking their selections for hreediog purposes not only have they selected horses with suhstence hut horses that were comely and hendsome in appearence. In producing a heevy dreft horse good looks and a fine appearence were very essentiel eccompaniments.

There is prohehly no horse living that is so handsome as a well-mede draft horse. The greceful curves in his outline ere more attrective then the most heautiful picture. A Percheron is not only a good, useful horse, hut he is also heodsome end attractive.

The French raise horses primerily for their own use, hoth in peece and war. The success of Nepoleon was due to the superior horses raised in France more then any other one thing, and the Percheron performed his pert.

Nearly every nation in Europe has its peculiar hreed of draft horses hut there is none that hegin to compare with the Percheron. He has weight, suhstence, heevy hone and an iron constitution comhioed. Frequently a 2000 pound Percheron will move with the grece and ease and heve the ection of a road enimel. There is no other dreft horse that has all of these good qualities so comhioed. The Shire and Belgian mey he lerger hut they fall fer short of the Percheron in other quellties. America is yet a comparatively new country; we heve not yet had time to produce a hreed of draft horses characteristic of this country and independent of the old civilizntions and our useful horses have come from ahroad in the same way as America is now occupied hy European civilization.

In the same proportion that we, the decendants of Europeans, are superior to the natives American Indians, so the horses that come from Europe are suporior to the nativo horses that primarily ran wild over the American prairies.

As it were, we have transplantod into America hreeds of horses thet are the results of hundreds and thousands of years of evolution and development in Europe.

I think that it is safo to say that more Percheron stallions and meres have heen hrought to America than all of the other draft hreeds put together. The Percheron moro than any other hreed of horses is possessed of the qualtities that Americans like. His activity and energy appeal to the American teste. We go to Europe without prejudice and tako from tho countries what we think is best. The fact that we have chosen the Percheron in preference to others is an ovidence of his superiority from an American standpoint.

For fifty years Percheron stallioos and mares have come to America for hreeding purposes, and during the pest two yeers more than ever were imported in an equel period of time. In the Perche, where nothing hut Percheron horses are raised, the record of pedigrees of their horses were kept principelly hy the Government. In that country, where they are all pure hred, pedigree is e suhordinate metter. The inferior enimals, no matter how well they might he hred, were discarded and went into commerce, while those that were superior, the hest ones of each generetioo, were permitted to multiply and improve the hreed. It is eesy to see how, when these principles of selection were applied, eech generation is hetter then its predecessor.

When Percheron horses were hrought to Americe we were not ehle to put into applicetion the principles thet exist in France. It wes necessary for us to estahlish stud hooks and pedigree records in order to preserve the purity of the hreed of Percheron horses as it is found in Frence. Less thau thirty years ago a stud hook was started in Frence under the euspices of the Societte Hippique Percheronne de Frence. At the same time the Percheron stud hook wes estehlished in this country, and the purpose of hoth of these hooks was to maintain the purity of the hreed of Percheron horses in Americe and elsewhere

There is no hreed of horses in the world that has reached the station that the Percheron hes. This is especially true in America where there are et present three separate and distinct organizations for the purpose of keeping a record of the pedigree as well as promoting the welfare of the hreed and encouraging those who are engeged in reising and importiog Percherons.

The last organizetion, the Percheron Registry Company is, perhaps, the very strongest. On account of the hitter rivalry that existed hetween the two former organizetions the Percheron Registry Compaoy is composed of thet large numher of Percheron hreeders who are disposed to avoid controversy and who have shown a disposition to advance the hreed and encourage the hreeders.

The Percheron Registry Company is incorporated under the laws of Ohio, is recognized as a reliahle authority end has offered egriculturel and livestock shows very liherel prizes as a suhstantial encouragement to Percheron hreeders. If the present good work will he carried out to its logical conclusion in a few years from now the Percheron hreed of horses in America will rival the Percheron horse of his native land.—W. McL.

The Kentucky Futurity Winner.

Grece Bond, winner of the two-year-old division lest year and the three-year-old division of the Kentucky Futurity is the greatest three-year-old thet has yet appeared since the hreeding of the American trotting horse hegen. No other trotter of her age ever won three heats in one race helow 2:10 and her fifth heat in 2:09¾ is undouhtedly the greatest performence ever made hy a three-year-old trotter. After winning the first and second heats in 2:09¼, she acted unsteedy in the next two, and all the wise horsemen whose opinions and money make certain horses favorites in the pools, thought she hed no chence to win, hut she came heck in the fifth heat in 2:09¾, making another world's record for her, as her first two heets hed heen. Grace Bond is aoother of the mervels that go to show the developed sire theorists that it is not ahsolutely necessary for a horse or mere to have a fast record to unable them to produce record hreekers, as her sire and dem are hoth unmarked. She is hy The Bondsman, a young stallion now nine years old thet was started three times as a three-yeer-old, hut failed to win a heet, although he was second to Boralma in one race, three heats hetter than 2:20, got third money in the Kentucky Futurity also won hy Boralma end in which the heats were from 2:12 to 2:16¾, heing a good second to that colt one heat in 2:13. Her dam is Grace Boyd hy Ashland Wilkes 2291, son of Red Wilkes, second dam Oneida 2:17 (dam of Paragon 2:29¼) hy Florida 482, third dam Ledy Hem hy Hamhrino 820, fourth dam Molly hy Ashland 47, fifth dam hy Mamhrino Britton, sixth dam hy Todhunter's Sir Wallace. Florida was hy Hamhletonian 10 out of a mere hy Volunteer 55, Hamhrino was a grandson of Hamhletonian 10 out of a mare hy Mamhrino Chief and Ashland was hy Mamhrino Chief out of a daughter of imported Margrave. There is not a weak spot anywhere in the hreeding of Grace Bond's dam. Her sire The Bondsman is hy the great Baron Wilkes, dam Sorrento (dam of Jayhawker 2:14¾) hy Grand Sentinel 865, second dam Empress hy Ahdallah Mamhrino 3715, third dam Big Ellen hy Clark Chief 89, fourth dam hy Ahdallah 15, and fifth dam hy Veech's Highlander The pedigree of Grace Bond shows trotting crosses everywhere hack to the fourth or fifth crosses and then good thoroughhred hlood all down the line. Three weeks ago "Hawley" in the *Kentucky Stock Farm* wrote of Graco Bond as follows:

"Of ell the three-year-olds in training there is one that at this writing has oot appeered in puhlic, yet on her private form must he considered the most phenomenal three-year-old of either sex thet has ever heen seen, end as she lest season at Lexington proved that she wes a genuine racing mechine there is little reason to douht her gameness or racing ahility. Grece Bond is today the festest three-year-old trotter that ever lived, and it is extremely douhtful if there is hut one trotter in training that can out-hrush her for a short distence. If nothing hefslls this wonderful three-year-old filly, and if she is hrought to the Lexington meeting in perfect condition to do herself full justice, I can not see how it is possihle to heat her, and if she is defeated, it will he a cese of a trotter of the greatest flight of speed ever seen in one of her ege forced to succumh to others nowhere her equal in that respect, and as there is alweys some good reeson for defeat under such circumstances, this reeson will he sought for hy the students of recing. Any two-year old that showed such genuine recing ahility as did Grace Bond lest season, which in her three-yeer-old form develops a flight of speed the equel of which has heen seen in hut one trotter, must he either a counterfeit or the victim of mismenegement if she cen not defeat the field that see will meet at Lexington. Grece Bond can trot a quarter fester than 30 seconds; she can trot an eighth of a mile faster than any trotter thet ever trotted with the exception of Lou Dillon; she is feultlessly gaited end very reliehle, and therefore if she is properly treined and properly driven, she should win the Kentucky Futurity with consumate ease, and this is seid with the full koowledge that this year's three-yeer-olds ere an exceptionally high class lot, aud thet the mare herself is one of the tiniest pieces of horseflesh that ever aspired to championship honors."

John A. McKerron 2:04 1-2 to be Retired.

Last week's issue of the *American Sportsman* puhlished at Cleveland, Ohio, the home of the great stallion John A. McKerron hy Nutwood Wilkes, contained the following:

It is with regret that we announce the intention of Mr. H. K. Devereux to permenently retire from the treck his great trotting stallion, John A. McKerron 2:04½. It will he recalled that lest year McKerron was troubled with a splint, and that in his mile at Syracuse, N. Y., where he trotted to his present record, he was quite lame. At that time Mr. Devereux withdrew all his engagements, he wes fired and given a good rest from trainiog. This season, after his stud engegements were over, he was given reguler work, and it was thought that he would stend the preparation. His fastest miles this year were io 2:08¼, one during the recent New York State Fair at Syracuse, where the final quarter was in 29¾ seconds. After he returned to Glenville, Mr. Devereux worked him a mile in the same time. These were the fastest miles he has ever gone without a pace-maker, trotting them clearly on his courage and finishing in his most determined way. These miles and the way they were trotted indicated his condition and creeted a hope among his friends that he would, when he reeched Memphis, estehlish a new world's record for trottiog stallions. It was seen, however, efter the last mile, thet he was a trifle lame, end after careful consideration Mr. Devereux hes decided to permanently retire the son of Nutwood Wilkes, so that he will not in all prohahility he seen egein in puhlic, his training deys heing at an end.

If he had remained sound he would have started to reduce his own record at Memphis, which would really have meant an attempt to lower the stallion record. Those who are familiar with the great flight of speed possessed hy John A. McKerron, together with his gameness and courege, helieve that he would have accomplished his purpose. His trotting career has heen an illustrous one, and very few, if any, stallions have indicated more quelity than has John A. McKerron. His quality and greatness hes heen evidenced in every place where he has heen tried. His greatest victory, perheps, was in the defeat of two such trotters es Lord Derhy and The Monk.

His retirement means that he will now he permanently in the stud. As a sire we expect him to he conspicuous. His colts give evidence of heing colt trotters and they are fast. He is strongly hred in the hest hlood lines, has heen a great trotter, and will undouhtedly prove to he a great sire.

Dehorah, 2:18 as a three-year-old, hay mare hy Sahle Wilkes out of Sproule hy Le Grande, second dam May Sproule (dam of Regal Wilkes 2:11¾) hy The Moor, third dam hy Williamson's Belmont, is now owned hy Dr. Gihson of Seattle, and has one of the finest looking suckling colts at foot ever seen in the northwest It is hy Mr. A. T. Van De Vanter's good stallion Montana Director.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Pacific Advisory Board.

At the regular quarterly meeting of the American Kennel Club in New York, September 23, business pertaining to Coast affairs and the action of the Pacific Advisory Board is shown in the following extracts from a report of the meeting:

Meeting of the Pacific Advisory Committee, held June 4, 1904, San Francisco. Present—Harley, Burnham, Norman. Absent—De Ruyter, Carlton. On motion, Mr. Harley took the chair.

It was moved and seconded that the action of the secretary, as outlined in his letter of May 31 to Mr. Vredenburgh, be sustained, and that the secretary he and hereby is instructed to delay taking any further action in the premises before the meeting until he hae received a reply from Mr. Vredenburgh confirming his letter of May 23. Carried.

It was moved and seconded that the matter of the present discussion be not spread on the copy of the minutes sent to the American Kennel Club for publication, but that the resolution adopted during the foregoing discussion he forwarded to the secretary of the American Kennel Club for transmission to the Executive Board at an executive meeting. Carried.

American Kennel Cluh versus Mrs. A. A. Roi—This is a charge made that Mrs. A. A. Roi showed at the late San Francisco show a Gordon Setter dog under the name of Dick, the said dog not being her property, and that the said dog was not entitled to the name and pedigree given. From the evidence produced it would appear that the dog in question was sold hy Edward Attridge, a resident of San Francisco, to Colonel Park Henshaw, and that the pedigree given was supplied hy the vender of the dog at the time of the sale; that the dog was presented hy Colonel Henshaw to Mrs A. A. Roi. It was therefore moved and seconded that Mrs. Roi be and hereby is exonerated from the charge, and that no suspicion of fraud can he imputed to her action.

Meeting held July 23, 1904. Present—J. E. De Ruyter, chairman; C. K. Harley and J. P. Norman. Absent—H. H. Carlton and Dr. W. P. Burnham. Communications: S. Barnett. relating to charge of entering dog under wrong name and pedigree; ordered filed. From A. P. Vredenhurgh, June 6, relating to resolution passed at previous meeting; also one dated June 11, on the same subject; hoth ordered filed. Proxy from H. H. Carlton to the secretary; ordered filed.

The constitution of the Western Kennel League was brought hefore the committee, and after some discussion it was moved and seconded that

Whereas, it has come to the knowledge of this committee that the organization known as the Western Kennel League has seen fit to incorporate in its rules and constitution a clause disqualifying all persons who may exhibit dogs at shows he.d west of the 110th degree of longitude under the rules of the American Kennel Club; and

Whereas, Such a clause proves that the organization has been formed and exists in a spirit of undisguised hostility to the American Kennel Club; and

Whereas, Such action is prejudicial to the best interests of dogs and dog shows; therefore he it

Resolved, That any person or persons acting from and after this date in any official capacity, paid or unpaid, including that of judge, secretary, superintendent, steward, clerk, of a show, or as an officer or member of a heach stow committee of a club holding a show west of the 110th degree of longitude, under the rules of the Western Kennel League, or nuder any rules other than those of the American Kennel Club, be and hereby are disqualified and deharred from all privilieges of the American Kennel Club. Carried. And he it further

Resolved, That this committee recommend to the American Kennel Cluh that it take under advisement the expediency of adopting similar measures affecting clubs and shows held east of the 110th degree of longitude under the rules of the Western Kennel League or any other organization hostile to the American Keanel Cluh or otherwiee prejudicial to the hest interests of dogs and dog shows. Carried.

It was moved and seconded that, whereas the foregoing resolutions become effective from date, the secretary be and hereby is instructed to secure for them the most prompt and extended publicity possible, in order to prevent their infraction by persons otherwise uninformed of their passage. Carried.

Meeting held August 30, 1904. Present—J. E. De Ruyter, chairman; C. K. Harley, W. P. Burnham and J. P. Norman. Absent—H. H. Carlton. The Secretary read the following report:

Berkeley, Cal., Aug. 30, 1904.

Pacific Advisory Committee, A. K. C.

Gentlemen: I beg to report that since our last meeting we have by mail vote unanimously elected to membership in the American Kennel Cinh the following cluhs: Oakland Kennel Cluh and San Mateo Kennel Club.

On the subject of the resolution passed hy this committee, disqualifying officers of cluhs holding shows held under rules other than the American Kennel Cluh, I have received certain letters of approval, which I will read to the meeting, suggesting that the committee first decide whether these letters shall he incorporated in the minutes reported to the American Kennel Cluh secretary to publish in the *Gazette*, or whether the letters he not reported to the American Kennel Cluh for publication.

I would respectfully call the attention of the committee to the fact that aforesaid resolution applied to all cluhs west of the 110th degree of longitude, and wonld ask the committee to either include or exclude specifically the clubs domiolliated in British Columbia.

The Spokane Kennel Cluh made arrangements for a show to he held under Western Kennel League rulee some time previous to the passing of the Western Kennel League resolution disqualifying American Kennel Cinh cluhs. The president points out that the cluh had no voice in the passing of that disqualifying clause, and was not in favor of it. He points out that it would he manifestly unfair lo disqualify officers of that cinh or to compel it to hold a show under American Kennel Cluh rules when ite premium list has already been issued for a Western Kennel League show. The judge of the ehow had already signed a contract with the club, and an appeal is filed with this committee.

I beg to call the attention of the committee to a recent announcement in a local sporting paper that the secretary of this committee was in receipt of letters from Northern fanciers, requesting the rescinding of the disqualification resolution. The paper in question very courteously printed in its next issue my unqualified denial of the statement.

Your attention is called to the announcemont in the sporting press thnt the Western Kennel League has rescinded its disqualification clause. Your attention is also called to a statement appearing in the public press, signed hy Norman J. Stewart, that the American Kennel Cluh was offering a subsidy of $300 to a Northern kennel cluh lo hold a show under American Kennel Club rules.

With reference to the correspondence to he laid hefore the meeting, hetween the secretary of the American Kennel Cluh and the secretary of this committe, I think it would he in order for this committee to ohtain a ruling from the American Kennel Club as to what resolutions of this committee should find prompt publication in the *American Kennel Gazette*.

The Membership Committee, having terminated its lahors, and the roster of the Pacific Advisory Committee heing now complete, the chair is asked so discharge the committee. Yours obediently, J. P. NORMAN, Secretary.

On motion, it was decided to take up the secretary's report seriatim.

The election of the San Mateo Kennel Club and of the Oakland Kennel Club was ratified.

It was moved and seconded that the resolution passed on July 23 by this committee, disqualifying all officers of clubs holding shows under the rules of the Western Kennel League or under rules other than those of the American Kennel Club, west of the 110th degree of longitude, does not apply to clubs holding shows under the rules of the Canadian Kennel Club, provided such shows are held outside of the boundaries of the United States. Carried.

An extract from a letter forwarded by Mr. Thos. S. Griffith of Snokane and pertinent to the matter at issue is as follows:

"Dear Sir: * * * * but I will send dogs to A. K. C. shows at 'Frisco and any other place. I regret the trouhle and that Spokane did not even have a vote on the rule or even know anything ahout it until it was finally passed. We advertised our show months before the trouble. If you disqualify me hecause I am President of the Spokane Kennel Club, you will do me an injustice, also prevent me showing at your shows out West and East."

After discussion it was deemed inadvisable to consider the suspension of the rule and the letters suhmitted were ordered filed. Mr. Griffith was instructed by the secretary accordingly. There heing no official notice before the Committee as to the rescinding by the W. K. L. of the disq ualification clause, the subject was not admitted to discussion.

An extract was read from a letter appearing in the sporting press, purporting to he signed by N. J. Stewart, the W. K. L. secretary. The resolution of the Board, nublished in the BREEDER AND SPORTSMAN, September 10, 1904, was adopted. This was in effect a denial of certain allegations, in so far as the Board or any member of it was cognizant thereof.

Considerable correspondence was laid before the committee that had transpired between the secretary thereof and the secretary of the American Kennel Cluh, with reference to the publicatian in the *American Kennel Gazette* of resolutions for which this committee, in the interests of the American Kennel Club, deemed prompt publicity desirable. After consideration of the same, it was

Moved and seconded that the secretary be instructed to request the secretary of the American Kennel Club to lay the matter before the Executive Board, with the request to the latter to authorize the publication in the *Kennel Gazette* of resolutions for which the committee desiras prompt publicity, without awaiting the action of the American Kennel Club on the full minutes of the meetings as reported to that honorable body. This request is in no way to be interpreted as any desire to impair the undisputed right of the American Kennel Club to be placed in possession of the full minutes of the meetings of this committee. Carried.

The Membership Committee reported the completion of its labors. The roster of the committee heing now complete, the chair accordingly discharged the suh-committee.

On motion, the report of the seoretary was approved.

In regard to the foregoing the action of the A. K. C. at the meeting held last month is given as follows:

The Secretary—The Pacific Advisory Committee asks a ruling. I will preface it by saying that in passing their disqualification rule they requested me to publish it at once in the *Gazette* I sent them word that I must decline doing so; tbat it had been the custom ever since I have been secretary of tbe club to defer publication of official communications until they could be reported at the American Kennel Club meeting, and then they would be incorporated in the minutes if the American Kennel Cluh so decided; that there was no reason why I should depart from the custom of years in publishing an official communication from the Pacific Advisory Committee.

Mr. Moore—Is the action of the Pacific Advisory Committee absolutely final?

The Chairman—Yes, until it is appealed from. If there is no appeal lodged against it, then it is a finallty.

Mr. Moore—Is there any time limit as to when the appeal must be made? It would seem to me as if they had a right to have the resolutions puhiished. At the same time, I agree with the secretary that it is advisable to hold them up some time.

Mr. Moore—I make that in the form of a resolution, that the secretary be directed to puhlish the minutes of the Pacific Advisory Board in the first issue of the *Gazette* following the receipt of the report; provided, however, no appeal is lodged. Motion seconded and carried.

The Management of Young Puppies.

The puppies, having heen brought into the world, remain blind for eight or nine days, the eyes of some of them opening earlier than those of others, hut in all cases the process is a gradual one. It may also be observed at this point that the noses are, in the first instance, pink or flesh-colored, becoming gradually spotted and often not entirely black, or dark, as the case may he, until their possessors are nine or ten months old, or even more. This is a peculiarity of the canine race which often concerns inexperienced hreeders very much, and causes them to write frantic appeals to editors of papers, of whom they desire to know if the puppies are pure-hred or not. Whilst upon the subject of change of color in puppies, it may likewise he stated that the coats of many varieties alter in later life. For instance, such breeds as Dandie Dinmonts and Yorkshire Terriers are whelped black-and-tan, whilst Dalmatians are born white, hut the change comes in due course, and therefore there is no cause for agitation on the part of owners.

Returning, however, to the question of the early management of puppies, it can conscientiously be written that the less they are interfered with, assuming, of course, that the bitch is a good mother and her supply of milk is sufficient, the better. Of course, at the same time, circumstances may arise which render it necessary that they should he handled; for instance, there may be a dead or a weakly puppy, or perhaps there are more in the litter than the bitch can provide for, and then the family has to be disturbed. Under all normal conditions, however, the dam is fully capahle of attending perfectly well to her offspring, and consequently she may be left alone. All visits, especially from interested strangers, should be disallowed.

When they reach the age of about a fortnight old, the puppies will be usually found to be willing to be taught to feed a little on their own account; and the lesson may he conveyed to them by means of a saucer in which a little finely crushed biscuit thoroughly steeped and softened in gravy is placed. Very often a good deal of patience has to be exercised at first, but it can usually be overcome hy patience, and by giving them a little of the mixture at the end of one's finger at first, for they soon find out what the saucer is there for when they get to like its contents. At first only a very little of this food should he given the puppies, but the quantity may be gradually increased as they get older, though on no condition should their food be allowed to remain beside them too long, as it is apt to become sour or soiled, and therefore unwholesome.

Besides this, some bitches are unable to resist the temptation of stealing their puppies' fare, and so the young ones do not get their share, whilst all the time the owner is under the impression that they are doing very well. Some people use a great deal of cow's milk in their kennels, but this is a form of food upon the value of which opinions differ very much, and if given it should be diluted by water—about three parts milk to two, not more, of water—and have a little sugar added. When at the age of two weeks, provided that they are a fairly healthy lot, those puppies belonging to breeds the tails of which it is the fashion to dock are old enough to be operated upon. The way to proceed is to draw back the skin of the tail from the end in the direction of the body of the pup, and to feel for a joint at the part selected, which ought to he at ahout one-third of the way down the tail, measuring from the body. Then the remaining two-thirds may be easily and painlessly removed by a sharp pair of scissors, cutting through where the joint is, and the puppy can be returned to its mother, who will attend to it.

When they are six weeks old most puppies are fit to be weaned, though some requiro to be on the dam for a little longer time. The sooner, however, that they can be taken away the better it is for the bitch, whose strength and constitution are severely tried by the exactions of a litter of healthy puppies, especially after their teeth begin to show. The process of weaning, however, should be a very gradual one, as the hitch ought to be removed at first for one hour a day, then for two or three, and so on, until the final separation is effected. Meanwhile the puppies should be encouraged to attend to feeding themselves more and depending upon their mother less. Their food may be more solid, and in the case of some breeds a little minced-up meat may be added; in fact, everything possible should be done to keep them in good condition and contented.

At this point a digression may be made in order that a few words may be said on the subject of foster mothers, whose services are occasionally indispensable when puppies are being reared. At the same time, it must he admitted that there are not many experienced breeders who like foster mothers, as their use involves a great deal of trouhle and much anxiety. In the first place, a healthy bitch, suitable in size and temper, has to be procured, which under the most favorable conditions is not always an easy matter, hut this initial difficulty is immeasurahly increased by the fact that it is absolutely essential that she whelps at the same time as the other does, or within a day or so. Having succeeded in getting hold of such an animal and reconciling her to her new home, the owner is on tenterhooks until he sees her taking kindly to her adopted family and ceasing to lament the loss of her own. In fact, the removal of the foster mother's puppies and the substitution of those belonging to another bitch is very ticklish and anxious work when it has to be faced.

The hest way to proceed is to entice the foster mother away from her puppies in the night—it is always best not to use any approach to force if it is possible to avoid it—and to effect the exchange as swiftly and

silently as you can. Unfortunately, neither lot of puppies is likely to assist by keeping silence, but the suspicions of the foster mother may in some degree be allayed if the bodies of the new comers are smeared with a little of her own milk, and some of the soil or damp that is in her nest, so that they may smell as like her own puppies as possible. Then as she cannot see the fosters until daylight, she may take to them more readily than she would otherwise have done; but there are always possibilities of troubles, so the less the dog breeder has to do with foster mothers the better.

Sometimes, too, the other bitch has a say in the matter, as she may object very strongly to being deprived of some of her offspring, and may vent her displeasure on those which are left her. Happily, this is not often the case, but it does occur, and therefore the more expeditiously the whole business is conducted the greater the chances of success; so if the services of a competent assistant can be procured, the owner is acting wisely if he avails himself of them.

It usually happens that all the puppies lose flesh when they are finally separated from their dam; but they soon pick up again if properly fed and looked after. At first they should have food every three hours or so from as early as possible in the morning—and therefore their attendant should be an early riser—until night, for, as explained above, it is not advisable that what is given them to eat should be allowed to stand about the kennel. Little and often should be the maxim, and all care must be taken that the puppies food is fresh and sweet. After a week the intervals between meals may be reduced, until at length only three a day are provided. Nor should it be forgotten that the youngsters must be taught to lap water, as sometimes they do not seem to see it in the drinking-vessels until they know what it is.

Great care must be paid to the cleanliness of the puppies' bed and surroundings, else they will not only cease to thrive, but will be much more liable to contract distemper at an early age, when their constitutions are too weak to combat the disease. It is imperatively necessary that they are kept warm and dry, but a run in the yard on a fine day, provided no other dogs are about, will benefit them greatly, for fresh air and sunshine are good for all living things, and particularly young ones. Very often the stomachs of the puppies swell out, not after meals only, but at other times, and feel hard to the touch. This is probably due to the presence of worms, the extirpation of which will be referred to later on.—*English Stock-Keeper.*

Pacific Northwest Entries.

The entries for the fifth annual field trials of the Pacific Northwest Field Trials beginning at La Conner on the 11th inst. number 17; 14 English Setters and 3 Pointers. Secretary F. R. Atkins writes that although numbers are lacking this is made up by the element of quality. The attendance, it is believed, will be a representative one and an enthusiastic meet held. The entries in the two stakes are as follows:

DERBY.

Chiquita, liver and white Pointer bitch (Dr. Daniels-Fan Go), whelped May 17, 1903. John E. Lucas, agent and handler.

Fandango, liver and white Pointer bitch, same breeding as above. J. E. Lucas, agent and handler.

Katherine, black and white bitch (Detroit Joe-Dolores). J. H. Schumacher, Los Angeles, owner. J. E. Lucas handler.

Hamburg Belle, black, white and tan Setter bitch (Count's Blackie-Chevalier's Gypsy), whelped June 13, 1903. J. W. Considine, owner. J. E. Lucas, handler.

Ramona, black, white and tan English Setter bitch (Lady's Count Gladstone-Sport's Destiny), whelped March 25, 1903. A. H. Nelson, owner.

Lady Destiny, black, white and tan English Setter bitch. Same breeding and owner as preceding.

Sir Bloomfield, black, white and tan English Setter dog (Mallwyd Sirdar-Dido's Child), whelped February 14, 1903. J. W. Riplinger, Seattle, owner.

Deacon, black, white and tan English Setter dog (Sousa-Policy Girl), whelped June — 1903. Cook Inman, owner.

Bettie, white and lemon English Setter bitch (Fleet's Bushranger-Dollie Marie). R. S. Eskridge, owner.

Rockline Young Boy, blue belton English Setter dog (Roy Mootez-Zola Montez), whelped April 27, 1903. Miss W. M. Davie, Victoria, B. C., owner.

Bob H., black, white and tan English Setter dog (Sonsa-Topsy C.), whelped July 13, 1903. H. Halsted, owner.

ALL-AGE.

Star's Rod, white and lemon English Setter dog (Starlight W.-Rod's Sylvia), T. J. Wattson, San Francisco, owner. J. E. Lucas, handler.

Valita, black, white and tan English Setter bitch (California Bell Boy-Rod's Lark), J. H. Schumaker, owner. J. E. Lucas, handler.

Policy Girl, black, white and tan English Setter bitch (Dave Earl-Top's Queen), J. W. Considine, owner.

Uncle Jim, white and lemon English Setter dog (Count Whitestone-Sport's May Belle), J. A. Peebles, Seattle, owner.

Count Whitestone's Chief, orange and white English Setter dog (Count Whitestone-Sport's May Belle), N. A. Wedeen, owner.

Sousa, black, white and tan English Setter dog Tony Boy-Sport's Destiny), A. H. Nelson, owner.

DOINGS IN DOGDOM.

GRANGER INN KENNELS.

That thorough sportsman and good fellow John Golobeck is to be congratulated on his well appointed and comfortable kennels at Eckley station, Contra Costa county.

During a pleasant visit last Sunday we were shown over the kennels and were particularly impressed with a four months' old puppy by Ch. Cato Jr., out of Mellwood Nellie. This pup is one of the most promising young Setters we have ever seen. He is Cato Jr., all over and we would not be surprised if he develops into a better looking Setter than his sire, who is a corking good one. The pup has a surprisingly good head, strong bone, and shows type and quality to a degree, and is beautifully marked.

Another good pup is the bitch Merry June by Petrel's Count out of Gath's Moxey. She is a pretty white, black and tan and teeming with quality. A lemon and white bitch puppy, a very nice one too, completes the junior roster of the kennels. Ch. Cato Jr., we are pleased to note, was in excellent fettle and humor, for we had him show us his aquatic abilities in Carquinez straits.

Theodora Gladstone is heavy in whelp to Cato Jr.

Albert Betz's English Setter bitch, a neat little lemon and white one, is at the kennels being in charge of Enos Valencia. Valencia will put Cato Jr. and Betz's Merry Heart bitch in shape for the trials at Bakersfield next January.

A CONTORTION STUNT.

The proceedings of the Pacific Advisory Board, reported in this issue are in one respect rather peculiar. In fact, we would not be straining the tension very much were it said that either the Board plays favorites or is inconsistent. We refer to the letter of the secretary in reference to the temporary suspension of the disqualification meted out to W. K. L. officials. The plea for this suspension looks as much like favoritism as anything can when one remembers the staunch resolutions passed by the Board and published in about every kennel journal in the country. From the tenor of the declaration one would believe that the position of the A. K. C. committee was implacable—it was, until the melting influence of inconsistency prevailed. The Spokane club could easily have made other arrangements.

Why the leniency of the A. K. C. committee is so surprising to us, in this case, is that one of the officials of the Spokane show who dodged the lightning thereby is under disqualification by the California Coursing Board. On June 18, 1900, Bradshaw, who was a Greyhound trainer, was ruled off the coursing field for life. He was ruled off under the name of "Joe" Bradshaw, so it is published in volume 8 of the Greyhound Stud Book.

At the 1902 show in this city there was a big showing of Greyhounds. At first Bradshaw had been nominated to judge the breed. The coursing men would have none of him and Mr. Cranfield judged instead.

The California Coursing Board is to the leashmen and sportsmen what the A. K. C. is to fanciers and kennel clubs, has an international standing and its rulings have had the moral support and respect of most officials and organizations in the kennel world and among sportsmen in this country and elsewhere. Just why the A. K. C. has gratuituously extended this discourtesy to the California Coursing Board is rather enigmatical.

We might in connection with this matter call attention to the weakness shown by the Spokane club in the matter. Bradshaw was disqualified for certain acts at a Portland show. The president of the Spokane club resigned his office, so that he would be immune from the disqualifying thunderbolt of the P. A. C. The club notwithstanding held on to a twice disqualified judge. When you study the situation it does not look good.

Artificial Baits.

If some of the members of the "New Nature" school would turn their attention from bears and deer and foxes, supposed to perform remarkable feats, to fish, and try to solve the problem of how game fish really regard the numerous curious artificial baits cast to them by anglers, some good might result; at least no great harm could be done, since makers of baits as well as anglers are as much in the dark now as they ever were on this subject.

Reference is had here to mechanical baits, for flies, insects and minnows are in many cases made to imitate as closely as possible the live baits to be used in their stead, although it cannot be denied that some of the most successful artificial flies and minnows in form and color resemble nothing that flies in the air or swims in the water, says a writer in the *Sporting Goods Dealer.* One case alone serves to illustrate this point. It is the beautiful American Ambassador fly, originally made as a souvenir presented to Ambassador Choate a few years ago when he attended a banquet of the Fly-Fishers Club in London. The colors and the stars and stripes of the American flag were deftly tied on a large hook, so that the finished fly resembled our honored ensign very closely. No fish, we fancy, could imagine a fly of this pattern to belong to the insect world, yet anglers who have purchased the Ambassador fly and tried it when other lures have failed have taken salmon and trout on it in different parts of the world.

Inventors have devised some of the most curious lures ever seen outside of a museum, and not a few of these are "great killers" in theory and fact. Without any desire or intention to ridicule these baits, we cannot help wondering what the wary old bass and cautious muscalonge think of them. The more exhibiting of a few of the more modern baits in the tackle dealers' windows is sufficient to draw a crowd, and perhaps a fish's curiosity is aroused in the same manner, so that despite its best judgment it is impelled to look, then pick at the queer object, with the inevitable result, getting caught. It is quite generally believed that fish do not regard these mechanical baits as any living thing, but whether they strike at them in curiosity, fun or anger is unknown. Many anglers hold the opinion that the black bass, naturally every inch a fighter, pounces on the spinning affair in much the same spirit as a bull moose charges the hunter, each seemingly bent on destroying the new enemy found prowling in its favorite haunts.

This may be true, but the theory that the bass loves to play is equally worthy of belief, we think. If one ties a string to a small, bright object and trails the latter past a lazy cat, whose frolicsome days are over, she cannot, apparently, resist the temptation to chase the thing, and if this is repeated she will forget her nap and her dignity and enter into the fun with all the zest of her kittenhood days. Perhaps the antics of the thing remind her of the attempt of a captive mouse to escape from her clutches; perhaps a purely natural impulse causes her to catch the thing when it moves away. At any rate the cat charges the object with avidity.

Tie a bit of red flannel on a line and cast it near a bullfrog. In its natural state the amphibian sees nothing the red flannel imitates, but that the latter has a powerful effect on the frog is never denied, and any gaudy bass fly will at times attract its attention; but if the frog will occasionally snap at a spinning lure, we have never heard it advanced that one lure attracts it more than another if both are devoid of red. And if it is curiosity which causes the frog to act as if locoed every time the red flannel comes its way, one would think it would be satisfied after once feeling the sting of the barbed hook. This does not hold good if the frog's return to the game is significant. In this one might liken it to the bulldog, which forgets pain in its efforts to close with and put an end to its enemy.

In this, however, the bass and other game fishes act differently. Exceptions are noted from time to time, but not every fish, once hooked but escaping, returns to investigate the subject further. This would seem to dispose of the theory that the fish attacts the bait as it does an enemy, for in a fight between two bass a jab or two only brings the combatants together with renewed fury.

Some of the modern baits resemble nothing whatever, unless it is other lures of the same type, but anglers of wide experience throughout many seasons of angling in various waters assert that these are the most killing baits of all they have ever tried for certain varieties of game fish. Not even live minnows are excepted by them. Where one device gives good results in one water, however, another one is often found most effective elsewhere. This makes business good for the bait makers, but even if the angler, to be completely equipped, must have in his tackle box several sizes and types of lures, he may count himself better off than his brother anglers who are compelled to catch their own minnows and keep them alive as best they can until they are used for bait—something not at all easy if one's preparations are not thorough and his equipment complete as regards minnow nets, buckets, etc.

It is often said that successful fly fishing for game trout spoils the angler for live bait fishing. This, no doubt, is largely accountable for the present popularity of bait casting with various mechanical devices intended to lure the fish to the hook. The preservation of minnows and frogs by the formalin and other processes has widened the scope of the bait-casting, too. Now that he can carry a tiny jar of preserved frogs or minnows with him his range of baits is much more extensive than heretofore, and in a great many waters a few of the artificial and a jar of the preserved baits will suffice for all his angling needs. Add to these a few grasshoppers, crickets or doodle bugs that are not difficult to catch in season, and the present-day bait caster has more in common with the fly fishermen than ever. Their weapons are widely different but their methods are in some respects similar.

GOSSIP FOR SPORTSMEN.

TROUT HATCHERY WANTED IN SANTA CRUZ.

Reports from Santa Cruz state that—since the trout streams of Santa Cruz county have become the rendezvous of many anglers from abroad efforts are now being concentrated toward having them restocked whenever occasion may demand it. With this end in view former Judge Logan has taken a step toward the establishment of a fish hatchery and guarantees to furnish a site and the material necessary for its construction. Judge Logan's scheme meets with the approval of local sportsmen, who are anxious to see sportsmen from all parts of the State given a chance to enjoy good trout fishing at all times during the fishing season.

The Supervisors have appointed a committee consisting of Judge J. H. Logan, Supervisors R. S. Miller, E. A. Hall of Watsonville, F. W. Swanton, F. H. Judah Jr., J. A. Baxter of Watsonville and H. L. Middleton of Boulder Creek to confer with the State Fish and Game Commission in relation to the establishment of a hatchery in the San Lorenzo valley.

The project is a commendable one and should be given support by everybody interested. But before the consummation of this desired end the present situation in the county should be surveyed and some radical efforts made to enjoy the benefits that can be derived from a fish hatchery in that section. As it is at present it looks as if the cart were situated in front of the horse. For of what possible benefit could a fish hatchery be when the county authorities are apparently indifferent to conditions in one of the principal streams of the thirty-two trout fishing streams in the county? We refer to the San Lorenzo and the pollution of that stream by several industries in the county—the principal offenders, it is claimed, being a tannery and the gas works, the refuse from which, allowed to run in the river, have time and again killed many fish.

Another matter, that has quite a tinge of incongruity, is the desire expressed to bring anglers to the

county from all parts of the state. Why discriminate against the hunters? Sportsmen, as a class, are equally devoted to hunting and angling. The recent county legislation will undoubtedly keep visiting shooters away. These visitors leave thousands of dollars annually among the business men of the county, hence the question naturally arises, why is a discrimination made?

Another matter that could be looked into, with ultimate benefit to the trout streams is the now unnecessary close season for several years on black bass.

BIG RUN OF SALMON.

Salmon are now running up the Sacramento to the spawning grounds in great numbers. A number of seizures of nets have been made since the beginning of close season, September 10th. The Fish Commission deputies have been busy stopping the spearing of salmon near Yreka, a number of seizures of nets have also been made. Last week, during the storm, the launch Quinnat was on patrol in Suisun bay and Deputy Jack Davis was successful in arresting fishermen who braved the elements for the purpose of catching salmon in close season, believing that the deputies were laying up comfortably and would not be on lookout. One net taken was 1600 feet long. Three of the men interested in this outfit paid fines of $100 each.

One evening this week a huge salmon was seen in the Tiburon ferry slip giving a big shoal of smelt a merry time in keeping out of his rapacious jaws. So great was the commotion created that hundreds of the small fish were leaping out of the water at a time. The big salmon was chasing them as if it enjoyed the game to the utmost, for in running them about it would time and again jump full length from the water. The incident was observed by a number of spectators who enjoyed the sight for a half hour.

GOOD STRIPED BASS FISHING.

It was an auspicious day last Sunday for the many striped bass anglers who journeyed to San Pablo, Rodeo, Crockett and other fishing resorts along the shores of Contra Costa county for nearly all of them enjoyed great sport with the gamey bass and returned to this city with many fish.

Probably the best results during the day were had in the vicinity of San Pablo station. During the forenoon, on the last of the ebb tide, some twenty boats were out on the shallow waters of San Pablo bay. The flotilla of bass fishing boats were strung out in formation almost of a circle and for an hour and a half the fun was lively. An angler in one boat would get a strike and his reel would sing as the fish ran out the line; his actions, mayhap, accompanied with an exultant shout, would attract the envious attention of anglers in a nearby boat. Their interest in the other fellow would not be for long, however, for almost simultaneously there would be a strike on the watchers' spoons and then they had to look after fish of their own. At one time the men in a dozen boats were seen to be engaged playing fish. It was conceded by every fisherman present at San Pablo last Sunday that it was the liveliest day with striped bass that local anglers have ever had. The luckiest fishermen at that fishing resort last Sunday were those who took the first boat from this city. Nearly all of the bass were taken on spoons; the bait fishermen were not able to make any showing as compared to the spoon trollers. On the contrary, those who used bait on the preceding day caught more fish than the spoon men. The only comment on this peculiar variance, made by the anglers, was that the showing was another puzzling illustration of the vagaries of the fish.

The exact locality where the best catches were made was on the shallow flats near the mouth of San Pablo creek, around and about the "barrel" beacon. The fact that the fish were caught on the last third of the ebb was commented on as being also rather unusual.

Among the lucky anglers were Charles Breidenstein, Sam A. Wells and Mr. Eaton, the latter on his initial bass fishing trip. The three landed eleven fish that scaled eighty pounds. Eagleson brothers caught seven fish that weighed fifty-five pounds "Ed" Schultz and "Pete" McRae took twenty-two fish ranging from four to eighteen pounds in weight. Jahez Swan and Walter Burlingame still fished with bait and hooked several fish.

Anglers who went to Rodeo returned with fish. At Eckley station, near Crockett, J. X. De Witt caught fifteen bass trolling in the long eddy between the grain warehouses. Bass have been caught plentifully at this point for three weeks past.

Fishing in San Antone creek is decidedly on the pickup. Last Thursday W. S. Kittle, A. M. Cumming and Mr. Church of this city caught over 200 pounds of bass. The fish ran from about three to fourteen pounds in weight and were nearly all taken with clam baits. Last Sunday in the San Antone Messrs. Bliss and Johnson took seven fish, ranging from five to fourteen pounds in weight. Al Hudson and companion were fairly successful fishing in the creek last Sunday.

Schultz slough, a fishing water reached in the past by anglers who went to Burdells, is now preserved. A number of Petaluma sportsmen have leased the marsh through which the slough meanders and have erected a shooting and fishing shack on the marsh. The slough is navigable, however, and anglers can still fish there, but it is now necessary to get into the slough by boat from its mouth. The old method of walking across the marsh is now forbidden by the new lessees of the land.

ILLEGAL DUCK KILLING.

The press dispatch given below is characteristic and in line with annual newspaper statements of this character. The allegation that "young ducks" are being slaughtered is suggestive of a "nigger in the woodpile." In less than two weeks the open season will begin, the age limit therefore is slightly incongrous.

If the game law tinkers would devote one-tenth the energy to the enforcement of the present game law that is expended in the yearly melancholy litanies upon the devoted heads of real and imaginery poachers there would be less cause for fanatical program and proposed legislative jerrymanding. The practice of the art of how not to do it is a far better paying institution evidently than an application of the police provisions of the law.

County officials are empowered to take action in game law violation cases just as much as in other infractions of the statutes.

There is far more profit in tinkering than in endeavoring to have the present laws properly observed. It is very evident that all interest was lost after the passage of the law. Past indifference is now to be bolstered up by new game law amendments, barnacled with ominous penalties, as of yore.

The history of bygone game protection penalties, the enforcement of the law and police application to that effect by the various office holders appointed for the purpose (mainly of drawing salaries and stirring discord, as events have proved) can be taken as a criterion in the administration of contemplated game law amendments, if adopted. The dispatch given below is an old familiar, in style, and if the truth were known, it would not be an off guess that Dustproof had sprung a little preliminary campaign mine.

This reminds us of a pertinent suggestion by a well known local sportsman. It is to the effect, that it would be a wise plan if one hundred or more interested sportsmen would chip in and pension the disturber off, for the almost unanimous concensus of opinion is that he has done more to set back game protection and sports afield and by the stream than can he made up in fifty years.

The dispatch alluded to was from Stockton, and since writing the foregoing we are reliably informed that it was a fake:

"The shooting clubs and other sportsmen of this city are highly indignant and have entered a protest against the great slaughter of young ducks out of season on the islands and new reclamation districts west of this city. For two weeks unsportsmanlike hunters have been out once or twice a week and have killed a large number of "floppers," or ducks which have not yet become strong enough to fly.

The Board of Supervisors was recently requested by the organized clubs to appoint game wardens, but it was decided that constables and other peace officers throughout the county should attend to the important matter. Not a single arrest has been made, though it is a well known fact that hundreds of young ducks have been killed during the past two weeks. In case any arrests are made, the offenders will be prosecuted to the limit by the shooting clubs."

SANTA CRUZ SPORTSMEN ORGANIZE.

A letter received from Boulder Creek, Santa Cruz county states that the sportsmen of that vicinity impelled by the threatened destruction of the game and fish in their section, held a meeting in the Alpine parlors Friday night, September 30, and organized the Boulder Creek Fish and Game Protective Association with H. G. Hollenback, President, and J. H. Aram, Secretary.

The continual disregard that has been paid to the fish and game laws, and the evident incompetence or unwillingness of the local authorities to act in the matter, practically forced the formation of this branch of the State Association. So many conflicting game and fish ordinances are now in force and proposed, that the sportsman from San Francisco and other places who make this vicinity their hunting grounds, would have to employ a lawyer and take a surveyor along when on their hunting trips. Resolutions were adopted condemning the proposed extension of the quail close season to November 15; approving making the rabbit season concurrent with the quail season as it now stands (Oct. 15), and calling the attention of the supervisors to the open defiance of the law in the maintenance of obstructions in the river and obsolete fish ladders that the small fish cannot run. Representatives of the club will appear before the next meeting of the supervisors and urge their claims. Starting with a list of sixty members, which embraces many of the prominent men of that section, a determined effort will he made to secure uniform laws and protection, that will make this locality again, the hunters paradise.

WILD PIGEONS.

Every sportsman knows that our wild pigeon (Ectopistes migratorius) is on the road to rapid extinction in this country—fewer and fewer of the birds being noticed yearly. Still, every now and then some sportsmen's journal in the country prints a statement to the effect that some one has observed immense flocks of wild pigeons in one section of the country or another. These reports usually come from western correspondents, and it is safe to say that they invariably refer to the band tailed pigeon (Columba fasciata). This bird, to be sure, is a large wild pigeon, and one of irregular distribution in the wooded mountain regions of western United States from British Columbia south to Mexico, and the mountainous regions of Guatemala. But it is an entirely different bird from the wild pigeon which was so abundant in the eastern part of our country fifty or seventy-five years ago. They do not even belong to the same genus of pigeons. An easy way to tell the two species apart is by a comparison of the forms of the tails, and the lengths of the latter compared with the wings. In the band tailed pigeon the tail is much shorter than the wing, it being composed of broad feathers and rounded. Now in the formerly abundant wild pigeon (Ectopistes), the tail is nearly as long as the wing, the feathers composing it being narrow, pointed at the tips and graduated. The plumage of the two species, moreover, are entirely different, but it is not necessary to enter upon their differential descriptions here.

Quail Season Shortened.

The supervisors of Santa Cruz county seem to be rabid in their desire for game protection in the county. The latest change in the county game law is the shortening of the quail season for one month—the open season in that county now begins on November 15th, instead of October 15th.

What the particular reason is for the cut down is an enigma to sportsmen who are posted in regard to the shooting conditions in the county and the necessity of proper game protection measures.

It is asserted by competent observers that quail are not only exceedingly plentiful in the county but that there is likewise large sections of the county that are extremely hard to hunt quail in and are therefore natural preserves for the birds.

As the Santa Cruz laws now stand, the use of dogs in deer hunting is prohibited, there is a close season on both doves and black bass for several years, and now the quail season has been shortened, it is claimed unnecessarily.

This journal is, and has been for years past, a staunch advocate of reasonable and proper game protection, but we do not believe in going to the extremes of prohibition.

Calendars for 1905.

WILMINGTON, DEL., Sept. 30, 1904.

EDITOR BREEDER AND SPORTSMAN:—Dear Sir, Will you kindly convey to your readers the fact that Laflin & Rand 1905 calendars will not be ready for distribution until November, 1904. In quite a few instances our good friends sent on their money and within a week or so have written us that they have not received the calendars, forgetting the fact that thousands of address labels have to be written before sending them on to the mailing rooms of the Lithographic Companies. Yours very truly,

J. G. EWING, Manager.

Riflemen Like Them.

At the California Schutzen Club shoot held Sunday, October 2, 1904, the first bullseye in the morning was made by M. Kolander. The last bullseye in the morning was shot by A. Pape, who also made the last bullseye in the afternoon.

In re-loading, both shooters used the reliable and far-famed U. M. C. "7½ Primers."

The best score made on the "honorary" target, 75 being possible, was shot by H. Schuenert who scored 72. On Monday, October 3, 1904, the highest score made on this target was shot by F. P. Schuster, who scored 73 and also made a score of 72 on his member's ticket.

Both of the above shooters re-prime their shells with U. M. C. "7½ Primers." They must be the goods for the work, results count.

A Corking Good Record.

W. B. Darton of Portland, Me., generally recognized as the best trap shot in Maine, on Tuesday, Sept. 13th, at Bangor, made what is considered to be one of the best scores ever made in the State of Maine with a 16 gauge Parker gun. Out of a possible 50 birds at 16 yards rise, Mr. Darton broke 47. This would not seem such a remarkable score except for the fact that it was performed with a 16 gauge Parker gun, which makes it a remarkable record. Mr. Darton is a shooter, becoming more and more prominent and is a staunch advocate and supporter of the "Old Reliable" Parker gun.

Smokeless Averages Reported.

Lafayette, Ind., September 8th and 9th, Mr. C. G. Spencer, first general average, 373 out of 400, shooting "Du Pont." Second general average, Mr. F. C. Riehl, 362 out of 400, shooting "E. C." Second amateur average, Mr. H. Clark of Wabash, Ind., 346 out of 400, shooting "Du Pont." Third amateur average, Mr. E. Brown, Pleasant Grove, Ind., 335 out of 400, shooting "Infallible."

Pittsburg, Pa., September 5th, Mr. L. B. Fleming, first general average, and also first amateur average, 139 out of 150, shooting "Du Pont." Second general and second amateur average, Mr. J. F. Calhoun, 137 out of 150, shooting "Infallible." Third general average, Mr. L. Z. Lawreoce, 133 out of 150, shooting "Infallible." Third amateur average, Mr. H. Gleffer, Mr. C. J. Jessop, tied, 128 out of 150, Mr. H. Gleffer, shooting "Schnitze," and Mr. C. J. Jessop, shooting "Du Pont."

Lakeside, Mich., Sept. 30th and 31st, Mr. Ralph Trimble, first general average, 315 out of 350, shooting "Du Pont." Third general average, Mr. Hood Waters, 311 out of 350, shooting "Infallible."

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tidewater.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

THE FARM.

Lessons of the Show Yard.

The writer met a friend at a great cattle show, who said: "Come with me. I want you to see my herd. I am in hard luck. The judges discriminate against me. I have not made my expeuses at this fair." A close inspection of the cattle revealed two facts: they were not in show condition and there was in each animal a fatal weakness of conformation, though the herd possessed great excellencies. "I know the animals are not fat. I have a poor herdsman. I am willing to get a hetter herdsman, if you think hest, and I am willing to get on the right side of the judge, if you think tbat will help me next year," was the suggestion.

Here was an old hreeder and a good man, who needed some elementary training and instruction. I decided it would he hest to speak with him frankly, for his future good. "May I talk with you freelv, and will you helieve me sincere and not take offense?" I asked. "Certainly," he replied. "Well, then you must not speak so of tbe judge. Judges are human and may make mistakes but it is rare that they are partial to individuals. Indeed I bappen to know tbat judges quite often give their own consciences a twinge hy awarding prizes where they do not properly helong rather than leave some poor exhibitor lonely in entire defeat. The number of our judges who are to be hought is very small indeed. I could not have given your cattle more than they received, and here is the weak place," and I put my hand on a marked deficiency in conformation.

"First of all, get a hetter sire; get one that will correct tbis weakness in his offspring; get a good one. Stand not on economy or pride or anything else hut hunt high and low till you have found one that is strong where you are weak. Then get two females as good as be is. Then you need not discard your present herd hut you will build it up while you are creating a new family to add strength to it."

"But I do not like to do that now; this is my thirtieth year as a hreeder."

"It is indeed the end of your thirtieth year, but rememher that it is also the beginning of another thirty years, of another fifty years, of another hundred years of effort. That is the right use of the golden present, to consider it not as the end of all but as the beginning of a hetter era. You and your boys may hetter date from today the time when you hegan to hreed prize winners than to date it as the time when you gave up, defeated, after thirty years of struggle. This is the first time you have met the best herds? Very well, you have learned far more than it has cost you to come here. Go home, somewhat humble, perhaps, but at any rate far stronger than ever before as you now have the knowledge that will make you succeed in the future."

The old breeder called his hoy. "See here, John, here is where our cattle are weak, here is what knocked us out; we have not realized this defect or classed it as serious, I think we will find a sire that will correct this. I have been to school here. Good day; I won't forget; this is the beginning, not the end." And the old man took a fresh pull at his pipe and led his old hull to water with a twinkle in his eye and a look of firm resolve about his weatherheaten face that told of something else than defeat.—Joseph E. Wing in *Breeders' Gazette.*

More Fencing for Sheep.

We have given up the expectation that in the near future sheep will he kept on every farm or on nearly every farm in the Northwest, says *The Farmer*, and for the reason that it is going to he some time hefore farms will he sufficiently fenced to permit of a rapid extension of the industry. It will he apparent to every thoughtful observer that it is impossible to keep sheep on farms without fencing, that is to say, to keep them on the farm throughout the year.

When the question of fencing is approached with any farmers who have hitherto heen without fencing, they shake their heads at the thought of the cost of the fencing. They do not wait to consider wbat will he the outcome of not having fences. They lose sight of the waning fertility which certainly must follow such a system of farming. The cost of fencing for sheep is also magnified frequently in the mind. Fences can be huilt that will turn sheep without great cost, providing the work is done in a certain way, that is providing a certain style of fence is adopted, providing it is conducted on certain principles and providing the work is done as it ought to be generally hy the ordinary lahor kept upon the farm.

We think the following style of fence one of the hest that could he erected for sheep. Take the road scraper and make a ridge of earth from 8 to 10 feet hroad and raise to the height of ahout 12 inches in the center. In the center of the ridge plant posts two rods apart, string along these posts, from the ground npward, some kind of woven wire about two feet high or prohahly a little more than that. In the center hetween the posts drive down a short stake which when driven will he the same height as the top of the wire; staole the wire to these stakes. Above the woven wire string a couple of strands of harh wire, the top one heing near the top of the posts. Such a fence should he put up at a cost not much exceeding 30 cents per rod for material, hut this, of course would not include the labor of building the fence. If posts were put in high enough and the fence was wanted to turn cattle another harh wire would answer the purpose.

Such a fence would not only readily confine sheep where this might he desired, but on level stretches of land the ridges thus formed would exercise a salutary influence on drainage. The depressions thus formed should not he filled in plowing the field, and the ridge on which tbe fence is built should he seeded down to some kind or kinds of grass so that it could he cut each year with the mower and thus kept free from weeds.

The good breeder of cattle prizes a diploma more than he does a $20 prize. He frames the diploma as a perpetual evidence. The cash prize disappears in the commercial stream and the victory in the ring becomes merely a memory.

SAN FRANCISCO, CAL

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D. Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy......$7
BOUND IN CLOTH, per Copy.......... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse, as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

CAPT. THOS. B. MERRY,
Hotel Marlboro, Los Angeles.

STOCK FARM FOR SALE.

FINE STOCK FARM, HIGHLY IMPROVED, in choice location in California, for sale. Address Breeder and Sportsman.

Experienced Trainer

WISHES TO ARRANGE WITH CAPITALIST to buy and condition young trotting horses for the Eastern market. This can be done at small expense and good profits made. Address N., care of Breeder and Sportsman, 36 Geary Street, San Francisco.

TEAMS FOR SALE.

PAIR OF WELL-MATED STANDARD-bred Bay Geldings; stand 16.1; weigh 2600 lbs.; well broke, both single and double, and are a fine carriage team, handsome and stylish. Also, a handsome black Driving Team, 6 years old; these mares are well bred, being by St. Nicholas, son of Sidney. They are square trotters and can beat 3 minutes to pole; either mare can trot a mile single in 2:40. For further particulars as regards price, etc., apply to A. DOBRZENSKY, Prop. Vendome Stable, Newman, Cal.

For Sale. Two-year-old brown Stallion by Diablo 2:09¼, dam by half thoroughbred son of Guy Wilkes, second dam by Venturo 2:27¼, thoroughbred son of Belmont. Has stake entries, is just broken and is a good prospect. Apply to this office.

FOR SALE.

ONE OF THE GRANDEST LOOKING AND finest bred young Stallions in California. He is 2 coming 3 years; chestnut with star, and one pastern white; good mane and tail; stands 15¼ hands high; all sound, not a blemish; well broken; never worked for speed: a trotter. Sired by Nearest 2:22, brother to John A. McKerron 2:04½. First dam Princess Airlie by Prince Airlie; second dam Minnie Princess, dam of Leonora 2:25 by Nutwood 2:18¾; third dam Belle by Paul's Abdallah; fourth dam Kate Crockett by Langford by Belmont; fifth dam Fanny by American Boy Jr. Prince Airlie by Guy Wilkes 2:15¼; first dam Chantilly (4-year-old trial 2:19½, dam of Chanty (2) 2:24, Cascade 2:14¾) by Nutwood 2:18¾; second dam Crepon (dam of Lovelace 2:20, Betsy Britton 2:20¾, Brilliantine 2:29½) by Princeps; third dam Crape Lisse (dam of King Rene Jr. 2:17, Balzarine 2:27) by George Wilkes 2:22; fourth dam Tarlton mare, dam of Tarlton 2:30. Only reasons for selling is that I have another colt bred the same way and am overstocked. Address

T. W. BARSTOW, San Jose, Cal.

FOR SALE.

WINNIE WILKES 2:17½

Black Mare, 16¼ hands, weighs about 1200 lbs in racing condition; 9 years old; sired by Rey Wilkes, dam Pet by Cresco second dam Topsy by General Taylor. WINNIE WILKES is in foal to Searchlight. She is a good driving mare, single or double. She is not only a high-class race-horse, but a most desirable broodmare. She will be sold on account of her owner being in ill health and not having use for her. Address or apply to R. P. M. GREELEY, cor. Franklin and 14th Sts., Oakland, Cal.

FOR SALE.

A HANDSOME 4-YEAR-OLD BAY FILLY; pacer: stands 16.2¼ hands; sired by McKinney, dam Mission Bell by St. Nicholas. Full sister to Mechanic. A smooth-gaited filly, goes without straps or boots, and with less than a month's handling has paced a half in 1:11. Is sure to make a fast pacer. Address or apply to JOHN ROWAN, 1347 East South Street, Stockton, Cal.

BUY THE BLOOD OF THE WINNERS!

FOR SALE—The seven-year-old black mare DUSKY BELLE by Creighton, dam Pacheco (thoroughbred), the dam of Anna Belle 2:27¼, she the dam of Murray M. 2:14 (three-year-old record), Maud Murray 2:12 (Austrian record) and Robert I. 2:08¾, sire of Roberta (2) 2:19¼. Dusky Belle is in foal to my horse Anteeo II. She is coal black, broke single and double, and a pure-gaited trotter. PAYNE J. SHAFTER, Olema, Cal.

Draft Horses in Demand.

The following from the New York *Herald* should contain a suggestion to thinking farmers, who possess facilities for horse raising:

The growing scarcity of heavy draft horses is again causing much concern among dealers. Proprietors of the small stables where stock is bought from week to week as the trade demands are finding it very difficult to obtain first-class drafters, and even the largest dealers, who contract for the pick of the horses on the breeding and feeding farms far in advance of their readiness for marketing, are constantly forced to pay higher and higher prices for their future supplies.

In speaking of the outlook in this branch of the trade, Joseph D. Carroll, general manager of the Fish, Doerr & Carroll Horse Company, said a few days ago:

"Two or three things are at present operating in the direction of higher prices for heavy draft horses, and I expect to see values reach new levels before the end of the year. One thing that forces prices upward is the fact that contractors who work thousands and thousands of horses are using much heavier teams than they used a few years ago. They have found that it pays to handle big loads, and their trucks are now built to carry two and a half yards of earth where they used to carry one yard and a quarter. To do this work they require bigger horses than before. I remember when all our customers bought horses under 1400 pounds for contractors' work, but they wont look at anything under 1500 pounds now, and most of them want animals weighing around 1600 and 1700 pounds. It takes a tremendous number of big horses to supply this new demand, and the worst of it is the breeders are not raising enough of them.

"High price for beef seem to have tempted a great many western farmers to drop horses and go into cattle raising in the last few years. There is no getting around the fact that steers pay best as a rule. They are ready for market in two years, where it takes four to raise a horse. Then, again, the difficulty of raising heavy drafters is not to be denied. Out of twenty colts, not more then ten will develop into horses weighing over 1400 pounds, no matter how big their sires and dams may be. Then cut out the blemished ones, and the ones that get sick and die, and the breeder has really only a small percentage of such drafters as the market now demands. No wonder we have to pay high prices for the best."

Sheep Shearing Contest at World's Fair.

A novel and exciting sheep and goat shearing contest will be held at the World's Fair, October 12, under the auspices of the International Sheep Shearing Festival Association. Cups to the value of $1125 will be offered for the following contests:

Professional contest for speed, first prize, $125; second prize, $65.

Professional contest for quality, first prize, $125; second prize, $65.

Agricultural College Students' contest for speed and quality combined, first prize, $125; second prize, $65.

Shepherd's contest for speed and quality combined, first prize, $125; second prize, $65.

Angora goat shearing contest for speed and quality combined, first prize, $125; second prize, $65.

Free for all competition, hand shearing vs. machine shearing, $125.

Dick Marquis, champion sheep shearer of the world will give an exhibition of sheep shearing for speed and quality. Mr. Marquis holds the world's record for shearing a single sheep in one minute and six seconds, 360 sheep in one day, and 1414 sheep in six days. The Shearing Festival will be held in the Live Stock Pavilion, World's Fair grounds, and "will be one of the most unique and attractive features of the live stock show," says Col. Chas. F. Mills, chief of the live stock department.

Col. L. D. Burch, editor of the *American Sheep Breeder*, says: "This will be the first international sheep shearing contest ever held, and it is not unlikely that all records for sheep shearing will be broken."

Jackson's Napa Soda untangles the feet.

Veterinary Advice FREE

Dr. S. A. Tuttle, a veterinary surgeon of long experience has written a book entitled "Veterinary Experience" on the diseases of horses, giving symptoms and treatment in plain terms. It is fully illustrated with diagrams showing the skeleton and circulatory and digestive systems with references that make them plain. Tells how to buy a horse and know whether it is sound or not. Every horse owner should have one. It is sent to any one.

TUTTLE'S ELIXIR

is the only guaranteed cure for **Colic, Curb,** recent **Shoe Boils** and **Callous.** It locates lameness, relieves and cures **Spavins, Ring Bone, Cockle Joints, Grease Heel, Scratches, Catarrh,** etc. Send today and get the book free and information about Dr. Tuttle's specifics.

DE CLOW, Cedar Rapids, Iowa

The Mutton of It.

Farmers in England are getting about the same price for wool that our farmers are, and in England the sheep is the "rent payer," even on lands that rent at from $5 to $8 an acre. In this country there is great complaint now in the live stock markets about the poor quality of the sheep that are arriving, says *Farm, Stock and Home*. They are carrying a poor quality of mutton, even from our average standpoint, which is not a high one, and almost none are suitable for exporting. From the English markets, on the other hand, come enthusiastic reports about the mutton quality of the sheep therein, and the growers of the sheep find in mutton the profit that makes sheep the most desirable live stock in England.

In other words, the English farmer has concerned himself in developing the best mutton sheep in the world, and out of the development he finds the wherewithal to pay the highest land rental in the world; while the American farmer has concerned himself chiefly with getting the highest tariff protection on wool, and finds sheep such indifferent profit-makers that our sheep population is relatively much smaller than a generation ago, on the cheapest lands in civilization.

This is not a "free trade" article, it is simply a statement of fact that ought to provoke thought. Stick to the tariff on wool, if need be; that doesn't do the wool grower much harm, though it does no good. But the tariff need not prevent the development of the mutton factor in sheep husbandry, out of which the British farmer, with no tariff protection on wool, is getting his large profits. Roots and our oil meal are the feeds that make English mutton. The first are as available here as in England, and the last much more so. The breeds of sheep out of which English mutton is made are already here, and in lands and rentals we have an immense advantage. Why, then, cannot sheep in the United States be made as profitable as in England? That there needs to be a reorganization in our methods of sheep husbandry is clear, and why longer defer getting at it? There is no danger of overdoing the matter of producing the English sort of mutton in the United States. Give our people that kind of mutton and everybody will be amazed at the quantity they will eat.

A breeder who practiced what he now preaches says: "It is a strange fact that few people get into any business just when it will do them the most good and cost them the least. Two years ago when beef cattle were selling high plenty of buyers were found for pure-bred cattle at high prices. Everybody knew that those prices for fat cattle could not last forever but many people wanted to buy breeding cattle on a correspondingly high level. Now things have changed Fat cattle are cheap and buyers for breeding cattle are few. They are cheaper now than they have been for years and they will make more money on the present basis than they would have made if bought two or three years ago, yet there are few investors. Watch for the low spots in the market and then buy. This applies to all classes of live stock. This country's consumptive ability is growing faster than its productivity and although we are not past occasional periods of low prices the day of long-continued profitless production has gone by. Beef cattle and all other staple products of this country will hereafter return a profit to the producer if the stuff is bred right but there will be no room for the scrubs."

—o—

Chicago reports good draft geldings and mares scarce at top prices. Importers are unable to fill orders in either Chicago or St. Louis.

—o—

Pigs confined in a pen need plenty of [illegible] food. Give them weeds, green corn, [illegible] or [illegible] fruit, etc.

Will serve a limited number of Approved Mares, Season 1904

FEE - - - $75

Reductions made for two or more mares.

Manager, WALTER SEALY.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, $1.00; Half-Gallon, $1.75; Gallon, $3.00; 2½-Gallon, $5.50; Five-Gallon, $10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

Sold by all Dealers in Harness and Turf Goods. If not in stock ask them to write any Jobber for it.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT, into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Isn't He Worth Saving?

ABSOLUTELY CURES QUINN'S OINTMENT REMOVES SPLINTS SPAVINS WINDPUFFS CURBS

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price $1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials etc.

MILWAUKEE, WIS

MEN—WOMEN—CHILDREN.
WEAK KIDNEYS CURED FOREVER.

If you bave a pain or dull ache in the back it is unmistakable evidence of kidney trouble. It is a warning to tell you trouble is ahead unless you remedy the cause immediately.

Lame back is only one symptom of kidney trouble. Other symptoms are, being obliged to pass water often during the day and to get up many times during the night, inability to bold your urine, smarting or irritation, passing brick-dust or sediment in tbe urine, catarrh of the bladder, uric acid, constant beadache, dizziness, sleeplessness, nervousness, irregular heart beating, rheumatism, bloating, irritability, worn-out feeling, lack of ambition and sallow complexion.

Hooper's Parsley Kidney Pills are proving to be the most wonderful cure ever gotten out for weak and diseased Kidneys. If you have tried tbe many so-called "cures"—if you bave become disgusted witb tbem and stopped using them, try one package of Hooper's Parsley Kidney Pills and you will immediately begin to feel better. Hooper's Pills are a cure. Tbey will stop the trouble just where it is and prevent that awful and dreaded Brights Disease. Don't buy any but Hoopers. Pacific Coast Trotting Horse Breeders Association

FOR FOALS OF MARES BRED IN 1904

TO TROT OR PACE AT TWO AND THREE YEARS OLD.

ONLY $2 TO NOMINATE MARE

$250 for Trotting Foals. $1750 for Pacing Foals. $800 to Nominators of Dams of Winners and $200 for Owners of Stallions. Money Divided as Follows:

$3000 for Three-Year-Old Trotters.
200 for Nominator of Dam of Winner of Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
200 for Nominator of Dam of Winner of Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$1000 for Three-Year-Old Pacers.
200 for the Nominator of Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator of Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

ENTRANCE AND PAYMENTS—$2 to nominate Mare on October 15, 1904, when name, color and description of Mare and Stallion bred to must be given. $5 February 1, 1905. $5 September 1, 1905. $10 on Yearlings February 1, 1906. $10 on Two-Year-Olds February 1, 1907. $10 on Three-Year-Olds February 1 1908.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace. $35 to start in the Two-Year-Old Trot. $35 to start in the Three-Year-Old Pace. $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Colts that Start at Two Years Old are Not Barred from Starting Again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats (2 in 3), and for Three-Year-Olds 3 in 5. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a Mare proves barren, or slips, or has a dead Foal, or twins, or if either the Mare or Foal dies before February 1, 1906, her Nominator may sell and transfer his nomination or substitute another Mare or Foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries the name, color and pedigree of Mare must be given: also the name of the horse to which she was bred in 1904

Entries must be accompanied by the entrance fee.

Should the amount of entrance money received be in excess of the amount of the Stakes the excess will be added, less the cost of postage stamps, printing and advertising, to the Stakes for the Three-Year-Old divisions in proportion to the amount offered in each division.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. Hopples will not be barred in pacing races.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each Division of the Stake 50, 25, 15 and 10 per cent There will be no more moneys in each Division than there are starters.

Entries open to the world Membership in the Association not required to enter, but no horse will be allowed to start until the owner has become a member.

Write for Entry Blanks to

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, October 15, 1904.

THIS IS THE LAST CALL for nominations of mares in Breeders Futurity No. 5, which has a guarantee money-in-the-bank value of $7000 and is for the foals of mares bred this year. Nominations must be made to-day, Saturday, October 15th, and $2 must accompany each nomination. Two dollars is a small sum to invest where the chances of winning are so numerous and so large. A colt or filly has the opportunity of winning as a pacer or a trotter as a two year-old and as a three-year-old. The person who nominates the mare that wins any division of the stake will be awarded $200. The owner of the stallion that sires the winner of either three-year old division will be given $100. There are many chances to get your money back with a big profit on the investment. But to do this you must make out your nominations and get them in the mail to-day. Don't forget all about it and then, when your colt is showing 2:20 speed as a two-year-old, be regretting that he is not eligible to start in this stake. Nominations close to-day.

COUNTRY JAY, a trotter that has been out of the game for two seasons owing to lameness of some sort, accomplished the wonderful performance of trotting a mile under saddle in 2:10 at Lexington last Wednesday. Country Jay's race record is 2:10¾, made in the third heat of the $5000 2:24 trot at Syracuse in 1901. Country Jay is by Jay Hawker, dam by Parkville, second dam by Young Jim. That he should come out after two years of retirement for lameness, and trot faster under saddle than he had ever shown in a race to sulky is not only a remarkable thing for a horse to do, but will go a long way to convince doubters that the claim made for years by Budd Doble and a few others of the old time riders and drivers, that a trotter or pacer should be able to go faster under saddle than to sulky. Now that Country Jay has lowered the 2:13¾ record of Charley Mac nearly four seconds, Mr. Billings will undoubtedly have a strong incentive to put a saddle on others of his many fast trotters and attempt to again secure the world's record for a trotter at this way of going.

THE WHITNEY SALE was a great success. Ninety-one head brought $463,650, and average of $5,095. Hamburg brought the top price of the sale, $70,000 and was purchased by Harry Payne Whitney. This is $10,000 more than his father paid for the great son of Hanover. Harry Payne Whitney also bid in the stallion Sandringham, a full brother to Persimmon, Diamond Jubilee and Florizel II. for $14,000, while Milton Young of Lexington, Kentucky, got Nasturtium, the best two year-old of his time for $10,000. The imported stallion Meddler was purchased by Matthew Corbett for $51,000. This is $2000 more than Whitney paid for the horse. Meddler was originally owned by George Abingdon Baird, an English millionaire, and when his horses were sold after their owner's death, Meddler was bid in for $72,500 by J. Malcolm Forbes of Boston, at whose death he was bid in by Sidney Paget, acting for Whitney, for $49,000.

Of the remaining stallions in the Whitney stud, Bally Hoo Bay went to Harry Payne Whitney for $25,000, and Yankee was bought by W. H. Jennings for $21,500. Other sales were: Morningside, b m, 1898, imp. Meddler-Sunnyside, sold to Harry Payne Whitney, $15,000; imp. Ondulee b m, 1898, St. Simon-Ornis, sold to James R. Keene, $14,000; imp. Snow Corrie, b m, Tristan-Correl Boy, sold to James R. Keene, $14,000; Yorkville Belle, ch m, Miser-Thora, sold to Sydney Paget, $10,000.

VILLAGE FARM, the greatest breeding farm of trotters, is to be dispersed. At the Fasig-Tipton Midwinter Sale, which is to be held at Madison Square Garden in January, all the horses owned by Messrs. Hamlin are to be sold by auction. The great California bred stallion Chimes, the only horse that ever sired three trotters with records of 2:06 or better will be offered with the rest of the stallions and great brood mares that are owned by Village Farm. It is a pity to see such an establishment broken up, but it offers an opportunity to the breeders of America that they will doubtless be eager to take advantage of. We sincerely hope that some of our California breeders will either attend the sale or send commissions to bid on some of the stallions and mares, as well as the colts and fillies. We need new infusions of the best eastern trotting blood on this coast. This is the best place in the world to breed the American trotter as has been clearly demonstrated this year. We can raise as good horses as any place on earth and can raise them for less money. We hope to see some of the Village Farm horses knocked down to California bidders.

DAIRYING IN CALIFORNIA is rapidly becoming the State's greatest industry. "For California," the very neat monthly publication of the California Promotion Committee contains a series of articles on this subject One "My Herd of Jerseys," contributed by Major-General W. R. Shafter, and another by C. D. Pierce of the Riverside Dairy Farm, near Stockton, entitled "Raising Fine Bred Dairy Stock in California" make this a dairy farm number of more than usual merit. "Opportunities for the Eastern Dairyman," by Judge P. J Shields of Sacramento; "The Dairy and Its Cow," by George W. Coe; "Statements of Dairymen in California," and "How a Co-operative Creamery Made a Success," complete the list of articles along this line. The articles are very interesting and instructive and the issue should have a wide circulation. It is an excellent thing to send to your Eastern friends who wish to learn something of our State's resources.

THE SALE OF TROTTING BRED horses which is to take place at Fred H. Chase & Co.'s salesyard on the 18th inst. will be well worth attending by our breeders. In the hurry of getting out the catalogue the breeding of the horses to be sold was not extended as it should have been in many instances. Some grandly bred mares are represented in the catalogue and some that are producers of great speed. The sale is an important one and should not be missed by anyone looking for bargains in young horses that have speed and good looks sufficient for the road or track.

MAJOR DELMAR is now the world's champion trotter, technically speaking. Without a wind shield or a horse in front he has trotted a mile in 2:01¾ lowering the record of Cresceus 2:02¼. When he reaches Memphis next week he will find Lou Dillon there to dispute the championship with him, and there is not a Californian but believes the little mare will be able to trot a mile in two minutes and if necessary to maintain her prestige as the greatest on earth will show a mile even faster than that.

BRIGHTON BEACH Racing Association advertises six rich stakes to close next Monday. The advertisement appears in this issue of the BREEDER AND SPORTSMAN and should be read by every owner of thoroughbreds. Brighton Beach is one of the best tracks to race on in the east. These stakes are for two and three-year-olds, and range from $7500 to $15,000.

Another Great Farm to Go.

NEW YORK, Oct. 6, 1904.

BREEDER AND SPORTSMAN, SAN FRANCISCO—In our earlier advertising of the coming Old Glory Sale, we announced a consignment from Village Farm, East Aurora, N. Y., consisting principally of the youngsters in training in the stable of Ben F. White. You may have noted that no reference has been made to this consignment in our more recent advertising, and by way of explanation, we will say that this consignment has been cancelled at our suggestion, because it has been decided to close out the entire farm at our Midwinter Sale in January. It was the desire of Mr. Hamlin to keep this from the public for a few weeks, but the report has leaked out, and we now confirm it.

Horsemen of every section will undoubtedly read the announcement with a feeling of regret, for the farm has played a master part in the evolution of the trotter; but many reasons demand this course on the part of Messrs Hamlin, and the great band of stallions and mares, headed by the superlatively great Chimes and the invincible Direct Hal, will be scattered in January. The loss to the breeding industry will be great, but it means that other breeders will be given an opportunity to purchase the animals that have made the Village Farm the world's greatest trotting nursery.

Yours very truly,
FASIG-TIPTON CO.

Sixteen Big Stakes.

The following list of events will close with the New California Jockey Club on Monday, October 24th. The meeting will open November 12th and promises to be the greatest meeting ever held in California, as more high-class horses are coming than ever before:

Burns handicap, guaranteed, $10,000, to be run Feb. 4th.

Christmas handicap, added money $3,000, to be run Dec. 26th.

Waterhouse cup, added money $3,000, to be run March 4th

California Derby, added money $2,500, to be run Feb. 22nd.

Thornton stakes, added money $2,500, to be run March 18th.

Opening handicap, added money $2,000, to be run Nov 12th.

Thanksgiving handicap, added money $2,000, to be run November 24th.

Croker selling stakes, added money $2,000, to be run Dec. 17th.

New Year handicap, added money $2,000, to be run Jan. 2nd.

Follansbee handicap, added money $2,000, to be run Jan. 7th.

Adam Andrew selling stakes, added money $2,000 to be run Jan. 4th.

Lissak handicap, added money $2,000, to be run Jan. 21st.

California Oaks, added money $2,000, to be run Jan. 28th.

Palace hotel handicap, added money $2,000 to be run Feb. 11th.

Bell stakes, added money $2,000, to be run March 11th.

Gebhard handicap, added money $2,000, to be run April 1st.

Funston 2:08 1-4.

The California bred pacer Funston by Dictatus 2:17 won a good race at Lexington last Thursday taking the second, third and fourth heats of the 2:18 class pace in 2:08¼, 2:09¼ and 2:08½. Funston is just getting right again. He was a very sick horse last year and is now just rounding to. P. W. Hodges, who worked him at San Jose and sold him to Sandy Smith for a Eastern horseman, has always had great faith in Funston and predicted that he would show his race horse qualities whenever he was right. Funston was bred by Mr. Geo. W. Theurkauf of San Jose who owns one full brother and two full sisters to him. The mares are safely in foal, one to Kinney Lou 2:07¾, the other to Scott McKinney, and one or perhaps both will be entered in the Breeders Futurity which closes to-day.

The Great Mule Race at Memphis.

One of the features of the Memphis Grand Circuit trotting meet, which is held October 18 to 26, will be the Transylmulia Stakes. This event, a one-mile trotting affair open to mules, is the farce comedy of the meet, and at the same time a betting affair of no little prominence. A handsome silver cup is offered for the winner, and no driver is allowed to run his entry. The amount of money bet on this event is surprising. Last fall the race was one of the best played on the week's card. The winner for the past two seasons has been owned by Ed. Geers, the well known reinsman, but a determined effort is being made to wrest the honors from his entry this year. Two years ago C. K. G. Billings paid $1000 for a mule which was thought capable of trotting a mile in less than three minutes. His entry broke down in the race and finished last. This season Billings is reported to have another mule which will defeat Geers' entry, and wagers on the result are already being made.

A Card to Trainers and Horse Owners.

At the close of the season of 1903 we, having received testimonials unqualifiedly endorsing and recommending the use of Campbell's Horse Foot Remedy from the great trainers—Geers, McDonald, Snow, Hudson, Spears, McGuire, Salisbury, Curry, Benyon, McCoy, Miller and many others no less celebrated, whose names, for want of space, we do not mention, published an illustrated page in the special numbers of racing journals.

Our purpose in doing this was to place Campbell's Horse Foot Remedy before horse owners who have not given it a trial in such a manner that its merit as a hoof grower and reliable cure for diseased and sore feet could not be questioned, if owners were at all disposed to be influenced by the advice and recommendation of those whose success in the horse business is a conceded fact. We believe that the advice of men to whom are entrusted the most valuable horses on the turf, because of their honesty and knowledge counts. These men cannot afford to, and they do not permit, "fake testimonials."

A glance over the summaries of the races in the Grand Circuit of 1904 shows that the "man behind" the winners, in most cases, is a trainer who uses Campbell's Horse Foot Remedy, or has used it in fitting his stable for this work.

The success such trainers are meeting proves that they know their business, and that their advice should be given weight.

We are confident that no stable can afford to be without this remedy, and solicit a trial, assuring you that if results are not satisfactory we will refund cost of remedy on receipt of a letter to that effect, no matter from whom purchased.

Nearly all dealers in harness and turf goods carry "Campbell's Horse Foot Remedy" in stock.

JAS. B CAMPBELL & CO.,
412 W. Madison St., Chicago, Ill.

In the race won by Funston, the Dictatus pacer, at Lexington, last Thursday, where he took a record of 2:08¼, Dr. Boucher started his fast little horse Bert Logan 2:16¼, but after finishing in fourth position twice was unfortunately distanced in the third heat

JOTTINGS.

ALTHOUGH the fact has been noted the death of the great stallion Steinway 1808 has not been referred to at any length, and now that the premier sire of Oakwood Park Stock Farm has gone some refereoce to his accomplishments will not be out of place. Steinway was bred by the late Colonel R. G. Stoner of Lexington, Kentucky, and was a great colt trotter. He was foaled in 1876, and when a three-year-old took the at that time world's race record of 2:25¾ when lame, and was afterwards sold to Sam Gamble, representing the Cook Stock Farm of California. That Steinway lived to be 28 years old and founded a big family of trotters and pacers is a tribute to Mr. Gamble's judgment in selecting him to head what is now the Oakwood Park Stock Farm.

Up to the first of January, 1904, Steinway had sired fifteen trotters and twenty-two pacers with standard records. Six of his sons had sired sixteen trotters and thirty-seven pacers, and sixteen of his daughters had produced eighteen trotters and six pacers. The fastest of Steinway's direct produce are Klatawah 2:05½ (champion three-year-old pacer), W. Wood 2:07, Agitato 2:09 (that also once held the championship for three-year-olds), Cricket 2:10 (the first 2:10 pacer to high wheels) and Silver Coin 2:10.

The most prominent of Steinway's sons are Chas. Derby, Saraway and Strathway: The first named is the sire of four 2:10 performers, viz: Don Derby 2:04¼, Much Better 2:07¼, Diablo 2:09¼ and Derby Princess 2:08¼. Saraway, full brother to Chas. Derby, is the sire of Winfield Stratton 2:06¼; Strathway is the sire of Toggles 2:08½, and of Homeward 2:13¼ sire of George G. 2:06¼. The daughters of Steinway are producing speed of a high rate and have several representatives in the 2:10 list, among them Stanley Dillon 2:07¾, winner of this year's M. & M, Tuna 2:09½, and Ben F. 2:09¼.

Steinway was a son of Strathmore 408, that is now reckoned one of the greatest of the sons of Hambletonian 10. Abbess, the dam of Steinway was by Albion out of a daughter of Marshal Ney, son of imp. Emancipation. The next dam was by Bertrand by Sir Archy. The hot blood of the desert is very prominent in the pedigree of Steinway. It is worthy of note that Soprano, an own sister to Steinway, ranks next to Beautiful Bells as a producer of standard performers, having no less than ten in the list. The death of Steinway was not unexpected, and for the last two or three years of his life but little use was made of him in the stud. He has left his imnress upon the standard bred stock of California and has founded a family of trotters and pacers that will add to his fame as the years go by.

By the last mail from New Zealand came the news that Norice, the black mare by Steinway's son, Chas. Derby, is the largest money winner of the season in that country. The amount she placed to her credit is very close to $3000—not a large sum for a pacer to win in this country, but quite a comfortable figure in New Zealand where harness racing is just coming into vogue. Norice was bred at Oakwood Park Stock Farm and is now six years old. Her dam is Naulahka by Balkan, second dam by Black Walnut She was owned for a time by the late C. Branin of San Lorenzo, who sold her to Mills & Sanders, who in turn sold her to Messrs. Price & Pettie of Dunedin, New Zealand, who purchased five or six well-bred prospects here in June, 1903.

A Lexington paper, sent me this week by Mr. Frank H. Burke, who has been enjoying the racing there, gives an extended account of a big sale of trotting bred horses by the Kentucky Sales Company. There were 68 horses sold consigned by such breeding farms as the Plant Estate Idle Hour Farm of Macon, Georgia, Bowerman Bros. and Brook Curry & Son of Lexington. The 68 head brought $29,285 an average of $430 per head, which is a good average as the highest price of the sale was $2:00 paid by Mr. W. W Estill for Flyingdotte, a two-year-old filly by Bernadotte 15608. The sale was held before the Kentucky Futurity was trotted, and had it been held after that date the average would probably have been larger as a full sister to Grace Bond and her dam were sold. The full sister is a weanling called Puss Bond and she went to William Simpson of New York for $2000. Grace Boyd the dam was purchased by the same gentleman and he only had to pay $1200 for her, which is evidence that while big prices are being paid for developed trotters and pacers, broodmares are not in demand at large figures. The small breeder should take advantage of the present condition of things and secure a few high class mares at the closing out sales. Grattan Boy 2:08, the eleven-year-old trotting stallion by Grattan 2:13, out of the great broodmare Paula by Robert McGregor brought but $1500 and was a bargain at the price although he has but two representatives in the list, a trotter and pacer with records slower than 2:20. The Tramp, a son of Jay Bird, seven years old, considered a promising young stallion, went for $1800, while a bay two-year-old colt by him out of a mare by Bow Bells brought $1400. The gray mare To Arms by Adbell out of old Sallie Benton, bred at Palo Alto Stock Farm, fetched $525, which was a better price than most of the mares brought. A Jay Bird yearling sold for $1600 and a John R. Gentry two-year-old reached the same price. The average of the horses sold by the Plant Estate was $548.66 for 45 head. The local report of the sale says the prices were good and the bidding spirited throughout the sale.

The same paper gives an account of the pool selling on the night before the Kentucky Futurity was trotted. Alta Axworthy brought $100, Grace Bond $55, Princess Athel $10, Alice Edgar $10, Jessie Benyon $5, Lord Revelstoke $5, Totara $5. Later the pooling was Alta Axworthy $50, Field $35, so that those who backed Grace Bond must have cleaned up pretty well on the race. Before the race Mr. Smathers offered $15,000 for Alta Axworthy, but Mr. Thomas declined the offer and fixed his price at $20,000.

The young stallion Axworthy, owned by Mr. John H. Shults of Portchester, New York, is now in the very front rank as the sire of colt trotters, and as Millard Sanders is handling a number of the get of Axworthy for Mr. Shults, Californians will naturally be interested in a few facts about this horse and his get. Axworthy was foaled in 1892 and took his record of 2:15½ as a three-year-old trotter in a winning race. He is by that great colt trotter Axtell whose mile in 2:12 was a world's record and sold him for $105,000. Axtell as is well known was by William L. a full brother to Guy Wilkes, also a great sire of colt trotters. The dam of Axworthy is Marguerite dam of six in the list, by Kentucky Prince, a great sire of speed and the sire of our California speed sire Dexter Prince. The second dam of Axworthy is Young Daisy, dam of Prince Lavlard 2:12½ and two more with records in 2:20, by Strideaway 294, that was a son of Black Hawk 5, and out of the famous old pacing mare Pocahontas 2:17½ by Iron's Cadmus The third dam, Daisy was a mare famous for speed and endurance whose pedigree was untraced. Axworthy got his first standard performer in 1902 when nine of his colts and fillies were given time trotting records from 2:21½ to 2:30. Last year four more trotters took records, two of them in races, the fastest being Alta Axworthy whose two-year-old record was 2:15¼. This year his four-year-old son Tom Axworthy has taken a record of 2:08¾, Alta Axworthy has made a record of 2:10½ as a three-year-old, and Jack Axworthy a two-year old won a stake at Lexington this week, making a record of 2:15¼. A half dozen others by Axworthy have taken records this year, nearly all two or three-year-olds and it is said Millard Sanders has a half dozen more that he will mark at Lexington and Memphis. The oldest of Axworthy's get are five-year-olds, so that the showing he is making has probably never been equalled by any stallion.

"A celebrated case" has become the suspension of Robert Smith from the trotting track, and it is becoming more and more apparent that it was not justifiable. All the facts that can be learned about the case go to show that the only reason for Mr. Smith's removal at Providence was because the judges thought he was not as competent as some drivers that could be secured. At Hartford Jack Curry drove Sweet Marie and failed to win a heat, yet the race was slower than several which Sweet Marie had won. Alta McDonald lost a heat at Columbus before he won with the McKinney mare, and at Cincinnati did the same thing. In the Transylvania he lost two heats to Tiverton, and while the time was very fast there is much reason to believe Sweet Marie could have won them as there was to believe Smith could have won with her at Providence or Readville. In discussing this case editorially the *American Sportsman* of Cleveland makes the following very sensible and timely remarks:

"Just what property rights the owner of a race horse has in his horse, when he enters him in a race, has not yet been definitely settled in the Grand Circuit. For instance—Is an owner allowed to have his chosen driver drive his horse, if the judges (on the advice of the pool speculators) think some more accomplished driver could drive him faster. Or, is it a sane part of the betting game that every man who invests his coin in the array of starters chalked up on the blackboard must take into consideration not only the horse but the ability and skill of the driver, when he buys a ticket on his choice.

"In our opinion the judges have no right, under the rules, to displace any driver who is making his best effort to win. And no one will claim that they have any legal or moral right to force their own judgment against the judgment of the owner of the horse. Hence, the claim made by a journal of the turf that because an accomplished reinsman drove Sweet Marie 2:05¼ better and faster at Providence than Robt. A. Smith, the lessee of the great mare, that the judges were justified in displacing Smith, has no sane basis.

"Mr. Smith started in to learn the game in the only true school—the school of experience—, and he had the right to learn the game that way. He had counted the cost of his experience before he made his venture in the charmed circle. If lack of skill compelled him to breathe the air of dust in the rear, instead of the purer and sightless air in front, that was Smith's misfortune but not his crime He certainly had the right to lose his own money and allow some more expert and experienced horseman to enjoy what might have been his. And, perhaps, the other man needs the money more than Smith. But while Smith was driving to the best of his ability and was not interfering with any other driver and was behaving with his accustomed decorum, he had a right to race Sweet Marie to the end of the circuit, even if he lost the whole income of his big coffee store in Philadelphia in the experience.

"And any other Smith, or Jones, has the same right. We are not here to discuss the merits of Robt. A. Smith's case, but simply to use it by way of illustration.

"We need all the good men we can get in the Grand Circuit. And we can well afford to allow any and all comers to come into the game, either for recreation or for fame or gain, who care to come. And if they want to make the Grand Circuit the kindergarten of experience, and are willing to pay the freight, they should be welcome."

Early Closing Stakes.

"Grattan" discusses the early closing question in the *Kentucky Stock Farm* as follows:

"I have been told on numerous occasions that the death-knell of the early closing event on the Grand Circuit has been as good as sounded. Those who have given me the information say that it is not a case of 'Scott Hudson won't make any entries,' or 'Geers is sick of it,' but that there is a general spirit of opposition that bids fair to make itself effective. It is not understood that such stakes as the M. and M., the C. of C., the Empire, the Massachusetts, Blue Hill and others of that class will be neglected. But the association that offers a long string of early closers may find the entry list more than meagre. Whether the now prevalent sentiment will last until the snow has melted next spring remains to be seen. At present there is a strong leaning toward purse races that close within a very few days of the beginning of the meetings.

"The situation presents two sides. Tracks must have a lot of entries or they can not give meetings; horsemen must come within a few dollars of paying expenses (leaving losses to one side), or they can not remain in the game. The public is not paying a great deal of the freight. Take the Grand Circuit of 1904 for example. The gate at Detroit was good and the meeting made money. At Buffalo the gate was the best of recent years, and the balance was not $100 either way—loss or profit. At Empire the gate was the best of recent years. At Readville the attendance was the largest ever recorded there, despite the fact that the crowd on Massachusetts day was the smallest of recent years. Hartford had more people than usual. Yet, taken up one side and down the other, the entry fee item is still the biggest and most important.

"And some equitable adjustment of it is necessary. Secretary Jewett tried the 2½ per cent plan for the second Readville meeting, with full gate fee for all except grooms, and got an average entry of eleven to a class, which he considered quite satisfactory. Perhaps it would be wise to try the low entry fee on all early closing events next season except the classics, which are in no need of a change of conditions. But if there is to be no concession to the big stables in the way of a privilege to name a few and pay on one, then there must be provision made so that all the horses in that big stable may be entered and, if possible, raced. Many light fields and no-account races this year came entirely through the restriction which compelled full payment on every entry made. It is not too much to expect that the track managers will, this winter, give the matter careful consideration and endeavor to arrive at some conclusion which will be just to all concerned."

Grace Bond 2:09¼, winner of the Kentucky Futurity ($14,000 to the winner), was bred by J. H. Thayer of Lexington. She was brought up on a bottle and given away as a weanling.

Lexington Meeting.

LEXINGTON, KY., October 7 —The Johnston stake was the feature of the racing decided this afternoon at the Kentucky Trotting Horse Breeders Association meeting. It fell to Lisonjero, a son of Dexter Prince, who won the event in straight heats, without reducing his Buffalo mark of 2:08¾. In two of the other races the favorltes also won, hut the talent fell heavily in the 2:11 class trot, in which Jim Ferry was regarded as the good thing. He was handily heaten hy Patchen Maid.

The 2:04 class pace was a very hot contest hetween John M. and Nathan Strauss. The latter won the first heat hy a head in 2:04½, hut the Smathers gelding heat him in the next two heats, hoth heing paced in 2:06 flat.

Fully 5000 people witnessed the racing, the track heing like a springhoard, and the weather was delightful

Anderson, the driver of Newton S., was thrown from his sulky in the first heat of the 2:11 class trot, hut escaped injury. Without the guiding hand of a driver Newton S. led the hig field entirely around the track and reached the wire in front. It was an exhibition of marvelous intelligence in a horse. Summaries:

Trotting, 2:24 class, purse $2000.

Lisonjero, b g by Dexter Prince–Liska	(Howard)	1	1	1
Jolly Bachelor, b g	(Spear)	2	2	2
Bonnie Russell, b b	(Hudson)	4	3	3
Getaway, ch g	(Stetsoo)	3	7	5

Texas, Governor McCauley and Tom Miller Jr. also started.
Time—2:10¼, 2:11, 2:12¾.

Pacing, 2:04 class, purse $1500.

John M., blk g by Paris-Laura	(Spear)	2	1	1
Natbao Strauss, b g	(Thcmas)	1	2	2

Time—2:04½, 2:06, 2: 06.

Trottlog, 2:11 class, purse $1200.

Patchen Maid, blk m by Patchen Wilkes–dam by Aberdeen	(Starr)	1	1
The Questor, b g	(Geers)	2	2
Jim Ferry, gr g	(Frank)	3	5
Tuxenite, gr m	(Thomas)	12	3

Van Sandt, Kirkwood Jr., Lady Gail Hamilton, Axdelight, Newton S, Monroe, Robert Mc, Invader, Aerolite, Calcine and Queen Wilkes also started.
Time—2:10¼, 2:09¼

Pacing, 2:18 olass, purse $1000.

Lady Mae, b m by Commodore Kitsoo–Maooa Girl	(Hussey)	1	1	1
Kidd, b g	(Stinsoo)	4	2	2
Glad Bells, b h	(Geers)	6	3	3
Mamie Kingsley, b m	(Dean)	3	4	4

Gordan V., Billy F., Argo Haile and Foxy Quiller also started.
Time—2:09¾, 2:10¾, 2:09¼.

LEXINGTON, KY., October 8.—Major Delmar went under the wire in 2:01¾, establishing a new world's trotting record, without a wind shield, here today. Four times previous this year he has tied Cresceus' mark of 2:02¼, made at Columhus on August 1, 1901, hut today Major Delmar was equal to the task set him and tonight E. E. Smathers is even on the $40,000 he paid last year for the marvelous trotting horse.

Major Delmar came on the track with A P. McDonald hehind him, accompanied by a runner driven hy Scott Hudson, while another runner was in waiting at the half to take up Major Delmar as he neared that point. After scoring three times, McDonald nodded for the word and the great horse went to the quarter in 0:29¾. Down the hackstretch his speed was dazzling, the half heing reached in 0:59½, a 1:59 clip. He showed no slackening in speed as he rounded from the half to the three-quarters in 1:28, trotting this quarter in 0:29¾. Here the crowd read the sign of the passing of Cresceus as king, and, amid tremendous excitement, the mighty horse came home, resolutely crossing the wire in 2:01¾, without having made a skip or hohhle. All the watches of the officials timers, H. B. Gentry, H. B. Leonard and Percy W. Albert, tallied exactly with the official time as hung out.

Major Delmar, with to-day's wonderful performance holds four world's records. His mark of 1:59¾ is the world's record for trotting geldings, with a wind shield, and his mile in 2:01¾ to-day is the world's record for horses of any sex, without a wind shield. He also holds the world's record for a half mile, 1:01, and a mile and an eighth, 2:22½.

He is a son of Delmar 2:16¾, dam Expectation by Autograph 2:16½. He was hred hy W. E. Spier of Glen Falls, N. Y., hut Thomas W. Lawson, the Boston millionaire, owns his dam. Major Delmar is seven years old and has heen on the turf since he was two years old. At that age he got a record of 2:31, at three he had a mark of 2:15 and as a five-year-old he reduced his record to 2:05½. Smathers hought him last year, when he looked like a candidate for championship honors. Summaries:

Paciog, 2:20 olass, purse $2000.

Morning Star, b g by Star Pointer-Fanny	(McDooald)	1	1	1
Barroo Grattao, b g	(Geers)	2	3	2

Edwin C., b g	(Valeotioe)	4	5	4

Boorbon, Sunny Slope and Gayety also started.
Time—2:09¾, 2:09½, 2:08½.

To beat 2:02¼, without a wind shield.
Major Delmar, b g by Delmar–Expectatioo. (A. P. McDooald) woo
Time, 2:01¾.

LEXINGTON, KY., Oct. 10—The classic Walnut Hall Farm cup drew 8000 people to the track here to-day, and the race resulted in a great contest. It took six heats to decide it, and not one was captured hy the wlnner without a struggle. It was also the greatest betting race of the meeting, no less than four horses at one time or another heing favorites.

The first heat fell to John Mac, while Redwood took the second heat, and then Hall Frey had an inning, hut Lady Patchie heat him hack for the fourth heat. After a hard fight in these two heats between Hall Frey and Lady Patchie, Redwood came to the front and won the last two heats and the race, carrying to the stable of J. A. Bennett of Pittshurg, Pa., the handsome silver cup donated hy L. V. Harkness.

The Broncho won her second race in the 2:12 class pace in straight heats and clipped three seconds off her record, which she reduced to 2:07. Darkness caught the last race, the 2:12 class trot, and it went over until to-morrow, after Mainland and Millard Sanders had each won two heats. Tbe weather was cloudy and the track slow. Summaries:

Trottlog, 2:15 class, Walnut Hall Farm cup, value $3000, and silver trophy.

Redwood, b g by Nogwood–Roema	(Puros)	2	1	3	6	1	1
Hall Frey, b g	(Foote)	7	6	1	3	2	2
Lady Patchie, b m	(Ecker)	5	3	2	1	4	3
John Mac, b g	(Geers)	1	5	5	5	6	4

Direot View, Angiola, Boooer and Jolly Bacbelor also etarted.
Time—2:10, 2:10¼, 2:09¾, 2:11, 2:12¼, 2:12¼.

Pacing, 2:12 class, purse $1000.

The Broncho, b m by Storm Cliff	(Deao)	1	1	1
Tillie Saal, b m	(Wylie)	2	3	2
Don N., ro g	(Valentine)	7	2	5
Miss Georgia, br m	(Curry)	4	4	3

Roland Reed, Ola Wilkes aod Austin Burns also started.
Time—2:07¼, 2:07¼, 2:10¼.

LEXINGTON, KY., Oct. 11—The McDowell stake for four-year-old trotters, worth $3000, was won to-day hy Tom Axworthy, owned hy John H. Schults of Port Chester, N. Y., in the first heat hy distancing his two competitors. He won first, second and third moneys, a feat never hefore accomplished in a stake race on this track. He scored the mile in 2:14, which was extra good for a four-year-old over a track which was so heavy that to-day's races were held off two hours for it to dry out. Tom Axworthy won the 2:14 class trot here on the second day of the present meeting, which was his only previous appearance in puhlic, and he is therefore unheaten. In that race he scored a mark of 2:08¾.

The unfinished 2:16 class trot from Monday was an easy victory for Millard Sanders.

King Direct won the 2:08 class pace, and the 2.09 class trot went over until Wednesday. John Taylor, Marion Wilkes and Robert Mc, each having a heat when the sun sank hehind the clouds. Summaries:

Trotting. 2:16 class, purse $1000. (first four heats trotted Monday.)

Millard Sanders, b g by Anteeo–Mayenne by Wedgewood	(Merrifield)	5	1	1	2	1
Mainlaod, b h	(Hudson)	1	5	2	1	6
Belle C., br m	(Bigbe)	2	2	3	5	3
Miss Kinney, b m	(Cares)	7	3	4	3	2

Free Silver, Setonette, Circus Girl and Cologne D. also started.
Time—2:14¼, 2:12, 2:11¾, 2:12¼, 2:18¼.

Trotting, The MoDowell Stake, for four-year-olds $3000.

Tom Axworthy, ro g by Axworthy–Nell	(Saoders)	1
Lady Pauline C., b g	(Vao Alstein)	d
Oak Blossom, b m	(Dodge)	d

Time, 2:14.

Pacing, 2:08 olass, purse $1200.

King Direct, blk h by Direct–Welcome Bunker	(Geers)	11	1	1	1
Ash Rose, b h	(Snow)	1	6	5	6

Mount, Personette, Dr. Monopole, Red Tell, Mustard, Gentry and Bnb O'Reil also started.
Time—2:12, 2:11¼, 2:12½, 2:12.

LEXINGTON, KY., October 12.—With an unfinished purse, two stakes and two other races down for decision today the 6000 people who attended the trots at the Kentucky Breeders' Association meeting had sport galore for their entertainment, and witnessed another idol shattered. In the classic Lexington stake, W. A Clark Jr's recent $10,000 purchase, Bon Voyage, the unheaten winner of two Futurities, met his match in Jack Axworthy. The latter colt outfooted the star of the stable owned hy Senator Clark's son every foot of the two heats. The time, 2:15¼, in the fastest heat, has hut twice heen heaten in the thirty years' history of the race.

The other stake, the West, was won in straight heats hy John Caldwell, owned hy Colonel John C. Kirkpatrick of San Francisco.

The unfinished 2:09 class trot was won hy John Taylor, the 2:06 class pace hy Sphinx S., and the 2:10 class trot hy Brownie Wilton, all of which, except Sphinx S., were warm favorites.

In an effort to lower Charley Mac's world's record of 2:14¾ under saddle, in an exhibition at catch weights, Country Jay 2:10¾, a great campaigner in 1901, was successful, trotting the mile in 2:10 flat. Summaries:

Trotting, 2:09 class, purse $1500, (three beats Tuesday).

John Taylor, gr g by Dispute–Dolly	(Wilsoo)	1	5	5	1
Robert Mac, b g	(Jolly)	6	2	1	2
Marion Wilkes, b m	(McDonald)	9	1	4	3

Economizer, b m by Chas. Derby	(Durfee)	4	3
Teddy, ch h by Diablo	(Hogoboom)	3	4

Time—2:17, 2:14¼.

Runoing, four and a half furlongs—Youog Pepper 107, won; Hogarth 107, second; Trap Shooter 107 third. Time, :55. Caroburn and Sunny Jim also ran.

Ronoiog, seveo furloogs—King Herald 119, won; Goldfioder 117, recond; Crosby 119, third. Time 1:28½. Foodo, Pastmaster and Lord Eldred also ran.

Bone Spavin Cured.

Mr Ovid Yancy of Sparta, Ky., writes Sept. 29tb as followe: "Please find enclosed one dollar, for wbich send me a bottle of Quinn's Ointment. I bave a friend wbo wants to try it ae I recommended it to bim. Received a botlle from you some time ago aod think it tbe best tbing I ever used for bone spavin. I tried eeveral remedies and all failed, but Quinn's Ointment is doing the work. Please send at once." Tbis is the general verdiot of leading horsemen all over the country. For curbs, splints, spavine, windpuffs and all bunches try this wonderful remedy. Price one dollar per bottle. Satisfaction guaranteed Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain it from druggist.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Notes and News.

Pacific Breeders Futurity No. 5 closes today.

Hassalo roduced his record to 2:11 at North Yakima.

Sidney 2:19¾ is now the sire of over one hundred standard performers.

Teddy 2:21, a pacer in Will Hogoboom's string, is a new performer for Diablo.

Miss Georgie 2:11¼ by McKinney was only beaten a half length by Belle Mc in 2:07¾ at Cincinnati.

The veteran Charles Marvin has had some good luck this year which has been pleasant news to his old California friends.

An owner advertises for sale a roan stallion colt five months old of the renowned Hal blood. Read the advertisement in this issue.

Henry Struve of Watsonville, has a well bred and fast trotting stallion that he desires to trade for a high class broodmare. See advertisement.

Swift B by Stam B. trotted a good race at Cincinnati in the race won by Redlac. The second heat was in 2:10 and Swift B. was only beaten a nose.

There were several two-year-olds raced on the California circuit this year that would in all probability been trotting in 2:15 had the racing season been longer.

The *Rural Spirit* says the Ward Totalizator was the only system of betting used at the Washington State Fair races at Yakima, and it did not prove entirely satisfactory.

Rain prevented the San Francisco Driving Club from holding its meeting at Tanforan last Saturday, but the program will be pulled off to-day if the weather is favorable.

Phebon W. 2:08¾, the fast pacer by Hambletonian Wilkes owned in Rhode Island has been winning races and smashing track records all through New England and the Provinces this summer.

Allerton 2:09¼ is the sire of the fastest race stallion of the year, at either gait. The fastest pacing stallion of the year is his son Locanda 2:03¾, while the fastest trotting stallion is Redlac 2:08½.

The Overland Park, Denver, has been sold, but a Denver paper says it will not be cut up into town lots as predicted. The race track will be preserved and a meeting held there every year as usual.

Getaway, the Strathway gelding, is trotting some good races on the Eastern track, but is meeting a lot of horses that are a little too fast for him. He trots in 2:15 or better nearly every time he starts.

At the big fair held at Muncie, Indiana, recently, Advertiser won the first prize for standard-bred stallions four years old and over, and colts by him took first prizes in the yearling and suckling classes.

Welcome Bunker by Mambrino King is the dam of two pacers with records better than 2:07—King Direct 2:06¼ and Cheery Lass 2:06¾. Welcome Bunker's dam is Lady Bunker, the dam of Guy Wilkes 2:15¼.

The Salisbury horses have not been showing up very well recently, but as they began racing before they left Pleasanton and have been at it ever since, it is not surprising that they should begin to lag a little.

It is rumored that the proprietor of a prominent Eastern breeding farm has made Ed Geers an offer to train his horses next year, and that the salary is so large that Mr. Geers is giving the offer much thought.

Bon F. has paced some excellent races this season where he failed to get first money. At Cincinnati when King Direct won and paced two heats in 2:07¼ and 2:06½, Ben F. was close up at the finish in both heats.

Geers has finally forged ahead of Chas. De Ryder and loads all the drivers in the amount of money won this year. The winnings of the Silent Man on the Grand Circuit this year now reach the neat sum of $45,000.

Lou Dillon worked a mile at Memphis on the 10th instant in 2:01½. This is the fastest mile she ever made in a workout, so she must be in good shape. The quarters were in 30, 30, 29¾ and 31¾. No wind shield was used.

Mr. E. Clawson owns a very handsome large mare that he bred last season to a German coach horse owned at Stockton and the result is a colt that he thinks will be just about the right thing for size, style and action.

W. A. Clark Jr, who last week purchased Bon Voyage, winner of the two-year-old division of the Kentucky Futurity, paying $10,000 for him, on Tuesday last bought the black colt Morone by Cicerone, dam by Monon. Morone started in the 2:19 trot the next day and won third money. Brownie Wilton won the race, best time 2:12¾.

Osmont, the pacer by Altamont that Under Sheriff Daly of Napa sold to Salt Lake parties and that afterwards took a record of 2:14½, won second money in a race at the Utah fair last week, in which the heats were in 2:17, 2:15 and 2:16.

Brayton Ives of New York, who owns Nora McKinney 2:12½, matinee record 2:09¼, would like to own Sweet Marie and made a big offer for her. He would be able to beat some of the New York double teams with those California mares.

The Roman 2:09¼, after a series of mishaps has been retired for the season. He has won about $2000 during the year and was not a losing proposition. He will be raced again next year and if he is like all the McKinneys he will improve with age.

In the report of the racing held at North Yakima, the time of the heats in the 2:11 pace is not given. The first heat was won by Hassalo in 2:11 but further than that the report which reached us does not state the time of any of the heats. Zolock won the race.

It is said that the second heat of Sweet Marie's Columbus race was in 2:06¼, instead of 2:09¼, as announced by the timers. The horses were sent away in that heat on the first score, and it is said that the timers did not start their watches and guessed at the time, calling it 2:09¼.

Snowden, Slinkard & Snowden, who were here for several days, finally secured one carload of horses after scouring the entire country. They wanted three carloads for the Los Angeles market, but the farmers think they will need all their stock for the winter work.—*Gonzales Tribune.*

Mr. J. C. Adams, of Phoenix, Arizona, who owns Lady Rivers by Carr's Mambrino also owns a two-year-old colt out of her by McKinney that is therefore a full brother to Sweet Marie 2:05. Mr. C. A. Durfee, who formerly owned McKinney, says that this was a very handsome colt when he last saw him, and a very promising one.

Fred Hahn sent his handsome black mare, by Chas. Derby out of Nellie Emoline by Leo Wilkes, down to John Phippen a few weeks ago to have her worked a little for speed. Last week Mr. Phippen worked her a mile in 2:17 and says she could have trotted faster had she been urged. This mare was purchased by Mr. Hahn from Oakwood Park Stock Farm a little over a year ago. She is one of the best prospects in California for a fast trotter.

There will be no race meeting at Santa Ana this fall, as was intended. The early rains have set everybody to work on the farms and it is too late now to get the horses. Next year Santa Ana will hold a first-class meeting with good purses. Mr. George W. Ford writes us that by next year there will be two electric car lines from Santa Ana to Los Angeles, which with the two steam roads will be able to land large crowds at the Santa Ana track when good racing is given there.

Mr. J. H. Revekes, who lives one mile from San Leandro, has a very handsome pair of stylish black mares by Prince Direct that he offers for sale. The mares are coming four years old, have been thoroughly broken single and double and are not afraid of steam or electric cars, automobiles or anything else. They can be driven by a lady, are absolutely sound and without blemish. While not large they are of fair size and very attractive looking. They will be sold at a bargain price if applied for soon.

The half tone engraving on this page is of the two-year-old brown colt Peter Shields, owned by Alex Brown Esq., proprietor of the Walnut Grove Stock Farm, Sacramento county. This colt is by the farm's premier stallion Nushagak, sire of Aristo 2:08¼ and his dam is by Dexter Prince. He is one of a string of twenty young horses bred at Walnut Grove by Mr. Brown, that were taken this week to the Woodland track, which that gentleman recently purchased. The string is in charge of the farm's trainer Chas. Spencer

Mr. Sanford Bennett, the Oakland banker, owns a mare by Dictatus 2:17 that he wouldn't trade for Sweet Marie. Daisy, as he calls her, is his family

Peter Shields
Two-Year-Old Colt by Nushagak

mare and he has no idea he could replace her with anything that would fill the bill for his use as she does. Daisy developed a splint as large as half a walnut and Mr. Bennett consulted Dr. Carpenter about it. The doctor told him to use equal parts of spirits of camphor and iodine and to keep up the treatment until the splint was gone. Mr. Bennett says it took just three months, but the leg is as clean as a whistle and there is no evidence of the splint ever having been there.

Mr. W. E. Speers of Oakland has sold his weanling colt by Guy McKinney, dam Sadie Moor 2:26 to Mr. H. Kohler of the same place. This colt is not only royally bred but is a splendid individual and should develop into a high class stallion and a fast trotter. His dam is about the fastest road mare owned in Alameda county for a brush on the road.

The Strathway gelding, John Caldwell, won a good race again at Lexington last Wednesday. He got first and fourth money by distancing James Butler's horse Direct Well in the race. The race was for a stake worth $2000, and John Caldwell won in straight heats, the fastest heat being the last in 2:11½. John Caldwell has now won over $6000 for his owner.

Brighton Beach Racing Association advertises in this issue several rich stake events to close October 17, which is next Monday. They are the Brighton, Jr., $15,000, the Neptune $7,500 and the Venus $7,500. All these are for two-year-olds to run in 1905. For three-year-olds to run in 1906, there is the Brighton Derby $15,000, the Iroquois $7,500 and the Brighton Oaks $7500. Remember that these stakes close Monday next.

Ed Mills has recently fitted up fourteen stalls at Pleasanton track to accommodate the horses he will have in training this winter. The stalls have been whitewashed inside and out and the lower half of the doors and the awning posts painted blue, which gives the row a very attractive appearance. Searchlight and Lecco are looking stout and rugged and are running out alternately in the big paddock.

Woodland Daisy, the two-year-old pacing filly that has been winning races and making a sensation on the Kansas and Oklahoma tracks this season is a California production, having been bred at Palo Alto. She is by Nazoto 2:28¼, brother to Azote 2:04¾, and is out of Wildflower 2:21 as a two-year-old by Electioneer. She is owned by Mr. L. D. Fossett of Guthrie, who purchased her at the Old Glory sale last year.

Word comes from Lexington that after Bon Voyage won the two-year-old division of the Kentucky Futurity, Mr. W. A. Clark Jr. asked Chas. Marvin to put a price on her. Mr. Marvin wanted $10,000 for the colt and Mr. Clark was willing to pay the price, so the trade was made. Bon Voyage is one of the best bred trotting colts living and as he has a mark of 2:15 made in a winning stake race $10,000 is not a big price for him. Mr. Clark will doubtless winter him in California. Chas. Marvin's many friends here will be pleased to hear of his good luck this year. He won $4000 with Bon Voyage in two races before he sold him to Mr. Clark.

Volume 16 of the American Trotting Register has just been issued by the American Trotting Register Association. This volume gives the pedigrees of standard stallions from 34,300 to 39,299 inclusive, a list of corrections and transfers, a list of standard mares and geldings and a list of non-standard animals which are registered. In the pacing department is a list of standard pacing stallions from 0681 to 0850 inclusive, a list of transfers of standard stallions, a list of standard mares and geldings and registered non-standard animals. The whole has been carefully indexed by Registrar Best, and the volume consists of 960 pages. It is an invaluable reference book for all breeders, and copies can be secured by sending five dollars to the BREEDER AND SPORTSMAN, or to W. H. Knight, secretary of American Trotting Association, Chicago, Ill.

THE TRANSYLVANIA.

How Sweet Marie Beat Tiverton in the Fastest Five Heat Race Ever Trotted.

The telegraphic reports of races cannot always he relied upon as correct and mail advices from Lexington show that the wired reports of the great Transylvania last week contained several misstatements. The time of the first heat was 2:05¾ instead of 2:04¾ and aeveral other minor pointa in regard to the famous race were not described correctly. The following account of tbe race, written hy a representative of the Lexington *Democrat* will he interesting to our readers:

In contrast to the two previous days, the weather was cold. The sun was hright and comfortahle, hut a strong east wind was hlowing across the track, wbich interfered perceptihly in the third quarter.

In the pooling Sweet Marie sold at $100, Tiverton $90 and the field $12. It was a few minutes past 1 o'clock wben Starter Walker sounded the hell for the line-up in the first heat. There was some difficulty in getting the field started. Every driver was eager for the least possihle advantage. After scoring a balf dozen times they were off to a very fair start, except for Hall Fry, who was two lengths hehind hia field. Sweet Marie had the pole, witb Tiverton in sixth position, but hefore the quarter was reached the hay gelding had gone ahead of the mare. At the half he was still a length and a half to the good, with the mare in second place and Knox's Gelatine King third.

They were hitting a remarkahle pace, considering the weather conditions, and the crowd, in anticipation of a record-hreaking performance, was already much excited. Into the stretch Tiverton had a lead of two lengths, and though McDonald made the hest drive he knew how with Sweet Marie, the gelding came in easy on the hit two lengths to the good in the record-hreaking time of 2:05¾. Snyder McGregor was third, four lengths back, Knox's Gelatine King fourth, Hall Fry fiftb. Tuna and Kent were distanced.

The fractional time of the heat was: :32¼, 1:04¼, 1:35¼, 2:05¾. This was not only the fastest heat trotted in a race this year, hut hreaks the record for the event 1¾ seconds, the hest previous time heing 2:07½, made by Prince of Orange in 1902. Considering the weather conditions, it was prohahly the most marvelous mile ever trotted until the next heat.

For hrilliant as had heen the first heat, it was soon destined to he eclipsed. Tiverton now sold at $50, with tbe field at $25, and he justified the confidence reposed in him. The start was good, hut Hall Fry hroke just after Starter Walker had yelled "Go!" Tiverton took the lead, hut this time the California mare was right after him. Close up all the time, she got on even terms with him at the half and for a moment her nose showed in front. But the gelding drew away gradually and at the head of the stretch had a lead of two lengths.

The crowd said "Cinch"—"The mare is heaten"—He walks in." But not without a contest, severe to the limit, was Tiverton destined to add tbe heat to his credit. The mare came fast in the stretch and after a magnificent drive was beaten only a head. She had pushed the gelding so hard that he was compelled to lower the marvelous record just made, the mile heing finisbed in 2:04½. In this heat, as hefore, none of the other horses were contenders. Snyder McGregor was again third, Knox's Gelatine King fourth and Hall Fry fifth. The fractional time waa 0:32¼, 1:02¾, 1:33, 2:04½.

Before the third heat Tiverton sold at $100, with the field at $70. Botb Tiverton and Sweet Marie were at 4 to 5 in the books on the heat. The admirers of the California mare believed that here sbe would ahow the stuff that was in her and race the gelding to death. The result was one of the greatest contests the trotting turf ever saw. Tiverton took the lead aa uaual with his starting speed, and at tbe quarter was in front by two lengths. But Sweet Marie began to go after him. Gradually ahe drew up, until at the half they were on even terms. Neck and neck they raced for a quarter, and none could tell which would win. The nose of the mare would ahow in front, only to he supplanted hy the nose of the gelding. On and on and on they came, and then the mare hegan to pull in front. It was very gradual, scarce enough to count at first, but it was gradually increased. And then Andrews hegan to whip. At firat Tiverton responded. But he had already done much—two record-hreaking heats is a good deal in one afternoon, and though he tried, he did not bave enough left to come far, and was forced to surrender to the great mare hy a length. Snyder McGregor was third, Hall Fry fourth and Knox's Gelatine King distanced. Tbe time, 2:05, hreaks the world's record for the fastest three heats ever trotted in a race. The fractional time was 0:31½, 1:02¾, 1:33, 2:05.

Before the fourth heat Sweet Marie was strong favorite, selling at $100 to $30 for the field. Tiverton jumped to the lead before the eighth pole was reached and took the pole. The favorite was pocketed and got hehind all the others, but when she hegan to make her bid sbe soon passed them, and at the half was nearly on even terms wlth the leader. On she came, neck to neck, nose to nose, and then she drew away and as tbey rounded into the stretch had a comfortahle lead. Seeing his horse was beaten, Andrews did not press Tiverton, hut allowed the others to pass him just hefore the wire, finishing last, with Hall Fry second and Snyder McGregor third. The time was 2:08½, as follows: 32½, 1:04½, 1:36, 2:08½.

Sweet Marie's victory waa now generally conceded. She sold for $50, against $7 for the field. There were those, however, wbo rememhered Andrews' marvelous drive with Grace Bond in the Futurity, how he had nursed up her strength in the fourth heat and then came on and won in the next. And rememhering this, tbey thought that Tiverton might yet he victor. But the horse was dead tired. He showed it as soon as he got on the track. He dropped hehind before the eighth was reached and trailed hia field the entire route. Sweet Marie led from the start and finished strong and easily, never headed. Hall Fry, tbe freshest and hest of the others, was a good second and Snyder McGregor third, several lengths in front of tbe tired Tiverton. The time of the last heat was: 33, 1:05½, 1:38, 2:09.

The race broke four world's records—tbe fastest second heat, the fastest third heat, the fastest three heats and the fastest five heats ever trotted in a race. The first three heats were an average of 2:05½ and the five an average of 2:06 11-20.

Caring for Trotters.

The puhlic know little of the unceasing care and constant, untiring effort to keep the great trotters in condition to race. Charles De Ryder talked interestingly on the suhject the other day. He said:

"Perhaps in comparing the running and trotting horse one might say that the highest grade of the trotter or pacer is all that a running horse is, plus restraint. The wild horse when in a hurry to get away gallops. He never trots. The trotter has had man at work on him. He has received an education, and the fear of inviting the displeasure of his driver hy hreaking into a gallop is constantly hefore his mind. He has heen taught restraint. When in his excitement and effort he forgets that restraint he hecomes just the wild, galloping animal—the race horse who knows no restraint and hrooks none.

"The big racing trotter, with its tremendous stride and perfect physical make-up, receives the care that few humans ever get.

"They are like hig hahies and need constant attention. It's a sponge in one hand and a thermometer in the otber most of the time. A race horse's temperature is an index to his health, as is man's. He is a hundle of nerves, too, and needs quiet and rest.

"In the morning the trotter lies around in his stall, getting rest and strength. He has a hox stall about 12x12 feet, with smooth walls There is no manger. Hia hay hangs from tbe ceiling in a rope hasket. There is nothing that he may injure himself upon. All morning long he munches hay and is supremely lazy.

"Just hefore the races are called he is taken out and given three trials. For instance, I drove Aristo around once in 2:45, again in 2:25, and again in 2:20 hefore the race.

"After the race had heen trotted and won he was hrought in and given a warm bath of salt water—a pint of salt to a pail of water at ahout 115 degrees. He was washed down thoroughly and partially dried. Then he got a rub witb alcobol and witch hazel, mixed in equal parts.

"After that he was wrapped in hlankets and cooled out. If a horse is suffering much distress, if he is hreathing very hard and is weak from the strain, I make the covering light, otherwiae I have the hlankets thick and heavy. He is walked up and down by his man for about twenty minutes, during which time he has drunk water a little now and then, and he is then ruhhed down until thoroughly dry with rubhing cloths. These are made of English salt sacks; they are pure linen. He then gets another ruh-down with alcohol and witch hazel, and his legs are hound up in cotton moistened with a solution of sugar of lead and sulphate of zinc. This keeps his legs cool and keeps down any swelling.

"All this has occupied ahout two hours, and if he is well cooled off and his temperature down, he is given a ruh with Smith's caloric vita oil, a preparation which keepa tbe hody warm and arouses circulation.

"Then he is hlanketed and turned in for the night and given his meal, consisting of hot hran masb, cooked with equal parts of flaxseed and oats. I usually season it up with a small handful of salt, so that he will like it. A pail of water and a fork of hay is left in the stall with him, so that he may eat and drink wben he feels like it.

"His man sleeps in the stall with him to see that he wants nothing. Every horse has his man. I brought down twelve horses and twelve men. Each man is responsihle to me for his horse. Nothing must happen to him during the night. If the horse gets sick the man muat know it and call me."

An Erroneous Idea.

The numerous reports that have recently heen sent out from Lexington regarding the internal strife in the management of the Kentucky Trotting Horse Breeders' Aasociation have put an erroneous idea of the condition of affairs in the association hefore the puhlic, and it is extremely unfortunate that so much stress has heen laid on the resignation of two of the directors. Each of the resigning memhers have emphatically stated that no friction whatever exiated to cause their retirement from activity in the management of the association, and any report to tbe contrary is not authorized hy either of tbem, and is calculated to do the association great harm, and it is extremely unfortunate, as well as heing in had taste, that these reports should come from Lexington, a city that derives greater henefit from the existence and success of this association than from any other institution in its immediate vicinity. The Kentucky Trotting Horse Breedera' Association was founded at a time when racing the light-harness horse was, comparatively speaking, in its infancy, and its early beginnings were in a modest way, from which has grown the present institution, one of the most powerful, influential and important of its kind in the world. Its influence on the industry of hreeding the American trotter has heen greater than that of any other association in this country. Its example has heen followed hy other prominent associations, and its prestige has heen second to none. The men who have controlled its affairs have heen the hest tbat this community has produced, and its connection with racing has honored it and upheld its hest traditions.

Tbe men in control of tbe association are practical business men, as well as horsemen of wide experience, and their management of its affairs has always heen entirely free from any selfish ideas or ulterior motives. Its principles have always heen for the hetterment of hreeding and racing the light-harness horse, and its object has never heen, nor is it likely to he, directed towards the financial henefits of its officers or stockholders. During its history men of great prominence and high atanding have served it faithfully and unselfishly, and it is but natural that in the course of events other duties and other interests should demand ao much time that those who have given it so much of their attention and ability should he forced to retire from active participation in its affairs. Year after year this association has followed the ideals and examples of those who founded it, and never once haa it atood other than at the very head and front of the trotting associations of this country. It has always heen a leader in all reforms and progressive movements, and its managers have always worked in harmony and with one accord. The two retiring memhers of the hoard, Major P. P. Johnston and Mr. J. D. Grover, have heen of incalculahle value in their untiring efforts to promote its success, and the former haa given to it for a greater period than any other man now living his hest thought and his loyal support; he has repeatedly endeavored to withdraw from active participation in the management of its affairs, and his withdrawal at the present time is promoted by no other desire than to devote his time to hia private interests and to enjoy a well earned rest from the care and fatigue incident to the work of running so great an institution. Mr. Grover's connection with the institution haa heen of great henefit to it, as he is a man of affairs, and bis interest in the breeding and racing of the light-harness horse is quite extenaive. The affairs of the Kentucky Horse Breeders Association were never hefore in more prosperous condition and never hefore has it atood higher in the estimation of the racing puhlic, and none other of the many meetings tbat have preceded the coming one have received as liberal a support from the horsemen throughout the country or have heen more eagerly looked forward to hy the lovers of light-harness racing.—*Kentucky Stock Farm.*

A press dispatch from Glen Cove, L. I., says E. E. Smathers, the horseman, made an offer—said to he $20,000—to Edward R. Ladew for the colt Ignor, and Mr. Ladew declined it. The colt is a two-year-old hay by Allerton, dam hy Constantine by Wilkes Boy, second dam hy Baron Wilkes, third dam hy Mamhrino Russell, and fourth dam by Hamhletonian 10. He has shown such extreme speed and action as to warrant the belief that be will develop into a senaational trotter. He went a balf mile over the Mineola half-mile track the other day after the races in 1:05.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tidewater.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Oct. 12, 16—Walla Walla Kennel Club. Walla Walla, Wash. Geo. L. Mason, Secretary.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

Oct. 25, 28—World's Fair Dog Show, St. Louis, Mo. F. D. Coburn, Chief of L. S. Dept., St. Louis, Mo.

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E. Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 11—Pacific Northwest Field Trials Club. La Conner, Wash. F. R. Atkins, Secretary pro tem, Seattle, Wash.

Oct. 24—Missouri Field Trial Association. Sturgeon, Mo. L. S. Eddins, Secretary, Sedalia, Mo.

Oct. 24.—Ohio Field Trials Club. Washington Court House, O. G. R. Haswell, Secretary, Circleville, O.

Oct. 25—Connecticut Field Trial Club. ————, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Oct. 31—Monongabela Field Trial Club. Oblong, Ill. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 1—Sportsmen's Field Trial Club. Clare, Mich. Erwin C. Smith, Secretary, Midland, Mich.

Nov. 7—Independent Field Trial Club. 6th annual trials. Hntsonville, Ills. H. S. Humphrey, Secretary, Indianapolis, Ind.

Nov. 8—Western Beagle Club. Inangural trials. Oregon, Ills. Reno B. Cole, Secretary, De Kalb, Ills.

Nov. 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Kennel Club. Field trials. Clay City, Ind. C. F. Young, Secretary, Clay City, Ind Week following Ills. Ch. trials.

Nov. ——National Beagle Club. 11th annual trials. Grafton, Mass.

Nov. 15—Michigan Field Trial Club. ————, Mich. Chas. E. Sisson, Secretary, Muskegon, Mich.

Nov. 15—Central Beagle Club. 9th annual trials. ————. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 22—International Field Trial Club Ruthven, Ont. W. B Wells, Honorary Secretary, Chatham, Ont.

Nov. 29—Virginia Field Trial Association. Martinsville, Va. C. B. Cooke, Secretary.

Dec. 3—Continental Field Trial Club 10th annual trials. Thomasville, N. C. John White, Secretary, Hempstead, L. I.

Dec. 12—Alabama Field Trial Club Huntsville, Ala. J. M. Kirkpatrick, Secretary, Huntsville, Ala.

Dec. 12—Pointer Club of America. 5th annual trials. C. F. Lewis, Secretary.

Dec. 17—Eastern Field Trial Club. Waynesboro, Ga. Simon C. Bradley, Secretary-Treasurer, Greenfield Hills, Conn.

1905

—— ——American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Am. Field Publishing Co., Chicago.

Jan. 9—Pacific Coast Field Trials Club. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco, Cal.

Jan. 10—Georgia Field Trial Association. Albany, Ga. P. M. Essig, Secretary, Atlanta, Ga.

Jan. 10—Texas Field Trial Club. 3d annual trials. ————, Tex. T. A. Ferlet, Secretary, San Antonio, Tex.

Jan. 16—United States Field Trial Club. Grand Junction, Tenn. W. B. Stafford, Secretary-Treasurer, Trenton, Tenn.

Los Angeles Tournament.

The seventeenth semi-annual tournament of the Los Angeles Gun Club took place on the new grounds at Sherman last Saturday and Sunday and was, as usual, a successful and well-attended affair.

Fred B. Mills of Bolsa won high average on the first day, 92 2-9 per cent (166 out of 180), from the 18-yard peg. Mills was in great form and was always in the money with his "pump gun." J. Ed Vaughan was second high average; he shot from the 20-yard stat and broke 161 out of 180, 90 per cent. Frank S. Ecker of San Diego, shooting his nickel-plated Smith, tied with C. D. Hagerman for third place with 86⅔ per cent on the day. No average prize was shot for, and the entire programme, medals and team race were figured on total.

Thirty shooters were on hand Saturday, a fair proportion being from other points.

"One of the surprises of the day was the sudden reversal of form exhibited by 'Barracuda' Jim Gibson, who, in the Tufts-Lyon medal race at fifty birds, suddenly went into a trance and tore off forty-seven before he came out of it," writes friend Hedderly in the *Times*. 'Gibson shot in championship form and proved a little too consistent for Charlie Julian, who stayed with his husky opponent for a time but finished one notch behind. Hagerman, Vaughan, Mills and Robertson were in the hunt, but forty-five was as many any of the quartette could do."

Not content with winning high average of the day, Fred Mills must needs chop out high run also, and by stringing fifty-seven consecutive breaks he distanced all competitors for this honor. To still further add to his collection of victories, Mills and Walker won the two-man E. C. cup. Mills made 25 straight in this race.

No hitches of any sort occurred to mar the fun, and the day was one of the most thoroughly enjoyable the club has ever had. The firing was done over the Leggett trap, which, if anything, throws birds a little easier than the set of Experts, which are special machines, screwed up to the last notch, and likely to throw birds over sixty yards any time. Quite a number of the old timers were on hand; John Schumacher, among others, unlimbered a new Parker that is to do service on the Pacific duck marsh this winter. C. D. Hagerman put in an appearance with a special Smith built for the game, and toward evening began to get the handling of this new piece down pat. Guy Lovelace also sprung a new Parker, as did Ed Vaughan E. E. Drake and Hip Justins were on hand with their Remingtons. A surprising feature of the shoot was the number of new Ithacas used. It was a fine representation of American guns that graced the rack between events, and at the lunch hour.

Mills and Walker had a good race in the E. C. cup two-man team shoot. But for Mills' score of 25 straight, Justins and Fano would have won the prize. Walker fell down to 19. Julian and Ecker were right on deck with 20 and 23, for 43, and Barracuda Jim with Ed Vaughan made a strong bid. The team scores follow: Mills 25, Walker 19, total 44; Justins 22, Fano 21, total 43; Julian 20, Ecker 23, total 43; J. Gibson 19, Vaughan 24, total 43; McCullough 22, Tubbs 20, total 42; Hagerman 22, Smith 19, total 41; B. Van Valkenburg 20, Lovelace 19, total 39; Kolb 21, Orr 18, total 39; Robertson 20, Schumacher 17, total 37.

Ed Vaughan won both miss and outs without difficulty by breaking fifteen straight in the first and five in the second.

Most of those present shot the entire program through The handicap feature had little effect upon the scores apparently, and gave satisfaction. It more nearly approached a success than at any time in the past. With arrangements of distance as now made, the poorer shooters have a fair chance.

Notwithstanding deep, dark masses of storm banked against the mountains and making the most difficult of backgrounds, first-class scores were the rule. The absence of wind in great measure atoned for the difficulty of seeing birds before they touched the thirty-five-yard line, but all day the keen-eyed fellows turned their quick vision to good advantage, while the slower brethren stood at a discount. Such conditions as Saturday's put a premium on the snap shots.

Beautiful weather prevailed on Sunday during which time forty-five shooters participated in the second day's shooting.

Never did the local gun club hold a more successful or pleasanter shoot; the attendance came up to expectations both as to numbers and as to good fellowship. Nothing happened to mar and the results on the whole would class favorably with any shooting that has been done over Pacific Coast traps this season.

J. Ed Vaughan proved to be the high average man for the day. He shot from the 20-yard mark as did Mills, who had an additional two yards tacked on to his first day's handicap.

Vaughan led Mills on the two days' shooting by just two birds, breaking 320 out of the 360 shot at for an average of .888 per cent to Mills' .883. C. D. Hagerman, took third high average by several birds, totalling 304 for .844 per cent.

Using his pet Parker recently acquired for saucer smashing purposes, Vaughan chewed his way into the money of almost every event and in the splendid race for the individual championship diamond medal was beaten only because Big Jim Gibson, shooting in magnificent form with the steadiness of a sea captain's clock, strung a straight score of twenty-five consecutive breaks on top of twenty-four in the first half for a total of forty-nine out of fifty—a record that has been made just once before in the history of the trophy. There be those who sit on the barrelheads and believe blue rock breaking is easy, but they never tried it. He who strikes down his ten or twelve quail out of fifteen; who drops his dozen ducks dead for the twenty shots fired is a wonder; the same record at the traps gets no money, and wins no medals. The mental and physical strain of standing up through half an hour, firing a shot every forty-five seconds and knowing that each must be a perfect one in order to qualify is best understood by those who have been through it and to them it requires no enlargement upon. Suffice it to say that Gibson's performance Sunday was wonderful, and Vaughan's feat in breaking twenty-two under fire but little less so. In the first installment of the medal race which was cut in two for convenience in shooting, Vaughan broke his twenty-five without a bobble and Big Jim missed only one. There was blood in "Barracuda's" eye when he stepped to the score for the second half; down the line he went five times and every target was accounted for. There were no slobbered targets, no single-shot breaks, but each one was pulverized by the center of a perfectly placed charge, and when Vaughan went to bat, it was with the knowledge that he had to score straight to win. That strain tells on any man, and when Vaughan went in it was with the knowledge that he had to score straight to win. The strain tells on any man, and Vaughan missed his first bird by shooting over it He recovered and began smashing them in his proper form, dropping two more for a total of twenty-two and a grand total of forty-seven—a score which has won the individual championship more times than it has lost it. Gibson now wears both the medals, having won the Tufts-Lyon trophy on the first day. His victory was a most popular one for no shooter is better liked than "Barracuda Jim."

Probably the five man team Los Angeles Gun Club team championship event would have been more interesting had not a fitful west wind played hob with the accuracy of all who shot in it. Apparently the breeze was made to order for the team race; it came up and ceased with it. The fourth team was head and shoulders the best, but was no better than it ought to be at that. Twenty-five birds per man or 125 to the five were the conditions, and when Fred Mills, O. O. Orr, Frank Ecker, C. L. Julian and Jim Kolb, the "San Diego team," stepped to the front and center wise pikers saw the winners. Orr distinguished himself by making 24, and the team totalled 108. None of the others reached three figures, scores being surprisingly low. They follow:

First team, Jim Gibson 23, S. R. Smith 17, C. E. Gibson 15, Fred Gilbert 19, Layman 25, total 99; second team, Vaughan 22; Justins 20, Englehart 22, Witman 21, Fano 12, total 97; third team, Hagerman 21, Lovelace 18, Van Valkenburg 17, Breer 19, Council 16, total 91; fourth team, Fred Mills 20, O. O. Orr 24, F. S. Ecker 21, C. L. Julian 21, J. M. Kolb 22, total 108; fifth team, Coles 23, Saville 20, Bungay 17, Fred Lyon 16, Redman 20, total 96.

As usual, the merchandise shoot, caught the entry of many who participated in no other events. Twenty birds were carded, and the fun was immense. Julian, Mills, Bungay, Robertson and Van Valkenburg with 18, were best scores.

The usual miss-and-out concluded the day's sport. Ed Vaughan won the first by breaking ten consecutive birds in a field of eighteen starters.

In the second, Guy Lovelace, by breaking eight birds, landed the prize.

The scores for both days are given in the summary below:

Saturday, October 9, 1904—

Events	1	2	3	4	5	6	7	8

Totals of those who shot the programme through were: Vaughan, 160; Kolb, 157; Julian, 155; Jim Gibson, 154; Mills, 152; Hagerman, 148; Witman, Van Valkenburg, Smith, 144; Lovelace, 141; Ecker, 140; Gilbert 140; Justins, 133; Bungay, 126; Fano, 107. Possible 180, including all events.

Thos. S. Griffiths, owner of the Glen Tana Stock Farm Collie Kennels, is to be congratulated on the wins at the recent Danbury show, of his imported Glen Tana Bounder (Ch. Parhold Picolo ex a Ch. Wishaw Clinker bitch). First novice, second limit, second open and reserve winners at a 565 dog Eastern show is encouraging as well as agreeable to the enthusiastic Spokane fancier.

Game Association Meeting and Proposed Changes in the Game Laws.

The annual meeting of the California Game and Fish Protective Association will he held at Visalia on November 11th and 12th. The program of the meeting as already outlined is the following: On Friday evening at the opera house the Mayor of Visalia will deliver an address of welcome to the sportsmen. H. T. Payne, president of the association, will respond. Hon. T. J. Sherwood of Marysville will speak on "Game Law Legislation." Mr. Sherwood, we believe, introduced the first game bill passed in this State at a session of the legislature years ago.

"Local Requirements," in the line of protection and observance, will he the subject upon which Mr. Frank H. Mayer, editor of *Western Field*, will expatiate. An important subject, "The Value of Insectivorous Birds to the Agriculturist and the Horticulturist," will come under the ahle oratory of W. Scott Way, secretary of the California Auduhon Society.

On Saturday the association annual business meeting will he held in Native Son's Hall. In the evening the sportsmen and their guests will partake of an old time "Spanish dinner" tendered hy the Visalia Fish and Game Protective Association.

Delegates and visiting sportsmen—for the meeting is open to all interested and whose attendance for the common good of the cause is invited, who stay over on Sunday will have an opportunity to enjoy some good quail and duck shooting.

Among the business measures that will come before the association will he a numher of proposed amendments to the present game laws and also a new proposed bill, one providing for a licence on gun and hunter.

The proposed amendments, etc., are embodied in a oircular issued by the association and as suggested by a committee appointed for the purpose.

Section 629 of the general game laws, relating to the closed seasnn on feathered game has added to it—English or jack snipe, dowitcher or red-breasted snipe, godwit or marlin, willet, sandpiper, sanderling, yellowlegs, surf hird, turnstone and oyster catcher. These hirds are known generally as shnre hirds and this change is believed hy many to he for the hest interests. A close season on English snipe, it is claimed, will not he tolerated by the Sacramento shooters. In that section hunters got snipe shooting only in April and March, hreeding time, in fact and all attempts in the past for proper protection of English snipe have heen futile. It is to be hoped that this change will receive the support of the state law makers.

Section 626c is to he amended so that swans and imported quail set at liherty for acclimatization, are to he protected hy nlose season all the year. This provision is acceptahle to every sportsman.

Section 626d is the subject of proposed changes that will create much attention. The cl ange is as follows: "Every person who, during any nne calendar day, takes, kills or destroys, or has in his possession, more than twenty-five quail, partridge, snipe, curlew, or ibis, wild ducks, doves, rail, plover, dowitcher, godwit, marlin, yellow-legs, surf hirds, turnstones, or oyster-catchers, is guilty of a misdemeanor."

It is si nificant to note here that English snipe have been omitted. The cut down on the duck limit is ohjectionable tn the majnrity of sportsmen. This charge is aimed, it is claimed, against the market hunter.

In section 626f the deer season is recnmmended to be shortened to two months, the individual limit two bucks per season and the use nf dogs in hunting deer to be prohihited. This amendment, it is helieved, will he bitterly fought. This change may he applicahle to certain districts, but is looked upon as not good general legislation.

Section 626k of the general law is recommended to be changed so that the sale of wild ducks, dove, rail, jack snipe, ihis or plover is to be made a misdemeanor. English snipe, it will be noted, are again not included. Provision is also made against corporatinns or others having game in cnld storage; steamers, for instance, that take fish and game aboard when leaving port. A clause in the proposed amendments is directed against this purveying of toothsome food stuffs for travelers.

The han against night shooting is supplemented in section 626m with the amendment "or animals." This, if adopted, will stop deer hunting at night.

Transportation of game, trophies of the chase, skins, specimens of game birds, etc., are to be so safeguarded that illegal shipment of game and fish out of the State will he stopped.

Section 627h relating to the transportation of game is changed to conform to the 25 hird limit, etc., but in the proposed change we notice that English snipe are again immune from needed protection.

The law against the use of illegal traps, nets, etc., is made stronger hy the prohihition of the use of any poisonous suhstance for any hirds or animals mentioned in tbe act. This change undoubtedly will be comhated hy ranchers and others who set out pnison for squirrels, coyotes and other vermin.

Violators of the proposed changes and the present law, it is urged, shall be fined in a sum of not less than $10 for each bird or each pound of deer meat illegally killed or in possession. Corporations that transport or carry the same are under the same han and penalty.

Fifty dollars for esch deer illegally killed nr having in possession the pelt of the same and a $25 penalty for each day that a hunter allows his hounds to trail deer, as well as numerous proposed penalizing injunctions directed against corporations are also among the proposed changes advocated.

The trout season is evidently too loog, for a month has heen cut off of the open season. May 1 to Nnvember 1 is claimed to he the proper open season. The size limit is to he six inches, the hasket limit 50 trout to the individual rod in one day, and trout less than one pound in weight can not legally he sold. This proposed change will meet with the indorsement of nearly every stream angler. The season on hlack hass will he extended from May 1 instead of July 1, until January 1 following.

Another proposed change in the law—an act to regulate the killing of game hirds and animals and to provide revenue therefrom for their restoration and preservation—is fnr the purpose of collecting an annual license of $2 from every sportsman who hunts in other than his own county. Nnn-residents and shonters who are not citizens of the United States are down for an annual license of $10. This clause is aimed at Chinese, Jans, "Dagos," "Guineas," Goathunters," so called—the general run of foreigners who are out every day in the year and perforate with shnt everything in the line of fur or feather—owls, jaybirds, quail, squirrels, all are good for the pot, for these marauding gentry are omnivorous.

This proposed law will meet with the endorsement of a majority of our sportsmen. The question has heen threshed out in nearly every State of the Uninn with the result that in a msjority of the states, as well as in Canada and British Columbia, licenses are imposed.

Provision is made in the proposed act for the collection of the licenses hy the State Board of Fish Commissioners who are to appoint for that purnose, deputies in every county,

Aside from the new act recommended, it is patent that most of the changes proposed, in fact those of greatest interest to our sportsmen, can be carried out by county hoards of supervisors under the powers relegated to them hy legislative act.

Oregon Sportsmen Have Excellent Pheasant Shooting.

The open season for hunting the China or Mongolian pheasant is now on, and all day October 1st the report of the shotgun was heard throughout the section of the Willamette Valley where they are plentiful, near Albany in particular. Saturday, Sunday and Monday were devoted to hunting in Linn county, the China pheasant's first home in this country, and where these great game hirds are more plentiful than in any other part of the United States. Large parties of hunters left Albany in the early days of the season, and many hundreds of the birds have been killed, probahly more than will be in any week during the remainder of the season.

Liberated in this country for the first time, twenty-four years ago, the Mongolian pheasants have multiplied rapidly. Fnr a long time, however, they were practically confined to Linn county, and though their increase in numbers was rapid, they did not spread far from where they were first set free. Of late years they have gone farther and while yet more common in Linn and the adjoining county of Benton than elsewhere, they have spread over all the counties in the central part of the Willamette Valley and may he seen in most of the counties west of the Cascade mountains. Recent reports say the hirds have been seen in different Southern Oregon counties.

The fame of the China pheasant has also spread until it has long been known as the greatest of Oregon game birds. Its fame is not confined to that State alone, as is shown in the fact that many sportsmen from Washington and California and even from the East have gone to Linn county during the open season.

The Mongolian pheasant was first introduced into this country hy the late Hon. O. N. Denny, formerly a resident nf Portland. When he was Consul-General for the United States at Tien Tsin, China, in 1880, he shipped 50 ring-necked Mongolian pheasants to his hrother, John Denny, now a well-known resident of Alhany, and 26 nf the hirds reached there alive and in good condition. Mr. Denny then resided nn a farm near Peterson's Butte, 11 miles east of Alhany, and four miles from Lebanon. There he liherated the hirds March 17, 1880.

The newcomers proved prolific, but though they have spread over most of Western Oregon, it is an interesting fact that to this day there are more hirds in the vicinity of the place where they were first set free than anywhere else, and one of the best pheasant hunting grounds known to sportsmen is near where Petersnn's Butte rears itself ahove the plains of Linn county.

The China pheasant was first legally protected hy an act passed at the special session nf the Oregon Legislature in November 1885. That act made it unlawful to kill or have in possession any of the pheasants for six years. At the expiratinn of this long closed season, there were thousands of the birds in the state.

The Legislature of 1891 passed a law permitting the killing of the birds during Septemher, Octoher and Novemher. During the past thirteen years the dates of the annual open season have changed time and again as succeeding Legislatures have considered the question, but the China pheasant has never been entirely protected since 1891. At the last session of Legislature an effort was made to estahlish another closed season which failed. When permissinn to kill the pheasants was first granted there was no limit to the number that could he killed in one day. As a result expert hunters sometimes slaughtered 50 nr 75 hirds on a good hunting day near the opening of the season. But in later years the limit for one hunter to kill in a day has heen successfully placed at 20, then 15 and finally 10 hirds.

The present law makes it "unlawful hetween the first day of Decemher and the first day of Octoher of the following year to hunt, pursue, take, kill, injure or destroy or to have in possession except for scientific or hreeding purposes, or to sell or offer for sale, barter or exchange any prairie chicken, grouse, native pheasant, ringneck or China (torquatus) pheasant." This law makes it unlawful "to kill any greater number than 10 of the game-hirds enumerated in this section in one day." The law permits selling the birds during the last 15 days of the open season.

The China pheasant is known by a variety nf names. It is popularly called the "China pheasant." In the verbiage of the law it is referred to as the "ringnecked Mongulian pheasant" or "the torquatus pheasant." Several people, who think that the man who introduced the hirds into this country should be honored hy giving the hird his name, call it the "Denny pheasant." From the standpnint of science the China pheasant is a "gallinaceous" hird of the sub-family phasiande and genus phasianus. "It is perhaps a cross with the phasianus torquatus of China."

The Mongolian pheasant is a heautiful hird. The male bird has most hrilliant plumage and hoth male and female combine grace and great heauty with the qualities that make the pheasant one of the hest of game-hirds. In scientific works the China pheasant is distinguished from nther hirds hy the following characteristics: "Bill moderate, strong, vaulted, slightly arched at tip, which overhangs the lnwer mandihle; wings short and rounded, fourth and fifth quills longest; tail long and wedged-shaped, each feather alternated; tassi of males armed with spur."

The China pheasant is indeed Oregon's greatest game bird. It is beautiful, toothsome and gamy. Other birds are perhaps as toothsome as the Oriental bird; a few may he as beautiful; but no hird in this country has the instinct of self-preservation in so high a degree or is so skillful at eluding hunters. The hird will douhle on its trail and has many methods peculiar to itself of preventing destruction. It seldom alights during the hunting season without running a considerahle distance and, being remarkably fleet of font, it generally escapes from a hunter if it once succeeds in alighting. It requires an experienced hunter with an experienced hunting dog to kill the limited ten hirds a day.

But as most of the residents of pheasant habitat parts of the State, more especially in Linn and Benton counties, have been hunting the pheasants for several years with the result that they are experienced in the hird's hahits, thousands are killed every season. Every year at the close of the open season the birds are very scarce and the fear is expressed that they will he exterminated, hut they are hardy and prolific and at the opening of the next hunting season are nearly as plentiful as in the past.

Attempts have been made in the vicinity of Albany to keep and hreed the hirds in confinement. During the winter when the ground is covered with snow the birds may frequently be captured alive. A few people have succeeded in raising large pens of the birds but as a general thing a large proportion of the young will die in confinement. The pheasant never becomes domesticated and no matter how long it has been in captivity will escape to the fields at the first opportunity.

Corvallis is near good shooting country and since the opening nf the pheasant season everyhody able to own a gun and dog has heen out after the pheasants, and the principal item on Corvallis' hill-of-fare has been fried or hoiled pheasant, according to the age of the victim Quite a number of visiting sportsmen are here this year for the first time, all of whom express themselves as greatly pleased with the number of birds found. Sunday, Octoher 2d, was a troublesome day for the pheasants, for many who were unahle to leave Saturday spent the day in the country, visiting their farmer friends, whose large fields and hroad acres are the "Chinaman's" favorite feeding grounds.

The Management of Puppies.

Assuming that the puppies have finally left their dam, and that all has gone well with them during the earlier stages of the separation, there is not much for the owner to do heyond keeping them clean and providing them with a sufficiency of proper food and exercise. Unfortunately for the wellfare of many a puppy it is not everyone who is entrusted with the responsibility of looking after a kennel who pays proper attention to the ahove matters, the result heing that his charges do not thrive as they otherwise would. Puppies that are not kept properly clean become verminous and generally unthrifty, which not only retards their growth and development, but so weakens them that they are unahle to combat the troubles which are often associated with teething and other infantine ailments.

It is important, therefore, that their bed should be kept scrupulously clean, the soiled straw heing removed daily and replaced by new, whilst the floor of their kennel should be cleansed thoroughly and be kept well covered with coarse sawdust if the weather is cold. At any time, however, it is had for the youngsters to he allowed to lie on any cold suhstance, such as cement or brickwork, which fact should be laid to heart by those who have them in charge.

Their food should he sufficient and wholesome, and it is hest that three meals at least should be supplied to them every day. Biscuits soaked in hroth will do very well for the first and last meal, and to the midday one a little meat may be added, but not much. Oatmeal is rather apt to disarraoge the stomachs of the puppies and should he avnided, as there is often a tendency to diarrhœa which should not be encouraged in any way. If this should occur, the addition of a little powdered chalk to their food will often check the evil, hut not infrequently worms will be found to he the cause of all the mischief.

As a matter of fact, most puppies suffer from worms, which carry off many a promising youngster soon

after it is weaned, either by extreme scouring or by fits. Consequently it is by no means an unwise course to take to give all fairly strong puppies a dose of worm-powder when they leave their dams. A preliminary fast is necessary if the medicine is to effect its purpose, but it will not be wise to keep them too long from food, as their strength could not endure the tax upon it. Six or seven hours will therefore be enough; or, better still, if the puppies are vigorous, the medicine may be administered on empty stomachs before the morning meal.

The two best vermifuges for ordinary use are santonine and areca nut. The former is a crystal, and is both an easy and clearing medicine to give, but an overdose is liable to produce fits. It is impossible to lay down a hard and fast rule as to how much if it should be given, as puppies differ so much in strength and size, but an ordinary dose is from one to four grains, and it may be administered in a little butter. Areca nut is a much more common remedy for worms, and is given in larger quantities than the santonine, the ordinary dose being two grains for every pound the dog weighs. It is certainly a very efficacious vermifuge and a safe one, but the objections against it are, first, that is a dirty and not over easy medicine to administer, and secondly, that if not quite freshly grated its virtues disappear; consequently, if this is the remedy selected the nuts should be newly grated.

It may be given mixed up in butter, or in a spoonful of milk or gravy forced down the puppies throat. Half an hour after the vermifuge has been given, many owners administer a small dose of castor oil, but this is a rather drastic course to pursue in the case of young and possibly delicate puppies, upon whose interiors the medicine alone will usually operate freely. Before leaving the subject of worms it may be added that very often a single dose will have no effect, and sometimes when it does it fails to extirpate all the worms. It is therefore best to administer two or three doses of worm medicine at intervals of not less than a week in the case of puppies or three days when adult dogs are being treated, but here again everything must depend upon the health and strength of the animals.

The puppies will begin to get their first teeth some time before they are six weeks old, that is, before they are weaned, and in the case of the more precocious members of the litter, a good deal of unpleasantness is caused to the bitch when they suckle. It is not the first teeth, however, that bring anxiety to their owner, but the second ones, as until these have come through, and are finally settled in their places, there is no knowing whether the dog is going to have a good mouth or not. Consequently, when any of the first teeth show signs of becoming loose, they should be inspected almost daily and removed if it appears that their remaining longer in the gums will prejudicially affect those beneath them when the latter come up. It does not do to extract these first teeth too soon, and the operation, if it becomes necessary, is not one for anybody but an expert to undertake if they are tight in the head, so the beginner, if he is a wise man, will take care to consult somebody who understands the matter better than he does.

There is no positive time for a puppy to get his second mouth, but about nine months is the usual age, though cases—rare ones certainly—have been known when everything has been over at four months and then, again, the nine months' limit is often exceeded. Neither is there any means of telling a dog's age by its teeth as is the case with horses, as the food the animal is in the habit of eating, the possibility of its being in the habit of carrying sticks or stones in its mouth, or gnawing the woodwork of its kennel, as some dogs persist in doing, all affect the condition of the teeth and render it impossible for any one to tell its age with accuracy. This assertion may be disputed but it is correct all the same, in spite of the fact that a policeman who gave evidence not long ago before a London magistrate in a case of a dog's licence swore positively that he could decide with a certainty a point which nine practical dog breeders out of ten will admit is past their power to express an opinion, much less swear upon—*The English Stock Keeper.*

Spokane Show.

Judging from press reports in the Spokane dailies, the show of the Spokane Kennel Club was not the feature of the State Fair that it promised to be at one time. A total of 95 dogs were benched, 5 of which were for exhibition only. These made up 156 entries as follows: Collies 16 dogs, 38 entries Fox Terriers (smooths) 10-15; Pointers 9-15; Cockers 9-12; English Setters 7-9; Irish Setters 7-13; Bull Terriers 7-13; Fox Terriers (wire hairs) 6-8; St. Bernards 4-10; Chesapeake Bay Dogs 4-5; Japanese Spaniels 2-2; Great Danes 1-4; Irish Water Spaniels 2-2; Boston Terriers 1-2; Irish Terriers 1-2; Miscellaneous 1-1. Of these, 51 dogs and 83 entries were from Spokane, Seattle furnished 20 entries, Portland and Salem 21 entries, Washington, Idaho, etc, 28 entries, San Francisco 4 entries—for exhibition only—a total of 45 dogs and 73 entries from outside points, a more enthusiastic showing than the local fanciers, with the exception of Glen Tana Kennels, made. When it is considered that there were 28 cups for specials, it would seem that there should have been a larger entry.

We note that the judges name is printed J. W. Bradshaw in the catalogue, he is known here as "Jack" Bradshaw and is mentioned in Vol. 8 of the Greyhound Stud Book as "Joe" Bradshaw. His usual luck in drawing entries seems to have followed him north, we are sorry to observe—for at the Los Angeles show in October 1902 there was but 84 dogs benched and at Oakland, December, 1902, there was considerably less than 100 dogs benched.

The class of the show was undoubtedly the Collies, in which breed the principal honors were annexed by Glen Tana Kennels and its produce. Pointers came next, Ch Oregon's Jessie II and Woolton Bang being the quality of the entry in that breed. J. W. Riplinlinger's English Setters captured the Setter prizes. A Ch Stylish Sergeant puppy was the new one brought out. Some good young Bloodhounds were shown by Glen Tana Kennels.

In Fox Terriers two new dogs from Portland were shown, Ben Bang and Go Bark, they are said to be good ones. Humberstone Rattler, from this city, we notice is entered in the catalogue but not mentioned in the list of winners and therefore presume he was in for exhibition only as was the Pointer Mason's Top Notch King, the Irish Terrier Rose of Killarney and the smooth Fox Terrier Sahine Brightlight. We acknowledge the courtesy of Mr. T. S Griffith in forwarding a catalogue and printed slip of winning numbers from which the following list is compiled:

AWARDS.

ST. BERNARDS (rough coats)—Novice dogs—1 J R Lamhley's Colonel, 2 P Clark's Cap, 3 M S Holzeheimer's Prince Bruno. Limit and open dogs—1 Colonel, res Cap. Novice limit, open and winners bitches—1 Mrs. C A Derry's Beauty.

GREAT DANES—Noviee, limit, open and winners bitches—1 Wm Daz's Pearl.

CHESAPEAKE BAY DOGS—Limit dogs—1 A F Weiseman's Genersl, 2 L C Waller's Mack, 3 J H McKowen's Minto. Open dogs—1 M McFee's Jeff, 2 Minto. Winners dogs—1 Jeff, res General.

POINTERS—Novice dogs—1 H B De Long's Sportsman. Limit and open dogs (55 pounds and over)—1 A B Jackson's Whitestone, 2 H W Peet's Spokane Sam, 3 Sportsman Open dogs (under 55 pounds)—1 F J Moore's Woolton Bang. Winners dogs—1 Woolton Bang, res Whitestone. Puppy bitches—1 Dr Diffenbacher's Gypsy. Novice hitches—1 Mrs A B Jackson's Spokane Dot. Limit hitches (under 50 pounds) Spokane Dot. Limit hitches (50 pounds and over) A B Jackson's Plain Queen, 2 J L Wyler's Sapho. Open hitches (under 50 pounds)—1 T E Daniel's Ch. Oregon Jessie II. Open bitches (50 pounds and over)—1 Plain Queen. Winners bitches—1 Ch. Oregon Jessie II, res Plain Queen.

ENGLISH SETTERS—Puppy dogs—1 J W Riplinger's Stylish Snowball. Novice dogs—1 Stylish Snowball, 2 R B Harris' What, 3 A Steers' Gladstone Diamond. Limit dogs—1 Stylish Snowball, 3 A Schuelheis' Black. Open dogs—1 J W Riplinger's Ch Stylish Sergeant. Winners dogs—1 Ch Stylish Sergeant res Stylish Snowball. Open and winners bitches—1 J W Riplinger's Ch Pera.

IRISH SETTERS—Novice dogs—1 J A Nelson's Duke, 2 H C Blair's Joe, 3 L Burr's Flash. Limit, open and winners dogs—1 Duke, 2 Joe. Limit, open and winners bitches—1 C W Wsggoner's Babe.

IRISH WATER SPANIELS—Limit, open and winners dogs—1 No 95 on marked catalogue slip. 2 E A Swift's Brannsgan.

COCKER SPANIELS (black)—Open and winners dogs—1 Portland Cocker Kennels' Mepals Saxon. Puppy bitches—1 F S Millchsmp's Black Cherry Belle.

COCKER SPANIELS (parti colors)—Novice dogs—1 C N Zeig er's Portland Kid Jr, 2 Elsie Kielhofer's Victoria Queen, 3 F S Millchamp's Rommy Boy. Open dogs—1 Portland Cocker Kennels' Ch Portland Kid. Winners, dogs—1 Ch Portland Kid, res Portland Kid Jr.

COCKER SPANIELS (solid colors, other than black)—Novice dogs—3 J F Jacobs' Yellow Kid. Limit dogs—3 J V Pohlman's Hooley. Open dogs—3 Hooley. Novice, limit and open bitches—3 M M Stepbens' Golden Dot.

BLOODHOUNDS—Puppy dogs—1, 2, 3 T S Griffiths' Glen Tana Johnnie, Johnson and Keenan. Puppy bitches—1 T S Griffiths' Glen Tana Bleed. Winners—1 Glen Tana Johnnie, res Glen Tana Bleed.

COLLIES (sable and white)—Puppy dogs—1 A K S Fulton's Glen Tana Laddie, 2 P Rummel's Beau Brummel. Novice dogs—1 T S Griffith's Glen Tana Radiance, 2 Glen Tana Boy, 3 P Rummel's Prince Spokane res Beau Brummel. Limit and open dogs—1 Glen Tana Radiance, 2 Glen Tana Boy, 3 O J Albee's and H S Harkness' Ormskirk Surprise res Prince Spokane v h c Beau Brummel. Winners dogs—1 Glen Tana Radiance res Glen Tana Boy. Puppy bitches—1, 2 Dr J S Kl eher's Glen Tana Queen, Glen Tana Molly, 3 D McGregor's Glen Tana Bon Bon. Novice bitches—1, 2 T S Griffith's Glen Tana Lauralea, Brandane Marionslea, 3 Glen Tana Bon Bon. Winners bitches—1 Glen Tana Lauralea res Braudane Marionslea.

COLLIES (other than sable and white)—Puppy and novice dogs—1 T S Griffith's Glen Tana Little Archer. Limit dogs—1, 2 T S Griffith's Glen Tana Marquis, Glen Tana Little Archer, 3 F J Tripp's Glen Tana Prince. Open dogs—1 Glen Tana Marquis res Glen Tana Little Archer. Puppy, novice, limit, open and winners hitches—1 T S Griffith's Glen Tana Lady.

BULL TERRIERS—Novice dogs—1, 2 Southend Bluff Kennels' Woodlawn Gladiator, Novoss Michoel, 3 V Laughley's Spot. Limit open and winners dogs (over 35 pounds)—1 Woodlawn Gladiator, 2 Novoss Michoel. Puppy bitches—1 D Lennox's Kid. Novice hitches—1 Southend Bluff Kennels' Newmarket Queen, 2 Kid. Limit bitches (over 30 pounds)—1 F E Watkins' Newmarket Baby, 2 Newmarket Queen. Winners bitches—1 N Baby, res N Queen.

BOSTON TERRIERS—Limit open and winners bitches—1 Mrs W C Ufford's Pattie II.

IRISH TERRIERS—Gpen and winners dogs—1 Wm Ollard's Bolton Wood's Despot.

FOX TERRIERS (smooth coats)—Puppy dogs—3 E C Davies' Cream. Novice dogs—3 W Yates' Bitters. Limit dogs—1 W B Fechheimer's Multnomah Boy. Open and winners, dogs—1 I G Morgau's Puget Speedy, 2 Multnomah Boy. Puppy and Novice bitches—1 I G Morgan's Miss May. Limit bitches—1 W B Fechheimer's Norfolk Mistake Open bitches—1 Norfolk Mistake, 2 W F St Quintin's Cleo. Winners, bitches—1 Norfolk Mistake, res Miss May.

FOX TERRIERS (wire haired)—Puppy and limit dogs—1, 2 J Redelsheimer's Ben Bang, Go Bark Open dogs—1 I G Morgan's Mineral Water. Winners, dogs—1 Ben Bang, res Mineral Water. Puppy and limit bitches—1 J Redelsheimer's Siwash Queen. Open bitches—1 I G Morgan's Morenga. Winners, bitches—1 Morenga, res Siwash Queen.

JAPANESE SPANIELS—Limit and open dogs—1 G Scott's Reggie.

MISCELLANEOUS (Mexican Pug)—1 E Hunt's Humpty.

SPECIAL AWARDS.

Cup for best Pointer, Woolton Bang. Cup for best Pointer hitch, Ch Oregon Jessie II. Cup for best novice Pointer, Spokane Dot.

Cup for best Collie dog, Glen Tana Marquis. Cup for best Collie hitch, Glen Tana Lauralea. Cup for best novice Collie, Glen Tana Radiance.

Cup for best Bull Terrier dog, W Gladiator. Cup for best Bull Terrier hitch, Newmarket Baby.

Cup for best Fox Terrier dog, Puget Speedy. Cup for best Fox Terrier bitch, Norfolk Misfake.

Cup for best English Setter dog, Ch. Stylish Sergeant. Cup for best novice English Setter, Stylish Snowball. Cup for best English Setter bitch, Ch. Pera.

Cup for best Irish Setter, Duke. Cup for best Irish Setter hitch, Babe.

Cup for best Irish Water Spaniel, No 95.

Cup for best Cocker, Mepals Saxon. Cup for best Cocker bitch, Black Cherry Belle. Cup for best novice Coeker, Portland Kid Jr.

Cup for best Bloodhound, Glen Tana Johnnie. Cup for best Chesspeake Bay Dog, Jeff. Cup for best St. Bernard, Colonel. Cup for best Great Dane, Pearl. Cup for best Irish Terrier, Bolton Wood's Despot.

Cup for best dog in the show, Ch. Oregon Jessie II.

Cup for best puppy in the sbow, Glen Tana Queen.

Cup for best four dogs shown by one exhibitor—Glen Tana Collie Kennels.

J. Redelsheimer special—a silver plate for kennel winning most points—Glen Tana Collie Kennels.

PORTLAND SHOW.

A press dispatch from Portland this week states that at a conference between members of the Portland Kennel Club and President Goode of the Lewis and Clark Exposition it has been decided to give the greatest dog show ever held in the West during the opening month of the Lewis and Clark Exposition.

William Goldman and E. F. Willis, directors of the club, submitted an estimate stating that 1500 dogs at least can be placed on show, and that entries from one leading Eastern kennel is already assured—the one owned by J. Pierpont Morgan.

THE OPENING OF THE FALL SEASON.

Duck hunting no doubt has been, to a great extent, put on the ragged edge for local sportsmen by the rains yesterday and a week ago. Reports during the week are that the birds had nearly all gone from many sections where they were very plentiful two weeks ago.

Quail shooting, on the contrary, if to-day and to-morrow are both fair weather should be a bit favorable to good sport.

At all events it is far easier to mention the names of sportsmen who have not gone to upland and marsh than to give a list of the army abroad with gun and dog to-day and to-morrow.

A Triple Alliance.

One of the best gun oils and all round lubricants for sportsmen is "3 in 1." It oils the mechanism of a gun, polishes the stock and forend and positively prevents rust on the metal, in any climate and in any kind of weather. Try it and you will never be without it.

A Gun to Have.

A gun made up to date in price and material and a gun that is equally as good for duck and quail shooting as it is known to be for trap shooting is the "Ithacs."

Merit wins, is not an empty phrase, the number of Ithaca guns sold this season proves that.

124 Out of 125.

At Nashville, Cumberland Park Traps, Captain Andrew Meaders, shooting the Parker gun, broke 99 out of 100—a remarkable performance

The event was the shoot for the Peters Cup. Mr. Meaders continued shooting after the event was finished to warm up his "Old Reliable," breaking 25 more straight, making a total of 124 out of 125.

Southern Shooters Use It.

The 17th Semi-Annual Tournament of the Los Angeles Gun Club, was held near Sherman, Oct. 8 and 9, 1904. The weather was delightful enabling the contestants to make good scores. There were 51 entries, of which number 42 shooters used U. M. C. ammunition, this being a continuation of the oft-repeated story and again emphasizing the perfection and popularity of the U. M. C. ammunition. Too much credit cannot be given to Mr. S. R Smith and Mr. Chas. Van Valkenhury, president and secretary of the Los Angeles Gun Club, for their unremitting efforts to further the comfort and pleasure of the shooters. Mr. E. E. Drake, Pacific Coast Manager of the Remington Arms and U. M. C. Companies, was among the visitors at the meet. Mr. Hip Justins, representing the U. M. C. Co. and Remington Arms Co. ably assisted the president and secretary in their endeavors to make this a most successful and memorable shoot. Los Angeles is to be congratulated on so fine a showing of hospitality and good-fellowship.

Jackson's Napa Soda does not tangle the feet.

THE FARM.

Great Sale of Jerseys.

No event has aroused more interest among breeders and owners of Jersey cattle than the sale of the entire herd from the Yerba Buena Farm of the late Henry Pierce which will be held at Fred H. Chase & Co.'s salesyard 1732 Market street, this city on Tuesday evening, October 25th.

On this page are pictures of two of the many fine animals to be offered—over eighty head being in the consignment. The bull Kathleen's Roy is a solid light fawn in color and prononnced by such a good judge as Prof. Anderson of the University of California as near perfection as any he has yet seen. He was sired by Kathleen's Son, No. 17,660 A. J. C. C., who, with two of his daughters won the first prize at the New England Fair, held at Rigby Park, Maine, in 1898. This was

Kathleen's Roy of Yerba Buena 52030
Bull—Dropped Dec. 13, 1896.

the third year in succession that the blood of this bull took most of the prizes at these fairs, where six States compete. He was bred at the late Henry Pierce's Saddleback Farm, Maine. Kathleen's Roy took sweepstakes in 1899, and again in 1902, at California State Fair. As will be seen by his photo, he is of the very best type, and, as his get, many of which are in this sale, will show, be transmits his fine qualities to his offspring. He is very strong in the Scituate and St. Lambert blood, either of which, it is claimed, have done more than any two other strains known, to produce the high-class Jersey of today.

The cow Irene Exile of California is a four-year-old and with calf. She is a solid red fawn, sired by California Exile 40,202, and her dam is Irene Draper 169,257. There are few as handsome young cows as this one and she is as valuable as she is good looking. California Exile, was by Exile of St. Lambert, from Queen Dick by Jersey Monarch, second dam Girlie's Glory Maid. This pedigree is very strong in producing lines, many of the champions of the Jersey breed appearing in the first five crosses.

Juliana De Kol Goes to St. Louis.

Under the auspices of the California Promotion Committee, Juliana De Kol, whose record as a milk and butter producer has never been equalled by any cow of her age has gone as a delegate to the convention of the National Buttermakers Association in St. Louis on October 24th to 28th inclusive. A special express car was provided for Juliana and the famous cow was accompanied by two attendants. While at St. Louis Juliana will occupy a handsomely decorated stall in the convention hall. Juliana is a California cow and her record is a remarkable one and is undoubtedly largely attributed to California's favorable dairying conditions. Juliana's seven, thirty and hundred day official tests are the largest in the world for a two year old with her first calf. They are as follows:

	Milk	Butter Fat
7 days ..	417 lbs	22 lbs
30 "	1852 "	92 "
100 "	5866 "	283 "

There are but few cows of any age or breed that have equalled this record.

California is coming to the front as a wonderful dairy State. The great acreage in alfalfa and the fact that in most locations cows can graze the year round on green feed makes dairying in California attractive to the Eastern dairyman. The fact of Juliana's trip has been widely advertised by the committee, not only in St. Louis, but in all cities through which the car bearing the celebrated cow passed. Juliana De Kol is one of the celebrated Riverside Herd of Holsteins owned by C. D. and W. F. Pierce, Rough and Ready Island, California.

Horses that cough should never have dry, dusty feed.

Some Seasonable Suggestions.

Replying to your suggestion that I give my method of maintaining proper sanitary conditions in and about our hog-pens, I will say that plenty of good pasture (in summer) fresh water fresh slop, clean grain, dry, clean beds, a supply of dry wood ashes, charcoal and salt, are essentials to keep the hogs hearty and healthy.

Their sleeping quarters, feed pens, floors and troughs are kept clean and sweet only by the use of plenty of "elbow grease," an occasional wash with water and good disinfectants, followed by a liberal sprinkling with air-slaked lime. The more sunlight and fresh air accessible the better. We find this obtained the easiest in the individual wigwam system for brood sows with litters. We also use them for the shoats and young stock after weaning. We make the A wigwam seven to eight feet square on the ground, eight feet rafters that come to a peak at the top; a three-light cellar window in the south and ventilators in north gables. A swinging door in southwest corner (that hangs at top so hogs can open; it drops shut), a door, on hinges in west side for attendants to work through. This west door (with bars to prevent pigs and sow passing out) can be left open to admit additional sunlight and air, and in early spring days the little pigs can bask in the sun beneath the east roof in the afternoon.

Each wigwam sets in the northwest corner of an enclosure for an exercise and litter yard. This places the wigwam so the yard lays south and east of it and the next wigwam south forms a shade if desired, although we have a row of shade trees along the east side of the plat where the wigwams and yards are situated. One of the advantages of one wigwam is that it can be easily loaded onto a rack bed on a low wagon or truck, and moved to the pastures or other convenient places. We prefer ground floor for the hogs to sleep on when it can be kept dry and smooth. By placing the wigwam on high ground, filling up inside with dry dirt, an inch or two above bottom of side walls, spreading over this a web of close woven (inch mesh) poultry netting stretched taut and securely fastened at edges, which is covered with an inch of sawdust or sand we have a soft, smooth mattress that will not be rooted up and which is above the dampness caused by the drip from side walls. The ground seems warmer in winter and cooler in summer than a hard floor raised above the ground. Then again, if the sow happens to step on a pig on the sawdust or sand, she will not be so apt to cut a hole or take off a toe, as I have seen done on board or cement floors.—S. O. Mason, Redwood Falls, Minn., in the *Western Swine Breeder*.

The Missouri State Fair.

In spite of the counter attractions of the big fair at St. Louis, the Missouri State Fair at Sedalia was a big success this year. Secretary Rippey has written an interesting letter about this fair and its methods to the Sacramento *Bee*, from which we take the following extracts:

We have made no effort to provide attractions for the public other than to get the best herds of livestock and the best turf performers for exhibition. We have never had a balloon ascension, no spectacular performances, no railroad head-end collisions, no cowboys or other specials of this character. We prohibit any kind of gambling device in the way of cane or knife racks, wheels of fortune, etc. No pools are sold on the grounds, and no private betting books are operated. No intoxicants of any kind are sold (notwithstanding, I will say, this is quite a hardship on some of the members of the Board and some of its officers). No immoral shows, fakes or freaks are permitted to operate on the grounds. The Board makes a special effort to protect the public from extortion or from fakes of any character. Those who conduct stands or purchase diningroom privileges or feed privileges are required to charge a certain fixed price that is reasonable, on pain of having their license revoked.

We are of the opinion that special attractions, while they might bring patrons for the time, are inclined to detract from the high character of an agricultural exhibition. We believe the people will come to the Fair and continue to come, year after year, if they can see the best herds of horses, mules, jacks, cattle, sheep and hogs, and a splendid poultry exhibit, and the Industrial Halls filled with worthy displays, and also if they can see unsurpassed turf performances, while spectacular performances would not bring the best and most progressive class of citizens, and in course of a few years would tire even those who now come to see the Fair.

So far our attendance has been satisfactory. This season was World's Fair year and Missourians were not expected to attend the State Fair in large numbers. But the attendance would have been in excess of our expectation had it not rained on Thursday and Friday, the two big days. It commenced raining on Thursday morning about 7 o'clock and rained without intermission till night; notwithstanding this we had 9000 paid admissions, every one of whom came and went home through the rain.

In selecting a horse for hard driving or for use under the saddle it should be borne in mind that the greater the angle presented by the position of the scapula or shoulder blade, giving obliquity to the shoulders, the less is the concussion put upon the shoulder under violent exertion, because the less upright the shoulder is and the less the force is applied directly in the line of bone and muscle, the less spring and elasticity there are in that direction. The breast should not be over medium width and the forelegs should be reasonably close together. Between the forelegs and close to the body the space should be filled with muscle so as to form a pointed arch rather than to show a wide space, as in the case of the draft horse. An arm wide at its junction with the shoulder rendered so by full development of muscles on the rear and anterior portions of the arm should always be sought, for the opposite formation is always attended by want of precision, power and activity in the movement of the forelegs. In selecting a horse for any other purpose than draft a very wide breast should be avoided, for in most cases a horse with this formation will paddle when he trots.

—o—

A good sized draft stallion or mare should have a well developed knee and fetlock joint in proportion. It is scarcely of any use trotting out the old adage, "No hoof, no horse," as nearly all the draft horses now have fairly good feet. Hocks, we think, should always be proportionate to stifles and quarters. They are not always so, however, a great, thin, ill-spread, leggy sort having at times hocks which throw it out of all bearing so far as the contour of a picture is concerned.—*English Live Stock Journal.*

Irene Exile of California
Cow—Dropped Jan. 10, 1900.

Jackson's Napa Soda untangles the feet.

TO TRADE FOR A BROOD MARE.

STANDARD-BRED STALLION 7 YEARS old by Prince Nutwood, dam by Strathway. Stands 16¼ hands high and weighs 1225 pounds. He got a record at Salinas, September 18th, of 2:31, jogged the last eighth. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. Promises to be very fast. W. H. Williams, who worked him on the San Jose track five weeks before the Salinas meeting, says that he looks like a 2:10 or 2:12 trotter. Good individual and will sell him at a reasonable price or trade for a high-class brood mare. Address

HENRY STRUVE, Watsonville, Cal.

Beware of Overfeeding.

It is perfectly safe to assert that thousands of work horses are injured by kindness. The owner thinks that because his team is hard worked it ought to be heavily fed, but he forgets that it is not what a horse eats, but what it digests that counts. This is especially the case in summer, when there is much field work to be done and little time in which to do it.

The horse hurries home, hot and weary, is given all he can "hog," and goes out to the water trough, where he fills up on water and goes on to work again. First of all, his stomach was not in fit condition for food reception. The fatigued, hot, sweaty horse cannot digest food. He needs a rest first and then a drink of water, which passes through his stomach and stays in the large intestines. If he first eats grain and then drinks water, the food is largely washed out by the water and passes to the small and large intestines in which such food is not digested, but decomposes, gives up gas and thus sets up more or less disturbance and distress.

Under these circumstances a horse is not properly fed just because he has been furnished with six quarts of oats and all the hay he can gobble in the short interim of the noon hour.

He has been fed, to be sure, but he has derived little benefit from his food. All the benefit derived comes from the portion of the food digested, and that is very small when there is not sufficient time first to masticate properly and then digest normally.

In the busy season the work horse should have small amounts of concencentrated, nutritious food—just such an amount as he can masticate and digest. When corn is fed it adds fuel to the heat of its body and does not supply the strength and vigor he most requires. That comes from oats, and time is needed for their mastication.

Hay is unnecessary and actually injurious when fed at noon. It is not digested while the horse is at work. It does not remain in the stomach, but, like water, passes through into the large intestines, where it lies inert, or decomposing, until a period of rest promotes the normal process of digestion.

On general principles it will pay to cut in halves the ration now being fed to work horses, provided they are given little time to masticate and digest their food. This will be found remedial where horses are evidently doing poorly, sweating too much, panting when at work, or having a tendency to diarrhœa. They will do better on less food for the reason that they digest a greater proportion of its nutrients.

Hay in summer time should only be fed very early in the morning and again at night, at which time the horse may have all he wants. Allow the drinking water before meals.

Matured Cows Are Best.

In one of the reports of the Kansas State Board of Agriculture it is pointed out that a more profitable return is secured from a cow at eight years old than at an earlier age: in other words, she is in her prime, and she will continue in this condition several years, and will not be considered an old cow until fourteen or fifteen years have passed. Cows with first calves—at two or three years—are generally unprofitable in their milk yield, and one really good cow between seven and eight years old will pay a better revenue than two that are performing their first years' duties in the dairy herd, and she will probably consume but a little more food than one of the younger ones This fact is worthy of consideration by those who are dairying for profit. A prudent dairyman who manages well knows which are his best cows; these he won't sell, under ordinary circumstances, as long as he continues in the business. It is therefore wise in buying a cow to investigate well the reasons for selling. It is highly essential that a dairy cow, to be profitable, should be a hearty eater, for just in proportion to her ability to consume and assimilate food will she make returns to her owner for his care and attention. This valuable feature can generally be determined very early in the animal's life. A calf with a dainty appetite is sure to retain this undesirable quality after she becomes a cow, while one with a rugged constitution and greedy, always wanting more, becomes the cow with power to consume food largely, and, if bred and constructed for dairy work, is the kind that will pay largest returns.

Best Type of Hog for Profit.

The type of hog for profit, for both breeder and feeder, from my experience from both standpoints, is the large type, and what I mean by large type is a hog with plenty of length, breath and depth. They grow faster from pighood and until they are ready for market, make more gain for the amount of grain consumed than the short, thick ones. They can be fed longer if desired and are better grazers than the early developed kind.

It is not necessary to have a rough hog to get a large one, not by any means. I have fed both kinds, or types, and made them both pay a neat profit, but the big framed fellows paid the best.

A word to those who are thinking of going in the hog business, but hesitate on account of high priced feed. After a hog gets to weigh 150 pounds and in good condition you can make every bushel of corn make from twelve to fourteen pounds of gain. At thirteen pounds gain you have 7½ cents for your corn when hogs sell at 5½ cents per pound, present prices, and as you can make the first 150 pounds cheaper than the last, you can easily figure out a nice profit at the present price of corn and hogs, but you will have to graze them on green pasture, such as green wheat, oats and sorgbum; alfalfa is best of all where it can be raised successfully.

But back to the type from a breeder's point of view. Some breeders say they like the large type best and would breed them, but they don't sell as well, and when they go in the show ring the early developed pig gets the money, regardless of his lack of size in proportion to age. That all depends on the type the judge likes best. From my short experience in the show ring, the pigs with plenty of size and anything like the same qualities as the short ones, get the first place, and when it comes to older ones, you can beat them every time, provided you have a smooth hog with it, which is essential in a feeder as well as a breeder. And when it comes to selling, the large ones sell more readily and at better prices, even though they have some defects, than the stumpy fellows. I have both types on hand now and haven't sold one of the fat kind, while the others go right along.

There is good profit to be made in breeding or feeding hogs, especially if you breed the right type, and that is the large type. In order to get the right kind you will have to breed from as near the type as you can get and don't feed too much corn or fat forming food to growing stock, especially broodsows and growing pigs, for it is growth you want while young to make a frame so you can finish for market at a profit.

ED. EDMONDSON, Newark, Texas.

Improving the Dairy Herd.

The ability to utilize food and convert it profitably into milk and butter is a quality of cows that varies with individuals. Among both ordinary dairy cows and cows of pure breeds the variation in this respect is quite remarkable, as illustrated to a marked degree in the study of the herd owned by the Connecticut Agricultural College, that was made during the year 1898. According to this study, described by C. L. Beach of Storrs, Conn., the cow with the best record produced during the year 509 pounds of butter at a profit of $42.82; while during the same time the cow with the poorest record produced 172 pounds of butter at a loss of $4.09. The variations in the amount of butter and milk produced by individual cows in this herd are not exceptional. The records of station herds, where individual records have been kept, show variations fully as great as these.

It is plainly evident that success in dairying depends very much upon the productive capacity of the individual cows that make up the herd. A very practicable way to improve the herd and increase the average productive capacity is to dispense with all cows which the scales and the Babcock test together prove to be unprofitable. It would be pretty safe to assert that twenty cows selected in this way for their high and economical productive capacity, would be more profitable than twenty five, and possibly even thirty cows, selected in the ordinary random method of making up a herd.

The time will come when the flocks of the western ranges will not be expected to subsist as do the birds of the air. Alfalfa stacks and roomy barns or sheds will be seen thickly studded over the plains and indeed such methods are already in existence and those adopting them are reaping a bountiful and well deserved financial harvest. Such course of procedure means an outlay of capital, but it is one from which big dividends are bound to accrue. Thousands of range sheep are lost each winter for want of proper nourishment and shelter and the remaining ones are decidedly the worse for their experience.

Horses intended for heavy work and active use should not be overfat.

It is not the "meat" but the muscle that does the hard work.

TEAM FOR SALE.

A PAIR OF VERY HANDSOME AND STYlish black Marea by Prince Direct; trotters, and broke to drive single or double; not afraid of cars or automobiles and can be driven by a lady. Absolutely sound and without blemish. Will be four years old in the spring. For sale at a bargain if applied for soon. Apply to
J. H. REVEKES, San Leandro.

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy......$7
BOUND IN CLOTH, per Copy.......... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse, as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

CAPT. THOS. B. MERRY,

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, $1.00.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

CAN YOU ENJOY A SQUARE MEAL?

Do you sit down at the table with a fine appetite intending to enjoy your meal immensely and after a few mouthfuls give up in despair? That's a typical "well along" case of indigestion or dyspepsia. Hundreds, yes, thousands are in the same boat and are willing to do almost anything to be as they used to—healthy, well and strong with a good sound stomach.

You cannot force your stomach to do work that it is unwilling to do. It has been tried time and time again, with the same results always. The stomach is a faithful organ, but when pushed beyond, and exerted to the utmost, it rebels. Some stomachs are stronger than others, but all have their limit and when the limit is reached it is unwise to attempt to force it into doing further work.

The best and uickest cure offered to that big army of sufferers is

DR. SPENCER'S ENGLISH DYSPEPSIA WAFERS.

If you haven't heard of this cure before, you have been needlessly suffering, for this medicine *will* cure you—cure you as sure as there's a sun above. Would you spend 50 cents if you thought there was some hopes. We know you would, and therefore tell you sincerely that D. S. E. W. *will* cure you.

The curing powers of these wafers are very simple to understand. They are natural in their workings and effects, taking up the work of the worn and wasted stomachs, digesting the food thoroughly and completely.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

---

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

MANHATTAN STOCK FOOD

Awarded Gold Medal At California State Fair 1892.

Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition.

Manhattan Food Co 1253 Folsom St., San Francisco

GREEN'S RUFUS..................The Baywood Stud, San Mateo

SAN JOSE IS THE PLACE chosen by the Pacific Coast Trotting Horse Breeders Association for its meeting to be held this year in August, and it will follow the Pleasanton meeting which will open the circuit. When the executive committee of the Breeders' Association met last Tuesday two propositions were submitted to it. Santa Rosa asked for the meeting and offered a honns of $1250 already subscribed. The Santa Rosa Stock Farm offered the free use of its track, but retained the bar and restaurant privileges. San Jose's offer was an already subscribed bonus of $1300 with the use of the track absolutely free, the Breeders to be allowed all the privileges. San Jose's offer being the best, the committee unanimously decided that it be accepted. Secretary Kelley was instructed, however, to correspond with the Ssnta Rosa people and make the following offer: If the subscription of $1250 is renewed the Breeders Association will agree to give a second meeting at Santa Rosa with the exception of the futurity colt stakes, and in their places good purses would be given for three-year-olds and two-year-olds. It is to be hoped that the Santa Rosa people will agree to this, as an extra meeting by the Breeders Association will help the situation immensely and the California circuit will begin to assume respectable proportions. The harness racing season would then start in at Pleasanton, move thence to Ssn Jose, then to Vallejo, then to Santa Rosa, and from there to Woodland, provided that place gives a meeting which it probably will. The State Fair would follow, and from there the horses would go to Fresno, Hanford, Tulare, and Los Angeles, with meetings also at Hollister and Salinas. The horsemen are much pleased with the selection of San Jose for the Breeders meeting, as it is but a short trip of thirty miles from Pleasanton where the circuit will open. The San Jose track is in superb shape at the present time, and it is one of the fastest tracks in California beyond a doubt. Santa Rosa also has a magnificent track and with the Breeders giving meetings at both places the horsemen will have a better opportunity to earn money with their trotters and pacers than for several years past, as the Breeders give the largest purses given in this State. As soon as an answer is received to the Santa Rosa proposition, dates will be announced for all the meetings. There is about $40,000 in purses and stakes in sight now for the California circuit of 1904.

THE SALE of the Napa race track property, comprising eighty acres of land with the buildings thereon, was completed last week, and Mr. John Cross of the Naps, Vallejo and Benicia electric railway is the new owner. The Napa *Register* states that Mr. Cross expects to cut the property into lots to be placed on the market for sale. We would suggest that the citizens of Napa get to work at once, assisted by the Napa Agricultural Society, and arrange with Mr. Cross for a harness race meeting to be given on the old grounds before they are devoted to other uses. The Napa track was built in 1888 and the first meeting was given by the Napa Agricultural Society in October of that year. Direct 2:05½ was a trotter and a three-year-old that season and won a race there, the best heat of which was in 2:23. The trotter Arab and the pacing mare Gold Leaf came together for a thousand dollar purse and the trotter beat the little three-year-old. Woodnut beat Lilly Stanley for a $1000 purse and as the mare was a native daughter there was gloom in the grand stand when Woodnut won. The next year there was a big meeting at this track. Among the winners were such now famous horses as Del Mar, the sire of Major Delmar 1:59¾; Redwood, a half brother to Lou Dillon 1:58½; Palo Alto 2:08¾; Direct 2:05½; Lorita, the dam of Alta Vela 2:11¼; Alto Rex, the sire of Rex Alto 2:07¾; Lilly Stanley, dam since of three in the list; and Creole 2:15, sire of Javelin 2:08¼. That year Gold Leaf paced to the world's four-year-old record of 2:11¼ at Napa. In 1889 two meetings were held—the Agricultural Society giving a meeting in August and the Pacific Coast Trotting Horse Breeders Association one in October. At the latter meeting Freedom was driven a mile against time by John Goldsmith and made the circle in 2:29¾, thus being the first yearling trotter to beat 2:30. During the hard times of 1893 and 1894, many of the trotting horse breeders of Napa county went out of business, and the cutting off of the State aid to district fairs was a severe blow to the Napa association as it was to many others. There have been occasional meetings in recent years, and the Napa people have always patronized them liberally. There is not a doubt but a meeting could be given there this season that would be a big success. We suggest to the Napa people that they give one more meeting before the splendid track that has felt the hoof beats of so many now famous horses is a thing of the past. It would draw all the best horses in training in California and fill the town with people during the week, putting many dollars into the pockets of the business men.

A NEW SPEED TRACK and athletic grounds for Golden Gate Park is a certainty. Treasurer Frank G. O'Kane of the Amateur Athletic and Driving Association has already banked $7000 in cash and the committees have been at work but a little over a week, and have not seen one-tenth of the people they expect to subscribe. The needed $25,000 will be had within thirty days and the Park Commissioners will begin work on the new pleasure grounds as soon as that amount is put to their credit, and will spend that much more on the improvement. This new feature which really originated in the minds of a few members of the Golden Gate Park Driving Association has been taken up by all the amateur organizations and is meeting with favor everywhere. The location for the sixty-feet wide half mile ovsl track is ideal, being convenient to car lines and the drives. There are to be provisions made for all sorts of out door games and sports. A bicycle track, polo field, base and foot ball grounds, cinder path and quarters for many other field sports will be made, and sll will be laid out not only with the idea of providing accommodations for those taking part in these sports, but the public is to be looked after and it will be arranged so that thousands of people can witness the contests with ease and comfort. It will be one of the most popular features of Golden Gate Park. The excellent start made by the soliciting committees shows that the project is in the proper hands and we hope they will be welcomed and favored with generous subscriptions wherever they go.

A HUMBOLDT SOUVENIR is the title of a 200-page magazine recently issued by the Humboldt *Times* of Eureka. It is not only a msgnificently illustrated production but it contains a fund of valuable information in regard to the county that is highly interesting. Humboldt is a little empire in itself and one of the most productive of California counties.

THE AUSTRALIAN DEMAND for American bred trotting horses is increasing. The Secretary of the San Francisco Board of Trade recently received a letter from John P. Bray, United States Consul General at Melbourne, asking that he be sent the names of breeders of standard bred trotters in California. He states that Australian horsemen desire to purchase each year in California a number of standard bred fillies in sufficient quantity to make their shipment to Australia profitable. They desire to purchase fillies about nine months old, right after they are weaned. A long list of the names of California breeders has been sent to Consul General Bray, but we advise any breeders here having weanlings for sale this fall to correspond with him.

Answers to Correspondents.

H. F. LYNN, Woolsey. Virginia—Will you please publish in your valuable paper the extended pedigree and performances of chestnut mare Quilla, foaled 1892, sire Spendthrift, dam Excellenza by Excel.

Answer—We do not find that Quilla has ever started. The dam of Excellenza is Sadie Somers by Alroy, second dam Nannie Harper by imp. Glencoe, third dam Fanny Hill by imp. Monarch, fourth dam Allegrante by imp. Young Truffle, fifth dam imp. Phantomia by Phantom, and on to the seventeenth dam Old Vintner mare.

E. J. MYERS, Nampa, Idaho—Please be so kind as to let me know through your next issue, if you can, the breeding of Jennie C., owned by Doc Wintermute, Stony Oak Farm, Tacoma, Wash ; also of the brown mare Jeannette, brand J 10, sired by Chesterton, he by Chesterwood, he by Nutwood.

Answer—We have no record of either mare. There are at least a dozen mares registered under the name Jennie C., but the books do not state that any are owned in Washington. Jeannette is not registered unless it be in Vol. 16, which has not yet been issued.

J. J. BOUZA, Avon, South Dakota—I have a thoroughbred colt by Pug III. by Hanover, dam Phillipene by Jos. Phillips. Is there any way to make him pace while young. He was foaled March 28, 1904.

Answer—If you want to make a pacer out of him, turn him over to some good trainer, with instructions to teach him to pace, if possible. He may learn to go at that gait, but it will probably take considerable time and patience. Would like to hear from you as to results

F. W. SHANK, M D., Susanville, Cal.—Will you please state the breeding and performances of Dick Russell (pacer) in next issue of your valuable paper.

Answer—Dick Russell is a chestnut horse, sired by Diablo 2:09¼. In a race at Woodland September 4, 1904, he won after five heats had been trotted, beating Dixie Maid, Lady and Belle Rose. He was fourth in the first heat, second in the following heat and won the next three. The time of the heats was 2:24, 2:18, 2:26, 2:22½ and 2:23¾. The Year Book does not give the breeding of his dam.

W. J. EAST, Fortuna, Cal.—Please give breeding and record of bay stallion Billionaire through your columns.

Answer—Billionaire, registered number 31,818, bay horse foaled 1894, by Millionaire 7292, son of Happy Medium 400. The dam of Billionaire is Hybla by Hermes 548, second dam Nelly Litchfield by Greyhound 154, third dam said to be by Hambletonian 2, fourth dam by Morgan Tiger. His record is 2:33.

Harness Racing at Seattle.

The King County Fair Association of Seattle, Wash., has announced two early closing stakes for their meeting, Sept. 19 to 24, full particulars of which will be found in their ad on another page of this issue. The association has announced that all the races, in addition to the stakes advertised, will be on the dash system at various distances from one to two miles. There will be two or more harness races each day in addition to the stakes. It is the aim and desire of the association to make harness racing as popular in Seattle as the thoroughbreds now are, and it is thought that dash racing will accomplish the desired result.

The stakes announced are the Northwestern Derby, value $1,500, a two-mile dash for 2:15 trotters, and the Puget Sound Stakes, value $1,500, a dash of one and one-half miles for 2.11 pacers. Both stakes have $300 consolations, free entrance, and will be dashes of one and one-eighth miles for the trotters and one mile for the pacers.

Like the stakes announced by other associations on the North Paaific Circuit the Seattle stakes will close May 20, when horses must be named. For entry blanks and other information write to A. T. Van de Vanter, P. O. Box 282, Seattle, Wash.

Jackson's Napa Soda does not tangle the feet.

JOTTINGS.

"OPPORTUNITIES CONSIDERED, what stallion ln America has accomplisbed as much as Sidney Dillon?" was the question put to the writer one day last week by George Ramage, the well-known trainer formerly connected with the Santa Rosa Stock Farm, but now in the business on his own hook at Pleasanton. Mr. Ramage knows all the Sidney Dillons and probably knows them better than any other person does. He broke and handled Lou Dillon and had her showing two-minute speed before she was turned over to Millard Sanders, and when she was two years old told me she was "the only trotter on earth." He "discovered" the champion mare and is entitled to the credit. For years he was in the employ of the Santa Rosa Stock Farm and knows as much aa any one about Sidney Dlllon and his get. So when he put the above question to me I gave him the Yankee rejoinder by asking him what opportunities the son of Sidney and Lou Milton had enjoyed, and this was the reply:

"Up to the first of January, 1904, Sidney Dillon was the sire of but fifteen living foals that were older than three years old, and of these just eight had been trained, and by training I mean given track work. The eight that had received any training were the following:

"Lou Dillon 1:58½.

"Dolly Dillon, 2:06¾.

"B S. Dillon, 2:16¼; trial 2:09¼.

"Captivity, 2:26¼; trial in 2:14½ the day she was sold for $1,500.

"Andros, worked a mile in 2:17½.

"Stanley Dillon, now in Ed Geers' string and credited with a work-out in 2:09½.

"Pansy Dillon, worked a mile in 2:24½.

"Lucky Dillon, worked a mile in 2:24.

"Here are seven trotters and one pacer that have beaten 2:25, one is the champion of all trotters, four have shown miles better than 2:10, and six of the eight have beaten 2:20 There are nine or ten head of Sidney Dillon's get that are four-year-olds this season and as they are scattered about I do not know just what they are doing, but I do know that Joe Cuioello is handling one that trotted a mile in 2:25, last half in 1:07 several weeks ago; Miss Sidney Dillon has trotted a mile out in 2:28½, and my four-year-old Bert Arandale has been a mile in 2:29½, last half in 1:07½, last quarter in 33¼ seconds, and last eighth in 15½ aeconds. These are the facts and when you can scare up another stallion that can make such a showing with that number of foals, write to me at Pleasanton, and I will take back my assertion that Sidney Dillon, opportunities considered, outclasses all other sires of speed."

It was in 1898 that Dolly Dillon, then called Dolly D, won the Occident stake for three-years-olds at the State Fair at Sacramento, but as the time was not remarkably fast—2:25½, 2:26, and 2:21 for the three heats—but little attention was drawn to her sire. The next year Dolly reduced her mark to 2:19½ in a winning race at the same place, but thia was nothing remarkable and Sidney Dillon did not get into the public eye very much as Dolly was his only performer. In 1900 this mare raced through the California circuit and started nine times. She won six of these starts, was beaten twice by Hazel Kinney, and in the other race Phoebe Childers and Dione finished in front of her. She closed the season with a mark of 2:11¼, and her sire began to have a little more attention paid him, especially as his only other starter Captivity, took a record that year of 2:28½. In 1901 Dolly Dillon made her memorable campaign through tho Grand circuit and was considered ono of the greatest trotting mares ever seen ln the east. Sidney Dillon began to be talked about and tho Santa Rosa Stock Farm began to givo him good mares. When Lou Dillon began to show such marvellous speed all the choice mares on tho farm were bred to Sidney Dillon and from now on ho will have tho opportunities that his merits entitle him to.

Horse Show at Burlingame.

The annual open air horse show under the auspi es of tho Burlingame Country Club will bo held April 23d (one week from to-day) at the Crossways Farm of Mr. F. J. Carolan, Burlingame. Tho horses will bo shown and judged between tho hours of 10 a. m. and 5 p. m., prizos of cups and ribbons being awarded to the winr ors. The committee in charge ls composed of F. J. Carolan, chairman; Francis T. Underhill, and E. D. Beylard. The judgos will be Lawrence McCr ry, and J. C. Kirkpatrick. Entries are open o all nd will close April 18th. Tho rules of the Horse Show Association of the Pacific Coast will govern. An admission fee of oue dollar is to be charged and the proceeds will be devoted to the Armitage orphanage, a very worthy charity. The classes will be as follows:

Roadsters—Horses entered in these classes must be practically sound and able to go a good pace. Class 1, single roadster; class 2, pair of roadsters.

Harness horses (open to all)—Horses entered in these classes must show conformation, quality, style, action, and suitable pace. Performance at a walk, park, and road gaits to be considered. They must have good manners and be able to back well—practical soundoess only to count. Class 3, mare or gelding over 14.3 and not exceeding 15 2; class 4, pairs mares or geldings over 14 3 and not exceeding 15.2; class 5, more or gelding exceeding 15.2; class 6, pairs mares or geldings exceeding 15.2; class 7, best mare or gelding over 14 hands suitable for a lady to drive—must be driven by a lady; class 8, best pair mares or geldings over 14 hands, suitable for a lady to drive—must be driven by a lady; class 9, best tandem mares or geldings 14.3 and over; class 10, best four-in-hand, 14.3 and over, to be shown to a coach or brake; class 11, best pony over 13.2 and not exceeding 14 3; class 12, best pair of ponies over 13.2 and not exceeding 14.3.

Saddle horses—Saddle horses to be judged on their quality, conformation, and manners. To be shown at a walk, trot, and canter. Must be ridden by a lady or gentleman. Class 13, mare or gelding uoder 14 3; class 14, mare or gelding over 14.3; class 15, best mare or gelding suitable for a lady, and to be ridden by a lady; (a) under 14.3, (b) over 14.3; class 16, best heavyweight polo pony; class 17, best lightweight polo pony; class 18, best qualified hunter, to be shown over jumps not exceeding five feet.

Sacramento Driving Club.

Several hundred people assembled at Agricultural Park last Sunday afternoon to witness the third matinee of the Sacramento Driving Club and enjoyed some excellent races. The timers and judges were W. O. Bowers, Dr. Weldon, and Mr. Delano, and they gave perfect satisfaction to all.

In the first class, 2:40 class, the starters were John Riley's Aleta R., John Morrison's Canny Scott, and I. H. McMullen's El Rose. El Rose took the first two heats, with Canny Scott second in each, after a good race. Time, 2:45¾ and 2:46.

The second race, 2:35 class, was between F. J. Rubstaller's Haos, Dr. A. M. McCollum's Jennie H, and Thomas Clark's Star Bitters. Star Bitters took both heats easily, with Jennie H. second. Time, 2:34½ and 2:32.

The 2:25 class came next, in the third race, the entries being Charles Silva's Queen S., F. E. Wright's Royal Dame, and William Harris' Molly Nourse. Royal Dame won without trouble both the heats, with Queen S. secood. Molly Nourse showed some fast bursts of speed, but could not be depended upon. Time, 2:35 and 2:34½.

The fourth race, the 2:30 class, was between J. H. McMullen's Rosa Gold, W. O. Bowers' Glide, and John Norton's Light Bird. Rosa Gold took the first heat, with Light Bird second. The latter acted badly in scoring for the second heat, but they got a good start, and at the half Light Bird, trotting very fast, went up and collared Rosa Gold, passing her near the upper turn and coming in an easy winner, with Glide second. Time, 2:34 and 2:34½.

Light Bird won the third heat, with Rosa Gold second. Time, 2:30.—Sacramento Union.

Zombro Filly Sells for $3000.

William Coleman, of Los Angeles, sold his three-year-old filly Geraldine on Thursday of last week to Mr. Lee Mayberry of that city for $3000. Geraldine is by Zombro 2:11, dam Gypsy Girl by Nucleus, son of Alcazar 2:20½, second dam Rene, sister to Our Lucky 2:13¾, by Rajah 10154, third dam Dora 2:29 by Gibraltar 1185, fourth dam Nelly by Black Warrior 73. Geraldine was bred by Mr. M. M. Potter and at his dispersal sale in December, 1901, was sold to Mr. Desmond of Los Angeles, who in turn sold her to Mr. Coleman. Sho is entered in all the priocipal California stakes and was put in training February 1st this year. Sho showed a quarter in 32¼ seconds last week to cart and is considered a great prospect—one of the greatest ever seen on tho Los Angeles track. Although the filly ia well entered in stakes in California, her new ownor will probably not start her this year, but hold her over to start next year in some of the big stakos on tho Grand Circuit.

Gypsy Girl, her dam, has been owned by Walter Maben for some time, aud he sold her to Mr. Coleman for $600 tho same day Mr. C. sold Geraldine. She is duo to foal to Zombro and will probably be bred back.

In and Around Los Angeles.

Light harness horse affairs are just booming at the Los Angeles track. Vet Kent is preparing a big string of fast ones. The fastest is his lot by record is Midnight, 2:11¼. All of Kent's horses are moving nicely and looking well.

Walter Maben is as busy as a bird dog io Dakota in prairie chicken time. He has about 35 head and many of them are high class.

Will Durfee is preparing for the Colorado circuit. His string of horses is about as good looking a lot as was ever seen here. The bay colt by Peter the Great is a pacer and recently stepped a half in 1:06 going easy. Jupiter B. by Gen. Beverley, dam sister to Miss Jessie, is a cute little trotter with a world of speed and good manners. Sweet Marie is big, stout, and sound; she is being prepared for business. Rita H. is trotting and bids fair to be as fast at that gait as she was at pacing. Petigru is being prepared for an essay against his record of 2:10½. He is the sire of a lot of fine looking colts. Durfee is training three horses for Mrs. Dr. Hastings, all the get of Sky Pointer. They are good lookers, all bays, and good actors. Willie is sweet on them.

J. H. Williams has Harrison Arms' horses, and the Limoneros are certainly showing up in great shape. Mr. Arms has just bought a car load of fioe lookers here for the Chicago market. In the lot is the stallion Chantward, by Onward. These horses will start for Chicago in a few days. Mr. Arms is a good buyer. The writer offered a big figure for the white trotter Rozell, 2:17¼, by Bob Mason, but could not get him. The offer was made for Mr. Arms.

I. C. Mosier is training Red Skin, Ama A., and a pacing stallion by Nutwood Wilkes, for Mr. S. S. Bailey, of Seattle. These horses are all in a fine fix and will be raced this season by Mr. Mosier.

Murray M., the colt by Hambletonian Wilkes, dam Anna Belle by Dawn is a candidate for the Occident Stake. He is going easy miles in 2:30 and is a very good looking and good headed trotter. R. Garnsey is training him at Santa Ana.

Dave Raybould worked Burnut by Neernut a mile in 2:15½ and a quarter in 30 seconds over the Santa Ana track last Thursday, the 7th. This gelding is entered in the M. & M. at Detroit, and is to be sold at Cleveland in May with Geo. W. Ford's consignment

Geo. Beckers starts for Cleveland soon with Zombro 2:11. Zombro is making a big season.

Limonero served 35 mares here last season and has about that many booked for this season.

Mr. Miller, of Denver, has purchased The Jester, brown stallion by Stam B. 2:11¼ and will race him on the Colorado circuit. Mr. Miller sold a very handsome chestnut mare by Allerton to Mr. Arms. This is a show mare and goes to Chicago in the Arms lot. Mr. Miller has the pacing mare Martha B. 2:09¼ and she goes to the Chicago circuit.

Robert Smith is training Idlewild by McKinney for the Colorado circuit aud she is trotting like a veteran. She should get a mark of 2:10 this season.

Yours, C. A. Harrison.

Los Angeles, April 8, 1904.

Professional Drivers Organize.

At the last meeting of the Professional Drivers' Beneficial Association of America a series of by-laws were adopted, the principal points being as follows:

Object—The elevation of the profession in general, mutual protection and relief of members, and representation in the deliberations of the American and National Trotting Associations.

Any professional driver, except colored men, may become a member, and any one who drives for a purse or stake shall be classed as a professional.

The anuual dues are $5, and a death benefit fund is established on the basis of a payment of $3, registration fee, from each member, who in addition will be assessed $1 each on the death of a member.

In case of accident while driving in a public race a weekly benefit of $25 shall be paid for the first twelve weeks and $10 per week for the succeeding fourteen weeks.

The association is incorporated under the laws of New Jersey, and its office is in Camden, N. J.

The stallion Geo. St. Clair, until recently owned at Bennington, Vermont, has been purchased by Mr. Barham of Grand Rapids, Mich , and will be taken back to Michigan for stud service. He is tho sire of tho sensational Grand Circuit trotter, McKinley 2:07¼, and many others. Geo. St. Clair is a bay horse foaled in 1888, by Betterton 8022, dam Ill Wind by Young Jim 2009. He has a trotting record of 2:15¼ and a pacing record of 2:10¼.

Jackson's Napa Soda does not tangle the feet.

The Horse's Mouth.

The following very interesting and instructive article was written for the *Breeder's Gazette* by Dr. F. C. Grenside, a prominent veterinarian of New York:

If a horse has a sore mouth he manifests it in some way unpleasant to his driver or rider, but it is rarely that an examination of that organ is made in order to determine the nature and extent of the trouble. Such an examination is not difficult to make by one at all accustomed to the handling of horses and can be made as follows: Take the horse into a place in which the light is good. To examine the near side of the mouth pass the left hand into the off side of the mouth, grasp the tongue gently and pull it a little to one side of the mouth (it is not necessary to pull it out of the mouth) in order to expose the branch of the lower jaw or bar, as it is sometimes called. The thumb of the right hand should be placed in the roof of the mouth so as to separate the jaws, when the part that the mouthpiece of the bit presses on can be easily scrutinized. The other side can be examined in the same manner by using the hands in the opposite way.

The soreness, however, is not always confined to the bars of the lower jaw, the result of the pressure of the bit, for it is not infrequently found that the lining membrane of the cheeks is excoriated by the bit forcibly pressing the cheeks against the anterior grinders. This form of injury is seldom found in a horse that readily bends his head upon his neck or "gets his nose in" as it is often expressed, unless it is from the use of tight pulley-bridoon bearing rein, which is almost certain to cause it, particularly if a horse bores on it. In the majority of instances it is where a jointed or snaffle bit is used when a horse "takes hold," and in the case of one not inclined to "bend" the lining of the cheek is injured. It can be readily understood, where a jointed bit is used on a horse that does not get his nose in, that when force is exerted upon the rein it presses the cheeks directly against the teeth and we can at once realize the great liability to injury of the soft and sensitive cheeks when pressed between two hard bodies, such as an iron bit and unyielding teeth, which frequently have sharp projecting hooks and angles at the very point at which pressure is brought to bear. Horses driven with tight over-checks are particularly subject to this form of injury to the mouth, as can be understood from the explanation already given. In horses that cannot be made to get their noses in, riding or driving, and which show evidence of soreness of the mouth in the lining of the cheeks, the front grinders should be kept as smooth as possible. It is impossible for a horse to have a pleasant responsive mouth when the pressure comes upon the cheeks. Nature evidently intended the yielding lower jaw to bear the pressure of the bit with the soft and elastic tongue to aid in avoiding injury to the sensitive structure which covers the branches of that jaw. Many horses which do not bend their heads upon their necks when used with a snaffle bit can be made to get their noses in with a curb, which is consequently, when rationally used, the more humane and much more effectual in promoting style and action. Occasionally, however, one finds that a horse goes better in a snaffle than in any other kind of bit unless it is a plain, straight and ringed one.

In addition to those already referred to there are many other ill results from sore mouths, and among the more serious of these are the restless and irritable habits horses develop when being ridden or driven out of the stable, as going off with a rush, rearing, plunging and even balking. A great deal depends upon the sensitiveness of the individual as to the manner in which he shows his restiveness and irritability when with a sore mouth again facing the bit. A horse of a cool, mild temperament may do nothing but show a hesitation in going into the bit and if in double harness hang back for a time, or he will not go up with his mate. Others will go sideways, cross their jaws, press on one side of the bit or toss their heads in an irritable manner that makes it almost impossible to guide them. High-strung nervous determined horses may show their irritability in the more dangerous manner of rushing, plunging or rearing. Drivers of horses are sometimes very much astonished to find a previously well-mannered horse go off with a rush, rear or plunge, but it is remarkable how seldom they think of looking to the mouth to find out the cause for the unexpected display of ill manners, when in the majority of instances it is to be found there. Even when the lips are tinged with blood from the injured lining membrane it is seldom that an examination is made to determine the extent of the injury. Frequently when an injury to the mouth is pointed out to an owner it is thought lightly of, the extreme sensitiveness of that organ not being realized.

Pinches, abrasions and cracks about the commissures of the lips usually attract attention because they are easily observed, but they really, as a rule, do not cause nearly the amount of irritation and pain that an internal injury to the mouth does and they are easily prevented by the use of a circular leather cheek piece on the bit. Some horses that show a disinclination to go into the bit for the first mile or two after a time begin to pull and the further they are driven the more they pull. This is usually the result of a sore mouth and I frequently have had to remove small portions of bone detached from the jaw by the extreme pressure of the bit. Bad "sideliners" are caused by a chipped jaw or else an extensive excoriation of the soft tissue on one side of the mouth where the bit exerts its pressure. In the healing up of such injuries the tissue with which Nature repairs the breach seldom seems to attain the ability to stand the pressure of the bit to the same extent that one not so severely injured does. The fact that such permanent ill effects are apt to follow injuries to the mouth from the bit should cause the exercise of due care when there is any evidence of soreness. Certainly high-couraged ambitious horses are predisposed to injuries of the mouth, but they can be largely guarded against by the exercise of care, and it is very important never to disregard "soreness," however slight.

There is probably no animal in which a bad habit is more apt to become confirmed than the horse, and these restless, irritable habits he is liable to develop on leaving the stable are among the most disagreeable. Some horses do not what is called "settle down" when first driven out, but either prance, hop or canter for a varying distance. This is generally accounted for by the owner as being evidence that the animal in question is feeling too well, or in other words is suffering from an exuberance of spirits. This may be the cause, but in the large majority of cases it is attributable to uneasiness in connection with the mouth. Sometimes this discomfort may not be the result of absolute soreness, as a change of bit may cause it. I have noticed it in an otherwise well broken horse where a curb bit is first substituted for a snaffle, particularly if it is placed too low in the mouth and if, as very often happens, the tongue is put over it, in which case a horse is very unlikely to go steadily, and his mouth is almost sure to get sore in a very short time.

I have found the placing of the bit in a horse's mouth a very important matter in influencing his manner of going. Some horseman say there is one proper position for a bit in a horse's mouth and that it should always be placed there. My experience is that this is best determind by experiment with each individual, and one can tell by driving or riding a horse a few minutes as to where the bit should be placed in his mouth. I have found it best to place it rather high at first, particularly when changing to a curb bit, but if he keeps his tongue under it and does not respond readily to pressure lower it as much as he will stand without showing restlessness. The lower the bit in the mouth, within certain limits, the better, providing the horse will keep his tongue under it and not fuss with it and face it with a reasonable degree of firmness.

How frequently we see horses go off their feet when going well within their speed at the trot. Sometimes this is the result of excitability, but in nine cases out of ten it is due to a feeling of discomfort or want of confidence in connection with the mouth. Very often this is caused by the arrangement of the curb in giving too much leverage, especially if the hands of the driver are not good. Some horses that go unsteadily with the rein in the bar will go much better in the half-check or it may be in the plain check, but very often the breaking from the trot is due to an injured mouth. I have known horse owners endeavor to overcome this tendency to breaking by giving long drives, and fatigue will temporarily overcome it as a rule, but I have seen horses almost jaded go unsteadily. This tendency can usually be overcome in a moderately worked horse if the bitting is made comfortable for him and the soreness of the mouth relieved.

Among the exciting causes of "interfering" soreness of the mouth is by no means an uncommon one and I have frequently observed it occurring even in well broken horses when a change of bit, particularly to a severe one, had produced some injury to the mouth. Fatigue, bad shoeing, rough or slippery roads and the swaying of a heavy two wheeler are all exciting causes of "striking," but I am of the opinion that the awkwardness arising from an imperfectly made (not thoroughly bitted) mouth, with the incidental soreness, is an important factor.

Driving green horses in double harness is a very fertile cause of sore mouths. There are undoubtedly advantages in handling green horses in double harness, particularly shy nervous ones, as the broke horse inspires confidence in the green one and he is more easily controlled if badly frightened, but one can make more rapid progress in making a mouth in single harness or in the saddle than in double harness, for the opportunity of humoring it is better and there is only one temper to consider. Trainers of green horses usually change the side horses are driven on every day, which is a good plan, as it tends to make them drive straight, but it is a tacit acknowledgment that there is more or less soreness of the mouth.

If the mouth is bruised or excoriated on the portion of the bars of the lower jaw where the bit presses, keep the bit out of it if possible until it heals. This need not prevent the horse being exercised, for if a suitable place is available he can be lunged a sufficient time daily to keep him in condition and under control. The lunging line can be buckled in the nosebband of the halter and no bit need be used. If a suitable place for lunging is not available and it is necessary to lead the horse alongside of another that is ridden, it can be done without the use of a bit by using a tightly applied standing martingale, made with a head piece and attached to a girth that is kept in its place by a crupper. The lead line should be attached to the nosebband of the headstall. In some instances by changing to a bit that exerts its pressure so as not to interfere with the sore part will answer as, for instance, the substitution of a snaffle for a Liverpool, but in most instances it is better to keep the bit out of the mouth altogether until it heals. When the mouth is sufficiently healed to stand the pressure of the bit again it is a very necessary precaution before driving for the first few times to take the sharp edge off the spirit of the horse by lunging him so that the sore part will not be so likely to be reinjured by the animal "taking hold."

It is well to emphasize what has already been stated, that the front grinders should be kept in condition, so that they can inflict no injury to the cheeks, by having them thoroughly beveled or rounded off with the tooth rasp. This does no harm, providing it is done in a rational way and is frequently of much benefit in preventing injury to the lining of the cheeks.

The Season for Hoof Troubles.

At the opening of the spring season the hoofs of horses are grown out to an extent far greater than good judgment and good care should permit. These are circumstances of a controlable character, however, and are responsible for the condition of horses' feet and were it only a matter of growth that the horse and horse owner should feel concerned about it would be very easy to forget, but that is the least of the ills. Following in the wake of overgrowth is disease and there is one particular form of disease which plays havoc with the foot of the horse and which makes its appearance at this particular time of the year more than any other.

In the discussion which is now being had on the subject of "What is the most prolific cause of corn," many writers attribute the cause to overgrowth. In part this is true, but the lodgment of foreign substances between the shoe and hoof is the cause of a most aggravated form of the disease which frequently finds its way to the living parts of the foot and not infrequently causes quittor. The moisture of the spring is constant, likewise the abundance of filth which is picked up by the shoe and lodges between it and the sole, with the outer wall as an additional guard to keep it in place until removed at the time of shoeing. Unless the greatest care is taken by the horseshoer to prevent the possibility of quittor arising as a result of this lodgment it may be expected.

Quittor is not to be feared so much in the case where a foot is free from the disease of corn, but when corn is present there is a separation seen between the insensitive sole and wall which allows the foreign matter to become located in the separated portion and gradually, through the movement of the animal, it works its way up into the living parts of the foot with the result as stated. It is therefore absolutely necessary that additional care be taken by the horseshoer to prevent the possibility of this disease arising, and as a preventative the following means are suggested:

Dress the hoof down as low as good judgment will permit, remove all dead portions of the sole and in case of corn being present cut cautiously into it with a knife suitable for the purpose of cleaning out any possible lodgment which may be seen between the sole and wall. After the part is thoroughly cleansed with the knife this part should, before the shoe is adjusted be filled with salve made up of equal parts of shoemaker's beeswax and one-half part of mutton tallow, which being melted together should be poured while hot into the heel. This forms a covering which will prevent any foreign substance finding the lodging place after the horse has been put to use and thereby relieve corn and prevent further trouble. As a further preventative the sole should be covered with a leather or rubber pad underneath which a layer of oakum and pine tar should be placed.—*Horseshoers' Journal.*

Notes and News.

Breeders meeting goes to Santa Rosa.

There will be $13,500 distributed in stakes.

It will be the greatest meeting held in California for years.

Ted Hayes worked his green pacer a mile in 2:15½ at Pleasanton one day last week.

The next inter-city matinee held by the League of Amateur Driving Clubs will be at Cleveland.

A proposition has been made to duplicate the program and hold a second meeting at Santa Rosa.

The directors of the State Agricultural Society will meet in a few days and arrange the program of harness races for the State Fair this year.

A half dozen condemned artillery horses were sold at the Presidio one day last week. The highest price obtained was $75, and the average for the six was $54.

Robert Garside is the owner of a two-year-old trotting filly by McKinney 2:11¼, dam by Boodle 2:12½ that Charley Whitehead is training at the Salinas track.

Read the advertisement of the stakes offered for Seattle's big meeting. They are something new and novel for this coast. The harness racing at Seattle will be dashes.

Geo. T. Beckers will leave Los Angeles May 1st for Cleveland with his stallion Zombro 2:11, Tee Dee Cee 2:19½, Zombowyette 2:18½ and a yearling brother to Zombretta 2:22.

Says the Salinas *Journal*: The horses in training at the Salinas race track are all doing well in their work, and it is a subject of remark that these has not been a sick or lame horse at the track all winter.

The San Jose track, always one of the very best on the Pacific Coast, is in better shape than ever this year and is good from fence to fence all the way round. About seventy-five horses are being worked there.

Lady Jones, the filly by Capt. Jones, that John Pender is training at Pleasanton, stepped a quarter a shade better than 32 seconds at that track last Saturday. She is owned by Dr. Froom, of Portland, Oregon.

Tony Bernal's handsome big trotter by Charles Derby that J. M. Alviso is training at Pleasanton, is one of the best gaited and most promising green horses at that track. Alviso worked him a half in 1:07 recently.

Chas. Whitehead is giving first lessons at Salinas track to a nice two-year-old filly by McKinney 2:11¼, dam Alberta by Altoona 8850, son of Almont 33 She is a good gaited trotter and is the property of Worthington Parsons.

Colonel Charles H. Page, formerly a member of the board of review of the National Trotting Association and well known to turfmen throughout the country died at Philadelphia April 10th of heart disease aged seventy years.

W. H. Shields, of New York, is now driving the bay gelding Col Benton 2:14½ on the road, and it is said the old fellow can hold his own in a brush with some of the best of them. He won four straight brushes the other day.

The Fresno Driving Club is agitating the question of giving a first class race meeting, and making a link in the California circuit. An announcement of purses and stakes will doubtless be made soon and the program will be arranged to accommodate all classes.

S. S. Stiles and Geo. Stickles sent three mares by Silver Bow 2:16 up to the Santa Rosa Stock Farm this week, where they will be bred to Sidney Dillon. The foals resulting will be closely related to the champion trotting stallion and the champion trotting mare of the world.

The mare Sallie Brooks 2:22½ was bred to Zombro 2:11 last year and nominated in the Pacific Breeders Futurity No. 4. She foaled on the 6th inst. a brown or bay colt that shows enough fine form and temperament to reach the quality of his great sire. Sallie Brooks is owned by Mr. M. L. Lusk of Sacramento.

Eagletta 2:11¼ that won the seven heat race at Woodland in 1902 as a four-year-old, and proved herself one of the gamest and fastest of the pacers out that year, is going faster than ever this spring and as she is sound as a dollar should be a winner in her class this year. She will go to the Blue Ribbon sale at Cleveland in May.

John Bradburn, for twenty-five years superintendent of Village Farm, the greatest trotting horse breeding establishment in America, will soon publish a volume which should be a text book on the breeding and development of the light harness horse Chapters include "The Starting of a Stock Farm," "The Selection of a Broodmare," "The Selection of a Stallion," "Care of the Weanling," "The Development of the Youngster," "Leading Colts," "Shoeing," with plates showing the advancement of the art, etc.

Horbert E. Coil of Woodland has been appointed a member of the State Board of Agriculture. Mr. Coil is a native son of this State, a man of standing integrity and good judgment, and is a breeder of cattle and horses. He owns one of the finest ranches in Yolo county which is under a high state of cultivation. He will make an active and excellent member of the Board.

Mr. C. A. Durfee took his coal black three-year-old mare Ragsy by McKinney to Pleasanton last Saturday and left her with Ed Mills to be bred to that gentleman's coal black stallion Lecco 2:09¾. Mr. Durfee says that he expects the produce of this union to make a black streak around the track in about two minutes when it is matured.

There will be about thirty entries for the M. & M., when all the returns are in, showing that the abolition of the substitution clause was popular with the horsemen as there were but fifteen entries last year. The list of entries has not yet reached us but Italia by Zombro and Stanley Dillon by Sidney Dillon are among those named for the race.

J. W. Johnston of Stockton has purchased from Singmaster & Sons from their branch at San Jose, one of the finest coach stallions on this coast. He is a seal brown without any white. The purchase price was $2000. Mr. Johnston purchased the Percheron stallion Sultan one year ago that is a magnificent horse, and he is doing as much as anyone to improve the stock of his county.

Mr. A. B. Byrant, of Alton, Humboldt county, has purchased, through an advertisement in the BREEDER AND SPORTSMAN from Mr. C. E. Humbert, of Cloverdale, Sonoma county, the handsome five-year old Percheron stallion Almont. This horse is a coal black, and is registered in the Percheron stud book, his number being 25,539. Almont will be a valuable addition to the breeding ranks of Humboldt county.

Fred Hahn of this city says the winner of the Breeders Futurity No. 4 was dropped at his place in Emeryville on the 14th inst. She is a light bay filly with star and is by Nutwood Wilkes 2:16½, dam Annie H by McKinney 2:11½, second dam Henrietta by Boodle 2:12½. The filly is a fine looker and a trotter. Fred says he will take fifty per cent of first money in the stake and stay out, but no less.

A Fresno correspondent writes that there are about thirty head of horses in training at the track there. C. E. Clark has ten or twelve, all green ones. Mr. Walton is training seven, the good pacer Jonesa Basler 2:11½ being his only record horse. Trainer Middleton has eight head. George 2:16¾ is his fastest horse Sangster has three head and Depoister two, all of which are without records. The track is in fine shape and the prospects are for a very prosperous season.

P. J. Williams is anxious for the associations to offer a good purse for trotters of the free for all class this year, as he would like to start Monterey 2:09¼. The horse is making a good season in the stud but Mr. Williams is confident he can get him ready to step for the money and don't object to starting against anything that wears hair and trots. A free for all trot would be quite a drawing card. California associations should have a free for all trot and a free for all pace on their programs every year.

Hopper 2:17¼ by McKinney, dam Cricket 2:10 by Steinway, is a great trotter this year. He has been in Monroe Salisbury's string at Pleasanton for a few weeks, and last Saturday his owner, Mr. H. W. Meek, went to Pleasanton to see him step, the idea being to see if he would do to go east. Charley De Ryder drove him a mile handily in 2:12½, and when he called on him about fifty feet from the wire, Hopper showed a burst of speed that made the spectators think he had been loafing the provious part of the mile.

Horse breeders in Southern California should not overlook the Ferndale Ranch stallions at Santa Paula. There are five stallions standing for public service there, viz.: Longworth 2:19 by Sidney, Sable Czar by Sable Wilkes. Ringwood by Sidney, San Miguel by Longworth, and the white and spotted horse Mahomet by Longworth out of a mare by an Arabian horse. Longworth is bred much like Sidney Dillon and is a sire of extreme speed, having three in the 2.15 list, including Alfred D. 2:11¼, A. C. 2:12½, El Moro 2:13½ and others. Sable Czar is a fine looker, of high carriage and style and his breeding is first class. Ringwood is also bred much like Sidney Dillon and is a splendid individual. All these horses are standing at a low figure considering their breeding and other good qualities.

The biggest race day of the year in California is the one given by the Butchers Board of Trade at Emeryville race track every year. The date this year is Wednesday, May 18th, and there will be twenty thousand of the butchers and their friends there to see the sport. All sorts of racing will be provided—trotting, pacing, and running races for horses and also a race for mules to cart. There will be races for butchers to drive and others for anybody, professional or otherwise. In the running races the starters will be horses now appearing at the regular meeting of the California Jockey Club at Oakland. Entries to the races close May 13th. The first race of the day will be called at noon as the program is a long one. J. M. Gilbert is Secretary and his office is 124 or 414 Pine street. Read the advertisement in another column. The program of races and all particulars are there given.

Kenney, the bikeman, has been so busy this week that he has not had time to rest. He has been selling bikes and speed carts right and left, and he says he thinks everybody in the country is buying a trotter. He sold a McMurray speed cart to R. Flaherty and another to Joe Evistor, both of this city. He received six new McMurray carts from the East this week, three road carts and three speed carts. Call in and see them at 531 Valencia street.

One of the sweetest gaited and most promising trotters we have seen for some time is the black mare Redruff by Chas Derby. She is owned by F. Hahn of Emeryville and is being driven some by that gentleman, who will doubtless race her next season. She is out of Nelly Emoline by Leo Corbett 23653 second dam Chick by Whippleton 1883, third dam Daisy Star by Ulster Chief 18,011, fourth dam by Young Argyle, thoroughbred.

Eagletta 2:11¼ has been consigned to the Blue Ribbon sale by her owner, Dr. C. Edgar Smith of Los Angeles. She is one of the fastest pacers in California and can lower her record several seconds She was the second largest money winner of the California pacers in 1902. Eagletta is a great bred one, being by Ketchum 2:16½, dam Lady Mack by McKinney 2:11¼, second dam by Othello, son of Sultan, third dam by Col. Hawkins 2:23 son of Echo. Vet Kent will go East with Eagletta and they will be in the same car with Geo. T. Beckers and Zombro.

Victor Verilhac of this city, who recently purchased the pacer Harry Hurst 2:14¼ by Delwin from Mr. A. T. Van De Vanter of Seattle, went down to San Jose last Saturday to drive him out a mile for the first time since he purchased the chestnut pacer. Jack Groom has him in charge and had him in good shape. Mr. Verilhac stepped him a mile in 2:22 and then broke the track record for this year by repeating him in 2:15¼, trying to take him back and calling "whoa" nearly all the way. Harry Hurst will make it lively for some of them in the Golden Gate Park Driving Club races May 30th at Ingleside.

Capt. N. P. Batchelder, of this city, received a letter from the Santa Rita farm, near Pleasanton, last week, stating that his great brood mare Luella by Nutwood has foaled on April 6th a fine and very large strong colt by Monterey 2:09¼ that was a trotter as soon as it saw daylight. Luella is now twenty-three years of age, but looks as if she was about half that. She is the dam of Prince Nutwood 2:12½, and Myrtle 2:13½, the latter the dam of the very fast mare Robizola 2:12¼ that Millard Sanders campaigned in the east last year. Luella's last foal was still born and was by McKinney, the year before she had a foal by Sidmore which died, and it is to be hoped this son of Monterey will have good luck and thrive. The old mare will be bred to Stam B 2:11¼ this year.

Practical investigation to determine the exact composition of the loco weed, which is the cause of much worry and expense to horsemen throughout the West, and to detect the cause of its poisonous effects upon animals, will be undertaken early in May by Dr. H. H. True of the Bureau of Plant Industry of the Department of Agriculture, who is now in Denver. In conjunction with Professor W. L. Caryle of the Colorado experiment station at Fort Collins, and Secretary Johnson of the Colorado Cattle and Horse Growers' Association, Dr True and his force of experts from Washington will make a thorough investigation and report upon the effect of the plant upon different animals. From experiments already undertaken it is believed that the loco weed is without serious effect upon sheep.

One of the most important sales made in California for some time was consummated at Pleasanton last week when Mr. J. D. Springer of that place became the owner of the mare Sonoma Girl by Linwood Wilkes, dam Maud Fowler 2:21¾. second dam Eveline (dam of Roblet 2:12, Tietam 2:19 and Maud Fowler 2:21¾) by Nutwood 600 The price is not given out by the parties to the sale but there are reports that it is somewhere between $5000 and $10,000. Sonoma Girl is one of the greatest prospects for a 2:05 trotter that has been seen at Pleasanton for some time. She was bred by Judge S. K. Dougherty of Santa Rosa, and was trained some last year but not raced. She went into Ed Mills' hands this spring and it is told that she recently negotiated a quarter a shade better than 30 seconds. She is gaited very much like her sire and but for an injury he would have been a 2:10 trotter to a certainty. Sonoma Girl is entered in the California Stake for 2:24 class trotters to be decided at the Breeders meeting at San Jose in August, but as Mr. Springer intends to race his horses over East this year she will probably not start in this State.

John Splan was talking about Kinney Lou to the editor of the *Western Horseman* at Indianapolis the other day and this is what he said: "There never was another such trotter foaled. He never had work enough to fit him for a repeat in 2:20, as trotters are usually trained, and no horse can accomplish what he has accomplished unless he had good, easy two minute capacity if fitted for it. and I do not believe that the stallion lives who has the two-minute mark so completely at his mercy as has Kinney Lou. With the same kind of training—not kept raced off of edge—Kinney Lou is not far from the Lou Dillon class. and if any wealthy gentleman wants glory of the Billings brand, and more of it, if he could secure Kinney Lou. and give the preparation, he would not have to wait long for the glory—and the fastest trotting stallion in the world. Why, I drove the runner along with Kinney Lou for Doble at Cleveland last summer a few times, just before the Cleveland meeting, and I never have seen any trotter, green nor tried out, that could step any quarter, first, middle or last, in 30 seconds with the consummate ease with which Kinney Lou could do it.

San Jose Track Items.

Between seventy-five and a hundred horses are now being worked at this track which was never in better shape than it has been since the big rain storms of March ended. The surface is worked its entire width and there is not a bad spot any place in the entire mile.

John Phippen has fourteen head belonging to various owners, among them a chestnut pacer by Nutwood Wilkes that is the property of Capt. Williams, of Palo Alto. This pacer moves and acts like the real goods and though but three years old is a large handsome colt. Mr. Phippen says that Henry Hahn's eleven-months-old colt Bendocino by Mendocino, dam Sally Benton, is undoubtedly the best and most promising colt of his age he ever sat behind, and he handled nearly all of the best ones bred at the famous Palo Alto Farm. He also says this colt is the best city broke horse he has in his stables, and he is not afraid of anything from automobiles to steam cars. Bendocino is a natural trotter with speed of a high order.

John Gordon drove his Diablo gelding a mile in 2:40 last Saturday when the writer was there, but this was not fast enough to get much of a line on the horse that is said to be a 2:15 or better trotter. He has considerable action, and marches out in a straight line as if he meant business. All the boys at the track think very highly of him. Mr. Gordon's stallion Silver Arrow by Silver Bow is one of the very best bred horses to be found anywhere and is looking to be in fine order.

Mr. Frank H. Burke, of San Francisco, found time to visit the track Saturday and drove his four-year-old McKinney Search Me his first mile inside of three minutes this year. The mile was in 2:41, and the horse looks better than he did last season. Wanda's three-year-old by McKinney is called Wanda II and to my mind is the best looking of all her foals, although Mrs. Burke insists that she is not as handsome as the Roman 2:09¼, her full brother. She is a more rugged looking trotter and here's a prediction that she beats The Roman's present record if nothing unfortunate occurs in the way of accidents, sickness, etc. The day of the flower fete last week old Wanda was all decked out in pink and was in the parade. They say she outlooked most of them.

W. H. Williams has a small string of horses at the track, several of which are good prospects. He has the stallion Signal Wood in the stud. This is a big fellow, about seventeen hands high and weighing 1400 pounds. He is registered and is by Signal Wilkes (son of Guy Wilkes and Lady Signal) and his dam is Mignonette by Antelope, he by Nutwood, and Mignonette's dam was by Nutwood. Signal Wood is a grand looker and should be a sire of carriage horses, as he has style and action in the superlative degree.

Jack Groom reached San Jose last week with a string of six and there are four green pacers among them that are pretty slick goods They will be heard from. The big trotter Liege 2:12½, owned by Mr. White of Washington, never looked better than he does right now and he ought to be in evidence when the money is paid out in the 2:12 class this year. He has a four-year-old by Nutwood Wilkes, dam by Direct Line, the property of W. Ford Thomas of this city, that makes visitors stop and ask about him.

Joe Cuicello has quite a string and will take a bunch of them to the Colorado circuit and then come back to California in time to race here. Mr. Coffin of this city, who has several horses in Cuicello's charge, was down Saturday and drove some of them himself. Mr. Coffin is a good reinsman and likes the sport of driving fast ones. His big mare, full sister to Klatawah 2:05½, is looking like 2:10. She is a very smooth going pacer.

Hans Frellson has a string of trotters and pacers, headed by F. Gommet's good son of Electioneer, Alta Vela 2:11¼. This horse will make quite a season in the stud and there is no horse in California that has a purer trotting gait than he.

C. A. Durfee is beginning to give slow work to Almaden 2:22¼, winner of last year's two-year-old division of the Breeders Futurity, and he is without doubt one of the handsomest three-year-olds in California. He could have beaten 2:20 last year very easily and is a trotter from the old town. He is such a handsome little fellow that everybody falls in love with him on sight. The two-year-old McKinney out of the famous old broodmare Elsie by Gen. Benton is to my mind about the handsomest and best proportioned young McKinney I ever saw, and there was never a better bred one. He is a square trotter, too, natural and easy and fast. Mr. Durfee has in him a successor to the old horse that will be right in the front rank before long

Budd Doble spends a good part of his time at the track. His stallion Kinney Lou looks like a different horse from last year and is as smooth and round as a newly varnished barrel. Kinney Lou is getting some splendid mares and will make quite a season. Doble has a four-year old McKinney stallion that is out of a Dexter Prince mare that is a swell looker and one of the richest dark bays one ever saw.

William Cecil is handling quite a string of youngsters for Martin Carter and has several others besides. He has a three-year-old filly by McKinney from a Nutwood Wilkes mare that is owned by Mr. Mowry of Mowry Station. This filly in thirty days work began to step so that she trotted a quarter in 34½ seconds. She is a swift one. Cecil is working Mr. Carter's pride T. C. easily and the stallion is going "awful good" as one of the boys said. He trotted a quarter in 34 seconds Saturday and seemed to be taking things very easy. A grey filly owned by Judge W. E. Greene, and a full sister to the very promising grey two-year-old that Monroe Salisbury is training, is a likely miss, but she is not the powerful strong thing the colt is. She is as fine as a thoroughbred, but a good gaited one.

Mr. T. W. Barstow may be cleaned out of horses soon, the way he is being besieged with letters and proposals for his fast pacers Alone 2:09½ and the two-year-old Just It. He has received some big offers for both these flyers. There is not a particle of doubt in the mind of any unprejudiced horseman but his stallion Nearest 2:22, own brother to John A. McKerron 2:04½, is bound to be one of the greatest sires of speed with reasonable opportunities. He is a grand big horse.

Other owners who are represented at San Jose are F. F Hoffman of Colorado, O. J. Holmes of Stockton, C. E. Dowling of Santa Cruz, H. Scott, owner of Scott McKinney, and Mr. Baker, who has that splendid stallion Red Nuttle there, and doing a good season with him.

What Lou Dillon Is Doing.

"Marque" writes from Memphis to the *Horse Review* as follows about the champion trotter:

"Lou Dillon is just at present putting a few gray hairs into Millard Sanders' head. Not that Millard is displeased with her actions, but rather because he fears that the capers she cuts may sometime cause her an injury. Never was there such a combination of wildfire and docility put up in one bundle as is found in Lou Dillon. When I reached the track last Monday morning Henry Bailey, her caretaker, was riding her with a halter and she seemed as gentle as any old saddle mare carrying a country parson. Occasionally Henry would jig the halter, making her break into as pretty a rack as could be shown by a 'high school' saddler. Every morning Henry rides her four miles, after which she is harnessed, and then Millard is made to lead the "life strenuous." Once on the track Lou begins a series of attempts to get away, fighting for her head, buck-jumping, and doing about every stunt recognized in the repertoire of a well-organized westerner bronco—except kicking; that she never does. To see her then would cause one unacquainted with her capricious ways to believe that she was the worst spoiled mare in America. Sometimes she is given her head and then for a short distance she fairly skims on the trot; but so far she hasn't even been turned the sight way of the track. Speaking of Lou's capers, Millard said that while she makes him a trifle nervous he was glad on first hitching her up this string to find all of the old fire and temper left in her. "Had she been docile and well mannered my experience with others of her kind would have led me to fear that the record-breaking quality had gone out with her dash and spirit," said he.

Tommy Waugh, who cared for Lou so faithfully last season, has quit the trotters and is now a traveling salesman. Henry Bailey, who now has her, first cared for her in California in 1902; last season he had Fereno 2:05½. He is an excellent care-taker.

Lou has changed greatly since last May when purchased by Mr. Billings. The clip she went last season could do but one of two things to one of her tender years—break her down or build up her tissue and structure. It did the latter. Her filly-like appearance of a year ago has given way to noticeable development "from end to end," and particularly in her hind quarters.

Late last season a few very small puffs appeared on her front ankles, but these have now entirely disappeared, her legs showing no sign whatever of the awful clip she went. I have often thought that Millard Sanders was necessary to the success of the mare, and after seeing her going through the "breaking process" again, I believe it more firmly than ever. Mark 1:55 on your stable door for Lou this season.

It is said that the Kentucky Futurity received nearly one thousand entries and the American Horse Breeders' futurity close to six hundred. Colt stakes are retaining all their popularity.

Directors Sued.

The California State Bank has brought suit in the Superior Court against A. B. Spreckels, J. W. Wilson, A. W. Barrett, D. E. Knight, Frederick Cox, Frank Covey and Grove L. Johnson to recover $7110, with interest at 6 per cent from January 1, 1903.

The note was given by the defendants, all of whom were, and some of whom now are, Directors of the State Agricultural Society, in April 1899, to tide the Society over a period of financial difficulty. The defendants assumed the personal responsibility for the return of the money advanced by the bank and the bringing of the suit is simply a precaution of the bank to save all its rights in the matter as it does not fear that the note will not be paid.

As the Sacramento *Bee* says: The obligation was incurred by public-spirited citizens of the State, who were serving as Directors without compensation, to carry one of the State's most important departments over a trying period in the history of its finances, and is a case in which individuals stood sponsor for the Commonwealth.

It is believed at the next session of the Legislature an appropriation will be made enabling the Directors to discharge the States obligation.

Natural Trotters

There is no question that the way to breed trotters is by mating trotters with trotters, and in addition strictly adhering to the sound principle that good individuality can only be obtained uniformly by using nothing but the best as regards conformation and soundness, says the "Stock Farm." Colt trotters that possessed great speed at the very beginning of their education and were forced to their utmost before they were developed are of a kind that will reproduce themselves, for the fact that they possessed speed at an early age and did methods to possessed speed at an early age and di methods to develop it, proved that they were natural trotters, and the natural trotter will reproduce himself with greater regularity than the artificial trotter or one that requires the help of his trainer for him to put his feet in the right place or to properly exert himself.

Natural trotters are extremely rare, for while many are brought to a state nearing perfection through constant training, few are to be found that can do everything that is expected of a trotter as soon as they are bridlewise. One of the most remarkable examples of the natural trotter that has ever been seen was the filly by Ponce de Leon that was afterwards sold for a very large price, which was in the stable belonging to the estate of the late Marcus Daly, and which afterwards became known as Miss Previous. This filly on the first time of asking trotted a quarter in thirty-five seconds, and this without any preparation other than education, which is commonly called breaking, and without more than a dozen lessons in harness she trotted a quarter in thirty-three seconds, and all in her yearling form. It is this natural speed and perfect action that is found only in very great trotters, and whether or not this filly becomes famous, her failure to do so will not result from a lack of capacity on her part, or as a yearling she possessed every quality that is essential in a great race mare and need improve but little each year to be the best of her class.

The present champion, Lou Dillon, has always been a natural trotter, although a somewhat wilful one, for no amount of schooling could make a defective trotter into the perfect piece of machinery that she now is. Arion was another natural trotter and a very great one, and it is this fact that must convince every one that if given the proper opportunities he will reproduce himself, if he does not sire one that will be his superior. Dr. McCoy's theory that any trotter possessed of extraordinay capacity will meet with greater success in the stud if he is never severely taxed, or, in fact, given even the preparation necessary for racing, has been followed successfully among breeders of thoroughbreds in England. The late Lord Falmouth, the most successful breeder that ever lived in any country, as soon as he discovered that his fillies possessed stake form, relegated them to the stud, and no matter how great was their promise or racing, he considered that their class or merit was of more value to him for breeding purposes than for racing. Many men assume that a fast record is proof enough that a stallion or mare will be successful in the stud, unmindful of the fact that fast records are frequently obtained only after excessive training, which must necessarily sap the vitality of the horse himself, and that a horse like Admiral Dewey, which raced but little, and consequently received but little training, while his record is not a fast one, is more valuable for breeding purposes than if he had obtained a record of 2:05 after several years of extreme effort, for the stallion possesses capacity enough to trot a mile in 2:05 and his vitalities have never been taxed in the effort to do so. Great colt trotters or colts of great natural ability will be the successful sires of the future: in fact, they are such already, and wherever they are found coming for several generations of the same material, their success is all the more readily assured.—Rural World.

Eastern Gossip.

[Culled from our Exchanges.]

Young trotting stallions of gilt-edged breeding are in demand these days. An offer of $10,000 was made and refused, a few days, ago, for the three-year-old colt, Vice Commodore, owned at Forbes Farm, Ponkapog, Mass. The youngster was sired by Bingen, 2:06¼, dam Narion, sister to Lord Roberts, by Arion, 2:07¾, second dam Nancy Hanks, 2:04, by Happy Medium.

Senator Horace White, of Syracuse, who is one of the most prominent amateur drivers in the country, believes in having his horses in good shape when he scores down for the word. The Senator is to send Miss Whitney, 2:07½; Sallie Hook, 2:09; Sylvia, 2:23½; and Willow Belle, 2:29½, to the covered track at Jewettville, where they will be put in racing condition.

Word comes from the Village Farm that the Corker, always a fast horse, by Rex Americus, is going sound, so far, in his work, and is very fast. Ed Geers said a year or so ago that The Corker would beat 2:10 the very first time he took the word.

Four McKinneys, all of them good ones, are in training at Memphis. The Tout, 2:23¼, trotting, has already been miles in 2:12; Marengo King, it is said, can trot in 2:15; China Maid, pacer, was miles last year faster than 2:06, and is said to be faster than ever this spring, and Trainer Roth has The Roman, 2:09½, in good shape and going good.

C. K. G. Billings dropped into town the latter part of the week on his way to New York from California, where be has had a most pleasant visit. He took a ride behind Sir Albert S., 2:03¾, and Prince of Orange, 2:06½, with Doc Tanner, and seemed well pleased with the general appearance of all of his horses.

Bouncer, 2:09, the fastest daughter of Hummer, failed to get in foal last season, and she is now being jogged preparatory to being sent to W. J. Andrews, who will get her ready to reduce her record. Cherry Lass, 2:24¼, by Bobby McGregor, out of the dam of King Direct, 2:09¼, that has been timed in 2:06¾ in a race, will also be placed in Andrews' stable, as will Double Z., 2:19¼.

Gil Curry, 2:09¼, the noted gray pacer owned in Boston, is a victim of glanders and is to be killed He is 17 years old, and first came into prominence in 1895, when Joe Mooney was winning races with him. He made his record ten years ago, but last winter he was able to hold his own in brushes over the snow around Boston.

"Marque" describes Stanley Dillon as follows: "Stanley Dillon is a big horse—standing full 16 hands and is built on rugged lines. Millard Sanders broke him last January and before bringing him to the May sale at Cleveland, where he was sold, worked him a mile in 2:15. Afterwards Frank Cares stepped him a mile in 2:13¼. No one could call Stanley Dillon a handsome horse, particularly because of his sharp, projecting coupling and rather low back. Leaving looks aside, he is, however, a powerful horse throughout, with a whole lot of substance and a large place to carry his victuals. He wears quite an outfit of boots and when at speed gives the impression that he could trot through a stone wall. He has a bull-dog look about his head and trots with his legs well under him, but hits the ground very hard with his front feet. Murray Howe says that Stanley Dillon reminds him very much of the trotter Owyhee 2:11, both in gait and build. Mr. Geers has the horse under perfect control at all times, taking him back or pulling him out to one side without changing his gait or taking a strong hold of the iron. I would like the Dillon horse better if he didn't hit the ground so hard in front. Still, to offset this he has large feet of good quality and the best of front legs.

China Maid, the green pacing mare by McKinney, 2:11¼, owned and trained by J. M. Nelson, is one of the much-watched things of the track. She is a peculiarly-gaited mare, but very oily and very fast. She can do a quarter in 32 seconds with an eighth in 15 and not appear to be at all interested or busy. I believe she is charged with a mile in 2:05¼ last season. Nelson will stake her down the big ring.

From the way the consignment of carriage horses offered at the American Horse Exchange, by M. H. Tichenor & Co., of Chicago, sold last Wednesday night, the indications are that the market is in a healthy and prosperous condition. Twelve head sold for an average of $1,235, one team fetched $3,500, and a black gelding brought $2,000.

Ma McDonald will endeavor to make a race of Oxford Chimes 2:13½, the erratic brother Monk 2:05¾.

At the Tranter-Kenney sale of trotters and pacers held in Lexington, Ky., late in March, the best price was $2,100 paid for Neva Simmons, 2:11¼, by Simmons, 2:28. The best price for a youngster was $495 paid for the two-year-old Usher by Arion, 2:07¾, dam by Bow Bells, 2:19¼. Col. Patrick, five years, by The Conqueror, dam Godelia, 2:16¼, by Aberdeen, was knocked off at $985, the second best figure of the sale.

John Kelly, who for the past year and a balf has been in charge of the trotters at The Abbot Farm, property of John J. Scannell, at Fishkill Landing, N. Y., has severed bis connection with that institution. John has as yet made no definite arrangements for the season, but it is safe to say that he will be at some of the big meetings with a good one or two, when the bell rings.

James Butler and family, who have been in California for several weeks, have returned to New York. Mr. Butler is very much pleased with the manner in which the East View Farm horses, in charge of Monroe Salisbury, at the Pleasanton track, are working.

Dr. W. W. Aldrich, one of Iowa's veteran trotting borse breeders, died last week near his home at Tipton, while returning from California. Dr. Aldrich founded Border Lawn Stock Farm near Tipton, some years ago. He at one time owned the stallions Border Wilkes 2:15¼, by Jay Bird, Mambrino Abdallah 1369, and Lord Wellington 1968.

American Belle, 3, 2:12¼ foaled a bay colt by McKinney 2:11¼ March 21st, at Terrace Farm, Titusville, Pa.

Almost all the stall room at the Cleveland track is already taken for the training season.

Dan Patch 1:56¼ will travel in a magnificent private palace horse car this season. It is now being built and will probably be the most elaborate one ever constructed.

Walter T. Chester, publisher and compiler of Chester's Complete Trotting and Pacing Record, which he published from 1883 to 1890, has joined the Fasig-Tipton forces, and will fill the vacancy made by the resignation several weeks ago of A. J. Meston, head of the advertising of the sale firm. Mr. Chester was for a long time connected with the Turf, Field and Farm, and since that publication went out of business, he has been associated witb Joseph Battell, of Middleboro, Vt., publisher of the Middleboro Register.

Nancy Hanks 2:04 and a yearling, two and three-year-old filly and four-year-old colt out of her will go under the hammer at the Forbes dispersal sale. Her two aged daughters, of five and eight years, now brood mares, are also included.

Advance reports indicate at least thirty entries in the M. and M.

Some $58,000 in stakes and purses is already in sight for 2:10 trotters. And yet some of the more pessimistic speed-horse prophets are wondering why 2:10 trotters are higher this year than last, in the presence of forty per cent depression of good dividend-paying stocks.

Joseph F. Pray, the veteran sulky builder of Boston, died a few days ago. He was among the first to build an arched axle, and probably the first to tilt an axle back to the connecting brace behind the sulky seat, which vehicle he made for A. J. Feek's old timer, Alroy.

C. F. Emery, owner of Forest City Farm, looks to see Norrie, 2:10, beat 2:08 this year. He also thinks Caspian, 2:07¼, will lower his record a good bit. Among the other record horses by Patron, which he expects to trot in 2:10 or better this year, are Parthia, 2:16¼, and Persia, wagon record, 2:14¾.

Messrs. Campbell & Sons sold the trotting stud of J. W. Welsby at Kirk's Bazaar, Melbourne, Australia, recently, when the following prices were realized: Emulator (stallion), $3,937; Captivator, b. c., two years, by Emulator, $320; Jessamond, b. f., 3 years (full sister to Emulator), $362; Juenetta, b. m., with foal at foot, by Emulator, $367; ch. f. yearling (full sister to Emulator), $294; Estimate, b. m., with foal at foot by Emulator, $294; b. f., 2 years (full sister to Emulator), $215; Edith, b. m., with foal at foot by Emulator, $152.

Ben Walker, who last season drove for the Salisbury stable, is now at Memphis, and announces that he will train a string of thoroughbreds this season, having received an offer from a wealthy Pittsburger who is about to break into the racing game. Walker is suffering from blood poisoning in one of his arms, which would prevent him from driving this season.

The Questor 2:11¼ looks a sure 2:10 trotter this season. He is working better than ever before for Geers at Memphis.

Newspaper items to the effect that Lou Dillon will make her first record-breaking effort of 1904 at the Grand Circuit meeting at Detroit, may be set down as without foundation.

E. B. Bergen, of Harlington, N. J., has a half thoroughbred trotter which he believes is worth training. This trotter is by Red Wilkes out of the mare Our Kate, by Don Jose, a son of Joe Hooker. On the dam's side the pedigree is pure thoroughbred. The trotter is a three-year-old filly, and is the result of an experiment in breeding by a New Jersey horseman.

Cleveland is a wonderful city to bring buyers and sellers together. Everything favors it as a locality for great horse sales. Its geographical position makes it convenient for people to meet from down East and out West, and the city itself is full of horse lovers. There are always many local buyers at the Blue Ribbon sale, and a good share of the most desirable animals remain right there. They will never forget that Mr. Billings bought Lou Dillon for a tithe of her value at Cleveland last May, and everybody is looking out for another like her. Fasig-Tipton Co. scarcely expect that the catalogue for 1904 will contain a peer of the Queen of the Turf, yet it may, for there are many brilliant prospects in the consignments, and it is the unexpected that is in the habit of happening.

The Colorado Supreme Court has decided that the horse-tail docking law is constitutional in all its features. The test case was instituted by John W Springer for his coachman, Ernest Bland. He was fined in the court below for driving docked horses. The court holds that docking is cruelty and that the Legislature has the right to prohibit the practice. No horses can be docked in the State, nor can such horses be imported. The buying and selling of animals that have been docked is a misdemeanor. Every bang-tailed horse in the State prior to the passage of the law must be registered.

A special dispatch to the daily papers from Austin, Texas, says: Blind staggers has been epidemic among the horses of the Lytton Springs community, fifteen miles south of here, causing many deaths. In dissecting one of the horses yesterday there was found in the cavities of the heart three living creatures, resembling snakes or mammoth worms. One was twenty-four inches long, one twelve inches long and one six inches long and one inch in diameter. They were white in appearance with bloody streaks running their length. Their bodies were soft and pulpy. Dr. Brewer examined the creatures, but failed to classify them. They have been brought to veterinary surgeons at Austin for examination.

Eoline, three-year-old record 2:14¾, dam of Lassadil, 2:29¼, and full sister to Salome, 2:28¾, by Anteeo, dam Myriad dam of Eoline, 2:14¾, Farco, 2:19½, Salome 2:28¾ by Stranger, second dam Myra, dam of four standard performers by General Knox, third dam Sappho dam of two standard performers and second dam of five standard performers by Jay Gould, has just foaled a beautiful bay colt by Ashland Wilkes at the Hillside Farm, Reading, Pa.

M. E. Sturgis of New York City, is to retire from the turf. For a dozen years Mr. Sturgis has raced his horses, at first on the mile tracks of New England, and of recent years he has been a prominent figure on the Grand Circuit. It was in 1902 that Mr. Sturgis had out his best stable, headed by the incomparable Dan Patch, and containing Baron de Shay, Prince Direct and Darwin. Under McHenry's able direction these horses won many races and the stable was one of the best money earners of the year. In the fall of that year Sturgis sold Dan Patch to M. W. Savage for $60,000. Last year his table did not perform so brilliantly, but his retirement was not looked for.

Gaited Saddle Horse in War.

[Chicago Breeders Gazette.]

I was much pleased with the article in one of your recent issues by Secretary Nall, concerning the suitability of the gaited saddle horse for cavalry mounts. Then came a veterinarian from the regular army who is evidently a foreigner, probably (judging from his name) either a Russian or a Pole. This learned veterinarian says of the American saddle horse that he is good to look upon, but that he is too delicate and will not stand the hardships of a campaign.

Now we old soldiers of the Civil War know that the American saddler was and is the best cavalry horse that the sun ever shone on. The stout old four milers from whose loins he sprang had that same kind of delicacy. On June 8th, 1864, at Mt. Sterling, Ky., in a fight with General Morgan's command, my horse was shot under me, but a few moments later a gallant young Confederate officer was killed while leading his men in a charge on our position. I was not twenty feet from him when he fell and had but little difficulty in catching his

erless horse. This proved to be the best cavalry horse I ever saw. He was a bay gelding, seven years old, 15.2 hands high. He had a clean bony head, with big yellow eyes like a shepherd dog, a remarkably long and graceful neck, and it came out of the top of his shoulders instead of the front of them, a short strong back and high croup. He was a wider horse than many we see nowadays, broad across the breast, and his forelegs did not both come out of the same hole. He was broad across the quarters, but measured ten inches more across the stifle than across the hips. His legs and feet were excellent, and he dropped down in the flank like a brood mare, giving him a place to carry his dinner. What were his qualities? He could flat-foot walk five miles an hour, showing the bottom of his feet at every step; he had a good square trot, but that was a gait the soldier did not love; his running walk (he was a "nodder") would easily cover eight miles within the hour. But fighten on the rein and make the least motion with your heel and he would rack down the pike like a house afire. Add to this that there were very few horses in either army that could run as fast, and I never saw one that could get under full speed from a standing start as quickly as he could.

In September of that year I rode this horse from Lexington to Saltville, Virginia. We "got licked" up there and had to retreat, the enemy pressing us hotly for fourteeen days and nights. This horse and one other alone of all those belonging to my company lived to see Lexington again. In November we went to Crab Orchard, where another expedition against Saltville was organized. This time we went across Cumberland Gap and up Clinch River as far as Bristol, when the orders were countermanded and we hustled off to Nashville by forced marches both night and day to assist in Hood's defeat. My company reached Nashville with 97 men and 18 horses. The horses were all condemned as unserviceable and turned over to the quartermaster at Nashville except my horse and two others.

Then in February we went to Louisville and joined General Stoneman. Again we went across the Gap into Tennessee, on to Knoxville, up into Virginia as far as Lynchburg, down into North Carolina, destroying the Weldon Railroad, to Saulisbury, liberating the prisoners and destroying the prison. Then we went to Salem and Rutherfordton, then with Major Modderwell to burn the high bridge across the Catawba river, then on through South Carolina and Georgia.

This was our last campaign, and my horse and one other (this other horse was also a magnificent specimen of the gaited saddler) were the only ones in my company when they returned to Knoxville in June that had started with it from Louisville in February.

On the Nashville campaign it was my misfortune to be taken prisoner by some of Forest's men. They took me to Gen. Forest's quarters. The general did not seem to think that I amounted to much, but he looked mighty hard at my horse, then turning to me, said: "See here, young fellow, if the whole Yankee army had hosses like that all hell wouldn't whip 'em." He then gave orders that I should be taken to an officer who had charge of some other prisoners, and in conclusion said: "Don't fergit to bring that hoss to me, you hear?"

Well we never got to where the other prisoners were. The men who were guarding me were poorly mounted, and were, I thought, almost too sure of me to watch closely. When we came opposite the mouth of a lane that opened into the road I jerked my horse suddenly around to the left, threw myself flat on his neck, jamming both spurs into his flanks. He was off like a quarter horse before the bewildered guard could realize what had happened. They fired, I thought all too promptly, but both horse and rider were untouched, and as to pursuit that was hopeless. In less than half an hour we were safe within our own lines.

I must apologize for the vast amount of "ego" in the foregoing. It was not my wish to relate my own adventures, but to tell about the best cavalry horse I ever saw.

Gen. Grant was an admirer of the gaited horse, and always kept one or more good ones. I was once present at a frontier post in Western Kansas when Gen. Sheridan was on a tour of inspection. Some of the officers were speaking to him of his ride to Winchester and the wonderful endurance of the horse he rode that day. "Yes," said the General, "he did have wonderful endurance, but the man who rides that kind of a horse must have wonderful endurance, too." The horse Rienza, or Winchester as he was afterwards called, was the roughest trotting horse in the Union army. He was trotting-bred and it is said could trot in about 3:00. He could not canter, and would not gallop until forced to go faster than he could trot. Gen. Burbrige was from Scott county, I believe. I know that he always rode a "mighty fine racking horse." We all know the opinions held by Generals Morgan, Basil Duke and Castleman on the subject. I have just told you about Forest, Grant and Sheridan.

The saddle-bred horse is too delicate, and will not stand the hardships of a campaign, eh? Look at Goodman's trip, and be a fat young stallion just out of a sale stable. I rode him 516 miles in twelve days. JOHN A. WHARTON.

The Horse for the Farmer.

One of the features of the South Dakota Live stock Association was an address by J. M. Dunmire of Scotland on "The Horse for the Farm." Mr. Dunmire spoke as follows:

"What I have to say on this subject is intended to apply to common horse-raisers—the farmer. It is just as necessary in all classes of business to know what not to do as it is to know what to do, horse-breeding not excepted.

"We have the road horse, the coach horse, the cab, the hunter and various kinds that are useful in their places, but are only profitable to those that make a special business in the breeding and raising of them.

"No doubt they all have a place in the business and pleasure of our great country, and by special breeding and management they are made profitable to the man that breeds them, but they require a kind of care in handling and fitting for the market that is not practicable with the average farmer. They all cost too much skilled handling to fit them for their place in the market.

"The horse for the farmer is the draft-bred horse. He is the horse that can be raised by the common farmer with little trouble and expense. He is in reach of almost every farmer in the country. It is a profitable business on the farm to raise a few good colts. I say good colts, for it is just as easy to raise good ones as poor ones.

"It is just as easy to raise good horses as good cattle or good sheep or hogs. It does not pay to raise poor ones—leave that for the other fellow. The farmers that raise good stock of any kind are the men that select good sires. The men that have good herds and flocks are the men that select a pure-bred sire from one or the other of the several pure breeds, and sticks to the breed of his choice, if in cattle it is short-horns, and in a few years his herd is all of the same type and color.

"If it is Angus or Herefords, the results are the same. If this is true of cattle and sheep, it certainly is true of the horse. Fellow farmer, select a sire from one of the pure breeds of draft horses, Percheron, Shire or Belgian, it matters but little which breed.

"It is only a matter of choice to the breeder himself. Be sure and select a good individual. Breed just such mares as you have. The better the dam the better the result. Always breed their produce to a pure-bred sire of the same breed.

"In a very short time your mares are all alike and of the same type and disposition, all bearing a family resemblance. You will not have the disposition of the broncho in one and the trotting horse in the other, but you will have a class of horses that are easily handled, easily fitted for the market, and an every-day market at home and abroad.

"You need not spend any extra time and expense in looking after buyers—the buyers are always looking after this kind. If they get a wire cut or blemish they are the kind that are useful to keep for any kind of farm work. A good mare with proper care will do just as good service on the farm and raise a colt, as a gelding, and have the colts for the keep.

"Never allow the colt to follow the dam when in harness, as the colt will do much better left in the barn, and the dam will be better off without them. Give the little fellows some oats and bran in their trough—they soon learn to eat and forget their dam.

"They are easily weaned, and if proper care is taken they will not stop growing until they are matured. Breed in this way, and in a very short time it will be impossible to raise a poor colt. Look at the farmers' horses that breed one year to a draft horse, that produce to a road horse, that produce to some cheap mongrel.

"His horses in ten years' breeding are no better than when he began. The price of service fees should hardly be considered. It costs as much to raise a low-priced horse as to raise a high-priced one. It is all in the breeding.

"Always use a pure-bred draft sire. A better individual than the dam, and then you are sure of gaining. Select one breed or the other and stick to it, and you will come out ahead and be on the right road to success in horse-breeding."

Fitting the Shoes.

A shoe for the regular hoof fits when the outer border follows the wall closely in the region of the nail holes and from the last nail to the end of the branch gradually projects beyond the surface of the wall to an eighth of an inch and extends back of the buttresses an amount equal to the thickness of the shoe. The shoe must be straight, firm, air-tight, its nail-holes directly over the white line, and its branches far enough from the branches of the frog to permit the passage of a foot pick. Branches of the shoe must be of equal length. In fitting a shoe to a hoof of regular form we follow the form of the hoof, but in base-wide and base-narrow hoofs which are of irregular form, we must pay attention also to the direction of the pasterns and the consequent distribution of weight in the hoof, because where the most weight falls the surface of support of the foot must be widened, and where the least weight falls (opposite side of the hoof) the surface of support should be narrowed. In this way the improper distribution of weight within the hoof is evenly distributed over the surface of support.

A shoe for a base-wide hoof should be fitted full on the inner side of the foot and fitted close on the outer side, because the inner side bears the most weight. The nails in the outer branch are placed well back, but in the inner branch are crowded forward toward the toe. A shoe for a base-narrow hoof should be just the reverse of the preceding. A shoe for an acute-angled hoof should be long in the branches, because most of the weight falls in the posterior half of the foot. The support in the front should be diminished either by turning the shoe up at the toe or by beveling it under the toe. A shoe for a stumpy hoof should be short in the branches, and for pronounced cases should increase the support of the toe, where the most of the weight falls, by being beveled downward and forward.

In many cases, especially in the hoofs of draft horses that stand very close together, the coronet of the outer quarter is found to stand out beyond the lower border of the quarter. In such cases the outer branch of the shoe from the last nail back must be fitted so well that an imaginary perpendicular dropped from the coronet will just meet the outer border of the shoe. The inner branch, on the other hand, must be fitted as "close" as possible. The principal thought should be to set the new shoe farther toward the more strongly worn side. Such a practice will render unnecessary the widespread and popular fad of giving the outer quarter and heel calk of hind shoes an extreme outward bend. Few farriers have either the time or the skill necessary to so adjust a cold shoe to the hoof that it will fit, as we say, "air-tight." If a heavy shoe at a yellow heat be held tightly pressed against a hoof which has been pared too clean till it embeds itself serious damage may be done. But a shoe at a dark heat may be pressed against a properly dressed hoof long enough to scorch and thus indicate to the farrier the portions of horn that should be lowered, without appreciable injury to the hoof and to the ultimate benefit of the animal. The horse owner should insist on the nails being driven low. They should pierce the wall not above an inch and five-eights above the shoe. A nail penetrating the white line and emerging low on the wall destroys the least possible amount of horn, has a wide and strong clinch, rather than a narrow one which would be formed near the point of the nail, and furthermore has the strongest possible hold on the wall, because its clinch is pulling more nearly at a right angle to the grain (horn tubes) of the wall than if driven high. Finally, do not allow the rasp to touch the wall above the clinches.

The bar shoe has a variety of uses. It enables us to give the frog pressure, to restore it to its original state of activity and development when by reason of disuse it has become atrophied. It gives the hoof an increased surface of support, and enables us to relieve one or both quarters of undue pressure that may have induced inflammation and soreness. The bar of the shoe should equal the average width of the remainder of the shoe and should press but lightly on the branches of the frog. The addition of a leather sole with tar and oakum sole-packing allows us to distribute the weight of the body over the entire ground surface of the hoof. Various forms of rubber pads, rubber shoes, rope shoes, fiber shoes, and other contrivances to diminish shock and prevent slipping on the hard and slippery pavements of our large cities are in use in different parts of the world. In Germany the rope shoe (a malleable iron shoe with a groove in its ground surface in which lies a piece of tarred rope) is extensively use with most gratifying results. In the large cities of England and the United States rubber pads are extensively used. They are rather expensive, but are quite efficient in preventing slipping on polished and gummy pavements, though not so effective on ice. The rubber is stitched and cemented to a leather sole and is secured by the nails of a three-quarter shoe. Such a pad will usually last as long as two shoes. They may be used continuously, not only without injury to the hoof, but to its great benefit. The belief, unsupported by evidence, that rubber pads "draw the feet" keeps many from using them. A human foot encased in a rubber boot may eventually be blistered by the sweat poured upon the surface of the skin and held there by the impervious rubber till decomposition takes place with the formation of irritating fatty acids: but there is no basis for an analogy in the hoof of a horse.—J. W. Adams, V. M. B.

Colds in Horses

are to be guarded against in Springtime. The creature should be kept in condition to resist this trouble. "Craft's Distemper & Cough Cure" is a remarkable preventive of colds in the fact that it is a germ destroyer. A slight exposure to drafts or an unusual chill affects the horse seriously when the system is permeated with the germs. "Craft's Cure" destroys the germs and leaves the blood in pure, healthy condition so that coughs, distemper, influenza, grippe, pinkeye, etc., are easily resisted. The same treatment is a sure cure for colds and any of the distempers if one has neglected to follow the policy of prevention. If druggists happen to be out of stock, our readers may order it, prepaid, as per advertisement in our columns from the Wells Medicine Co., 13 Third St., Lafayette, Ind.

Strike!—if they don't give you Jackson's Napoda when you ask for it.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

AT THE TRAPS.

About forty shooters attended the April shoot of the Union Gun Club last Sunday at Ingleside. This showing was rather surprising considering the extremely warm weather. A summary of scores and winners follows:

Club shoot, 25 targets, class shooting, 8 classes—Daniels 21, "Woodpecker" 19, Foster 23, Hoyt 22, "Slade" 21, Walpert 19, Nauman 24, Dr. Hansen 16, Masterson 20, Lowrey 16, Pisani 22, E. Klevesabl 23, Fisher 21, Dr. McConnell 17, Donohoe 18, Shreve 16, Dutton 18, Dr. Finnie 16, "Williams" 17, White 11, Biller 12, Gross 7, Frankel 11, Wollom 19, Green 9, Dr. Hutton 11, Jacobson 19, Muller 21, Murdock 21, Knick 17, Frahm 19, Dr. Pitres 22, Burns 17, Robertson 24, Patrick 19, Leary 15, Hodapp 20, Grimm 16, Miller 14, H Klevesahl 15, Turner 10, Haight 21, Libert 15, Walsh 10, Barber 13, Iverson 21, Sylvester 21, Mitchell 21.

The winners in this race were: Nauman and Robertson divided first class money, Foster and E. Klevesabl second money; Daniels, "Slade," Fisher, Muller, Murdock, Haight, Iverson, Sylvester and Mitchell third money; "Woodpecker," Walpert, Wollom, Jacobson, Frahm and Patrick fourth money; McConnell, "Williams," Knick and Burns fifth money; Scott, Leary, H. Klevesahl and Libert sixth money; Barber seventh money; Walsh and Turner eighth money.

Medal race, handicap, 25 to targets, 2 classes, handicap fixed by scores in previous event, 25 possible—McConnell shot at 27, broke 21, Donohoe 27-23, H. Klevesahl 28-20, Walpert 27-22, Hanson 28-22, Leary 28-23, Burns 27-20, Forster 25-23, Woodpecker 27-18, Nauman 22-25, E. Klevesahl 25-22, W. Murdock 26-22, Fisher 26-22, Williams 27-18, Finnie 28-18, Patrick 27-22, Wollom 27-23, Hutton 30-14, Daniels 26-25, Jacobsen 27-18, Dutton 27-16, Masterson 26-21, Hoyt 26-22, "Slade" 26-22, Pitres 25-22, Frahm 27-16, Shreve 28-19, Grimm 28-22, Hodapp 26-21, Pisani 26-23, Biller 30-21, Iverson 26-19, Sylvester 26-24, Haight 25-25, Turner 30-8, Robertson 25-20.

The winning shooters were as follows: Daniels, Nauman, and Haight tied for first medal. In the shoot-off under the original handicap Daniels won. The second-class medal was won by J. Scott Leary.

Added money race, open to all, bandicap, 25 to 30 targets. 3 moneys, high guns—Daniels shot at 21, broke 16, Knick 24-13, Hoyt 20-13, Murdock 21-18, Masterson 21-16, Jacobson 22-11, E Forster 20-19, "Woodpecker" 22-19, Robertson 20-17, Frahm 22-18, Nauman 20-19, E. Klevesahl 20-16, Hutton 25-10, "Slade" 21-19, Burns 22-15, McConnell 22-20, Fisher 21-14, Donohoe 22-15, Patrick 22-10, Haight 21-17, Turner 25-17.

Dr. McConnell won first money, Nauman, Forster, "Woodpecker" and "Slade" second money, Murdock and Frahm third money.

Fifth event, open to all, 10 targets (16 yards), 5 pairs (14 yards), class shooting, 3 moneys—Daniels 15, Pitres 14, Knick 9, Forster 17, Jacobsen 14, E. Klevesahl 18, Hoyt 17, McConnell 15, Donohoe 15, Robertson 15, Iverson 14, Sylvester 13, "Woodpecker" 9, Nauman 17.

Winners—E Klevesabl first. Forster, Hoyt and Nnuman divided second, and Daniels, McConnell, Donoboe and Robertson third money. Harry T. Hoyt was high gun on douhles.

At the Millwood Gun Club shoot on the 10th inst. George Collins and W. Price were bigh in the first event. Collins won on the shoot-off. In the second race Ashlin and Turpin tied. The third event was won hy Mr. Collins, who hroke 14 nut of 15.

In the club hadge race at 25 targets Price and Haas were tied. Price won on tbe shoot-off, scoring 9 to 5 nut of 10 targets. Iu tbe "sealed condition" event at 15 targets Kewell and Haas divided the pool. The Individual scores In tho varlous races were as follnws:

Event 1, freeze-out shoot, J. K. Orr tropby—Price 16 19; Ashlin 3, 4; Wagner 1, 2; Haas 1, 2; Van Nordcn 1, 2; Collins 17. 19.

Event 2, gold tropby, 20-target race—Kewell 16, Ashllu 18, Wagner 13, Turpin 18, Haas 15, Allen 8, Collins 13. Newlands 13, Vau Norden 17, Johnson 9' Price 17, Johns 13, Collins Jr. 8.

Event 3, shell race, 15 targets, class shooting—Kewell 12. Ashlin 9, Turpin 9, Wagner 19, Price 13, Haas 12, Van Norden 13, Newlands 10, Collins 14, Johnson 4, Collins Jr. 5, Allen 5, Johns 10.

Event 4. club badge race, 25 targets—Turpin 18, Newlands 17, Van Norden 17, Collins 15, Haas 21, Ashlin 16, Kewell 18, Collins Jr. 7, Johnsnn 10, Wagnor 12, Allen 12, Price 21.

Event 5, sealed conditions, 15 targets—Kewell 10, Ashlin 11, Wagner 7, Van Norden 9, Johnson 9, Price 9, Haas 10, Collins 8, Wayman 1, Collins Jr. 2.

At the Empire Gun Club's April shoot last Sunday, W. O Cullen's score of 21 out of 25 in the championship race was the best shot up during the day. All the scores in this event, however, show a decided improvement over last month's contests. No score below 14 made a hlatus for the fourth class in tbe money match. In the second event Webb was high gun, breaking 22 out of 25 from the 22 yard mark. Sweeney, Cullen and Allen were next with 19 breaks each. Dr. Payne, who shot himself into the first class at his initial trap shoot last month, did not shoot up to his [illegible] shot like a winner up to his sixteenth target [illegible] lost but one target whilst Cullen and Webb each had lost two. The doubles were his hoodoo, as his last ten targets in tbe money match will show. Webb's score in the special prize event, 18 targets out of 20 at 22 yards' rise, was tbe best record in that event. Nothing worthy of special note transpired in the Sweeney record medal race.

Tbe scores and handicaps in the regular events follow:

Event No. 1. Club champion race, 25 targets, entrance 75 cents, singles, 16 yards—

Cullen, W. O.	11110 11111 11111 11111 11111	24
Webb A. J.	11111 11111 11110 11111 11110	23
Allen, L. H.	01101 11111 11111 11111 01111	22
Roman, Con.	10111 11111 11111 11010 11111	22
Payne, Dr C. C.	10111 10101 11111 11011 11111	21

Allen	16 "	—10		—1

Tbe College City Gun Club initial shoot for 1904 took place last Sunday on the newly fitted up club grounds at North Berkeley. In the regular events L. Leavell was high gun in the Chick medal race at 15 targets. This contest is for members only and a shooter must win the medal three times consecutively to entitle permanent ownership of the trophy. Leavell has now won the medal twice, winning it Sunday after a shoot-off at 10 targets with Reed and Schmidt.

R. C. Reed was bigh gun in the club medal race at 25 targets. In the Cup race at 20 targets all contestants shoot the first 10 targets from the 16-yard mark and are handicapped as follows for the remaining 10 targets: 9 and 10 breaks, 20 yards; 7 and 8 breaks, 18 yards; 5 and 6 breaks, 16 yards; 4 or less, 14 yards. Winners each month will be handicapped 2 yards for the first 10 targets, on each win. The contest is open to members only and requires three wins to entitle a shooter to individual ownership of the prize. Swales shut the bigh score in this event last Sunday, in the final 10 targets he smashed 9 at 20 yards rise. Searles was high man in the "Sbell" race at 15 targets. This event is shot under sealed conditions. R. C. Reed and C. C. Juster each won a club silver bar for straight scores of 15 targets.

Before and after the regular club events practice and pool shooting was indulged in. A summary of the different scores made is the following:

				Chick Medal Race	Shoot-off for Chick Medal	Club Medal Race	Cup Race	Shell Race	Pool	Pool	Pool
No. of targets	15	15	15	15	15	10	25	20	15	25	25	25
Schmidt, W.	5	7	10	..	12	7	17	13	..	..	..	..
Leavell, L.	11	10	12	8	12	10	22	14	12	16	15	18

The Capitol City Blue Rock Club shooters held the initial medal shoot for 1904 last Sunday at Sacramento. Tbe attendance was good, but the scores of the local shooters were below the average. Tbe new Leggett trap may have something to do with it, as all the targets were thrown at unexpected angles. Possibly the shooters are not yet used to it. However, the new trap worked most successfully and is an immense improvement over the electric pull traps and throws the blue rocks more evenly, and where many misses were made at the same angle the ground where the targets alighted for a radius of a yard or two was thickly strewn with unbroken discs, and this means something to a trap shooting club.

The scores made in the principal events were as follows:

The target warm up—F. B. Adams 8, 5; Hughes 2, 2; Blair 8, 9, 7; Peek 8, 9; E. D. Adams 7, 7, 8; Seaver 9, 9, 8, 7; Ruhstaller 7, 5; Weldon 7, 6; Shore 8; Upson 7; Just 8.

At 15 targets (practice)—Ruhstaller 12, 14; Seaver 13, 14, 14; Blair 12, 3; E D. Adams 8; Shore 11, 12; Vandeford 8; Just 13; Peek 11, 9; Fissell 11, 10; O'Brien 8, 7; Cotton 7, 8; F. Adams 12, 14; Morgan 6.

Distance handicaps, 18 yards, 25 birds—Fissell 15, 17; Blair 13, 14; Just 13, 17; Morgan 10, 17; Weldon 18; Englehart 17, 14; Lower 18, 13; O'Brien 17, 16; Gray 14, 12; Seaver 24, 21; Davis 17, 11; Shore 15.

16 yards, 25 targets—Englehart 11; Lower 13, 14; Lipp 11, 16; Book 11; Blair 5; Dr. Smith 10; Seaver 24; Gray 5.

16 yards, 15 birds—Morgan 10, Englehart 14, Weldon 12, Callahan 12, Vetter 12.

16 yards, 10 targets—Lipp 3, Dr. Smith 4, Fissell 8, Book 6, Englehart 8.

18 yards, 15 birds—Fissell 7, Blair 3, Just 9, Morgan 5, Weldon 8, Englehart 9.

14 yards, 25 targets—E. D. Adams 19, R. Callahan 17, J. Cotton 14, F. B. Adams 17, Shore T. 17, D. W. Vanderford 18, J. Blair 19, C. D. Morgan 17.

16 yards, 25 targets—E. Peck 17, F. Ruhstaller 13, A. Just 18, C. Englehart 18, F. O'Brien 20, Vetter 18, Fissell 17, Weldon 18, Seaver 24, Upson 17.

San Francisco Show.

The San Francisco Kennel Club show this week at the Mechanics Pavilion, we are pleased to note, has been a great success in every respect. The entries, 534 in number, will give the show a five point rating. The A. K. C. rating for this year had been placed at three points, this based on last years entries.

Judge Mortimer handled his classes in his usual business-like and suave style, his decisions with but few exceptions being received with satisfaction by exhibitors and visitors.

The attendance was good throughout the show, the popularity of the exhibition argues the attendance of a large crowd this evening to see the special finals and the presentation of awards.

The arangement of the benching was all that could be desired, the aisles being wider this year than heretofore, thus allowing everybody plenty of room.

The judging ring, it may be said, was the best ever put up for a dog show west of Chicago. The ring was laid over with boards, upon which the sawdust was sprinkled. This gave those handling the dogs a firm footing. At previous shows there was many an upset on the hard slippery maple floor. The ring stewards did their work faultlessly. A pleasing innovation was the pinning of numbers on the owners and handlers when they had their dogs in the ring. The press accommodations were better this year than ever.

The general average of class and quality—notably so in Setters Pointers, Cockers, Collies, Bull Terriers, and Bostons, was a pleasing surprise to many veteran showgoers.

An extended report and complete list of awards will appear next week.

Victoria Show.

The third annual show of the Victoria Kennel Club opened on the 6th inst. and was a successful four day show in every respect. The entries exceeded those of last year by a small margin. Cockers had the largest representation, 63 all told. The honors were annexed principally by Portland Cocker Kennels, Dr. A. J. Garesche of Victoria, Mrs. C. W. Sbarples of Seattle, H. O. Litchfield, Mrs. J. W. Creighton and Mrs. C. A. Goodwin.

Collies were strongly represented and of splendid averaging quality. Glen Tana Stock Farm Kennels, Thos. S. Griffiths, Spokane, won a majority of the prizes. In tri-colors Glen Tana Monk got a special for best and four firsts and winners, Glen Tana Black Bahy, a full sister to Miss Tuffet, was first puppies and winners. In sables, Glen Tana Sentinel was first novice, second limit and third open. Rippnwam Bo Peep took first limit, open and winners in bitches. Ravenswood, owned by Arthur Letts of Los Angeles, won second open dogs. Prince, a Victoria dog, won first open in sables.

In Scotch and Irish Terriers, Mrs. K. Bradley-Dyne of Saturra, B. C., was the principal winner. Woodlawn Irish, owned by Mrs. W. R. Whittier of San Francisco, won open dogs and winners.

Fox Terriers were a stylish lot, in smoothe the competition was very keen, the judge finally deciding in favor of George Florence's Wandee Revelry. Novice and open bitches went to J. K. Angus' Dot and Vic. Dr. Milne's Jeff won a first and special and points enough to get a championship.

Bonnyhred Stiletto, owned by F. E. Watkins of Portland, was the classy dog among the Bull Terriers shown. Gordon Setters and Irish Setters were a good all round showing.

The Bulldog honors were centered on H. M. Papst's King Commander and N. J. Stewart's Her Majesty of

Charlcombe. Minnesota Joe was first winners in Pointers, of which breed there were fewer shown this year than last.

Englisb Setters made a grand display and kept Judge John Davidson busy. Perhaps tbe greatest surprise of the show developed when John W. Riplinger's Seattle dog Stylish Sergeant was defeated by T. P. McConnell's Count Rigo, a Victoria dog. Tben followed the wins of C. W Minor's Zola Montez over Mr. Riplinger's Ch. Elloree and Pera. As a result Mr. Riplinger is out with a challenge that Elloree and Pera can beat Zola or any other dog owned by Mr. Minor and the latter gentleman has expressed his willingness to accept the challenge.

The show was held under P. K. L. rules. John Davidson judged all breeds. a summary of the entries is the following: Cocker Spaniels 63, Englisb Setters 53, Fox Terriers 58, Collies 25, Gordon Setters 25, Irish Setters 20, Pointers 12, Irish Water Spaniels 10, St. Bernards 10, Scottish Terriers 13, Bulldogs 2, Clumber Spaniels 2, Greyhounds 2, Blenheim Spaniels 3, Japanese Spaniels 1, Mastiffs 3, Airedale Terriers 1, Field Spaniels 1, Retrievers 1, Pugs 1. Outside entries numbered 57, as follows: California 8, Portland 11, Seattle 27, Vancouver 11.

Trade Notes.

The Capitol City Blue Rock Club, of Sacramento, Cal., held its first modal shoot of the 1904 season at Agricultural Park on the 10th inst. Of the twenty-six shooters who participated in this shoot, twenty-five shot Winchester "Leader" shells, and eleven Winchester "Pump" guns. The star shooting of the day was done by W. H. Seaver, of San Francisco, shooting a Winchester "Pump" gun and Winchester "Leader" shells, Selby loading. Mr. Seaver scored 184 out of the 200 he shot at, and broke 93 out of the last 100. Mr. Frank O'Brien shooting a Smith gun and "Loader" shells, captured the Kimball-Upson Company's medal on the score of 20 out of a possible 25, in this event Mr. Seavor scored 24 out of 25, but being a manufacturer's representative, was not eligible to receive the medal.

No Use.

It's mighty disappointing when you've sat and fished all day,
And had to grin and bear it while the fish all got away.
You've done the very best you could with book and line and bait.
And nothing else remained except to trust to luck and wait.
You may as well take comfort in the lazy summer day
And feel the breeze and watch the shifting shadows in the bay,
And do your best to tell the truth when you go home at night,
'Cause there's no use kicking if the fish refuse to bite.

And when the years are passing—'most as swiftly as the days,
And you find the things you longed for bave all turned to other ways,
It's better to appreciate tha laughter and the song
Than take a solemn vow that all the world is going wrong.
It's hard to be convinced that you have struck a losing chance
No matter if the game he love, ambition or finance.
But the days are full of sunshine and the stars all shine at night,
And there's no use kicking if the fish refuse to bite.

—*Washington Star.*

The Poetry of Trouting.

It is a beautiful sight and a seductive example of the gentle art of angling to watch the accomplished fisherman drop his flies lightly upon the surface of a trout stream and float them deftly and tenderly over or past the spot where presumably some trout lurks. The skill with which the angler avails himself of all the possibilities of baok or bush to cooceal his form or shadow from the sky and suspicious trout he would entice; his close attention and steady silence; his ready acceptance of the passing breeze's mood that would waft his fly, as with loving care, to the very spot he would have it fall, or his defiance of it, the ethereal lightness of the feathered barb; the graceful curve of the pliant rod, and the soft, musical murmur of the braided silk as it speeds through the air; the royal beauty and knightly combativeness of the fish that is hooked—all these combine to make trouting the very poetry of angling.

But the fulness of it can not he enjoyed without the days of June. Then the year has burst into full and lusty life. The weather is soft and gracious. Earth and air and sky are attuned to universal gladness. The streams sing with joy. The meadows are draughts of sweetness. The trees nod hearty greetings and beckon one to enjoyment. June is the time to think tenderly and lovingly of the brook among the hills; of the pools where gliding rapids grow calm and willows cluster and manzanita, oak or laurel throw their dancing shadows; and of the savory, lusty, beauteous creatures that lie in wait beneath the ripples and the foam flecks and the darkening eddies.

Pity the man into whose later life there comes no memory of a day such as this—an early June morning; the old road through shadowing woods, past fragrant fields, by knolly stretches; he eagerly afoot upon it, with rod and creel.

One bright-eyed songster of the wildwood is just astir and piping cheerily to bim. The breeze carries the greeting to other feathered confreres and the others toss theirs along. Birds that are not of the plumage of the pioneers join their matin voices in the chorus, until the music-laden air is bearing here, there, and everywhere, the gladness and the sweetness of Nature's jubilate.

A frisky tree squirrel peers at him cautiously from the crotch of a white oak tree. The fussy jaybird flutters and fumes from bough to hough in noisy protest agaiost his proximity. The leaves tremble and shake and scatter down little showers of silver that will glitter like jewels by and by when the sun sees them.

Tree and shrub and flower, bathed in the morning's moisture—fresh, unsoiled, and full-fed—partake of the joy and health he feels, and every flying, running, creeping thing is refreshed and satisfied.

Then, by and by, from beyond the dark green stretch of trees, from which the road turns to seek a pleasanter way, he hears the brook sing and shout to him; and now he greets it face to face, and follows it where its ripples merely kiss his feet, and anon where he must brave it in dark pools that frown and grumble, and where cataracts are angry, where bold, jagged rocks warn him that danger is about them, and deep ravines echo with the sullen voice of waters held in check against their will.

He follows it through shadowy woods and suolit fields—here where it murmurs peacefully by grassy banks, there where it leaps in wanton recklessness from rock to rock, yonder where it glides io dark, smooth reaches by overhanging clumps of alders that nod and touch their tips above it.

All moods of the brook are hut changing joys to him. And he casts his flies lo pool aod ripple and alder stretch, demanding trihute from them all, until at last hero is the ancient bridge across tbe creek. its timbers decaying and awry, for its only use for years has been to cast shadows on the water for trout to lie beneath when the sun throws down too fiercely its noonday rays—tho old meadow just beyood, and the b'g oak on the hank, spreading its great mat of shade on the grass beneath it—the spot for luncheon aod pipe and an hour's rest.

Lying in the cool shade of the waviog oak, the smoke of his pipe curling ahout In the soft June air, he seos the sky, as bluo as blue can be, with here and there a fleecy cloud scudding across it, and swallows dashing and flitting up and down, high and low and never resting.

He soes the row of green bushes that grow along and clamber over tho rickety worm fence that marks the line between tho meadow and the woods beyond, and tho cool grove of oak, laurel and manzanita climbing the hill, and the old farm road that winds around it, shady and grass-grown. He sees the meadow green and level, stretching away and away, with the cows standing in lazy groups under the big oak trees, nhewing, chewing, their eyes closed, and their breath mingling with the fragrance that even the bees can never roh the clover blossoms of, although they work all the livelong day.

And he sees the brook, and hears it as it goes singing down through the meadow, now hiding a moment behind some alder thicket, then flashing into light again, and dancing laughingly on its way, flitting off at last into the woods where the meadows ends, and losing itself among their shadows.

He sees and hears it all, and but for the brook singing and dancing on its way he might long lie willingly there, indolent, amid the humming of the bees and the fragrance of the meadow blooms, and wishing there was naught in the wide world but sun and sky and bees and clover. But the charms of the brook woo him even from the languorous ecstacy of them all, and again he courts its every mood and caprice, until at last wholesome weariness and the departing sun warn him that the rare June day is dying, and he trails homeward with the evening shadows and the sweet-breathed kine.

Ah! the memory of it! And pity the man who hath it not!

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

April 23—Saturday Contest No. 5. Classification Series, Stow lake, 2:30 P. M.

April 24—Sunday Contest No 5. Classification Series, Stow lake, 10 A. M

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 1-May 1—Open season for shrimp.

Sept. 10-Oct. 16 -Close season in tidewater for steelhead.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

April 17—Golden Gate Gun Club. Blue rocks. Ingleside.

April 24—Home Gun Club. Pinole.

April 24—Millwood Gun Club. Blue rocks. Mill Valley.

April —Capital City Blue Rock Club. Agricultural Park, Sacramento.

May 1—California Wing Club. Live birds. Ingleside.

May 1—College City Gun Club. Blue rocks. North Berkeley.

May 8—Union Gun Club Blue rocks. Ingleside.

May 8—Empire Gun Club. Blue rocks. Alameda Point.

May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

July 1-Feb. 15—Dove season open.

Nov. 1-July 15—Deer season closed.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 16—Seattle Kennel Club. Seattle, Wasb. Charles McAllister, Secretary P. K. L.

April 28, 29, 30—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary, San Jose, Cal. P. K. L.

May 4, 7—Southwestern Kennel Club Los Angeles. P. K. L.

THE FARM.

The Science of Breeding.

In the last issus of the *Live Stock and Dairy Journal*, Mr. Edward W. Howard of this city makes the following well timed comments upon the above named subjects:

In your Decemher issue thers appeared an article entitled the "Science of Breeding," hy Peter J. Shields, which I have read several times over, and each time found new food for reflection. It seems to me that a discussion of this suhject would be heneficial to sll of us so-called breeders, and to start the ball rolling I should like to ask how many hreeders are of the opinion that it can he determinsd with any degree of justice by our agricultnral colleges or other investigators, "Which of the various breeds are the bettsr for the purpose for which they are bred?"

I agree with Judge Shields as to the desirahility of having answers to the many yet autboritatively unanswered questions relative to breeding, hut whsther it could he determined, which is the best beef hreed, or which is ths hest diary hreed, I have my doubts. Would not the decision of such an experiment havs to he qualified by scme such statement, given such and such conditions, and such and such a breed will he the hest? Agsin, who shall determine tbe point as to whether ths individoals of the various hreeds comprising the test are an equally good average of those breeds? Even if such an experiment were undertaken, would not its value be doubtfnl in that what might he ths most profitable breed today might he forced to take a hack seat tomorrow? For experience, I helieve, has taught that the efficiency of a breed is dependent in great part upon ths intelligence, aim, and degree of care exercised in handling and developing the individuals hy those behind the breed, or in other words, the breeders themselves, for it has been found that when natnre and environment ars ths sole moulders a reversion to an original type suited to the environment of the individuals, and not to the use or requirements of man, at once takes place.

The characteristics, then, upon which the best breed would bs judged are artificial or developed charscteristics, and as such will they not be on the increase or decrease in a given breed, as compared with some other breed, and will not this even be the case hetween different lots or herds of individuals of the same breed? That these are the facts is evidenced by the different values placed upon cattle bred hy one man and those of some hrother hreeder, though in many cases they have started their breeding operations with very much the same foundation stock as far as blood lines and individuality are concerned. So long as the personal factor is so important a one, our experiment stations would have to inaugurate a continual experiment, or say one every six months, and the man that wished to be breeding the real thing would have to change his hreed as often.

Still another difficulty presents itself to my mind; climate and other conditions are various and varied in different sections, and under various conditions of nse and environment various hreeds will be found to he the best breed. Would it be wise or just, say to blacklist the Jersey because under certain conditions, hy reason of her more sensitive and highly strnng nature, she proved to be unahle to compete with her more hardy sister, the Holstein? I think not. Would it be right to say that the Short-Horn unqualifedly is the hest beef hreed, because in the long run they retain their type and scale better than say the smoother and mors compact Hereford or Angus? In fact, I believe there is room for all the improved hreeds.

I agree with Judge Shields in the desirahility of a unity of type. The effort of our agricultural colleges and stats fairs should be, to teach the farmer and breeder which is the hest type, not hreed, for the production of beef. That is, what type of animal does the market pay the highest price per pound for, and how to handle and feed this type to produce the largest value of heef for the least money. That individuals of this type can be found in all the beef hreeds I have no doubt.

Again, in the dairy hreeds, let them teach the farmer and breeder which type, not hreed, is most likely to carry with it dairy qualities in excess; that they may make intelligent selection and know a dairy cow when they see one whatever the hreed. Let them hammer away at color crazes and other fads and teach ths hreeders that utility should he the main object, not something nice to look at. That pedigree without ths individual is worthless; that it is an index of the future accordingly as the lins of blood represented has produced in the past and nothing else. Hence the necessity of recording past performsnce to acquire future improvement along the lines desired.

I helieve that a great deal has been done along these lines already, and as a result the various heef breeds are approaching more and mors a standard type, whsther they be "Black Skins," "White Faces," or "Red, White, and Roans." Whether the diary breeds are moving as fast towards a common standard of type and performance, I would like to hear from the diarymen.

Ths smooth, compact, early maturing animal is the hest for heef production. What is the best for disry capacity? I have read that recent experiments show ths large, hardy type of diary cow to he the best for the purpose for which the dairy breeds are hred. What is your exprience, hreeders of Jersey cattle? Does your larger type produce more profitahly as a rule than your mors refined type? If so, breed them larger even if you have to sacrifice some refinement. It seems to me that many of these questions can be answered hy the hreeders themselves if they will systematically ohserve and record their observations. Moreover, if they find out something worth knowing, don't be afraid to put your neighhors on. Co-operation in more ways than one will do a great deal to dispel the clouds of prejudice and ignorance on these subjects. Co-operation with each other, co-operation with the agriculture colleges, co-operation with the pedigree record associations. And in this matter of recording let us move for a recording of performance as well as a mere list of names, that we may sift the chaff from the whole grain, that we may guard against just such unfortunate occurrences as Judge Shields relates; namely, to breed to a bull which he too late found to have heen bred by a man strongly inoculated with the color craze. Remember that the men that have made a success of hreeding have made a life study of their subject, tbat they have proceeded cautiously trying out their sires before hreeding them to their best females, discarding those which though they might appear to he like were shown to be not alike; that there is more to a breeding animal than appears to the eye is to he learned from the operations of successful breeders of the past, for their success was often due to the liberal use and concentration of the blood of some one sire. Of such an animal it can he truthfully said that like produces like, and of such a one only.

There is a strong temptation to purchase young males because they are cheaper. Then the tendency is to use the male too young, hecause he is needed. Hogs are at their hest from 18 months old to five years old. He will hreed a good deal earlier.

When You Buy a Cow.

When you go out to huy a cow whst do you look for; or, in other words, what kind of a cow meets your idea of a profiahle one to purchase? If you are buying for your own use the sooner you learn to depend entirely upon your own judgment the better. Almost every farmer has the plsasing impression that his cows are hetter than his neighhor's and no matter how honest the man may he when the cows sre hought you are the one who has to prove whether or not they ars profitahls. We do not care as to size, althongh some of our experiment stations have tried to prove larger cows the more profitahle; we think it is in the cow, not her size. Ons must learn to form his opinions quickly and size up a cow upon short notice and the faculty to tell a good or poor cow by examination comes from such a type. If one will study his best cows he will ohserve that they have certain similar characteristics, no matter what the breed or size of the cow may he.

We do not like the smooth (slick looker as she is often called) cow, yet she is always the easiest one to sell. She carries a good looking udder, is good sized, and would make fair heef if knocked down at once; hut mark you, she takes good care of herself before she does anything for you, and a good share of her food goes to supply the clothes on her back. We like to see tbe cow in moderate flesh, not poor or thin from lack of food and care. We like the hips wide apart, thin tbigh, large harrel, and the ribs wide apart; a good wide space hetwesn the hip and the first rih. Run your finger along her backhone, and the rougher it is the better. We like to see the cow thin just hack of the shoulder so that the hackhone is rather prominent there. If she is thick there do not huy her. Shs takes too good care of herself. We are simply in want of a machine that will work up the food we give her into the more profitable product, and the less toll she takes and the less she wastes the hetter.

We have taken pains to ohserve in our own herd that the unprofitahle cow nearly always was thick just hack of her shoulders. We like to see a small neck, clean cut, a good wide dishing forehead, a good eye, and large clear nostrils. Deliver us from the Roman nose cow; she's coarse everywhere else. Good large tortuous milk veins, running well forward; these indicate that hlood flows, and plenty of hlood must reach and return from the udder. We do not like a cow up on legs too fsr, as it means that her barrsl is too small to hring it close to the ground; avoid the straight under line.

The real finishing work is in the udder, and we will have our ideal in this; running well up in front and high up in the rear, teats of good size well placed, and far enough apart so that you can milk her without continually hitting knuckles. Fat, fleshly udders are no good; they should milk down well, he soft and flexihle, and have plenty of tissue to perform their work. We have not said a word about hreed, as that is not what we are after; it is the type of cow that is to make the most good milk for us at the least expense. Neither does the price of a cow cut any figure. The price of ordinary cows ranges from $30 to $60, but there may be more profit in the $35 one than in the one costing $60. When you see a cow you want, buy her; $5, $10 or $20 difference in price is nothing compared as to whether she will make 150 or 350 pounds of hutter in a year, or give 3000 or 7000 pounds of milk. You will usually find it is the large, smooth cow that commands the hest price. She is not the hest cow to buy, and you are buying, not selling. We ought to study our cows and find out why this one gives twice as much milk as the one beside her under the same conditions. There is a reason for it, and even nature, they say, reveals her secrets to the patient, unweary student, and when we find this reason we shall know how to pick out good cows.—*H. G. Manchester in Rural New Yorker.*

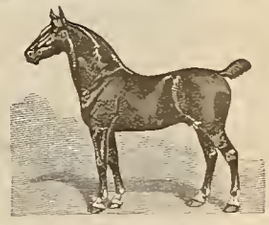
Sale of Tule Lands.

Through the real estate agency of Edward Dinkelspiel, of Suisun, a deal was consumated a few days ago, whereby Mrs. Catherine Joyce sold a tract of about 200 scres of tule land adjoining Suisun on the northeast, to Daniel and P. Danuser of Humboldt county, the consideration being $5000. Mr. Daniel Danuser and family are now in Suisun to reside until a dwel'ing house can be built on the land. It will probahly be erected on the southwest corner of the property on a line ahout due east of the last house on the east side of Union avenue. It is the intention of the purchasers to huild a levee around the land and reclaim it. Soms of it will be seeded to grass and grain, while the remainder will ne used as pasturage for stock. It is the purpose of Messrs. Danuser to conduct a dairying business, with which they are familiar, having heen engsged in that business in Humholdt county, where dairying is extensively followed on marsh lands that have been reclaimed.

The reclamation of this lsnd will be a great improvement and will no douht stimulate other owners of tnle lands in the work of reclamation. This land is very fertile and immensely productive when reclaimed, as has heen demonstrated in many places.—*Solano Republican.*

A large block of range lambs was recently sold in Chicago, and the animals were so exceptionally large and fine that they attracted universal attention and went to the very top of the market. They were the product of heavy, coarse-wooled mutton-type rams snd large grade Merino ewes. The hreeder and grower of these lambs was particular to say that especial pains was taken in selecting the mothers, and to that fact was attrihuted very largely the size snd qnality of the lsmbs. This is a pointer to hreeders of animals of all kinds to place more dependence upon ths females than is generally done. Our people are too prone to think that anything will do for a mother when breeding live stock of any kind and to that fact is largely due the slowness with which our flocks and herds are improved. We should get away from the idea that the sire is the whole thing.—*Denver Field and Farm.*

There seems to be an almost universal opinion among young breeders that to get the hest results, two good hreeds must he crossed. Whenever it is attempted it is a mistake. The varieties we have are the result of long, careful selection and careful hreeding. For a novice to attempt anything better would he a mistake. Let him select what he wants and stick to it.



WILL NOT SCAR OR BLEMISH.

GOMBAULT'S

CAUSTIC BALSAM

Is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cautery or firing.
It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.
Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY Cleveland, Ohio.

Poultry Notes.

Under no circumstances should misshapen fowls be kept in breeding.

One of the main objects in breeding is to keep up size and constitutional development; unlimited range for fowls is not necessary, although it is great saving of feed.

On the farm after the chickens pass the sixth or seventh week, they can pick up a good part of their living.

Economy and good management go hand in hand in poultry breeding to make it successful.

The possibility of profit in raising turkeys comes from their ability to pick up for themselves a good living a good part of the time.

The most widely popular breeds of chickens are those which combine good size and form with good egg producing ability.

Under average conditions fifty fowls is as many as should ke kept in one flock, and usually they will pay better than a larger nnmber.

One objection to keeping old hens and pullets together is that the old ones boss the pullets and are apt to secure more than share of feed.

Too heavy feeding and want of exercise tend to harrenness not only among fowls, hut among all kiuds of animals.

Keeping fowls on hard floors or runs will frequently cause swollen feet and legs. They must have some loose ground to scratch over to thrive best.

There is no excuse for keeping poor fowls when a flock of good fowls can he secured at so small an outlay.

There is nothing better, whether the yards are removable or stationery, than turning the ground thoroughly hy spading or light plowing where the yards are more extensive in dimensions.

A hen without restraint may pick up enough of the bone and egg shell material if her range be varied, but in confinement she will fail to get sufficient from ordinary food and a supply in the shape of lime, oyster shells, or ground hone must be given.

After chickens are one-third or one-half grown, coarse and milky food may he mixed with their grains to an advantage, hut it will not pay to feed too costly food to chickens intended for market.

With poultry, as with other stock, one of the main objects of hreeding is to keep up size and constitutional development of the hreeding stock and to breed from stunted and immature hirds is to defeat what we are striving for.

The advantage in using pounded or broken oyster shells in preference to those that are ground is that the sharp pieces are the more desirahle as they assist in grinding the food in the gizzard, which is not the case where they are finely ground.

When making a start with poultry in selecting your hreed he governed largely hy your market and what you propose to do. If eggs are to he made a specialty get some of the non-setting breeds. If you want to raise hroilers you want a quick maturing breed that fatten young and will make a good weight in a short time.

On the farm there is no occasion to he lavish in food during the growing season. If the fowls can he given a free range, and they can on the majority of farms, they will pick up a good part of their living from the time they have made a sufficient growth to he given a free range and the cost of feeding he made very light.

at the same time.

WESTERN MEAT COMPANY
SAN FRANCISCO, CAL.

The sensation in the Denver meat trade last week says *Field and Farm*, hinged on a bunch of spring lambs raised by Colonel Grubh of Garfield county. They were dropped on the 10th of January and were served as Easter mutton at one of Denver's fashionable hotels. At the age of eighty davs they weighed seventy-eight pounds and hrought eighteen cents a pound or a total of $14.04 each. The joke about these young Shropshires is that they were grown outdoors, waxing fat in the Colorado sunshine without graiu. Who can say that sheep do not pay when hred and fed right by a ood farmer.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Chickens, turkeys, ducks, and geese may he readily improved hy the purchase of a pair or two of hirds or a setting or two of eggs.

Sale of Shropshire Sheep.

J. B Hoyt, a prominent stockman of Montezuma hills, has sold his entire stock of Shropshire sheep, consisting of over 200 head of thoroughbred ewes and lambs, to Lambie Bros., who are the owners of over 2000 acres of farming lands and stock ranges near Denverton. Lambie Bros. have extensive stock interests including horses, mules and cattle, and are now arranging to add sheep raising to their holdings. Mr. Hoyt will continue in the sheep business but simply desired to close out his stock of Shropshires.

—o—

Several tests made under the supervision of Professor E. B. Voorhees of the agricultural experimental station at New Brunswick, N J, recently have proved that H. D. Roe of Augusta, N. J, has a Holstein cow which holds the world's record for producing milk. The record shows that in seven days the cow gave 620 95 pounds of milk and 26.87 pounds of butter fat, which produced 34 42 pounds of butter. The record for thirty days is 2640 pounds of milk, 110 1-10 pounds of butter fat, making 127 6-10 pounds of butter.

The cow is named Aggie Cornucopia Pauline and has been valued by the Holstein-Friesian Breeders Association at $10,000. For the tes s the cow was milked four times each day.

—o—

Within recent years many changes have taken place in hutter making. It was formerly supposed that most any one who was neat and tidy could make good hutter. Since investigations have been pu sued along scientific lines we find that it requires skilled labor, says *Stockman and Farmer*. The men who are pursuing dairying at our schools now are possibly twenty-five per cent in advance hoth in education and skill of the students who took dairy work seven or eight years ago. As we look the country over we find the people who have become famous in the dairy world are men of unusual intelligence, who would undoubtedly have made a success in most any other line of business.

—o—

Talking about practical demonstration, writes a correspondent, I was at the farm of an Angus breeder recently who had in his yards 100 fat steers. The greater portion of these steers were well hred fellows, on the whole a good average lot, even more than an everage lot, but in the lot were two full hlood Angus which the owner had considered too poor individually for use as sires and in consequence had castrated them. These two steers were hog fat, in fact finished, while the remainder of the l t would require three to four months more feeding to put them in the same condition. Question—Why breed grades.

Trotting Horses

in being shipped about from place to place on a circuit, subject to all kinds of weather and consequent changes in temperature are very likely to fall sick, *chills, colic, colds, pneumonia, &c.*, may take them at any time. Avoid trouble in time by having a supply of

Tuttle's Elixir

ever ready to hand. It is invaluable in such cases and for hurts, bruises, splints, spavins, &c *The best body and leg wash known.*

Used and Endorsed by Adams Express Company.

Tuttle's Family Elixir cures rheumatism, sprains, bruises, etc Kills pain instantly. Our 100 page book' "Veterinary Experience" **FREE.**

Tuttle's Elixir Co., 467 O'Farrell St., San Francisco, Cal.

Beware of so-called Elixirs—none genuine but Tuttle's. They raise blisters; they offer only temporary relief.

KENDALL'S SPAVIN CURE

When you strike a stubborn case of Spavin, Ring Bone, Curh, Splint or any other form of lameness, use

KENDALL'S SPAVIN CURE.

Men who bave used it all these long years assert that it is infallible in the treatment of these diseases of the horse. You need not take our testimony—take tbeirs.

ELKTON, S. D., March 7, 1902.

Dr. B. J. Kendall Co., Enosburg Falls, Vt.

Gentlemen:—Please send me a copy of your "Treatise on the Horse and His Diseases." My father cured **two spavins,** one on each of his horses, and used only three bottles of Kendall's **Spavin Cure.** I know just what your remedy is. Two of my neighbors used the **Spavin Cure for Curb,** and they cured them completely. The legs are left in good clean shape and there is no sign of any spavin or curb. I am using one of the horses on my farm to-day and you could not tell that he ever had a spavin.

Very truly yours, GEORGE SEARS.

For sale by all druggists. Price $1; six for $5. As a liniment for family use it has no equal. Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address,

THE STANDARD BRED YOUNG STALLION

HIGHLAND (TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON..................$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos Sanchez in charge

$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur Prompt and careful attention in all cases Pasturage furnished to mares sent from a distance at $2 50 a month.

A DICTATUS MEDIUM PURSE OF $100.

I will give a purse of $100, with entrance money added for a race, best two in three, open to any and all colts from DICTATUS MEDIUM, the result of the breeding season of 1904, either pacers or trotters Must be three to start and race to come off on Hollister track, Fair week, 1907 (Exact date to be hereafter announced) $5 entrance money, payable June 1, 1905. $5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address **R. P. LATHROP, Hollister.**

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail kind and gentle with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24. but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Willson's yearling LITTLE MEDIUM, paced an exhibition ¼ mile on the Hollister Race Track in 38¼ seconds, a 2:33 gait. This colt has great promise

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11¼), by Happy Medium, grandsire of the dam of Lou Dillon 1:58½. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25¼

Son of Sable Wilkes 2:18 and Fanny Bayswater, Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10¼

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL. Fee $40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

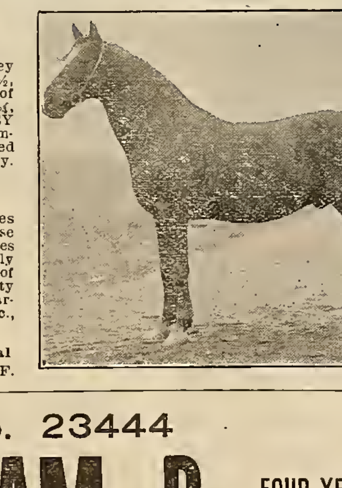
SIDNEY DILLON 23157

Sire of { LOU DILLON 1:58½ (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06¾ (the fastest mare of 1901), B. S. Dillon 2:16¼ and Captivity 2:28½.

SANTA ROSA STOCK FARM

SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19¾: dam Venus (dam of Adonis 2:11½, Leah 2:24¾, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27¼, sire of dam of Directum 2:05¼ SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.



Terms for the Season, $100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage $4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes For particulars regarding shipment of mares, etc., address **FRANK TURNER,**
Supt. Santa Rosa Stock Farm,
Santa Rosa, Cal

Or IRA PIERCE, 728 Montgomery St., S F.

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15¾
REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By **PIEDMONT 904** (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10¼, Alta Vela 2:11¼, etc., etc.); dam **LULANEER** (dam of Limonero 2:15¾, Bion 2:19¾) by Electioneer 125.

LIMONERO 2:15¾, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track LIMONERO 2:15¾ got his record as a three-year-old in the fourth heat of a six-heat race for a $5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15¾ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee $25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes Mares should be shipped to University Station, Los Angeles Co., Cal, in care of

HARRISON G. ARMS, Owner — **J. H. WILLIAMS,** University Station, Los Angeles, Cal.

KINNEY LOU 2:07¾

(Winner of $11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE. Service Fee, $100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylock 2:15½ and Ned Winslow 2:12¾. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr, next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions,

For further particulars and card containing tabulated pedigree, address

BUDD DOBLE, 1030 Pacific Ave, Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09¼, champion 4 y. o. of 1903 (half mile :59¼), OUR LADY (trial 2:20¾) and full brother to JOHN A McKERRON 2:04½' (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½, Who Is It 2:10¼, Stanton Wilkes 2:10½, Claudius 2:13¼, Georgie B. 2:12¼, Bob Ingersoll 2:14¾, Tidal Wave 2:13½, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04½, Nearest 2:22½ and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05¼, Direct 2:05½, Direction 2:10¼, etc; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462 sire of Echora 2:23½ (dam of Direct 2:05½) and 16 others in list: third dam Tiffany mare (dam of Gibraltar 2:22½, sire of Our Dick 2:10¼, Homestake 2:14¼ and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15 3 hands and weighs 1200 pounds: well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, $40 for the Season. Usual return privilege. Excellent pasturage at $4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed For further particulars address

Telephone: Red 1431. T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¼, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28½ (trial 2:22): The Boquet (4 y. o. trial 2:17½): Majella 2:29 (4 y. o. trial 2:13¾).

Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fidelia (dam of Fidette 2:28½, dam of Mary Celeste 2:17¼) by Director 2:17: second dam by Reavis Blackbird 2:22; third dam by Lancet, son of McCracken's Blackhawk. **FEE $50 for the Season, limited to 40 outside mares.**

PRINCE ANSEL

2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¼, James L. 2:09¼, Edith 2:10, etc.): dam Woodflower (dam of Seylex 2:15¾) by Ansel 2:20, son of Electioneer: second dam Mayflower 2:30½ (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 16675 Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily **FEE $30 for the Season.**

The above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at $3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2

(Officially Timed in Race in 2:08¼)

SIRE, DIRECT 2:05½, sire of 54 in the list, including Directly 2:03¼, Direct Hal 2:04¼, Bonnie Direct 2:05¼, Prince Direct 2:07 Directum Kelly 2:08¼, Trilby Direct 2:08¼, King Direct 2:09¼, Rey Direct 2:10, etc, etc

DAM, FRANCISCA (dam of I Direct 2:12½, Sable Frances 2:15¼, Guycesca 2:26 and Earl Medium, sire of May Bud 2:13¼, Tom Martin 2:14¼, Kanawah Star 2:14¼, Lucy Stokes 2:18¾, Goneril 2:24¼, Pearl Medium 2:29, etc) by Almont 33.

Second Dam, Frances Breckenridge (dam of Maximus 5175, sire of 8 in list) by Sentinel 280: third dam by Bayard 53; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagless by imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E streets, near Agricultural Park, Sacramento.

Fee $50. I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds: has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

NUTWOOD WILKES.

RACE RECORD..............2:16½
By GUY WILKES..............2:15¼
Dam LIDA W..............2:18¼
By NUTWOOD..............2:18¾

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12¼ respectively. Who Is It, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A McKerron 2:04½ (2:12¼ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES will make the Season of 1904 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = $50

For the Season

With return privileges if horse remains my property. Good pasturage at $3 per month. Bills payable before removal of mare. Stock will cared for, but no responsibility assumed for accidents and escapes.

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTING STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19½

(Sire of Monte Carlo 2:07¼, Idolita 2:09¼, etc.): dam **CRESIDA (3) 2:18¾** by Palo Alto 2:08¾; second dam Clarabel (dam of 3 in 2:30) by Abdallah Star; third dam Fairy (dam of 2 in 2:30 list) by Hambletonian 10.

CASSIAN is a high-class young stallion in every particular and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has producing blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and has every qualification for a sire of extreme and early speed, being good gaited, level headed and game.

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee $50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: $30 FOR THE SEASON.

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:20)

1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27¾) by Ensign Golddust Jr.

2d dam LITTLE BELLE (grandam of 2 in list) by Belmont (sire of Nutwood 2:18¾ and 58 more in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:20 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Cresceus 1:59¾, and on his dam's side he carries the blood of the Golddust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at $3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to McKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

PETIGRU 2:10½

Son of Kingward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:09¼, Petigru 2:10½, Lady Wilton 2:11¼ and Lemonee 2:18¾). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. **FEE $50.**

CORONADO 2:18¼

By the great McKinney 2:11¼ (sire of 8 in 2:10 and 27 in 2:15); dam Johanna Treat (three-year-old trial 2:17) by Thos Rysdyk; second dam by Venture, sire of dams of Directum 2:05¼ and Sidney Dillon (sire of Lou Dillon 1:58½, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. **FEE $40.**

SILVER COIN 2:11¼

(Record made as a four-year-old in a winning race of five heats against aged horses. Sired by the great Steinway (sire of 4 in 2:10): dam, the fast race mare Jenny Mac 2:09 by McKinney 2:11¼. SILVERCOIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual.
FEE $40.

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address

W. G. DURFEE,
Box 96, University P. O., Los Angeles, Cal.

MONTESOL

(TRIAL 2:24)

Full Brother to Lady Grannard 2:23 (trial 2:13)

Sire McKinney 2:11¼ (only sire of five 2:10 trotters), Sire of 8 in 2:10, 27 in 2:15 and 57 in the 2:30 list.

Dam IGO (registered) by Antevolo 2:19; 2d dam Daisy May by Nutwood 600; 3d dam Ralston Mare by Alexander's Abdallah.

MONTESOL, 6 years old, stands 15¾ hands, weighs about 1125 pounds: is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcyone. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before booking elsewhere.

$40 for the Season, with return privilege

POLE STAR

4 years old, by McKINNEY, dam MOUNTAIN HARE by Young Ventnre; 2d dam Rose Clark by Nigger Baby; 3d dam by imp. Trustee. Will be permitted to serve 10 approved mares at $40 for season.

The above Stallions will stand at Alameda, Danville, Concord and Pinole.

For further information address P. FOLEY Race Track, Alameda.

SEYMOUR WILKES REG. NO. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12¼ and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure

Terms for the Season $30. $50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage $3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Alta Vela 22449 RECORD 2:11¼

SON OF THE GREAT ELECTIONEER 125

(Sire of Arion (4) 2:07¾, Sunol 2:08¼, Palo Alto 2:08¾, Alta Vela 2:11¼, and 9 more in the 2:15 list, etc) Dam LORITA 2:18½ by Piedmont 904; second dam Lady Lowell (dam of Ladywell 2:16½, Lorita 2:18½, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16¾.

Will Make the Season, 1904---Fee $50---Race Track, San Jose.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, $1.00; Half-Gallon, $1.75; Gallon, $3.0 2½-Gallon, $5.50; Five-Gallon, $10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

Commnnications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, October 22, 1904.

OAKLAWN FARM, Wayne, Illinois, the greatest importing and breeding establishment in the world, has opened a hranch barn at Woodland, Yolo county, under the management of Mr. Charles K. Coleman, where they have some of the finest specimens of Percheron, Belgian and French Coach stallions ever seen iu the United States. Horses of the heavy draft and coach types are in great demand and the supply cannot he filled in the next ten years. Those wanting first-class stallions of any of the above breeds should correspond with Mr. Coleman and have catalogues sent them, or what is better visit Woodland and make a personal inspection of the stallions there. These horses can he purchased on liberal terms. In several counties in the State the eastern plan of forming companies to purchase stallions, has been introduced with success. Four or five or a dozen breeders organize a company, purchase a stallion and breed him to their own mares, also standing him for puhlic service. This plan has been found to he very successful and profitable in the east and enables breeders to purchase the very best stallions to he obtained. Letters of inquiry written to Mr. Chas. R. Coleman at Woodland will receive prompt atttention.

HAMILTON BUSBY, for so many years editor of *Turf, Field and Farm*, and a writer of long experience on harness horse affairs, has added a new volume to the American Sportsman's Library Its title is "The Trotting and Pacing Horse in America." In the 350 or more pages Mr. Busby gives a short history of the light harness horse and his gradual increase in speed from three minutes to two minutes and hetter. The champion trotters are all referred to and described and a history of the more important of the foundation families is given. There are many illustrations in the work and the volume is well gotten up throughout. There is hut little in it that has not heen prinied in the "horse papers" during the past twenty years, hut as the volume was probably designed to interest the amateur horseman and hreeder it will fulfill its mission very well, and at the price—$2, should he in every horseman's library as it gives facts and figures that are easily found hy means of an excellent index and it will therefore he a valuable book of reference.

SECRETARY GOCHER of the National Trotting Association has published a new volume. His "Ta'es of the Turf" met with a large sale and proved a successful as well as a most interesting volume. His latest is a more pretentious work and is entitled "Wadsworth or The Charter Oak" and gives a complete history of that famous tree and the hiding in it of the Colony charter hy Capt. Jos. Wadsworth. Copies of many original documents are printed in the hook, and the self reliant spirit that runs through them is a striking outline of Connecticut character. The book is handsomely bound and sells for $2. It is a valuable addition to American historical literature.

THIRD PAYMENT OF $5 will he due and payable November 1st on the foals of this year that were entered in Breeders Futurity No. 4, that has a value of $6000. Don't let this payment lapse hut make it and keep your coit in this rich stake. Remember transfers can he mnde in the stake up to March 1st next. If you pay up and your colt dies you have a chance to get you money hack. If you don't pay all chances are gone. Read the advertisement in this issue.

SWEET MARIE has done the trick again and her record is now 2:04¾. Eastern horesmen are now pretty thoroughly convinced that this grand mare will he a two minute performer if she is fitted for one mile against the watch. She does not get away fast in her races as a general thing, and trots the last part of her mile much faster than the first, hut when she learns how to get away fast her great strength and endurance will enable her to carry a two minute clip a full mile. All California is enthused over her and if she could be secured for a trial against time either in San Francisco or Los Angeles, ten thousand people would pay to see her perform.

IF YOU WANT A JERSEY for your home or your herd attend the dispersal sale of the registered and pedigreed Jersey cattle from the late Henry Pierce's Yerha Buena Ranch which is to take place at Fred H. Chase & Co.'s salesyard on Tuesday evening next, October 25th, commencing at 7:30 o'clock. The stock will be at the yards Sunday and an inspection of them is invited.

Successful Sale.

The combination sale of trotting bred horses at Fred H. Chase & Co.'s salesyard last Tuesday evening was very successful. In addition to the consignments of owners the sales of which are summarized below, these were sold from the Bellota Farm of Hon. W. A Shippee, twenty-two head of young horses, mostly only halter hroken. They hrought an average of $75 each which shows that the horse market at San Francisco is in good shape at the present time. The Shippee horses were well hred being hy standard sires and out of standard mares, and averaged well in size and looks. Had the catalogue contained their breeding in full they would have sold even hetter, and the few broken horses all attracted lively hidding and hrought good figures. Several two-year-old drafters were sold at good prices during the evening. The other sales were as follows:

PROPERTY OF J. D. CARR ESTATE.

Thishe, ch f, 1901, hy Thor–Nellie Jr; to P. M. Golden for $50.

Lildine, b m, 1894, hy Boodle 2:12¼–Gabilan Maid; to Jasper Paulsen for $90.

Cleveland, b g, 1899, hy Ecce–Mary C ; to W. D. Walker for $65.

Isahella McCa, ch m, 1893, hy Lottery–Mohawk McCa; to Jasper Paulsen for $205.

C. F. Bunch, h g hy Boodle Jr–Nina B ; to S. H. Cowell for $230.

Chestnut colt, 1903, by Dictatus Medium–Nina B.; to J. J. Donovan for $115.

Silvion, b g hy Eros–Lucky Girl; to S. H. Cowell for $190.

Bay saddle gelding; to C. H. Maddox for $115.

PROPERTY OF K. O'GRADY, SAN MATEO.

Enchantress, ch m, 1898, hy Green's Rufus; to S. Schultz for $175.

Little Boy, h g, 1898, hy Hart Boswell–Trilhy; to L. E. Clawson for $95.

May Dare, h m, 1897, hy Prince Airlie–Maid Marian; to Judson & Co. for $110.

PROPERTY OF J. DORAN.

Robert Mc, b g hy Dudley–Carmine; to M. O. Holden for $105.

The Kenney Manufacturing Company at 531 Valencia street reports the sale this week of two more of those McMurray carts that seem to he so popular with horsemen. One was purchased hy Mr. Lawton of this city, the other hy Mr. E. A. Servis of Durham, Butte county, owner of that fast pacer Edwin S. 2:08. Mr. Kenney is manufacturing a chin rest that is the neatest and hest thing yet devised to hold a horse's head up to keep him from choking. It only weighs eight ounces and is made of the best tubular steel.

"Save the Horse," a remedy that is highly spoken of by every horseman that has used it, is advertised in this issue. The company that manufactures this article has been lately organized and is ready to supply any quantity of the remedy on short notice. Mr. D. E. Newell is the Pacific Coast agent at 519 Mission street. "Save the Horse" is the great spavin cure and is sold with a positive guarantee of cure.

As a return compliment to E. E. Smathers for the performance of his famous gelding, Major Delmar 2:01¾, the Kentucky Trotting Horse Breeders Association ordered a magnificent silver cup, which was presented to him the latter part of the week. The trophy was ordered at the suggestion of Secretary H. W. Wilson.

Biflora, a green mare with a reported trial of 2:11¼, soln for $3000 at auction last week.

Consuela S. has not been winning lately but she has over $13,000 to her credit.

Sweet Marie's winnings this year are close to $25,000.

State Board of Agriculture.

The Executive Committee of the State Agricultural Society held an executive session last Saturday afternoon at which it was decided to sell Agricultural Park and acquire a new location for the race course.

Robert T. Devlin, one of the attorneys for the Society, explained the status of the title to the ground, which he declared to be perfect, and it is announced that the State will he responsible for all deeds given within the next five years.

Devlin was instructed to have the title hrought up to date, in order that the property may he advertised for sale. It was decided to divide the ground into five tracts, to be sold to the highest bidders.

A communication was received from Clyde L. Seavey, Acting Secretary of the State Board of Examiners, calling attention to the fact that the law requires the Board to present a statistical report hefore the money appropriated hy the State for the support of the Society can be available.

Director James Whitaker was appointed a Special Treasurer to hold all moneys paid on entries to stake races and keep them separate from other moneys of the Society. It has heen the practice to place stake moneys with other receipts and funds, with the result that they were paid out to meet expenses other than they were intended to meet.

Several days ago W. W. Bassett was appointed hy the Superior Court a Commissioner to sell the property to serve without compensation. His bond was fixed at $90,000. It was stated at the time that hids for the purchase of the property will probably be received early in November.—*Sacramento Bee.*

Says *Trotter and Pacer* of New York: "Messrs. A. B. Gwathmey, H. C. Mapes, Arthur Lape and A. C. Schuyler formed a group at the end of the grand stand near the judges' box watching the horses trying to win hlue ribbons at the first matinee of the Road Drivers Association on the Spweedway Saturday and talked. Every horseman who happened to pass that way stopped and had something to say in a congratulatory way to Mr. Gwathmey on the wonderful race of his great trotter, Tiverton, at Lexington a few days hefore. Among high class sportsmen Mr. Gwathmey stands in the front rank, and the only thing that could have made the performance of his horse more popular would have heen victory. It is douhtful if any man ever had more expert advice as to what to do with a horse than was freely given Mr. Gwathmey from the time he bought Tiverton until he hegan to show that he was worthy to he classed among the topnotchers. He was gruelled on the Speedway and experimented with in various training stahles. He developed traits which caused many experts to kindly inform Mr. Gwathmey that a gold hrick had heen unloaded on him; but through it all nothing could make him lose his faith that he had a high class trotter, and soon after Tiverton was turned over to John Howell he hegan to make good and now ranks among the greatest trotters of the country. His owner would he less than human if he did not feel justly proud that his confidence in the horse has been sustained. He paid $2500 for Tiverton three or four years ago and has won something like $12,000 with him, to say nothing of the good sport he had on the Speedway for a year or two.

Tiverton 2:04½ wears a novel pole on his head which is the invention of John Howell, the man who made the horse but met with an accident at Readville in which he sustained a broken leg and had to give up the great trotter to W. J. Andrews. Howell had tried the ordinary rigid stick to keep the horse's head straight, hut found that he fought it and fussed with his head. He finally hit upon the present device, which seems the most sensible thing of the kind ever gotten up. The pole is made of two hollow steel tubes, one working inside the other. The larger tube is strapped firmly to to the hit ring and the smaller one to the saddle turret. A spiral spring inside the larger one rests against the end of the smaller tube, causing a slight tension but permitting free use of the head from side to side. Howell has so far made no attempt to patent the device.—*Horse Review.*

For some little time past the Adams and American Express companies have been very good buyers of horses of their kinds in the Chicago market. It is told that hoth of these companies are laying in an extra stock whenever they can get what suits them out of a load for the reason that the managers who have charge of the equine supply departments helieve there is going to he a regular famine of such horses and they would hetter get them when they are to be had and not he put to the expense of getting different rigs at some future time.

"Al" Thomas, owner and driver of Alta Axworthy (3) 2:10½, recently purchased of A. J. Welch, Hartford, Conn., the eight-year-old mare E'la hy Altivo 2:18½, hrother of Palo Alto 2:08¾; dam Elaine 2:20, great hroodmare, dam of Iran Alto 2:12¼, etc., hy Messenger Duroc; second dam Green Mountain Maid, dam of Electioneer. E'la used to be owned by John A. Shults and while his property trotted quarters in 30 seconds hut was put to hreeding. She foaled a dead colt this spring by Axworthy (3) 2:15½. Mr. Thomas will prepare her for next year's races.

JOTTINGS.

FIFTY THOUSAND DOLLARS was paid last week by William Simpson the millionaire horse breeder of New York to Mr. H. B. Gentry of Bloomington, Indiana, for the great stallion McKinney 2:11¼. Two years ago Mr. Gentry came to California and paid Mr. C. A. Durfee of San Jose, $25,000 for this stallion and took him to his farm at Bloomington where for two seasons he has had a large patronage at a fee of $200. The fact that there is not now any boom in trotting stock and has not been for years is evidence that the price paid by Mr. Simpson for McKinney is not any more than the stallion is worth as a business investment. He is but seventeen years old, is strong, healthy and vigorous and should be a valuable horse for ten years more. He is without doubt the greatest living speed sire and for his opportunities no stallion has ever equalled him as a sire of fast trotters and pacers that race. His produce raced almost entirely in California and that he should make such a showing is nothing short of marvelous. While his list of standard performers is not as large as some few stallions of his age whose get have been hoomed and started by the score for tin cup records, he has sixty five in the list of which thirty-four or over half have records of 2:15 or better. There are twelve in the 2:10 list and seven are trotters. No other stallion living or dead ever made such a showing at any age. And the McKinneys all have race records. There is not, I believe, a tin cup performer among his entire list as shown in the Year Books. The marvelous performances of his daughter Sweet Marie 2:04¾, the largest money winner on the Grand Circuit this year, had much to do with the purchase of McKinney by Mr. Simpson. It is a satisfaction to know that his new owner is the possessor of a large number of very high class broodmares and that at his stock farm at Cuba, New York, McKinney will be given a greater opportunity than he has ever had.

Chas. Durfee, his former owner, when told that McKinney had been sold for $50,000 said: "I wish Gentry had received a hundred thousand, as the horse is worth just that much money" There was never a person more loyal to a horse than Durfee is to McKinney. If he had a hundred thousand dollars now I believe he would offer Simpson seventy-five thousand of it for his old favorite. He did not sell McKinney because he wanted to, but because he needed the money, and before he had cashed Mr. Gentry's check he would have gladly given it back and retained the horse. Since he sold him Mr. Durfee has received nearly a hundred letters from stallion owners asking him to buy or lease their stallions. "In your hands," they write, "my horse will be as great a sire as McKinney," and when Durfee reads that there is always a rise in temperature in the neighborhood of his collar. He said to me one day just after getting such a letter. "I can't see why these fellows think that I made McKinney. He made himself and I was a handicap to him. Had he been owned by a Stanford or a Hamlin he would have had fifty 2:10 performers and three hundred in the list. I had no stock farm nor any mares, and if you will look over the list of his performers you will find that not over two or three of them ever produced to any other horse. It makes me awful tired to here these fellows say that I made McKinney. Why he made me, and about the only distinction I have in my long and somewhat checkered career is that I was his owner. He has only just started as a sire. Wait until the colts and fillies he has sired since Gentry bought him get to trotting. He'll have a list of 2:10 performers and two minute trotters that will be a mark for the rest to shoot at for several generations." So don't ever tell Charlie Durfee that he made McKinney, as he won't stand for it.

Lou Dillon was beaten for the first time at Memphis last Tuesday when she started in the third race for the $5000 Memphis Cup. She was a sick mare and had a severe attack of the "thumps," and Mr. Billings pulled her up and permitted Mr. Smathers to win the heat with Major Delmar in the slow time for him of 2:07. A veterinary pronounced Lou Dillon a very sick mare, but Mr. Billings took her out and jogged her around in the second heat so as to give the affair the semblance of a race. Major Delmar's time in the second heat is reported in one dispatch as 2:13¾ and in another as 2:18½. The time made was immaterial. That Lou Dillon is not the mare she was last year is perfectly plain. She did last season what no other horse had ever done and did it more than once. A mile in two minutes or better seemed play for her, but there were many predictions that her mark of [illegible] with a dirt shield in front would be beaten this year under normal conditions. But the game little mare has so far failed to come up to the expectations of the enthusiasts although one afternoon she worked two heats in 2:02 and 2:03, something no trotter ever before accomplished, and the conclusion was natural that she was in as good shape as ever in her life. When she finished her wonderful performances last fall she had a drawn appearance and looked like a mare that had been through a hard campaign. A year's rest would doubtless have restored her to perfect condition again, especially if it could have been spent in the sunny pastures of her native State. But she was wintered in her new home and at the very beginning of her training this year gave evidence that she was not just right. Football players, pugilists, oarsmen, baseball pitchers and others are often afflicted with diseases of the heart caused by over-exertion or over-training. A horse is doubtless liable to the same affliction, and it may be that the many record-breaking miles the daughter of Sidney Dillon was asked to trot, may have left her with this organ somewhat impaired. That she is far and away the swiftest trotter the world has ever seen is beyond all question, and I hope her owner will not ask anything more of her this year, but send her back to California to romp and play among the alfillera and poppies for a year at least, that she may be restored to the full bloom of that perfect health, strength and nerve power which she enjoyed while on her native heath.

A Visit to the Malamoot Stock Farm, Saanich, Vancouver Island, British Columbia.

At the invitation of Mr. W. J. Taylor, owner of the great horse Maximo, I spent a very pleasant and profitable day at his beautiful country home, and saw some of the grandest bred and finest looking thoroughbred horses that it has ever been my pleasure to see.

Arriving at the Sydney station, via the Victoria and Sydney Railway we were driven over a good road behind Mr. Taylor's road team through the very finest country, to the Malamoot Farm which is located about three miles from the station. Upon arrival at the farm we were taken on a tour of inspection by Mr. Taylor and his trainer, Mr. Glover. The two-year-olds that are being prepared for the California winter meeting are of superb size and conformation, those by Prince Rudolph being exceptionally large and of fine conformation. They are of racy appearance and have good dispositions. After looking at the two-year-olds we were shown the great Maximo, and it has never been my pleasure to look upon a more magnificent horse. He is seal brown, full 16 hands high, 1250 lbs. weight, and from tip to tip he looks every inch a race horse. It would be almost impossible to find any fault in his make-up. He is of a type that will stamp greatness upon all his offspring; his breeding is of the stoutest and best. As a race horse he was a good one, and had not an accident stopped his racing career we would surely have held a position at the top. His sire Maxim was a great horse; his dam Daniella by Joe Daniels, a race horse and a sire which gives Maximo a double license to be a great sire.

Maximo's oldest colt on Mr. Taylor's ranch is a three-year-old, dam the great mare Miowera. He is a big slashing horse. Unfortunately he will never face the starter again owing to an accident while running in pasture. He will be retained as a stock horse and should produce speed.

A weanling filly by Maximo, dam Miowera is the star of all the weanlings on the 300 acre ranch. The get of Maximo outshow all others. Every weanling has a roomy, well-lighted box-stall, and every horse, mare and colt looks like prosperity. On every hand there is an air of neatness and good management. The covered track where the weanlings take their canter is six laps to the mile, and it is a pleasure to see these blue-blooded youngsters enjoying their gallops.

After visiting the stables and track, we spent an hour out in the meadows with the broodmares. Mr. Taylor asked me to pick out Miowera; the first pick I had her. She is a brown mare of most magnificent appearance; one that would be picked out as a great mare in any sort of company. She will surely hold a high station in the high-class thoroughbred broodmare ranks.

Muscat by Hampton, dam Muscatel, second dam Bonnie Bell, dam of winners in England is a grand looking matron and will surely add money and glory to Mr. Taylor's farm and do credit to his judgment as a selector of high-class matrons.

Maggie Burns is a handsome chestnut mare by Highland Chief, winner of the Triennial Produce and Exter stakes, Newmarket, De Trafford and Molyneaux cups and well placed in other classic events in England.

The dam of Maggie Burns was Counterpart by Thor, winner of the Grand Prix de Paris. For six generations Maggie Burns' ancestors were winners of the highest class. Mated with Maximo she should produce high class youngsters for Mr. Taylor.

Mary Alice is a grand looking daughter of the great race horse St. Carlo and imported Miowera. This mare shows greatness in every turn and will surely produce race horses of a high class.

Imported Maximillia is a daughter of Maximillian, winner of the Liverpool cup. Wild Dove, her dam, was a daughter of the Derby winner Wild Dayrell. This grandly bred matron will produce race horses of high class for Mr. Taylor.

McKinney 2:11 1-4
Sold Last Week for $50,000.

Would space permit, I would give you the names of a few more of Mr. Taylor's high class mares.

The Malamoot Farm is especially adapted to the raising of thoroughbreds, having the very best of water, feed, shelter and rolling land. Every convenience is at hand to care for and develop the youngsters. Mr. Taylor is certainly deserving of much commendation for the way his farm is arranged and conducted and for his excellent selection of blood lines.

A trip to the Malamoot Farm will convince any visitor that Mr. Taylor is not only a thoroughly well posted horseman but also a very hospitable gentleman.

C. A. Harrison.

In a report of the Galesburg, Ill., meeting an exchange says: "All of the grooms appeared on the track in white jackets and caps furnished by the management. Secretary Smollinger remarked on the first day that it took all his authority and two policeman to inaugurate the change, but it was one appreciated by the audience."

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Notes and News.

Tom Axworthy 2:08¾ is now the fastest four-year-old trotter of the year.

Henry Haws, of Johnston, Pa., now owns Tuna 2:09¼ by James Madison.

Bon Voyage is a nicely named colt His dam is Bon Mot and his sire Expedition.

Roxine by Stam B. took a record of 2:18½ at the Helena, Montana, State Fair.

Grace Bond 2:09¼ is, all things considered, the greatest three-year-old trotter the turf has known.

George Starr will train a public stable at Cleveland nexs spriog. He is not going to Russia as reported.

Grace Bond cost $8,500 and in her second start for her new owner won him $10,000, not a bad investment.

Dan Patch, in his first public performance since his recent sickness, stepped a mile in 2:04 at the Illinois State Fair.

Lord Revelstoke (3) 2:12¾ was the only colt that started in the Kentucky Futurity. The other six were all fillies.

Totara, Princess Athel and Alta Axworthy were each separately timed the first mile at Lexington in 2:10¾ or better.

Allerton 2:09¼ will lead the list of sires of new psrformers again this year. He has at least twenty new ones to his credit now.

Bingen 2·06¼ is honored with two such colt trotters as Lord Revelstoke 2:12¾ and the filly Totara, who was separately timed in 2:10¾.

William Simpson, who recently bought McKinney 2:11¼, owns the dam of Grace Bond 2:09¼, winner of this year's Kentucky Futurity.

Horsemen are now speculating as to how fast Sweet Marie could trot if trained for a fast mile against the watch. It would be close to two minutes.

The fairs at Hanford and Tulare were completely successful and well attended; complete reports of the races held there will be published next week.

It is said that Millard Sanders has no less than seventeen young Axworthys and that he intends to put them in the list at the Memphis meeting.

Zephyr 2:11 by Zombro is sound again and should be among the best trotters in her class next year. She has been a half in 1:04 over a half-mile track.

There is a report in circulation in Montana that W. A. Clark, Jr. has cootracted to purchase the Bitter Root Farm, owned by the estate of Marcus Daly.

Harry Brown of 266 Second street, Oakland, has a fine single footer for sale that is 16 hands high. She is a bay mare and drives single or double See advertisement.

Alta Axworthy's time in her five heats at Lexington was 2:10½, 2:10, 2:11¾, 2:13, 2:10, averaging 2:11. Grace Bond's time was 2:09¼, 2:09¼, 2:14, 2:16, 2:09¾, average, 2:11½.

Sadie Mc. now carries a matinee record of 2:08½ made at Pittsburg. The daughter of Peter the Great is still eligible to the 2:12 class and should be a money earner next year.

The two-year-old colt Bon Voyage 2:15, for which Mr. W. A. Clark, of Butte, Montana, paid $10,000 last week, is cheap at that price for a stock horse even if he never wears harness again.

Lisonjero won again at Memphis last Wednesday. His heata were in 2:08¼ and 2:08½. He looks like a 2:05 horse for next year as he is sound. Lisonjero is Spanish and means "a flatterer."

Mr. Geo. L. Warlow reports the death of a foal by Athablo out of Lady Harding by Athadon. The colt was but three days old when it died. It had been entered in Breeders Futurity No. 4.

One of the best things the N. T. A. ever did was to repeal the rule which forbid "sandwiching" races. With the new rule in vogue there need be no trotting in the twilight. All races can be finished by six o'clock.

Alta Axworthy 2:10½ is the largest three-year-old of the fast ones that have shown on the Grand Circuit. She is a quarter of an inch over 16 hands high. Grace Bond 2:09¼, the filly that defeated her, is a little mite of a thing under 15 hands.

Cuban 2:23¼, by Alfred G., 2:19¾, won a free-for-all pacing race recently on the Chamounix speedway, Philadelphia, in two straight heats, in the sensational time of 1:03½, 1:00¾. Cuban's dam is Spanish Maiden 2:29¾, the dam of Lizzie A. 2:13½, and Margrave 2:15¼ by Happy Medium.

King Direct 2:07¾ holds the world's seventh and eighth heat records of 2:07¾ and 2:09½ for stallions. Only one horse, Baron Grattan, has equalled 2:07¾ in a seventh heat, and curiously enough both these pacers were driven by Ed Geers.

Lymon Redmond, a well-known Pennsylvania driver, fell from his sulky while driving Noah B. 2:16¼ in the 2:14 pace at York, Pa., last week, and was picked up dead. Physicians who examined him said he was dead from heart failure before he fell.

Geo. T. Beckers reached his home in Los Angeles last week with Zombro 2:11 and a carload of horses. Zombro made a good season at Columbus, Ohio, this year and before he was shipped home Mr. Beckers refused $20,000 for the great son of McKinney.

In the light of the great speed being shown by the get of Axworthy this year, the fact that Sunol's only living foal is by that young sire makes the little fellow an object of more than usual interest. It is to be hoped that he will be trained up in the way he should go.

An error occurred in the advertisement inserted in this journal last week by Mr. Henry Struve of Watsonville. He has a fine gelding to trade for a brood mare. By mistake the advertisement stated that it was a stallion that Mr. Struve owns and desires to trade.

Al. Thomas has been offered and has refused more than one offer of $10,000 for Alta Axworthy 2:10½. Al. says she will "six" next year, and do still better the next if she stays sound. He also says she is not for sale at any price, as he is going to keep her for a brood mare.

R. O. Newman of Visalia has sold the mare Ida May by Grosvenor, dam Susie K. by Aleric—and her colt foal of this year by Robert Direct to Mr. L. Y. Dollenmayer of Hanford. The mare and colt are entered in Breeders Futurity No. 4, the guaranteed value of which is $6000.

George G. 2:06¼ did not start in the Transylvania because of sickness. He was taken down a couple of days before, his temperature running up to 106 Much uneasiness was felt about him by Geers, until he began to mend the next day. That he will start again this year seems improbable.

Sidney Dillon is to be shipped to the Old Glory Sale during the last of November. The car containing the great sire will leave Santa Rosa, and there is room in it for about a half dozen more horses. Any one desiring to ship horses east, to the sale or otherwise, should communicate with Mr. Ira Pierce, 728 Montgomery street.

Mr. J. A. Jones of Springbrook, Oregon, has transferred a nomination he had in Pacific Breeders Futurity No. 4, to Mr. Geo. Bryan of Lafayette, Oregon, who has named a colt by Captain Jones, dam Helena by Altamont. Mr. Jones had named Minmont by Altamont also bred to Captain Jones in this stake, but her foal died.

A Kentucky paper quotes Charles Marvin as saying that Bon Voyage 2:15 is a better trotter than Arion was at the same age; but unless Bon Voyage can trot a mile in 2:10¾ in November this year we shall believe that the veteran trainer is a little over-enthusiastic about his latest toy. And then Arion's mile as a two-year-old was to high wheels.

The six $5000 races of the Great Western Circuit have now all been decided, and all have been won by mares. At Galesburg the $5000 trot was won by Angiola and the $5000 pace by Fantine. At Hamline the $5000 trot was won by Izetta and the $5000 pace by Ecstatic, both of which mares repeated their achievements at Milwaukee. Make way for the ladies!

Sweepstakes by Snow Heels is a great progenitor of 2:10 pacing speed. From her came Star Pointer 1:59¼ and Hal Pointer 2:04½. From one of her daughters (Stella by George Washington) came Star Hal 2:04¾. Star Pointer sired Morning Star 2:04¾, Joe Pointer 2:05¼, Sidney Pointer 2:07¼ (the sire of Angus Pointer 2:06) and Schley Pointer 2:08½. Star Hal sired Black Hal 2:05¼.

Welcome 2:10½ by Arthur Wilkes made a good season at Watsonville this year, and some well bred mares were mated with him. Mr. Henry Struve of that place, who has him under lease, tells us that Welcome is being used this fall for general road purposes, the ladies of his family driving him everywhere with safety. There is no better dispositioned horse than this handsome stallion.

As an evidence of how fast a three-year-old can be and not win it is only necessary to state that Totara trotted the first two heats of the Kentucky Futurity this year in 2:10 and 2:10¾ and finished third in both heats. A person would naturally think, if he owned a three-year-old trotter that could beat 2:11 twice in any stake, that it would win first money; but the youngsters are goiog fast these days.

Before the close of the Cincinnati meeting J. A. Richardson, of Boise City, Idaho, owner of the pacer Oregon Maid, filed a protest with the judges, protesting against the payment of the winnings of the pacer King Direct, which won first money in the 2:09 pace on Wednesday. The grounds for the protest are that both King Direct and Ben F., who started in the event named, are owned by the same man, James Butler, of New York. King Direct is in the string of Mr. Geers, and is entered in the name of E. F. Geers, while Ben F. is entered by East View Farm, New York, and is in the string of Monroe Salisbury.

Mr. F. W. Covey, formerly superintendent of the Palo Alto Stock Farm is greatly improved in health and is arranging for a big combination sale of trotting bred horses to take place at Fred H. Chase & Co.'s salesyard in this city in the near future. Mr. Covey will be pleased to correspond with parties desiring to consigo horses to this sale. Address him care of Chase & Co., 1732 Market street, San Francisco.

A dispatch from Kalamazoo, Mich., states that on September 30th records for high-jumping horses went glimmering when Mme. Marantette sent her famous horse St. Patrick over a bar seven feet ten and one-quarter inches high at the Recreation Park fall race meeting. The best previous record, though unofficial was made two years ago at Chicago, when St. Patrick and Heather Bloom tied at seven feet eight inches.

The McLaughlin Brothers corralled all kinds of prizes in the horse ring at the St. Louis Exposition. In Percherons they practically made a clean sweep of the first three stallion rings. In aged stallions they took all the money, missing only highly commended or sixth place. In the three-year-old rings they went even farther, taking everything down to seventh and again in the two-year-old ring did the same thing. They also won first, second, third, fifth and seventh in classes for French coachers, four years old or over and they were quite as successful in the Belgic classes.

Cyrus Lukens, one of the veteran turf writers in the east makes the following startling statement: "The same influences that brought about the complaint against Mr. Smith at Narragansett brought a meeting of the stewards of the Grand Circuit convened in New York city. They reimposed the penalty of suspension agaiost Mr. Smith. But that is their own affair, and Narragansett Park is not in any way responsible for that. There has been a persistent effort on the part of a few to buy Sweet Marie, and it has been repeatedly said that offers of $15,000 were made several times. As they were not accepted, something had to be done to stop a new man winning all the way down the circuit, and it was done."

Mr. W. A. Shippee of Nelson, Butte county, advertises for sale two stallions that are well bred and splendid individuals and should be readily sold for the prices asked. Mr. Shippee has so many mares and stallions that he is compelled to offer some for sale as the increase every year is too great a tax upon his land. The stallions offered are Dictator Wilkes and Temescal. The first named is a son of Dictator out of a George Wilkes mare and is a royally bred horse. He is a sire of standard speed as well as of many large, well built horses. Temescal, the other stallion was bred at Palo Alto and is by Palo Alto 2:08¾ out of Telie, the dam of Truman 2:12 and two other standard performers by Gen. Benton. Write to Mr. Shippee for prices and terms.

Mr. E. C. Peart, the well known merchant and horse breeder of Colusa county, has recently purchased from C. E. King, of College City, the stallion Diawood 2:11, paying $1000 for him. Diawood is a son of Diablo 2:09¼. His dam is the great brood mare Abbie Woodnut by Woodnut, second dam by the French coach horse Admirable, a magnificent stallion imported to this country by Mr. J. B. Haggin of Rancho Del Paso. Diawood was bred by Mrs. E. P. Callendine of Sacramanto. His record was made in a winning race at Sacramento in 1899 when he was a four-year-old. He has been in the stud the last four years, and the first of his get to be raced is the colt Seymow that won the two-year-old pacing division of the Breeders Futurity at Petaluma last year, taking a record of 2:23, and was a close third to Friskarina, the winner of the three-year-old division this year in 2:13¾.

Barondale 2:11¼ is credited with five new performers in the list this year, and all are race records, over half-mile tracks, with the single exception of Princess Eld. The list is as follows: Ina Barondale 2:15¼, dam Princess Beatrice 2:21¾ by Billy Sprague; Princess Eld (4) 2:16¼, dam Dolly, dam of Sir Eld 2:14¾, said to be by Legal Tender Jr.; Barondean (3) 2:23¼, dam Anna Baron by Baron Wilkes 2:18; Laddie Dale 2:24¼, dam Jessie 2:21¾ by Sherman Medium, son of Happy Medium, and Miss Lady Dale 2:24¼, dam Penelope by Penrose, son of Onward 2:25¼. In addition to these five new ones Earlondale has reduced his record to 2:25¼ from 2:29¼, and the four-year-old Fashoda is trotting miles along in the 20s every time she is turned at the Fair grounds half-mile track in this city, and can go into the list any time she starts. This is a pretty good showing for Barondale this year. —*Spirit of the West.*

Among the horse breeders of Saota Cruz county is Mr. Thomas Weeks, who has resided in that county for fifty-four years, owning fine horses all that time and only breeding the best. Among others he bred Ethel Downs 2:10 and Bismark 2:29½. Ethel Downs is a half sister to the fine stallion Henry Nutwood by Henry Patchen, he by Geo. M. Patchen Jr. 31, being out of Nutwood Weeks by Nutwood, grandam Lady Weeka. The dam of Lady Weeks was a mare brought to California from the East in the early 60's and was known as Long Island Maid. Mr. Weeks bred Lady Weeks to Nutwood and the product was Nutwood Weeks, which was in turn bred to Boodle 2:12½ and produced Ethel Downs. Bred to Henry Patchen Nutwood Weeks produced Henry Nutwood. Mr. John Soper bought Henry Nutwood from Mr. Weeks nine years ago He is full sixteen hands, very dark chestnut with the best of feet and legs. His colts are almost invariably large and marked like their sire, with big open gaits and fine style. The younger generation of stallions that have come upon the scene during the past two years will reap the benefit of the presence of Mr. Soper's horse as he has many daughters in that section that will make excellent broodmares.

The Memphis Meeting.

MEMPHIS, TENN., October 13—For the first time in her career Lou Dillon, the acknowledged queen of the trotting turf, was forced to defeat. E. E. Smathers, representing the New York Driving Club, drove his champion gelding, Major Delmar, to decisive victory in the annual struggle for the Memphis gold cup today at the inauguration of the Memphis Trotting Association's meeting. Major Delmar won in straight heats, and although excuses were made for Lou Dillon no attempt was made to rob Major Delmar of any of the laurels he had earned.

The son of Delmar set the pace after drawing the pole position, in the first heat, and never allowed the mare to show her nose in front. He showed the way over the first half of the journey in almost record-breaking time, finally drawing away in the dash for home, and winning by as many lengths as his owner cared to win. The second heat was practically a walk-over.

The poor performance in the first heat caused alarm among Lou Dillon's admirers, and her trainer called for the advice of a veterinary surgeon. After a close examination Lou Dillon was pronounced to be suffering from a case of "thumps." C. G. Billings therefore decided to start his pet, only in order to allow Smathers to proceed over the course. In the second heat Lou Dillon was pulled to a slow jog, Major Delmar continuing over the mile in 2:13½. The fractional time of the first heat was 0:30¼, 1:00¾, 1:31¾, 2:07.

Sweet Marie won the 2:01 class trot in straight heats and reduced her record to 2:04¾. She completely outclassed her field.

It was a great day for Smathers. His commission was sent in on John M., in the 2:01 pace, and after a grand struggle, which lasted through four heats, George Spear landed the race with the Paris gelding.

Billings wound up the day's racing by riding his pacer, Greenline, to a new world's record under the saddle for amateurs, covering a mile in 2:14½. Summaries:

Trotting, free for-all, the Memphis gold cup, amateur drivers

Major Delmar, b g by Delmar–Expectation	(Smathers)	1	1
Lou Dillon, ch m by Sidney Dillon	(Billings)	2	2

Time—2:07, 2:13½.

Trotting, 2:01 class, purse $2000, the Diamond handicap.

Sweet Marie, h m by McKinney	(McDonald)	1	1
Dr. Strong, gr g by Strong Boy	(Spear)	2	2
Snyder McGregor, gr g by Gilman McGregor	(Hogan)	3	3
Alexander, h g by Star Duroc	(Geers)	6	4

Jim Ferry, Hall Fry and John Taylor also started.

Time—2:04¾, 2:05.

Trotting, 2:19 class, purse $2000.

Oak Blossom, b m by Baron Oaks	(Dodge)	1	1
Morini, blk h by Cicerone	(Hayes)	2	2
Getaway, ch g by Strathway	(Stetson)	3	3
Princess, h m by Sidney Prince	(Carter)	4	4

Jessie C., Betsy Ford, and Poindexter also started.

Time—2:12¾, 2:13.

Pacing, 2:01 class, purse $1000.

John M., blk g by Paris-Laura	(Spear)	2	5	1 1
Dan R., ch g by Tasco Jr.	(Benyon)	1	4	2 2
Gallagher, h g by Royal Rysdyk	(Snow)	5	1	3 d
Nathan Strauss, b g by Direct	(Thom)	3	2	4 ro
Dariel, h m by Alexander	(McDonald)	4	3	5 ro

Time—2:02, 2:06, 2:03¼, 2:03¼.

MEMPHIS, TENN., October 19.—At the Driving Park today records did not receive the expected shaking up. The most remarkable time of the day, made in the 2:05 class pace, to wagon, for amateurs, in which F. G. Jones drove Baron Grattan to victory in the first heat, covering a mile in 2:06¼, and C. K. G. Billings won the second heat with Angus Pointer in the remarkable time of 2:04½. The deciding heat of the race, as well as the final heat in the 2:07 class pace, were postponed until Thursday.

John Caldwell, the California gelding, was distanced in the first heat of the first race which was won by another California horse Bonnie Russell. Lisonjero, another product of the Golden State, won the Magnolia Stake in fast time.

The 2:07 class pace developed a grand race. Belle Mc. and King Direct each won one of the first two heats, but the fast clip maintained and the whipping finishes wore the pair out, and Sphinx S. had little trouble in capturing the third heat.

Prince Alert, driven by Jack Curry, made an unsuccessful attempt to beat 1:59½. Paced by a runner, he covered the first two quarters in 30 second each, and the third in 0:29¼, but slowed down in the last quarter and finished the mile in 2:01.

Lou Dillon has recovered from the attack of "thumps" from which she suffered Tuesday in her race with Major Delmar. She was taken out of the stall to-day and jogged slowly around the track. Summaries:

Trotting, 2:20 class, The Dividend Stake, $2000.

Bonnie Russell, b b by Conifer	(Hudson)	1	1
Brilliant Girl, b m	(Curry)	2	2
Clarence S., b h	(Sanderson)	3	3
Ozone, b h	(Foote)	4	4
John Caldwell, h g	(Thompson)	d	

Time—2:10¼, 2:11¼.

Trotting, 2:14 class, The Magnolia Stake, $3000.

Lisonjero, b g by Dexter Prince	(Howard)	1	1
Angiola, b m	(Ames)	3	2
Tuna, b m	(Curry)	2	4
[illegible]	(Geers)	4	5
[illegible], b m	(Eckers)	5	6
[illegible]	(Madison)	6	3

Time—2:08 [illegible], 2:08¼.

Pacing to beat 1:59½.

Prince Alert, h g by Crown Prince	(Curry)	fost	

Time, 2:01.

Fractional time—Quarter, 0:30; half, 1:00; three-quarters, 1:29¾; mile, 2:01.

MEMPHIS, TENN., October 20.—Grace Bond, winner of the Kentucky Futurity at Lexington, and Alta Axworthy, winner of the Horse Review stakes at Cincinnati, met here today for the last time this year to decide the question of their supremacy in their three-year form, and Grace Bond, the greatest racing three-year-old that ever lived, won the Kentucky Stock Farm stake in two straight heats, with Alta Axworthy always second, and her claim to the championship is undisputed. Five fillies fought it out in this race, but Grace Bond took the lead when she was ready, and held it as long as she pleased. Alta Axworthy was a safe second in both heats, but was unable to catch the Bondsman filly.

The 2:05 class, pacing, to wagon, amateurs to drive, which was unfinished yesterday, was the second race decided this afternoon. Billings drove Angus Pointer to another victory in the deciding heat, and the Sidney Pointer gelding circled the track in 2:06¼. This was the same time which was made in the first heat of the race yesterday, and these figures, combined with the remarkable time, 2:04½, made in the second heat, makes this race the fastest pacing race to wagon on record. Summaries:

Pacing, 2:07 class, purse $1000.

Sphynx S., c g by Sphinx	(Spear)	6	2	1 1
King Direct, blk s	(Geers)	2	1	2 3
Belle Mc., h m	(Laird)	1	3	3 2
Dry Monopole, br s	(Curry)	3	4	5 ro

Oregon Maid and Don N. also started.

Time—2:04¼, 2:05½, 2:07¼, 2:05¼.

Pacing, 2:05 class, to wagon, amateur drivers.

Angus Pointer, by Sidney Pointer	(Mr. Billings)	2	1	1
Morning Star, h g	(Mr. Devereaux)	3	3	2
Baron Grattan, b g	(Mr. Jones)	1	2	w

Time—2:05¼, 2:04½, 2:06¼.

Trotting, 2:20 class, purse $1000.

Miss Jeanette, blk m by Acolyte	(Ecker)	1	1
Electric Maiden, h m	(Dunbar)	2	2
Al Smith, br h	(Dunn)	3	3

Time—2:23½, 2:18¾.

Kentucky Stock Farm Stakes, for three-year-old trotters, value $7500.

Grace Bond, b f by The Bondsman	(Andrews)	1	1
Alta Axworthy, ch f	(Thomas)	2	2

Time—2:09½, 2:10.

Pacing, 2:12 class, purse $1000

Tillie Saal, b m by Billy Wilkes	(Wylie)	1	1
Lula May, blk m	(Carter and Benyon)	2	2
Three Feeds for One Cent, s g	(Hersey)	3	3
Little Sphynx, h m	(Curry)	4	4

Dan S., Miss Georgie, Gayety, Delpha and Rieley McKeen also started.

Trotting, 2:12 class, to wagon, amateur drivers.

Ilive, h m by Highwood	(Mr. Jones)	2	1	1
Imogene, ch m	(Mr. Billings)	1	2	2

Time—2:15½, 2:21, 2:12¾.

Board of Review, N. T. A.

Secretary W. H. Gocher of the National Trotting Association has sent out notices to the effect that a regular meeting of the Board of Review will be held at the Murray Hill Hotel, New York, at 11 o'clock A. M. on Tuesday, December 6, 1904, in accordance with the by-laws. The President authorizes the announcement, according to precedent, that either an adjourned or a special meeting of the Board will be held in New York, N. Y., in the early spring of 1905, to accommodate those whose convenience or necessities will be served thereby.

All communications intended for the consideration of the Board at the December meeting must be forwarded to the Secretary not later than November 21, and all parties who desire that their cases should be acted on at the spring meeting should immediately notify the Secretary to that effect.

The Board of Review is empowered to act in place of the full Board with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

The Greatest Five Heat Race.

That the Transylvania of 1904, won by Sweet Marie after Tiverton had taken two heats, is the greatest race of five heats ever trotted is generally admitted. It is the fastest five-heat race, the average time being 2:06 11-20. The time of the different heats by quarters is as follows:

	¼	½	¾	MILE.
First heat	0:32½	1:04½	1:35½	2:05¾
Second heat	0:32½	1:02¾	1:38	2:04½
Third heat	0:31½	1:02¾	1:38	2:05
Fourth heat	0:32½	1:04½	1:36	2:08½
Fifth heat	0:33	1:05½	1:38	2:09

Take No Chances.

There are times when it is commendable for some people to speculate and take chances. Such times have no relation, however, to taking the risk of contracting disease in one's family or among domestic animals. Any horse owner takes no chances in keeping on hand a constant supply of the well-known germ destroyer, Craft's Distemper and Cough Cure. This liquid has the endorsement of many famous veterinarians and of horse owners generally. It is also guaranteed to relieve in case of all germ diseases or the manufacturers will refund the price on request to the Wells Medicine Co., 13 Third St., Lafayette, Ind.

Last Two Days at Lexington.

LEXINGTON, KY., October 13.—Grace Bond captured the classic Kentucky stake this afternoon in straight heats in 2:10½ and 2:10¼. Good judges regarded the time as even better than that made in the Futurity, as the day was cold and cloudy and a strong wind blowing through the stretch.

The filly did not have to meet her old rival, Alta Axworthy, today, but pitted against her were all the cracks of her age, save the winner of the Horse Review stake. Grace Bond added another record to her long list of achievements by tying Sadie Mac's mark of winning both the Kentucky Futurity and the Kentucky stake, which has been in existence since 1875. Her time in both heats was also a race record for the Kentucky, the best previous mark being made by Sadie Mac, 2:11½, last year.

Five thousand people witnessed the sport, which was marked by two big dumps in the 2:17 pace, Lady Mac, a red-hot favorite, being defeated by the California gelding, Funston. In the 2:12 trot Patchen Maid, a strong first choice, after winning a heat, fell before Kirkwood Jr. Mainland, the favorite, won the last race after Miss Jeanette had taken the first heat. Summaries:

Trotting, The Kentucky stake, for three-year-olds, $2000.

Grace Bond, b f by The Bondsman–Grace Boyd.	(Andrews)	1	1
Lord Revelstoke, h c	(McCleary)	2	3
Alice Edgar, h f	(Dodge)	4	2
Totara, h f	(Titer)	3	4

Jessie Benyon, Princess Athel and Madge Wildfire also started.

Time—2:10½, 2:10¼.

Pacing, 2:18 class, purse $1000.

Funston, ro g by Dictator	(Shaw)	5	1	1 1
Maniauk, b g	(Clark	2	2	3 3
Lady Mac, h m	(Hussey)	6	6	2 2
Edgar Boy, b h	(Fuller)	1	5	d

Billy F., Bert Logon, Donnybrook and Glad Bells also started.

Time—2:09½, 2:08¾, 2:09¼, 2:08½.

Trotting, 2:12 class, purse $1000.

Kirkwood Jr., br h by Silverthorn–Leah	(Dillon)	6	4	1
Aerolite, h m	(Saunders)	5	1	2
Patchen Maid, blk m	(Starr)	1	2	4 3
Euenixte, gr m	(Thomas)	2	6	5 ro

The Questor, Ardelight, Van Zandt, Diadem, Calcine and Invader also started.

Time—2:09½, 2:09½, 2:10, 2:10½.

Trotting, 2:22 class, purse $1000.

Mainland, b h by Axtell by Kentucky Prince.	(Hudson)	4	1	1	1
Miss Jeannette, blk m	(Ecker)	1	3	4	2
Ozone, b g	(Foote)	2	2	2	6
Emily Letcher, br m	(Rea)	3	4	3	3

Harry Simmons, Poindexter, Getaway, Sunny Jim, Offertory and Helen Miller also started.

Time—2:12, 2:12, 2:12, 2:13¼.

LEXINGTON, KY., October 14.—In the first heat of the 2:20 class pace today the bay gelding Royal Bell, by Maple Bells, dropped dead in the homestretch, falling over the inner fence and carrying a whole panel down on his driver, George Swisher. The latter had a narrow escape from instant death, but left the track with only a fractured knee cap. The horse was stricken with heart disease and died a few minutes after he fell. He was owned by F. G. Camp of Oswego, N. Y.

The races, including that for the Stoll stake, were all one sided and won in straight heats, in turn by Snyder McGregor, Nancy H. and Tom Axworthy, all hot favorites in the betting.

In the Stoll stake Snyder McGregor reduced the race record of that event made by Jay McGregor last year by a second, by taking the opening heat in 2:08¼.

The meeting ended today. Grace Bond leads the winning horses with $11,000 and Tom Axworthy comes next with $3550. Summaries:

Trotting, The Stoll Stake, 2:19 class, value $2000.

Snyder McGregor, ch g by Gilman McGregor–Mag	(Benyon)	1	1	1
Alexander, b g	(Geers)	2	2	2
Hall Frey, b g	(Foote)	3	3	3
Jolly Bachelor, b g	(Walker)	4	4	4

Time—2:08¼, 2:09¾, 2:08¾.

Pacing, 2:20 class, purse $1000.

Nancy H., blk m by Gambetta Wilkes–C. F. Clay	(Hudson)	1	1	1
Bourbon, h g	(Francis)	3	2	2
Mamie Kingsley, h m	(Dean)	4	3	3
Flinch, h g	(Whitehead)	2	5	d

Loleta and Royal Bell also started.

Time—2:11¼, 2:13¼, 2:09.

Trotting, 2:25 purse $1000.

Tom Axworthy, ro g by Axworthy–Nell	(Geers)	1	1	1
Maud Maxine, b m	(Snow)	2	2	2
Blix, b m	(Grundy)	5	3	3
Czarina Dawson, h m	(Clark)	3	4	4

Clown and Lobo also started.

Time—2:13¼, 2:12¾, 2:13¼.

Harness Races at Victoria, B. C. Fair.

First Day—Trot or pace, 2:40 class, purse $250. Mr. W. H. Thompson's George D. won in straight heats, Nellie Emmett second, Printers Ink third.

Second Day—Trot or pace, 2:25 class, purse $200. Mr. William Walker's Glengarry Patchen won in straight heats, Geo. D. second, Cross Cut third. Best time 2:17½.

Third Day—Trotting, free-for-all, purse $450. Glengarry Patchen won in straight heats, Arketa second. Best time 2:17.

The heaviest money winning pacer this year is Morning Star 2:04¾ by Star Pointer 1:59½. He has won over $16,000.

The Late Thomas W. Pemberton.

Tbos. W. Pemberton who died recently in Pasadena, Cal., was in many ways a remarkahle man. Locating in the early days in that wild and undeveloped territory of Arizona, he helped found the city of Pboenix when the country was yet a harren plain, and aided materially in making it one of the most prosperous cities of the whole territory. With keen sagacity he foresaw tbe future and with that indomitable energy characteristic of him, branched out into many enterprises, foremost of whicb was a system of irrigation wherehy the harren wastes have heen turned into fertile and arable land. Recognizing his sterling qualities his fellow townsmen elected him to the Legislature of tbe Territory, and subsequently made him Territorial Treasurer, a position he held for many years. He was the principal organizer of the Pboenix Light and Fuel Company, and held the position of president and manager of the same until death ended his prosperous and honorahle career.

He established some years ago a breeding farm, being a great lover of tbe trotting borse, and purchased tbe stallion Boydello, the good son of Boydell own hrother to Delmar, sire of the champion trotting gelding of the world—Major Delmar 1:59¾. As a four-year-old Boydello was leased to Mr. C. A. Winship of Los Angeles and placed in tbe hands of the late Thos. Keating, who raced him successfully in the east, giving bim a record of 2:14¾. Boydello would no doubt he now in the 2:10 class had not sickness caused bim to be retired for the season. Later Boydello was brought to California and placed in Ed Lafferty's hands, Mr. Pemberton always claiming that he should be in the 2:10 list. While in Lafferty's band tbe stallion showed remarkable speed. In his first race that year at Santa Rosa in tbe fall of 1900, he was second to Daimont in 2:10½, hut unfortunately met with an accident that compelled him to be again temporarily retired. Mr. T. J. Crowley took the horse in charge and the following spring hred bim to his mare Lottie Parks 2:16¾ and the produce now a two-year-old has been named Pemherton. He is one of the most promising colt trotters in California. The last time Mr. Pemberton visited this city he told Mr. Crowley to take good care of tbat colt as Boydello was siring great speed and substance in his bome in Phœnix.

Mr. Pemberton had been in poor healtb for several years prior to his death, but in the days of his physical strength always took an ardent interest in the trotting borse and it was only on account of his failing healtb that be sold out his farm and all bis trotting stock to Mr J. C. Adams of Pboenix, and I don't believe they could have fallen into better hands, as Mr. Adams is an enthusiastic horseman having raced witb some success the last two seasons a few of tbe produce of Boydello.

We speak of the late Mr. Pemberton as we found him—an honorable, upright, gentleman, and his demise is a loss to the city and territory he helped to build and of whose history he was an important part.

T. J. CROWLEY.

Harness Races at Spokane Fair.

[October 3d to 8th—Half Mile Track.]

Pacing, 2:25 class, purse $500.

Prince Charles, ch h hy Charles Derhy	(Helman)	2	1	1	1

Time—2:36½, 2:32, 2:40½.

New 2:10 Trotters for 1904.

Up to the close of the Lexington meeting last week 28 trotters had entered the 2:10 list this year. Last season there were 26 additions to the 2:10 trotting list all told. Tbe list should have over thirty names by the close of the season. The new list is as follows:

Tiverton by Galileo Rex 2:12¾, dam Folly by Arragon 2:04½
Sweet Marie by McKinney 2:11¼, dam Lady Rivers by Carr's Mambrine 2:04¾
George G. by Homeward 2:13¼, dam Mahel hy Junio 2:06½
Snyder McGregor by Gilman McGregor, dam Mag by Mambrino George 2:07¼
Consuela S. by Directum 2:05½, dam Daisy Nutwood by Nutwood 2:07¾
Stanley Dillon hy Sidney Dillon, dam Athenian hy Steinway 2:07¾
Aristo by Nushagak, dam Nosegay by Langton. 2:08¼
Angiola by Gregory The Great 2:23¾, dam Arline hy Artillery 2:08¼
John Taylor by Dispute 2:15¼, dam Dolly hy Joe S 2:08¼
Lisonjero hy Dexter Prince, dam Liska 2:28¼ by Electioneer 2:08¼
Redlac hy Allerton 2:09¼, dam Grandma hy Muscovite 2:08½
Direct View hy Direct 2:05½, dam Formosa by Mansfield 2:08¾
Tom Axworthy (4) hy Axworthy 2:15½, dam Nell hy Estill Eric 2:08¾
Judge Green hy Directum 2:05¼, dam by Anteeo Jr 2:09
Aerolite hy Acolyte 2:21, dam hy Madrid 2:09¼
Grace Bond (3) by The Bondsman, dam Grace Boyd hy Ashland Wilkes 2:09¼
Gen. Forrest hy Allerton 2:09¼, dam Mist 2:09½ by King Rene 2:09¼
Hall Frey hy Woodsprite, dam Pee Wee by Fortunatus 2:09¼
Patchen Maid hy Patchen Wilkes 2:29½, dam Maiden hy Aherdeen 2:09½
Alexander by Star Duroe 2:25¾, dam by George Wilkes 2:09½
Tuna (4) hy James Madison 2:17¾, dam Ituna by Steinway 2:09½
Altro L hy Alcantarus 2:20¼, dam Itaska hy Idol (wagon) 2:09¾
Anaconda by Knight 2:22½, dam Haggin Mare by Algona 2:09¾
John Mac by Rex Americus 2:11¼, dam Caprara by Daniel Lambert 2:09¾
Kent by Wilkesward 2:18½, dam Rhoda McGregor hy Rohert McGregor 2:09¾
Jim Ferry by Orange Wilkes, dam Silver Queen hy Bacchus 2:10
Invader hy Jay Bird, dam Wild May hy Lumps 2:10
Norman B. hy Pballas 2:15¾, dam Jeannie W. hy Swigert 2:10.

Helena, Mont., State Fair Races.

[Oct. 3d to 8th—Mile Track.]

Trotting, 2:35 class, purse $300.

Satin Royal, ch h (3) hy Bonner N. B.	(Lindsey)	5	1	1	1
Roxine, b m hy Stam B.		1	3	4	2
Captron, h g hy Prodigal		2	2	e	3

Patsy, h g hy Bay Bird		dis				
Lord Constantine, h g hy Copper King		dis				

Time—2:14, 2:13½, 2:16, 2:17, 2:20.

Trotting, 2:18 class, purse $2000.

Button, hlk m hy Gold	1	1	1
School Bell, h m by Prodigal	2	2	2
Aodricus, hlk m by Milroi	3	4	3
Lady Spokane, h m by Bozeman	4	3	4
Lady Bird Jr., hy Bay Bird	dis		
The Commonwealth, b h hy Stadeland Onward	dis		

Time—2:15, 2:13¾, 2:14¼.

Billings G. won the special pace in a six-heat race; County Attorney second and Haydee third; hest time 2:17¼.

Captron won tbe 2:30 trot in straigbt heats; Bay Bird, Jr. second; Iago thlrd; best time, 2:22.

The free-for-all pace on the last day had four starters, Alpha W., Jib, Le Roi and Modicum Alpba W. won the first and second heats in 2:10 and 2:11 with Jih second. On account of rain the race was then declared finished as it stood. The free-for-all trot was ended in the same manner after Button had won two heats in 2:16 and 2:17. School Bell was second in the first beat and The Commonwealth in the second. Second money went to Tbe Commonwealth.

Eastern trainers are beginning to think of bringing their horses to California to train during the winter. This State can beat the world for tbe number of training days hetween Novemher and May. We are generally enjoying sunshine here while the Eastern fellows are sitting around the stove. It rains a few days in succession sometimes but there is not a week passes but the horses can he jogged on the roads or tracks with comfort.

Tbe racing men ought to try the Hart Apartments this winter; 3 and 4 rooms, private haths, telephone, steam heat, first class. 750 Ellis street. *tf

They Are Not Fashionable.

While white horses are not fashionable except for funerals of the young, the most fascination of Anglo-Saxon tradltions cluster around tbe white borse. To-day in the Grand Circuit we can think of a few grays, but not one of the pure white species. The hattle ensign or flag of the ancient Saxons was a pure white horse. The galloping wbite borse is the device of the House of Hanover. The rampant white horse is the device of the House of Savoy, descended from the Saxons. Rorak, the horse tbat conveyed the prophet Mohammed from earth to tbe seventb heaven was a pure white borse. Hence in all Mohammedan countries, and in Japan, the wbite horse is still tbe popular color. And the wbite horse is still popular in France. The great war horse that Napoleon rode for the last time in tbe battle of Waterloo was a pure white stallion. The favorite borse of King Richard III of England was White Surrey. Shakspeare refers to bim wben he writes "Saddle White Surrey for tbe field tomorrow." The winds that come on a windy day crested with foam on the lakes of Killarney, Ireland, are poetically known as "O'Donahue's White Horse." Tom Moore in his famous "Irish Melodies" has a poem on the subject. But poetry, mythology and tradition have heen cast to the obsolete bow-wows in tbis country, and the wbite horse is an off color. Poetry and tradition bave no commercial value.—*Ex.*

A Card to Trainers and Horse Owners.

At the close of the season of 1903 we, having received testimonials unqualifiedly endorsing and recommending the use of Camphell's Horse Foot Remedy from tbe great trainers—Geers, McDonald, Snow, Hudson, Spears, McGuire, Salisbury, Curry, Benyon, McCoy, Miller and many otbers no less celehrated, whose names, for want of space, we do not mention, puhlished an illnstrated page in the special numbers of racing journals.

Our purpose in doing this was to place Camphell's Horse Foot Remedy hefore borse owners who have not given it a trial in such a manner that its merit as a hoof grower and reliahle cure for diseased and sore feet could not he questioned, if owners were at all disposed to he influenced hy the advice and recommendation of those whose success in the horse husiness is a conceded fact. We helieve tbat the advice of men to whom are entrusted the most valuahle horses on the turf, because of their honesty and knowledge counts. These men cannot afford to, and they do not permit, "fake testimonials."

A glance over the summaries of the races in the Grand Circuit of 1904 shows that the "man hehind" the winners, in most cases, is a trainer who uses Campbell's Horse Foot Remedy, or has nsed it in fitting his stahle for this work.

The success such trainers are meeting proves that they know their husiness, and tbat tbeir advice should be given weight.

We are confident that no stable can afford to be without this remedy, and solicit a trial, assuring you tbat if resnlts are not satisfactory we will refund cost of remedy on receipt of a letter to tbat effect, no matter from whom purchased.

Nearly all dealers in harness and turf goods carry "Campbell's Horse Foot Remedy" in stock.

JAS. B. CAMPBELL & CO.,
412 W. Madison St., Chicago, Ill.

A curious discovery bas attended the investigation of the breeding of the very fast gelding Hazel Patch 2.06½. Hazel Patch is a son of Hard Patch and the latter's dam was got hy a 1300-pound general-purpose horse begotten by an imported Clydesdale stallion from a mare full of running hlood. Hazel Patch's dam is named Bell and she in turn had for a dam a quarter mare called Flora, alleged to he by Roan Dick, a very famous getter of quarter horses and sire of Bob Wade, which holds the world's record for two furlongs. Hazel Patch was bred hy Joe Thomas, Plymouth, Ill., and passed through several hands to his present owner, E. R. Flack. He was always a good fast pacer after he was waywise and as a four-year-old could pace in 2:12 or thereby. He has been a good money winner this season.

VETERINARY DEPARTMENT.

CONDUCTED BY

WM. F. EGAN, M. R. C. V. C., F. E. V. M. S.

Snhscrihers to this paper can have advice through these columns in all cases of sick or injured horses, cattle or dogs hy sending a plain description of the case. Applicants will send their name and address tbat tbey may he identified.

D. S. M, Ryder, Cal.—Can you state tbrough your veterinary columns an answer to the following: I have a very fine tbree-year old colt, lame in one hind leg in some of his three joints—hip, stifle or hock joint—the location of sprain, I am very much puzzled about. He has a hitch in his trot and tips his toe when he trots. Can you give any information through your paper ahout treatment of any kind for him?

Answer—The hitch in trotting and tripping or touching his toe against the ground wben moving generally indicate an affection of tbe hock joint, and often the coming of a hone spavin. Injury to any joint may cause dragging of the toe on tbe ground, from want of flexion of that joint. In spavin lameness a horse generally starts out lame, improves as he warms up and when let stand for a few minutes will start off quite lame again. Examine the hock joint of the affected leg tboroughly, and if there be any enlargement tbere apply the following hlister:

Beniodide of mercury, half an ounce;

Simple ointment, two ounces

Mix together and ruh well into the enlargement, once. Tie the horse so that be cannot get his mouth to the hlistered part for a few days, and do not put him to work for a month.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

W. K. L. Executive Board Meeting.

At a meeting of the Executive Board of the Western Kennel League held in San Jose on October 16th it was decided to hold a W. K. L. show in San Francisco some time during the coming winter, and a committee composed of a delegate from each club in the league was appointed to make arrangements for the coming show.

Among other business transacted was the disposition of two matters arising out of the non-appearance of certain dogs at the last Los Angeles show and of certain irregularities alleged in regard to entry fees.

The article referred to below was part of a paragraph published in the initial number of a paper printed in this city and is as follows:

"Then again, this spring, on the northern circuit from Vancouver to San Jose it was Glen Tana all the time, and what an awful walloping the much touted Ravenswood received. Four straight defeats was Ravenswood's lot, and it was a cinch for five only for a blunder (?) on the part of the secretary of the Southwestern Kennel Club. Mr. Griffith's dogs were entered at Los Angeles, but for some reason, still unexplained, the secretary answered a telegram of inquiry to the contrary. Surely the secretary ought to know if the dogs were entered or not when he was the recipient of the entry blanks and fees also."

The construction placed on the above by those most concerned was that it was intimated thereby that Mr. Griffith's entries were juggled away so that the Los Angeles dog would have a clear field, and that Los Angeles fanciers were cognizant of the affair. This led to an indignant aspersion of the gratuitous insult implied and a demand for an investigation, the result of which appears below and has the coloring of what may be dubbed "hoist with his own petard."

Bradshaw seems to be singularly unfortunate in both his editorial and show ring careers. As a judge he has received small recognition, comparatively, in entries; as a managing editor, the irregular issue of his paper proves the scribe's calling to be a task somewhat more difficult than the prodigal use of ands or the careful avoidance of spelling but with two t's.

As a trainer he has been ruled off for life by the California Coursing Board and as a dog handler he was suspended and a fine imposed by the Pacific Kennel League for objectionable conduct in connection with the Portland dog show two or three years ago. Mr. Mansell of London was the judge at the Portland show. The foregoing hard luck is now supplemented by a three years' suspension imposed by the W. K. L. as follows:

FINDINGS.

Of an Executive Board meeting of the Western Kennel League held at San Jose, October 16, 1904 to investigate certain charges made by the *American Illustrated Kennel News* against the Southwestern Kennel Club.

In accordance with the evidence submitted the Board finds:

1—That when F. H. Kirby, Secretary of the Southwestern Kennel Club wired Mr. N. J. Stewart of San Jose at 5:45 P. M., May 2d, that he had not received the Griffith entries, he had not received them.

2—That no blame whatsoever attaches in any way to the Southwestern Kennel Club, its officials or members for the failure of Mr. Griffith's dogs to be present at its show.

3—That Mr. Arthur Letts of Los Angeles is exonerated from all suspicion of having had anything to do with or any knowledge whatsoever of Mr. Griffith's entries.

4—That John Bradshaw did wire the chairman of the bench show committee of the San Jose Club to return the Griffith dogs to him in San Francisco, after the San Jose show, stating in a telegram that the dogs were not to go to Los Angeles and that it was his mistake.

5—That said John Bradshaw is alone responsible for the said Griffith's dogs not being present at the Los Angeles show.

6—That the charges made by the *American Illustrated Kennel News*, John Bradshaw editor, against the Southwestern Kennel Club are malicious and untrue.

And we therefore, under article 6, section 1, of the rules of the Western Kennel League, hereby suspend John Bradshaw, editor *American Illustrated Kennel News* for reprehensible conduct in connection with dog shows, for a term of three years from all privileges of the Western Kennel League.

Attest: NORMAN J. STEWART,
Sec'y Western Kennel League.

San Jose, Cal., Oct. 16, 1904.

FINDINGS.

Of an Executive Board meeting of the Western Kennel League held at San Jose, Oct. 16, 1904.

Southwestern Kennel Club vs. F. H. Kirby. In accordance with the evidence submitted the Board finds:

1—That F. H. Kirby did receive, endorse and cash a check for two dollars and fifty cents from Chas. R. Harker for entries and that said Kirby failed to turn over the proceeds of said check to said Southwestern Kennel Club or its authorized agents.

2—That F. H. Kirby did receive, endorse and cash a check for six dollars and fifty cents from Thos. S. Griffith of Spokane for entries and that said Kirby failed to turn over the proceeds of said checks to the Southwestern Kennel Club or its authorized representatives.

And we therefore, under article 6, section 1 of the rules of the Western Kennel League, hereby suspend F. H. Kirby, of Los Angeles, for reprehensible conduct in connection with dog shows, for life, from all privileges of the Western Kennel League.

Attest: NORMAN J. STEWART,
Sec'y Western Kennel League.

San Jose, Cal., Oct. 16, 1904.

British Columbia Field Trials Club Trials.

The British Columbia field trials for 1904 were finished on Saturday, October 1st and were the most successful in the history of the club These trials, which are said to be the only ones held over pheasants on the continent, have now come to be recognized as among the most important on the Coast. Dogs are sent there from everywhere, and to show well much less to win, means an added value to the dog, and a reputation to his family.

Describing the first place winners in the three stakes, they are all English Setters small sized dogs of the very best breeding of the day, and closely related to each other.

Count Whitstone's Chief is probably as high-class as any dog that ever ran on the Pacific Coast. His work is of the snappy, positive sort, and he makes few mistakes. Mr. C. H. Barker of Vancouver owns another of this famous little Whitestone blood, Cesant by name, who will also be heard from when thoroughly trained.

Tony's Destiny, the winner of the Membership Stake, is a small blue belton, a straight bred Llewellin, being by the famous field trial winner and most noted sire of field trial winners, Tony Boy.

Sport's Destiny, the dam of Tony's Destiny, has also been a remarkably successful dog at field trials, having won in seven stakes under different judges over both prairie chicken and quail. Tony's Destiny comes by her quality honestly, and had she put up the race in the open All-Age that she did in the Membership, would undoubtedly have gone higher. She was unfortunate in the drawing, getting the middle of the day in each of her heats in the All-Age stake. In her heat in the Membership stake she showed great speed and range with good merry tail action. Her birds were found at great distances from her handler, and held staunchly, she remaining perfectly steady to shot and wing. She is owned by the secretary of the club, Mr Norman F. Lyne

The Deacon, winner of the open Derby, is a white, black and tan straight Llewellin dog by Sousa, he a field trial winner, and a litter brother of Tony's Destiny.

Policy Girl, the dam of The Deacon, is also a field trial winner. The Deacon gave a good exhibition of range and speed, and was particularly good on birds, and showed perfect training, doing credit to his handler, H. Hansen. He is owned by Mr. Cook Inman of Seattle.

The trials were judged by Hon. Thos. Plimley of Victoria, B. C.

A summary of the three stakes follows:

LADNER'S LANDING, B. C., September 29 1904.—British Columbia Field Trial Club's second annual Derby for Pointers and Setters whelped on or after January 1, 1903. Five dollars to nominate and $10 to start. Four prizes. Twelve nominations, eleven starters. Judge, Hon. Thomas Plimley of Victoria, British Columbia.

I

Rock Line Young Roy, black, white and tan English Setter, by Roy Montez-Lola Montez; Miss W. E. Davie, Victoria, owner; C. H. Sweetzer, handler.

With

Sir Bloomfield I, black, white and tan (ticked) Setter, by Mallwyd Sirdar-Dido's Child; John Riplinger, Seattle, owner; H. Hansen, handler.

Brocton's Val's Baron, black, white and tan Setter, by Draco-Tohie's Val; Mr. Abbott, owner and handler.

With

The Deacon, black, white and tan Setter, by Sousa-Policy Girl Cook Inman, Seattle, owner; H. Hansen, handler.

Estella S., black and white Pointer bitch, breeding unknown; Miss Ella Sweetzer, owner; C. H. Sweetzer, handler.

With

Maggie, liver and white ticked Pointer bitch, by Plain Jack-Williams' Fan; Mr. MacDonnells, owner; C. H. Sweetzer, handler.

Rod's Val, black, white and tan English Setter dog by Rodfield's Lad P-Val's Lady; W. D. Frost, owner and handler.

With

Pat, black, white and tan English Setter dog by Beachgrove Earl Dudley-Lady Roberts; Gardner Johnston owner; C. H. Sweetzer, handler.

Jock, liver and white Pointer dog, unknown pedigree; Mr. Abbott of Victoria, B. C., owner and handler.

With

Iroquois Boy, black, white and tan English Setter, by Iroquois Chief-Lulu Wind'em; Mr. Jessup, owner; C. H. Sweetzer, handler.

Bob H, black, white and tan Setter by Sousa-Tohie C; Mr. Bridges, owner; H. Hansen, handler.

With

Gladiator, black, white and tan Setter, by Real John-Busy Bee; Mr Kent, owner; C. H. Sweetzer, handler. (Withdrawn; dog not on grounds).

II

Deacon with Estella S. Jock with Pat. Rod's Val with Maggie.

RESULT.

1st—Deacon. 2d—Maggie. 3d—Jock. 4th—Pat.

ALL-AGE STAKE.

LADNER'S LANDING, B. C., September 30, 1904—British Columbia Field Trial Club's second annual All-Age Stake, for Pointers and Setters which have not won first in open trials. Purse, entry fee, less fifteen per cent. Five dollars to nominate, same to start. Four prizes. Twelve nominations; eleven starters. Hon. Thomas Plimley, judge.

I

Lady Roberts, black, white and tan English Setter bitch, by Grouse P.-Tohie's Val; Mr. Abbott, owner and handler.

With

Tony's Destiny, black, white and tan Setter by Tony Boy-Sport's Destiny; N. F. Lyne, owner; H. Hansen, handler.

Estella C., black and white Pointer bitch, breeding unknown; C H. Sweetzer, owner and handler

With

Point black and white Pointer dog, by Sport IV-Perod's Daisy; Mr. MacDonnell, owner and handler

Sonsa, black, white and tan Setter dog, by Tony Boy-Sport's Destiny; A. H. Nelson, owner; H. Hansen, handler.

With

Roy's Lady, black, white and tan English Setter bitch, by Roy Montez-Victoria Belle II; Miss Davie, owner; C. H. Sweetzer, handler

Count Whitestone's Chief, white and orange ticked Setter dog, by Count Whitestone-Sport's May Belle; N. A. Wedeen, owner; H. Hansen, handler.

With

Assiniboine Rodfield, black, white and tan English Setter dog, by Hickory Gladstone-Thiers' Speck; Burrard Kennels, owners; Mr. Rolstone, handler.

King Solomon, liver and white Pointer dog, breeding unknown; R. S. Palmer, owner; C. H. Sweetzer, handler.

With

Rock Line Young Boy, English Setter dog, by Roy Montez-Zola Montez; Miss Davies, owner; C. H. Sweetzer, handler. (A bye.)

II

King Solomon with Point. Roy's Lady with Lady Roberts. Sousa with Count Whitestone's Chief. Assiniboine Rodfield with Tony's Destiny.

RESULT.

1st—Count Whitestone's Chief. 2d—King Solomon. 3d—Point. Equal 4th—Tony's Destiny and Assiniboine Rodfield.

MEMBERSHIP STAKE.

Tony's Destiny with Assiniboine Rodfield. Maggie with Lady Roberts. Whitestone Count with Val's Rose. Shot with Rod's Val.

RESULT.

1st—Tony's Destiny. 2d—Assiniboine Rodfield. 3d—Maggie. 4th—Lady Roberts.

New Westminster, B. C., Show.

The annual bench show of the New Westminster Gun Club was one of the features of the Royal City fair. The entries numbered nearly 200; with 130 dogs benched—a notable increase over the Spokane show entries and dogs benched during the same week, and a testimonial of the drawing powers of Judge Frank H. Turner of Victoria, B. C. against J. W. Bradshaw of this city who handled the ribbons at Spokane. The following summary of the show is by "The Chiel":

The leading feature of this year's show was to be found in the grand collection of Cocker Spaniels.

Among these the competition in the open class for dogs (black) brought out three of the best on the Coast, Mr. Close's Willard C., Mr. Dyke's King Pluto, and Mr. R. G. Gamwell's many times winner, Royal Duke placed by the judge in the order in which they are named. King Pluto is far ahead in expression and muzzle, but gives way to the winner in coat size and leg feather. Duke Royal was not at his best.

In black bitches, Mrs. C. A. Goodwin's Little Dorrit, a typical specimen, beat a good one in Wondering Beauty.

In colors other than black, Mrs. C. W. Sharples' black and white Bud Zunts easily beat the sterling old dog, Bauk Note, who is a good deal larger than the rest of his class.

In bitches, a lovely red bitch, Queta, beat a new face in Silver Heels, the winner in the puppy class, of whom more will be heard.

Collies were a poor lot with two exceptions, Mr. Ricketts' Glen Tana Monk and Mr. McIntosh's Prince. The latter was placed over Mr. Ricketts' dog, a decision which was a great surprise to those who follow this fancy. While Prince is a dog with immense bone and good length of head, he comes a long way behind the tri-color in expression, coat, carriage of stern and build. Glen Tana Monk lacked his full coat and was not in the best of condition, but in all the finer points showed unmistakable evidence of his superior breeding.

St. Bernards—W. F. Hall's His Highness won well from Elmore, his only competitor, a dog of heavy bone but failing in foreface expression.

In Great Danes L. H. Cohn's Romeo, who was third at Vancouver this year, was first and Mrs. Bradley-Dyne's Princess Chimay second.

Doom was the only Deerhound shown. He is a true representative of the breed, somewhat on the large side, and it was hard lines that the classification would not permit of his being awarded a winner's medal.

In Greyhounds Rosie lightly beat two high-class competitors. She is not so well ribbed as Nellie B., but was ahead of both in muzzle, hindquarters and length of stifle.

A lovely little Beagle is Elora Delmara, with the pendulous ears and true hound expression, so easily lost in this diminutive breed.

The Pointers were an interesting lot, owing to the competition among the youngsters sired by Oregon Lad, whose quality is well known.

Delta Spy is a pup of good quality, but the puppy bitch Beauty Girl was the pick of the bunch. She is not so well ribbed as Dotaway II, but excels in head qualities. All this strain appear to be smaller than the ideal standard, but in quality and all other characteristics of the breed leave little to be desired.

J. A. McDonald's Wapella Grouse, a recent importation, a great strong dog with wonderful muscle development, is coarse and lacking in head quality.

English Setters were headed by T. P. McConnell's Count Rego, who has made a great record for himself, taking into consideration the short time he has done it in for he is now a champion. A greater breadth of back is his principal requirement, otherwise he is a model.

In bitches Bess Montez beats Mr. Farrant's strong hitch, Beechgrove Bell in head properties, but is not

so good in front. She was benched with two good-looking pups by Stylish Sergeant.

Irish Setters brought out a large entry headed by Mr. Wulffsohn's Jeannot, whose grand body and legs won for him all there was to win. Mickey Green made a good second. In bitches Lady Mac was well to the fore, a nice bodied bitch on good legs and characteristic head and well-placed ears.

In Gordons, the second is very clumsy or would have been higher.

In Irish Water Spaniels, each entry had a class to itself, all three being good representatives of these weather-proof duck hunters.

Field Spaniels were much better than usual. Trip occupying his usual place at the head of the list, but this time closely followed by his own son, who is remarkably like his sire, but not so good in front and foreface.

Bingo is a good bitch and won easily from three competitors.

In Bull Terriers Rodney was beaten by a dog with a wall eye, who was superior in other respects.

Dachshunds brought out two good black and tan bitches, Hexie, a very diminutive specimen beating Tackle, who has hitherto had to bear the responsibility alone at our local shows of representing this game breed of hurrowing sportsmen.

In smooth Fox Terriers, Sunshine All White, the property of Miss Edith Gordon, and bred by Mr. F. W. Welsh, won in novice and limit, but was beaten by Ch. Revelry in the open. There were those who thought he might have won here, and he certainly would have done so had he had a little more time to mature. He is every inch a terrier, with long, lean head, a keen eye, strong jaw, stands on well placed legs and carries a good coat. Revelry is better sprung in the ribs, but is not so good in the eye and lacks the terrier quality of the younger dog.

In wires Mr. Welsh's Sunshine Elf looked better than he has ever appeared before, and won well from his old antagonist, Charlton Bristles, who is wider in skull.

Dandie Dinmonts were well judged. Swanpool Hector, in good form, carried off the winner's medal. He is better in head expression than Giffnock Wanderer, but is light in eye and not so good in coat. He possesses wonderful muscle for a dog of his size and shows well. In limit, Skookum Raider rightly beat his younger brother Scot. He is not so good in coat, but is nearer the ground. Scot will improve a lot with age.

The judge's decisions were received with general satisfaction, although some disappointments will make themselves felt at every show. The element of uncertainty lends zest to the contest and provides the excitement and interest without which a dog show would soon lose its popularity.

Several Statements Explained.

The following communication was received too late last week for publication as requested:

SAN JOSE, CAL., Oct 12, 1904.

J. P. Norman, Esq., Secretary Pacific Advisory Board, San Francisco, Cal.:

Dear Sir:—My attention has been called to an excerpt of minutes of Pacific Advisory Board published in the BREEDER AND SPORTSMAN, which states that the members of the Pacific Advisory Board had stated on their honor that they had not, either in their official or private capacity, made any monetary offer to any northern club to hold its show under A. K. C. rules.

During the Seattle show of last April, Mr. J. A. Peebles (for many years a prominent member of the Seattle Kennel Club and now, I believe, a director of the Seattle Kennel Club Incorporated), during a conversation regarding the newly formed Western Kennel League, said to me: "We have been offered $250 in cash and a guarantee of fifty dogs by the A. K. C. in San Francisco to hold our next show under A. K. C. rules."

Mr. Murphy, the late treasurer of the Seattle Kennel Club and present treasurer of the Seattle Kennel Club Incorporated (which has recently applied for membership in the A. K. C.) told the President of the Western Kennel League, Mr. Redelsheimer, that they had been offered $250 and a guarantee of fifty dogs by the A. K. C. people to hold a show in Seattle, provided that they would agree to send fifty dogs to an A. K. C. show in Portland. It was on the authority of these two statements, made by gentlemen whose veracity I have no reason to doubt, that I stated in a letter to the clubs of the league that the A. K. C. had offered $250 to a northern club as an inducement to hold its show under C. K. C. rules.

The members of the Pacific Advisory Board are personally known to me and in view of their denial of having offered any monetary inducement to any northern club to change its allegiance, I desire to withdraw the statement that the A. K. C. made any such offer and to express my regret to the members of the Board for having wrongfully accused them of making such an offer.

At the same time the offer was made in the name of the A. K. C. by a person who poses as its champion, and as you will see there was nothing to cause anyone to doubt that he was not acting with authority of the A. K. C. in San Francisco.

I hope to shortly be in a position to lay the proofs of above before the Advisory Board for your information, so that you may take such action as you see fit to prevent such unauthorized use of the name of the A. K. C.

I have sent copies of this letter to the papers which published the original accusation, so that the withdrawal and expression of regret may be given as much publicity as the original accusation.

Yours obediently,
NORMAN J. STEWART,
Sect'y W. K. L.

Strike!—if they don't give you Jackson's Naps Soda when you ask for it.

Talks to Dog Owners.

THE CANINE HOBBLEDEHOY.

There is probably not a more disappointing, aggravating living thing on the face of the earth than a growing puppy. Irrespective of the trouble he gives and the anxiety he causes during his early youth, the growing puppy possesses a natural gift for altering his appearance from time to time in such a manner as to bring most owners to the verge of despair. It is a most difficult task to set an experienced breeder to ask him to judge a puppy, as a month or six weeks may cause the greatest change in a young dog, so that the pick of the litter may prove to be the wastrel after all, and the despised one develop into a champion. A good many experienced men entertain the opinion that puppies as a rule return to their six weeks old form; and that, therefore, no matter how ugly he may be whilst he is growing into a dog, the pick of the litter at that age will prove the best adult. This idea may and, in fact, very likely does, hold good in many cases, but there are exceptions to every rule, and it is no doubt the wisest plan for the beginner to seek the counsel of some experienced friend if he decides to dispose of any of the immature members of his kennel.

FAULTY EARS.

After the teething troubles, which have been referred to already, are over, the carriage of his puppies' ears perhaps causes more anxiety to the owner than anything else; and, truth to say, these appendages of a canine hobbledehoy are often very ugly indeed. They may be carried in just exactly the contrary position to that desired, or they may appear as big as those of an African elephant, but still the worst cases often come all right in the end, though, unfortunately, not always. If their only fault is their size, it will by no means unfrequently be found that the puppy grows to them, which means that the skull increases in bulk whilst the ears alter very little, so that in due course of events they are quite proportionate to the size of the head.

In the case of faulty carriage of ears there is a whole peck of trouble before the owner of the puppy, but this does not mean to imply that every puppy which carries his ears badly at any part of his age up to nine or ten months old is going to do so all his life. Still, it is always pleasanter to have no trouble of the kind, whilst there is consolation in the reflection that many bad ears are amenable to proper treatment if their culture is taken in time—that is before the gristle hardens. In some cases mere manipulation by the fingers in the way of bending the ears into the desired shape, pressing the folds firmly but gently and then holding them in the position required for several minutes at a time may accomplish much. It is a tedious task, though, and has to be repeated pretty often during the day, and for a good many days at a stretch if it is to effect a permanent result; and therefore there is not much time left to the attendant upon a number of puppies to devote a proper amount of attention to the ears of each one.

Some people have been guilty of the reprehensible practice of cutting or pricking through the roots of the ears, or applying a hot iron to other parts of these delicate organs, in order to affect their carriage; but in addition to the improbability of such operations accomplishing much good, and the unnecessary cruelty of them, the fact remains that such tampering with the ears is illegal and its detection would involve disqualification upon the dog. Then, too, the owners of some breeds in which long ears are supposed to be the correct thing have been known to pull the ears of their whelps so viciously that the roots have been destroyed, with the result that the animal cannot move his ears.

The most common form of improving faulty carriage of the ears is to fix a strong plaster at the back of them, before the cartilage has hardened, of course, by this means keeping the ears in the correct position for some time. This practice is, of course, an extension of the finger manipulation method referred to above, but there is this distinction between the two that the one is permissible according to the rules of the dog show world, whilst the other is not. Consequently, the owner who affixes plasters to the ears of his dog must be prepared to endure the penalties of detection if he is caught, which, to speak from observation, he very rarely is.

Speaking generally, and subject to the proviso that there are exceptions to every rule, there is no reason for an owner to become really uneasy about the carriage of a puppy's ears until the animal has turned eight or nine months old. After that age, if the fault continues, there are grounds for fear, and when the year is passed it is just as well to become reconciled to anything. Some dogs, moreover, possess a trick of carrying their ears quite correctly at one time and all wrong at another. This is, of course, most exasperating to their owners, but there is comfort in the knowledge that it is quite within the limits of possibility for the right carriage to be in evidence when required, and under any circumstances it is better to have matters sometimes right than always wrong.

EXERCISE FOR GROWING DOGS.

It is absolutely necessary that young dogs should be provided with plenty of exercise, which, by the way, is a pleasure that should be denied no animal, but in the case of a growing puppy it is essential to its development. Half the cases of malformed limbs and joints one sees are the result of improper rearing, into which the neglect of a sufficiency of exercise enters very largely. If kept three or four or more together in a spacious yard or paddock, the puppies will usually enjoy enough romping to keep them in good health; but as soon as they are old enough they should be taken out on the roads, so as to see the world and overcome the shyness which is natural to all young things. Walks on the roads, moreover, tend to harden the soles of the feet and to assist the development of muscle, whilst this form of exercise necessitates the exercise of discipline over the puppies, and, as it is always easier to teach a young animal the way it should go than an old one, both the owner and his dogs gain an advantage.

COLLARS, SLIPS AND CHAINS.

Although there is no necessity for doing so, it is a good thing to accustom a puppy to the feel of a collar round his neck before he arrives at full age. This will save trouble some day, and the collar need not be left on for more than a couple of days or so at a time, and then it can be transferred to another member of the litter so that all receive their lesson in turn. Still more necessary is it to teach the youngsters to lead, as no sooner does a puppy which has been accustomed to enjoy the delights of full liberty feel the restraint round its neck, than he forgets any approach to good manners that he may happen to possess. As a rule he commences by a series of mad plunges in any direction but that which he ought to take, and then he will as often as not lie down and create a scene in the street. It is best, therefore, to commence by putting a collar and chain on the dog, and then tying him up for an hour or two a day, so as to teach him that he cannot get away if he wants to. At first he will probably hang back at the full length of the chain and sulk, but reflection will bring reason, and after a few lessons the puppy will fully realize that resistance is of no use to him. Then is the time to teach him to lead, and for this purpose a leather slip may be fixed to the collar and the dog be encouraged to follow his master, who holds the end in his hand. If he tugs and tries to get away, patience, and not a thrashing, should be adopted to secure the end in view, and when the pupil begins to show signs of an inclination to do what is wanted of him, a piece of meat or biscuit may be given him as a reward. Anybow a whip ought never to be used in the case of an obstinate or timid dog, but the puppies will very rarely be the latter if they have been allowed to see a little of the world as advised above.—*The English Stock-Keeper.*

DOINGS IN DOGDOM.

SEATTLE KENNEL CLUB HAS RECEIVER APPOINTED

The Seattle *Post Intelligencer* of the 12th inst. gives the following story relative to the present status of the legal proceedings for control of the Seattle Kennel Club:

In the superior court yesterday Judge Bell named W. H. White as receiver of the Seattle Kennel Club on petition of the officers of that organization, who several months ago obtained an injunction preventing the faction which attempted to secure control of the club and distribute its assets from doing so. President Riplinger, J. Redelsheimer, H. C. Bromley, C. B. Yandell and other prominent officials of the club contended that the meeting held in an effort to dishand the old club was irregular and caused restraining orders to be served upon the faction forbidding them to take possession of any of the club's records, moneys or other property.

The case was called up yesterday on a demurrer, interposed by J. A. Peebles, Arthur Murphy and other members identified with the faction which sought to capture the organization, alleging that the meeting held in May last was regular and that the old club was neither a partnership nor a corporation, therefore the plaintiffs were not entitled to a receiver. Judge Bell held, however, that the organization was to all intents a partnership and subject to the same laws which governed such associations.

Receiver White immediately filed his bond and and secured an order directing Secretary McAllister, who is identified with the faction which sought to obtain control of the club, directing him to turn over all its property to him.

President Riplinger yesterday announced that the club would hold a special meeting early next week for the purpose of filling the offices made vacant by the retirement of those men who identified themselves with the seceding faction. All fanciers, whether they be members of the club or not, are invited to be present, as well as all old members, many of whom, when they attempted to participate in the meeting called by the seceding faction last May, claimed to have discovered that they had been issued season instead of membership tickets and were thus deprived of the right to vote. At the meeting held in May last a large number of the old members present were denied the right to pay their dues by the faction temporarily in control, and these also, President Riplinger states, will be reinstated to full membership and permitted to participate in all the club's deliberations.

The club still retains its membership in the Western Kennel League, President Riplinger says, and is the only kennel organization in this city which possesses any official recognition at the hands of the league. The seceding faction applied for membership shortly after its attempted capture of the club, but at a meeting of the league directors, held in San Jose in July, the application was denied.

COAST FIELD TRIALS.

The second forfeit $5, on Derby nominations for the Pacific Coast Field Trials in January will be due and payable on November 1, 1904.

In all probability a well-known local fancier and sportsmen will be the judge at the Bakersfield trials.

WORLD'S FAIR DOG SHOW JUDGES.

Mr. James Mortimer, of New York; Mr. James Cole of Kansas City; Dr. Henry Jarrett, of Philadelphia, and Mr. Marsh C. Byers of Grand Rapids, have all definitely accepted invitations to judge at the Exposition dog show, to be held in St. Louis, October

25 to 28. The classes are not finally assigned, but will probably be divided something as follows:

Mr. Mortimer—Boston Terriers, Fox Terriers and pet dogs.

Dr. Jarrett—Collies, Greyhounds, Foxhounds and either Beagles and Sporting Spaniels.

Mr. Cole—Mastiffs, St. Bernards, Great Danes, and perhaps Sporting Spaniels instead of Dr. Jarrett.

Mr. Beyers—All breeds of Setters and Pointers

The special Llewellin Setter prizes will be handled by a special judge selected from among the practical field trial men. The suggestion to judge this class has been made to Major J. M. Taylor, but it is not yet known whether he can be present.

JOSEPH A. GRAHAM,
Superintendent of Show of Dogs,
CHARLES F. MILLS,
Chief Department of Live Stock.

BAKERSFIELD NOTES.

"Mace" Dodge writes us from Stockdale Kennels that there has been some favorable rains in that section recently. This will cause the feed to grow and lay the dust, making conditions favorable for the Pointers to get down to work on quail.

The Stockdale Derby prospects are in splendid fettle. Next week the string of young Pointers will be installed in the training quarters and from thence on Manager Dodge will be on the jump getting the youngsters into shape.

There is an opportunity offered now to sportsmen desiring several well broken high-class Derby candidates to obtain a good dog for $125 and half the money won. The condition is reserved by Mr. Dodge to train and handle at the trials.

A number of young broken dogs have been sold lately, in fact about every individual else that the Stockdale Kennels had to dispose of. Pointers broken by Trainer Dodge are thought highly of by Coast sportsmen who have been so fortunate as to get one.

A GOOD DANE GONE.

Rupert of Hentzau, the prize winning Great Dane owned by Mrs. L. S. Adams, Jr., joined the doggy majority last week. In the death of this handsome dog the Great Dane fancy of the Coast has had quite a set back. Rupert was a winner at Oakland in 1902, where he made his initial appearance in the ring and was always in the money at every show he was entered since. We thought he was a dog of promise as a puppy and it is to be regretted that his opportunities to become a producing sire was not for a longer time.

NATIONAL BEAGLE CLUB OF AMERICA.

Secretary Chas. R. Stevenson writes us that the fifteenth annual field trials of the National Beagle Club of America will be held at Mineola, Long Island, during the week commencing October 31, 1904. The headquarters of the club will be at Johrens' Hotel, Mineola, L. I. Premium lists, entry blanks and full information relating to the trials will be forwarded to anyone upon application to Charles R. Stevenson, Secretary, 106 Market St., Camden, N. J.

GOSSIP FOR SPORTSMEN.

OPENING OF THE SEASON.

Weather conditions on the 15th inst., the opening day of the season on feathered game, were not at all favorable to the duck hunting contingent. The sportsmen who favored upland shooting, however, had generally a good two days' sport with the quail.

Results in the Suisun, Sonoma and Petaluma marshes and a few of the up river preserves near Collinsville were not up to expectations. The Field and Tule Gun Club members had fairly good luck, the best bags being made by Lee Harpham, Al M. Cumming and Wm. Bay. On the Pringle ponds several canvasback were shot, Len D. Owens and J. W. Bourdette each had a very good shoot on these famous duck ponds.

W. W. Richards was one of the lucky shooters on the Montezuma Club preserve near Collinsville, the birds coming in to his blind enough to enable him to get a good bag.

Among the legion of quail hunters who were out limit bags of 25 were numerous. The Marin uplands were in splendid condition for hunter and his dog. Members of the Country Club, Tamalpais Club, Point Reyes Sportsmen's Club had excellent sport with the birds. A number of huntors who went to Novato and Ignacio returned with limit bags.

Conditions for both duck hunting and quail shooting, as we go to press, look as if the weather would be practically the same as prevailed last Saturday and Sunday.

COUNTY LAWS.

It may be in order to give here, for the information of sportsmen, the county changes that are in force and curtail the season and limit on feathered game—the open season under the State law began on the 15th inst. and will end February 15th. In Marin, Contra Costa, Napa, Santa Clara, Alameda and San Mateo counties the State law on quail and duck prevails. Sonoma county recently shortened the quail season—the opening day being November 1st and closing on February 15th. The limit on ducks per day for one individual is twenty-five. Kings, Humboldt and Madera counties also enforce a twenty-five bag limit. In Kings and Madera counties the quail season opens on November 1st and closes February 1st. In Yuba and Yolo counties the quail season is open from November 1st until January 1st.

The most recent change is that adopted by the Santa Cruz authorities. The quail season opens on November 15th and has been consequently shortened one month. This action of the supervisors has given rise to much indignation on the part of the most prominent sportsmen of the county, none of whom, it is claimed were advised as to the proposed action of the county fathers. This recent law and several other ordinances recently adopted in that county have caused the sportsmen to organize the Boulder Creek Fish and Game Protective Association, composed of the leading sportsmen and business men of that section.

DUCK HUNTERS WILL LIKE IT.

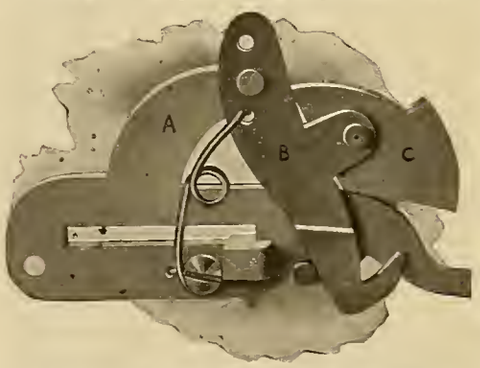
An important item in a duck hunter's kit is a good and serviceable duck strap. Many devices tending to fill the bill in this particular have been put on sale in the sporting goods stores. Rarely, however, is it, that the article will stand the proof of usage and convenience. Most of the general run of duck straps have more or less merit, but we never saw an all round good one until we examined a device of Otto Feudner's this week in Clabrough, Golcher & Co's establishment.

This strap is simple in construction, strong and capacious enough to carry 100 ducks, and is so made that it is almost impossible to get out of order. The greatest objection to most straps, particularly the rawhide ones, is, that the loops do not last. In the Feudner strap, the loop string is a strong single piece, of a proper thickness and quality of material, and is lashed and braided through a series of holes arranged at intervals in each end of the shoulder or carrying hand. By this arrangement a durable and even loop is had, the chance for breaking reduced to a minimum and the weight strain of the ducks is evenly distributed. There are no stiches to weaken the leather or break and the strap is of the conventional style and size. We believe that nineteen out of twenty sportsmen would buy this strap on first sight and discard any other strap they used.

A New One-Trigger Device.

The cut below shows the new Hunter one-trigger just being put on the market by the Hunter Arms Co., of Fulton, N. Y. The Hunter Brothers have lead the market for many years as manufacturers of the L. C. Smith gun, and the conservatism shown by this firm in any improvement placed on their product is a guarantee of merit always. A "one-trigger" is a decided improvement when it is simple, durable and absolutely sure to do its work every time.

The Hunter one-trigger has been tested in every conceivable way for the past three years and is only now offered to the sportsman as a practical success.



All of the parts are very large and strong. The mechanism is positive in its action, is not dependent on friction in any way. It is impossible to double the Hunter, and the second barrel is always ready to fire when the first has been discharged. Of course the shooter can use right and left, left and right, all rights, all lefts, as he prefers.

The Hunter Arms Co. have issued a very neat catalogue of the new gun explaining fully the Hunter one-trigger and our readers will be welcome to a copy.

Both Want a Good Thing.

Mr. George E. Rockwell of Butte, Montana, a prominent sportsman of that section and member of the Butte Gun Club stated recently that he has had and used a number of different makes of the very finest grade shot guns, but never had the equal of his high grade Ithaca—a gun fitted with two sets of 28 in. Whitworth fluid steel barrels, one for duck shooting and the other for field shooting. He recently loaned the gun to Mr. O'Connell, another Butte sportsman, who used the gun at the Ingleside trap grounds. Mr. O'Connell is the owner of several fine shotguns, but thinks so highly of this particular Ithaca gun that he was loth to part with it—in fact he has disposed of all his other guns and has not yet returned the gun to Mr. Rockwell.

Some Powder Averages Reported.

Portland, Me., September 6th, the Portland Gun Club's team won the team championship race with a total of 244 breaks out of 250 shot at, each member using "Infallible" Smokeless. Geo. Darton broke 50 straight, W. B. Darton and Mr. Hunt broke 49 out of 50, and E. A. and C. S. Randall, each scored 48 out of 50. W. A. Arris of Byron, Me., won the individual championship of the State of Maine at targets, breaking 49 out of 50, using "Du Pont" Smokeless. G. S. Randall of Portland won the Elm House trophy, 23 out of 25, shooting "Infallible."

Pittsfield, Mass., The Gold Medal Contest of the Oak Hill Gun Club which started July 16th and finished September 24th, was won by the secretary of the club, John Ranschousen, shooting "Infallible."

Waterloo, Iowa, September 22d and 23d, Fred Gilbert, first general average, 401 out of 420, shooting "Du Pont." Henry Stege of Waterloo, Ia., second general average and first amateur average, 398 out of 420, shooting "Du Pont." Guy Burnside of Knoxville, Ill., third general average and second amateur average, shooting "Du Pont" and "E. C." 391 out of 420.

Morgantown, W. Va., September 28th, L. Z. Lawrence, first general average, 125 out of 130, shooting "Infallible."

Cleveland, Ohio, September 28th, John Prechtel of Cleveland, O., first general average, 153 out of 165, shooting "E C." G. E. Wagoner of Akron, Ohio, and Dennis Upson of Cleveland, O., second general average, 151 out of 165, shooting "Du Pont." C. O. LeCompte, third general average, 146 out of 165, shooting "Infallible."

Winchester Whispers.

Winchester shot gun shells and Winchester factory loaded metallic ammunition continue to carry off the honors at the leading shooting tournaments throughout the United States, as will be noted below.

At the regular annual open meeting of the New York State Rifle Association, which was held at the historic Creedmore range September 12th to 17th, Winchester factory loaded ammunition carried off the premier honors. Captain W. G. Hudson, U. S. A., captured the elegant Thurston Trophy with the splendid score of 69 out of the possible 70 at 800 yards, and 66 out of the possible 70 at 900 yards, making the total of 135 out of the possible 140 at 800 and 900 yards. In this score Captain Hudson made 17 consecutive hullseyes. In this same match Corporal W. B. Short, N. G. N. Y., made 16 consecutive hullseyes at 800 yards. Captain Hudson also won the Allcomers' Mid-Range Match. Both Captain Hudson and Corp. Short used the new Hudson-Winchester .30-40 caliber bullet as loaded by the Winchester Repeating Arms Company.

Winchester "Leader" shotgun shells keep on taking the high honors at the inanimate target tournaments. J. A. R. Elliott, who always shoots a Winchester "pump" gun and the "Leader" shells, was the "King Bee" at the big four days' tournament which was held at Middletown, New York State, on Sept. 13th to 16th, Mr. Elliott not only made the longest straight run at this tournament but also walked away with the high expert average with the splendid score of 610 out of the 640 targets shot at. At the Neal-Harris Blue Rock Tournament, which was held at Guthrie, Okla., Sept. 14th and 15th, Frank Faurote, shooting a Winchester "pump" gun and the "Leader" shells captured the high honors with the score of 354 out of the 375 targets shot at. At the North Beach Gun Club tournament, which took place at North Beach, N. J., Sept. 13th and 14th, J. M. Hawkins, shooting a Winchester "pump" gun and the "Leader" shells, walked away with the high honors on the splendid score of 382 out of the 400 targets shot at.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open.

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tidewater.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

Oct. 25, 28—World's Fair Dog Show, St. Louis, Mo. F. D. Coburn, Chief of L. S. Dept., St. Louis, Mo.

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 24—Missouri Field Trial Association. Sturgeon, Mo. L. S. Eddins, Secretary, Sedalia, Mo.

Oct. 24.—Ohio Field Trials Club. Washington Court House, O. G. R. Haswell, Secretary, Circleville, O.

Oct. 25—Connecticut Field Trial Club. ————, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Oct. 31—Monongabela Field Trial Club. Oblong, Ill. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 1—Sportsmen's Field Trial Club. Clare, Mich. Erwin C. Smith, Secretary, Midland, Mich.

Nov. 7—Independent Field Trial Club. 6th annual trials. Hutsonville, Ills. H. S. Humphrey, Secretary, Indianapolis, Ind.

Nov. 8—Western Beagle Club. Inaugural trials. Oregon, Ills. Reno B. Cole, Secretary, De Kalb; Ills.

Nov. 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Kennel Club. Field trials. Clay City, Ind. C. F. Young, Secretary, Clay City, Ind. Week following Ills. Ch. trials.

Nov. ——National Beagle Club. 11th annual trials. Grafton, Mass.

Nov. 15—Michigan Field Trial Club. ————, Mich. Chas. E. Sisson, Secretary, Muskegon, Mich.

Nov. 15—Central Beagle Club. 9th annual trials. ————. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 22—International Field Trial Club. Ruthven, Ont. W. B. Wells, Honorary Secretary, Chatham, Ont.

Nov. 29—Virginia Field Trial Association. Martinsville, Va. C. B. Cooke, Secretary.

Dec. 3—Continental Field Trial Club. 10th annual trials. Thomasville, N. C. John White, Secretary, Hempstead, L. I.

Dec. 12—Alabama Field Trial Club. Huntsville, Ala. J. M. Kirkpatrick, Secretary, Huntsville, Ala.

Dec. 12—Pointer Club of America. 5th annual trials. C. F. Lewis, Secretary.

Dec. 17—Eastern Field Trial Club. Waynesboro, Ga. Simon C. Bradley, Secretary-Treasurer, Greenfield Hills, Conn.

THE FARM.

Great Irrigation Enterprises in California.

In the Sacramento Valley, California, great irrigation systems are being built which will add within the next few months half a million acres to the irrigated area of this country. During the past two or three years this great valley has been the scene of elaborate irrigation surveys by the United States Agricultural and Interior Departments, and the abundance of water supply and comparative cheapness of application have been commented on at length in exhaustive official reports, which have spoken in high terms of praise of the productive capabilities of Sacramento Valley soil and climate and the immense wealth certain to be created by the development of irrigation systems. It is said that the National Government has now in contemplation an immense irrigation project for the Sacramento Valley, but the people of California are not waiting on National enterprise.

At the present time three great systems are under construction in this valley. One of these, the Central Irrigation Canal, was started as a district enterprise several years ago, but like many other district irrigation projects started under California's irrigation laws, it has been the subject of continuous litigation and work was discontinued for years. At the present time work is being prosecuted and it is expected that water will soon be running. This canal is sixty feet wide and will irrigate 200,000 acres of land, while it may be extended to water millions of acres. Its source of supply is the Sacramento river.

Another great system just nearing completion is the Yolo County Consclidated Canal which diverts the waters of Cache creek and will irrigate 100,000 acres of land lying in Yolo and Solano counties. This canal is constructed by a private corporation. It is forty feet wide and carries water to a depth of six feet. A notable feature of this system is the fact that the source of Cache creek is Clear Lake, a mountain reservoir covering 80 square miles and having vast storage possibilities. This project was seriously considered by government experts as the initial undertaking of the government under the National Irrigational Law. Water was turned into this canal October 8th and the event was marked by a great celebration at the town of Winters, near the course of the artificial stream.

Another irrigation celebration of equal importance was held a week earlier at Gridley, in Butte county, and marked the breaking of ground for the Butte County Canal, which will divert the waters of Feather river and cover at present an area of 215,000 acres. This system is capable of vast development as the Feather drains an area of approximately 4,000 square miles with an annual rainfall ranging from 30 to 60 inches. This canal may be made to irrigate all the lands lying between the Feather and the Sacramento from the point of diversion southward, an area of 700 square miles. It too is built by private capital.

The development of these great irrigation systems is worthy of note, both on account of the magnitude of the enterprises themselves and because of the conditions in the territory covered. The Sacramento Valley has an annual rainfall of from 15 to 30 inches and is far from being an arid or even semi-arid region, notwithstanding the dry summers which prevail in California. The lands that will be watered by these canals have for a half century produced crops. Wheat, barley, vegetables, and fruits are grown. Some of the largest orchards in California are here, as well as some of the largest grain ranches in the world.

One of the first effects of the introduction of irrigation on a large scale will be to induce the subdivision of these great grain ranches into small farms and the transformation of a grain country but sparsely inhabited, into a land of diversified crops and many homes.

Dairy Tests at the World's Fair.

Edmond Mitchell, in the *Kansas Farmer*, has the following to say of the dairy tests at the World's Fair:

What can the dairyman, the breeder of dairy stock, the general farmer who keeps a few cows for supplying the milk pail and for the fattening of an occasional calf, gain by a visit to the St. Louis World's Fair? The unhesitating answer may be given that if he comes to "see, learn and inwardly digest," he will carry away with him information that will greatly improve his methods and markedly add to the profits of his industry. Although such simple mechanical devices as the Babcock milk tester and the Scovell sampling tube, both the inventions of State Government experts and given freely without patent encumbrances to the world at large, have been in use for over ten years, how many dairies at this present day are equipped with them? However, any intelligent farmer who watches their operation at the model dairy in the Palace of Agriculture, and further notes their exact application to the elaborate cow tests being conducted in the livestock barns beyond the Palace of Horticulture, will return home with firm resolve no longer to be without such invaluable appliances.

Taking the sampling tube first, as precedent in use to the milk tester, little need be said as to the paramount importance of having a true sample of the entire milking yielded by a particular cow. If a careless sample be taken from the top or from the bottom of the pail, only conflicting and valueless deductions will follow. The Scovell sampling tube obviates all this. It is a hollow cylinder, open at the top, and with a telescope arrangement at the bottom which provides apertures for the free entrance of the milk, but can be closed by simple pressure of the hand above. In this way a complete sample of the milk, containing the due proportions of the lighter butter-fat, and of the heavier solids is lifted from the pail.

Next the milk-tester. This consists of a horizontal rotary disk, provided with hollow cups for the reception of a number of glass vessels. These latter are tiny flasks, with their necks graduated in similar fashion to the tube of a thermometer. Into the bulb of each flask is poured a regulated amount of the sampled milk. To this added a small amount of sulfuric acid, so as to rapidly break up the caseine. Then the bulb is filled with water, up to the top of the graduated scale. Each of, perhaps, a dozen flasks, all properly numbered for reference, now represents each individual cow in the herd. All are rapidly revolved for a few seconds. In each case the butter fat is thrown up into the graduated tube, and the exact butter value of each cow's milking can be read at a glance The whole operation, both sampling and testing, may have taken ten to fifteen minutes

Now, what are the advantages gained? If the entire milking from the herd had gone straight through the cream-separator, the dairyman would have known, certainly, his total production of butter, but he would have remained in blind ignorance as to the contribution made by each individual cow. Mere quantity of milk affords no guide, for the brimfull milk-pail may be much poorer in butter-fat than the pail that is only three-parts filled. In a word, only by the use of the tester is the farmer enabled to ascertain with certainty which are his most profitable cows. It costs just as much to feed a poor cow as it does to feed a good cow. So the thing to do is to proceed gradually to weed out the unprofitable stock, always testing, to replace them by better butter-producing animals. This is scientific dairying pure and simple, and is therefore the dairying that brings up the money returns year by year with assured regularity. Let every farmer, big or small, go to St Louis, convince himself by actual demonstration, and carry away with him the all-important lesson.

To the breeder of dairy stock the moral is just the same. At present he, too, often selects his breeding cows solely by judgment of the eye. Here at his command is judgment by the unerring foot-rule. Heredity follows its almost unvarying laws. The most profitable dairy cow throws the calf that in due season will be the most profitable butter producer. The breeder with the milk-tester as his guide, can thus, in his turn, weed out poor or doubtful stock, and concentrate his energies on the good stock. In this way, as surely as the sun shines, he will after a series of years raise the average value of his herd. * * *

The interesting and prolonged tests for butter production now being conducted at the World's Fair between large herds representing the Jersey, Brown Swiss, Holstein-Friesan, and Shorthorn breeds are also intended to afford a reliable clue as to which class of stock supplies the best "dual utility" cow. The ability to add to live weight while yielding milk enters into the contest. It need hardly be pointed out that the latter test, applied to a milking cow, simply demonstrates her capacity to throw calves profitable to rear and fatten for the meat market. The cow that can more than pay her way at the milk-pail, and at the same time throw profitable feeders is the "combination cow," or "dual utility cow," in stock-breeders' parliance. On thousands of farms, where dairying is not the chief specialty, this is precisely the animal required. The best dairy cow is incontestably the specialty bred cow. The best beef cow is the one bred specially to beef production. But previous tests, especially those conducted at the Chicago World's Fair, have placed it equally beyond peradventure that dual profits may be reaped by those who avoid the special-purpose cow and follow both lines. In other words, broad backs and big udders may be profitably coordinated. Which among the breeds represented best fills the bill from this point of view? That is one of the many important questions which the dairy competition at St. Louis will answer.

Avoid keeping too many horses on the farm. Get rid of surplus horses if they are not making money. Do not allow them to eat up the profits which the useful ones earn.

o

Woven wire is now so cheap that a little money will nicely fence a horse pasture. No farmer should run any risks of spoiling a horse or horses on barbed wire.

For Sale or Trade for Real Estate

CATALOGUES ON APPLICATION TO INTENDING PURCHASERS.

Great Sale of Jerseys.

Improvement is the order of the day with progressive dairymen all over the country. The article from the pen of that well known writer Hark Comstock which appears in this department this week should be read and heeded by every person who is interested in dairy cattle At the sale of the Jerseys belonging to the estate of the late Henry Pierce, which is to take place next Wednesday evening at Fred H. Chase & Co.'s salesyard in this city an opportunity will be offered to buyers which they cannot afford to pass by. There are over eighty head to be sold, breeding, the cattle in this sale, being the entire herd of the late Henry Pierce, deceased, without reserve, rank with the best known to the Jersey world.

Improve the Cow.

The 18,000,000 milch cows of this country find their product virtually consumed at home, leaving little for expertation. Yet few dairy farmers get rich. Perhaps it is upon the principle that few in any given business get rich. All agricultural profit in these days comes of using improved methods and machinery. The farmer who still mowed his meadow land with a scythe would be left far behind in the competition of these days. The cow is the first item, and a most important one in dairy machinery. At the average she is a good deal what she was fifty to a hundred years ago, as far as relates to her dairy functions. In beef producing quality the case is entirely different. In place of the angular and active Texan cow and her offspring, the "Texas steer" of the ranges, we now have, by grading up from these native herds with Short Horn, Hereford and Pelled Angus bulls, great droves of ranch cattle scarcely distinguishable from their thoroughbred sires. They are bred with an eye single to their beef points, and are a wonderful improvement on the foundation range stock from which they were graded up. Not so with the dairy stock of the country. The good milker has not been persistently bred to the sou of a good milker. The eye does not take in the situation with dairy points as with beef Besides, the average dairy farmer bas never until recently realized the importance nor the possibilities of breeding for direct improvement of the dairy capacity of his cows independent of other considerations.

It has been his crotchet to try to do two things at once by using a dual purpose cow, so that after her milking days were over he could get something for her carcass, never realizing that in putting up fer any length of time with an inferior milker for such doubtful compensation he was continually swapping a pound of butter for an ounce of beef.

According to the statistics of the Department of Agriculture the average dairy cow of the country gives 130 pounds of butter per year. In the dairy demonstration now progressing on the world's fair grounds at St. Louis the entire Jersey team of twenty-five cows has averaged more than that per head in sixty days. Admitting that better care and better feed have much to do with the question, there yet remains a very wide margin that can only be credited to the functional capacity of the cows bread in their bone. When farmers began to select their bulls from thoroughbred herds possessing these great dairy values, letting the beef question and all side issues take care of themselves, they began to establish improved machinery in the shape of dairy cows.

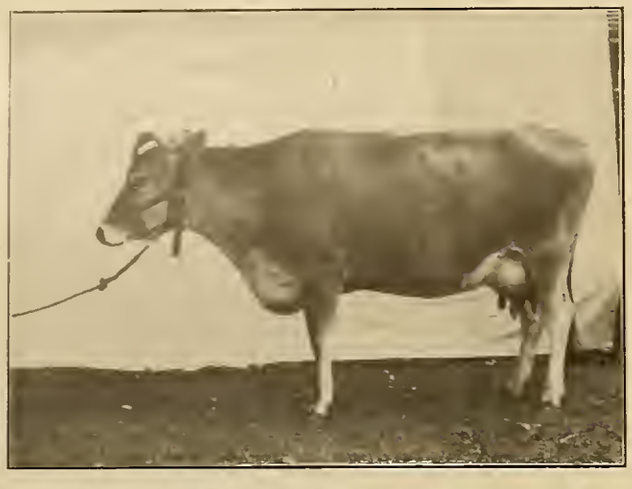
Nearly 12,000,000 cows are devoted to butter making in the United States, and the product in round numbers is 1,500,000,000 pounds of butter, worth, at 18 cents a pound $270,000,000. Suppose that each of these cows could produce a heifer calf by a high-class Jersey bull, and the improvement in butter capacity for the new generation was even as little as 5 per cent, which would be an exceedingly small estimate; the increased butter output for a single year, assuming that the price was not lowered, would be worth $13,500,000—a net profit over present income due solely to the use of improved cow machinery.

Only in recent years has the disparity in value between the product of different individual cows been brought home to the comprehension of the average farmer and dairyman. Butter fat is the most valuable constituent of milk, whether it be made into butter or used otherwise. The creameries buy milk by its test of fat, allowing nothing for the skimmed remnant. Quarts no longer measure at the creameries and factories. They merely float the pounds of fat for which the dairy farmer is paid. The change to this plan was an eye-opener to him. He quickly found that his heaviest milker was not necessarily his most profitable cow. A machine for quickly determining the percentage of fat in milk is now used everywhere. The dairy farmer has found out where the money is and is beginning to look for a different cow from that which formerly excited his admiration.

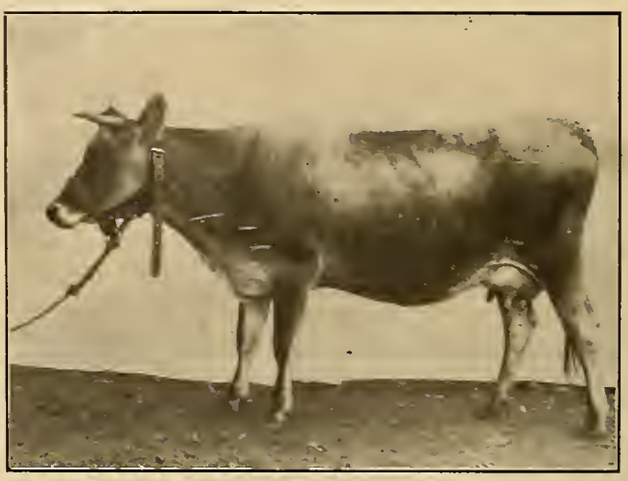
The great step now in the improvement of the dairy business is the distribution of the bulls from the thoroughbred herds of Jersey, Guernsey, Holstein, Brown Swiss and Ayrshire cattle throughout the dairy districts, as the beef raisers have been taking them from thoroughbred Short Horn, Hereford and Polled Angus herds to the grazing districts.

Hark Comstock.

New York, Oct, 10th.



Loreta of Yerba Buena 165471



Ruby Cole of Yerba Buena 177811

bulls, cows and heifers. On this page are the pictures of a few of the many choice young cows to be sold.

Loreta is a young cow four years old out of Pansy by Kathleen's Roy, and, as might be expected, is a very beautiful as well as exceedingly valuable animal for dairy or family. She should be able to hold her own in any company in the show ring. In color she is light fawn. Her milk record is 34 pounds and her butter record is 13 pounds.

Twin Sister is a two-year-old silver gray heifer that was bred to Kathleen's Roy, September 15th, this year. She is first class in every way and a grandly bred one.

Ruby Cole is also a two-year-old. She is by Silvia's Exile out of Addie Exile. In color she is a light fawn.

Connie Exile is five years old by California Exile from Dixie Draper. She is a solid red fawn and a very fine individual.

There are many others worthy of mention but our space will not permit the extended notice that should be given them. All Jersey breeders know this wonderful herd of prize winning Jerseys by reputation, and we may confidently state to those who are seeking an opportunity to buy first-class Jerseys, that in point of high individuality and rich

Milk Men's Difficulties.

Milk is naturally a pure product. If milk is found unclean, unwholesome, or disproportioned in its proper parts, the chances are that it is not the fault of the cow. In all such cases the presumption is that some person is to blame, either the one who cares for the cow or the one who handles the milk. If those who buy milk used proper care they would have little trouble in always procuring a good clean article. It is possible to produce milk free from contamination, and if impure milk is delivered the dairyman or dealer may be held responsible, and it is the duty of the customer to reject it. When the milkman knows that his customers will not accept poor or unclean milk he will stop offering it.

On the other hand, some people are most unreasonable in their complaints and demands upon their milkmen. This, and the sharp competition between rival dealers, two chief causes of dishonesty in the milk business. When a milk peddler knows that he is delivering the best of

Twin Sister of Yerba Buena

Connie Exile 169261

milk and complaint is made that it is not yellow enough or has not enough "hody," and he is afraid of losing a good customer, he is naturally tempted to either give that person a supply from near the top of a can, thus depriving some one else of cream which rightly belongs to him, or to do what he thinks his dishonest competitor is doing, whatever that may he.

There is a great desire to get milk cheap, and it is not an nnknown thing for customers, including hotels and private institutions as well as private families, to demand such large measure for their money that the dealers feel compelled to "extend" the milk in order to meet these requirements and prevent loss of trade. Some are satisfied with the adnlterated stuff, not knowing that the same amount of actual food, hut no more and perhaps less, is heing delivered in the large measure than was formerly delivered in the small one. This explains how it sometimes happens that milk is retailed in cities at less than the regular wholesale price. Persons too easily forget quality and think only of quantity. The only sensible thing for the housekeeper or other buyer of milk to do is to willingly pay a fair price and insist upon good milk in return. Buyers should rememher that at the highest prices usnal anywhere good milk is ahout as cheap an article of food as can be purchased.

It should also be borne in mind that milk can he contaminated as easily after delivery to the family or consumer as hefore and too often a milkman is hlamed for had milk or cream when it was made so bv conditions over which he has no control. If left where dust can settle in it or flies have access to it, or if set in an ill-ventilated cellar or in a warm place, it is pretty certain to he in had condition after a few honrs, no matter how good it was when delivered.

Numerous well authenticated cases are known where customers have complained of milk received, and upon investigation it has been proven that servants in the house tampered with the milk, removing cream for their own use or adding old milk or vinegar to make it sour prematurely. The ohject of the latter was, in connivance with an outsider who supplied the motive, to cause the buyer to change to some other dealer whom the servant was ready to recommend.

More Butter Used.

The consnmption of hutter during the past season has heen much larger than usual. Prices have heen somewhat lower, the general consumer is generally better off and more able to buy in quantity and the average grade of all butter coming into market has improved. The oleomargarine law may have had some influence but probably the improved quality has had more to do with increased sales this summer than any or all other conditions. Good hutter goes qnickly, while poor butter is left on the plate from one meal to the next. Improved methods and increased knowledge of how to care for milk, cream and butter is slowly improving our product. Dairy schools and the snggestions and teachings of farm papers are reaching the individual butter maker in every section of the country.

The increased use of hand separators also is a factor in the improved condition of dairy hutter. It is easier to keep the cream in good condition than the whole milking. The skim milk is valuable and because the young stock pays hetter greater interest is taken in the whole process. Usually an extra cow or two is added to the herd and more interest is taken in every hranch of the business.

Dairy hutter should be the hest butter made hecause all the conditions are under the control of one individual. The hest hutter in the world is made in the private home dairy hy cleanly, painstaking farmers who live well and take a pardonahle pride in having everything ahout the dairy as clean and comfortable as any other part of the premises.

Hen and Cow Figures.

One of the interesting stories that is going the rounds is the following: "Buy four cows for $40 apiece and you have $160 of an investment. The best any cows have been known to do, kept in the artificial way, is to retnrn a profit of $25 and $30 each per year, hut allow $40 profit for each cow and yon have made $160 per year from the keeping of the cows. On the other hand the same $160 invested in 160 hens at $1 apiece, if properly managed, will return $1.25 assured profit from each hen. This would he $200 profit from the hens as against $160 made from the cows, minus the trouble of milking the cows, which certainly would be in excess of the labor necessary to care for the hens."

This is a fairly good statement of the facts, and we should consider that even more than $1.25 could be made from the hens, and that they could he kept where cows could not be kept, and there is not the labor and care of going regularly twice a day to milk, as with the cows. Of course they must he fed and watered, the same as the cows, hut after due reflection and the offal considered into the hargain, we find that the product of a hen is more valuahle than the product from a cow and the manure from the hens more valuable for land than from the cows. There is no question but that the profit is largely in favor of the hens, yet we would not advise every one to keep hens, hecause to gain this profit you must know the hens better than you know the cows. Success in all things comes from knowing all things well.—*The Feather.*

Making and Using Starters.

It pays to use starters if they are rightly made and properly applied. The following rules were given by an expert:

Do not let your starters get over ripe. They are most active when just on the point of coagulation.

Milk pasteurized twice is more certain to give good results than milk pasteurized once.

Be very cleanly in person and have all utensils coming in contact with a starter thoroughly sterilized hy hoiling water or steam.

Never taste a starter without first sterilizing the spoon or ladle, and never return any of the starter after tasting it.

Do not open the jar or can of the starter too often to stir or taste. Do the stiring by shaking whenever possihle without removing the cover, or hy mechanical means as provided for in the starter can.

Propogate and keep on hand several small "mother starters" in different stages of development, from which to choose the hest.

The nse of a regular starter can gives the hest results for large quantities of starter.

The nse of pasteurized cream makes the hest butter.

The hest of incubators fail the operator at times. Still, we note that the most profitahle chicks continue to come from the incubators at seasons of high prices. Carloads of these machines are used today in all parts of this country where a dozen were sold ten years ago.

———o———

By letting in sunshine and air during summer we render our poultry houses healthful and comfortahle. Not so in winter. The open spaces should he few, for proper protection against winter rains and high winds that wet and chill and cause disease.

———o———

In testing out incubator eggs at end of fifth or sixth day replace those removed if possible with some set under hens about the same day. One hen can thus start enough eggs to fill up the gap in a 120 egg machine.

SAVE-THE-HORSE

Registered Trade Mark

SPAVIN CURE

$5 PER BOTTLE. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Splint, Thoroughpin, Capped Hock, Shoe Boil, Wind Puff and All Lameness.

ON BROKEN DOWN, WEAK, SPRAINED and RUPTURED TENDONS and LIGAMENTS its power is unfailing.

The fire-iron is uncertain and invariably only aggravates the injury or disease; blistering is less effective; both necessitate laying up the horse for months. Mercurial and poisonous compounds cause irreparable injury.

"SAVE-THE-HORSE" eliminates all these factors.

Cures without scar, blemish or loss of hair. Horse may be worked as usual and with boots, as no harm can result from scalding of limb or destruction of hair.

Need of second bottle improbable except in rarest of cases.

Send for booklet and copy of guarantee.

$5—All druggists and dealers, or sent express paid.

High-class stock always on hand. It will pay to call and inspect stock if you are in need of a good stallion. C. O. STANTON, San Jose Manager.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequaled. Price $1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

W. B. Eddy & Co., Whitehall, N. Y.

3-4 of all Fall Troubles among Horses

CRAFTS DISTEMPER CURE

can be directly traced to distemper, coughs, colds, pinkeye, la grippe, epizootic, catarrhal troubles, etc. All of these can be cured by the use of CRAFT'S DISTEMPER & COUGH CURE, which is guaranteed to help or no pay. It kills the germs, saves the horses and makes money for the horse owner. $1 a bottle (smaller size 50 cents), $4.50 a dozen bottles, at druggists, or direct prepaid on receipt of price. Send for booklet.

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy..... $7
BOUND IN CLOTH, per Copy..... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

CAPT. THOS. B. MERRY,
Hotel Marlboro, Los Angeles.

FOR SALE.

WINNIE WILKES 2:17½

Black Mare, 16½ hands, weighs about 1200 lbs in racing condition; 9 years old; sired by Rey Wilkes, dam Pet by Cresco second dam Topsy by General Taylor. WINNIE WILKES is in foal to Searchlight. She is a good driving mare, single or double. She is not only a high-class racehorse, but a most desirable broodmare. She will be sold on account of her owner being in ill health and not having use for her. Address or apply to R. P. M. OREELEY, cor. Franklin and 14th Sts., Oakland, Cal.

FOR SALE.

A HANDSOME 4-YEAR-OLD BAY FILLY; pacer; stands 16.2½ hands; sired by McKinney, dam Mission Bell by St. Nicholas. Full sister to Mechanic. A smooth-gaited filly, goes without straps or boots, and with less than a month's handling has paced a half in 1:11. Is sure to make a fast pacer. Address or apply to JOHN ROWAN, 1317 East South Street, Stockton, Cal.

MEN—WOMEN—CHILDREN.
WEAK KIDNEYS CURED FOREVER.

If you have a pain or dull ache in the back it is unmistakable evidence of kidney trouble. It is a warning to tell you trouble is ahead unless you remedy the cause immediately.

Lame back is only one symptom of kidney trouble. Other symptoms are, being obliged to pass water often during the day and to get up many times during the night, inability to hold your urine, smarting or irritation, passing brick-dust or sediment in the urine, catarrh of the bladder, uric acid, constant headache, dizziness, sleeplessness, nervousness, irregular heart heating, rheumatism, bloating, irritability, worn-out feeling, lack of ambition and sallow complexion.

Hooper's Parsley Kidney Pills are proving to be the most wonderful cure ever gotten out for weak and diseased Kidneys. If you have tried the many so-called "cures"—if you have become disgusted with them and stopped using them, try one package of Hooper's Parsley Kidney Pills and you will immediately begin to feel better. Hooper's Pills are a cure. They will stop the trouble just where it is and prevent that awful and dreaded Brights Disease. Don't buy any hut Hoopers. The British Pharmacal Co., Milwaukee, Wis., Distrihutors.

Price 50 cents a box.

San Francisco, Saturday, October 29, 1904.

THE CALIFORNIA CIRCUIT of harness racing must he eolarged and improved. Ths few mset-iogs given this year wers the bsst ever held in the State, and but for the unfortunate conditions of things at Sacramento, where the State Fair for the first time io an existsnce of fifty-ons years, failed to pay its purses, the circuit of six weeks would have bssn one of the most successful sver held on the Coast. Pleasanton, San Joss aod Santa Rosa held meet-ings thst were almost of Grand Circuit calibre, and the associatioos giving them had balances of profit to turn into their treasuries. All that will be oeedsd next year is an eolargemsnt of this circuit. The State Fair nesd oot be reckoned with as a good cir-cuit can be made up without it. There are at least five additional cities that cao be brought into the cir-cuit that will give good cleao harness racing a geosrous support. Ws refer to Los Angelss, Saota Cruz, Stockton, Fresno and Woodland. At all of thsss places with the sxception of Santa Cruz, well appointed tracks are already located, aod at that beautiful seaside resort one of the fioest tracks in California will be huilt during the nsxt fsw months. Here then is an opportuoity to arrangs a circuit that will be worth while. By starting at Los Angsles with an early summer meeting, the racing can thsnce move to Frssno, to Stockton, to Plsasantoo, to San Jose, to Saota Cruz, to Santa Rosa, to Woodland. This would give a circuit of eight weeks which would be ample for a summsr campaign of harness racing, aod would induce many ownsrs to traio aod race their horses who have not in late ysars bsen doiog so. The suggestion has bssn made that thsse eight cities form the Calfiornia Circuit of 1905 and announcs dates. The Pacific Coast Trotting Horss Bresders Association can give one or more of thess mestings as it did last year and will be willing to take the datss that will be most convsoieot for the others. The managers of the proposed nsw track at Saota Cruz will givs a program that will rank with aoy evsr offsred in the State, and the Pleasaoton association which has already demonstrated its ability to hold a high class mesting will aim to surpass its splendid effort of last year. Now that tbe Woodland track has hsen purchassd by ons of the lsadiog trot-tiog norss breeders of Califoroia it will agaio bs the sceoe of a great harnsss race meeting and its citizens cao he depeoded upon to equal their best efforts of former days. Los Angeles, Fresoo and Stockton need ooly to aonounce good programs to receive large eotry lists as the horsemen enjoy racing at all those tracks. There should be an early meeting of representatives of the tracks here mentioned that some plao of action may he agreed upon. The managers of the Pleasan-too and the Breeders associations would doubtless be present and ready to show to the representatives from other places how they gave four days of harness racing this year with big purses and made their meet-iogs pay. The California circuit should be formed not later thao Jaouary, and dates aod purses an-nounced. Energy, enthusiasm and good maoagemeot can arrange a circuit of the best raciog ever given on the Coast.

THE FALL SALE OF THOROUGHBREDS to be held by the Fasig-Tipton Company at Lexingtoo, begiooing Monday, Novemher 28th, promises to be the greatest ever held in Keotucky. The sale will comprise large coosignments of oative aod imported stock, stallions, mares, yearliogs and weanlings. Parties wishiog to secure catalogue space should send in their entries before Novemher 5th. All the leadiog breeders in the country will be represented. J. B. Haggin will sell 122 broodmares and 74 yearlings and there will be consignments from Clareoce Mackay, Milton Young, Baker & Gentry, Dixiaoa Farm, and many other famous breeding establishmeots. See the advertisemeot oo opposite page.

LARGE PREMIUMS will be givsn horses, cattle and all domesticated livsstock at the Lewis & Clark Csntennial Exposition at Portland, Oregoo which opens Juoe 1, 1905 and closss October 15th the same ysar. A lettsr to this journal form Henry E. Reed, Secretary of ths exposition, states that $12,000 in cash premiums will he given horses, $16,500 to cattle, $6500 to shsep and goats, $3500 to swins, and $1500 to poultry and psts. This is a total of $40,000 and Califoroia brseders should begin now gstting their stock rsady to take a good share of the money. The fair is csrtain to bs a grsat success.

THE SALE OF JERSEY CATTLE from the Yerba Buena Farm, hsld by Frsd H. Chase & Co. last Tuesday evenlng was a complete succsss. There was no dsmand for hulls, but the cows and heifers sold readily at prices ranging from $50 to $225. The avsrage was very close to $100 per head.

Answers to Correspondents.

C. G. FAIRFIELD, Geyserville—Oakland Boy, chsst-nut stallion, has a pacing record of 2:29. He was by Winthrop out of a Blaokbird mare.

RAY DITTUS, Sacramento—Wilkesdale 4541, brown horse foaled 1883, was got by Alcantara 729, dam Thorodale Maid by Thorodale 305, grandam Bridss-mald by Hambletoniao 10, great grandam by Hector a soo ot Lattourrette's Bellfouoder. George Dextsr 2:18¼ (rsgistsr number 26,057) is by Dsxter Prince, dam Nslly C. by Kilrush, son of Whipples Hambls-tonlan, grandam Firefly by James Monroe a son of Naubuc. Antinous 4778 is by Electioneer 125, dam American Girl by Toronto Sontag, grandam Laura Keene by Hambletonian 10. His record is 2:28½. Big Lize was a bay mare foaled 1873 by Geo. M. Patchso Jr., dam Loog Islaod Maid by a soo of Loog Island Black Hawk. Her record of 2:24¼ was made io San Fraocisco on August 11, 1883.

C. A. HARRISON, Victoria, B. C.—In a harness race best two heats in three, all horses not distanced cao start in the third hsat. Rule 31, Section 1, Natiooal Trotting Associatioo says that in heat rsces, best two io thrse, "a horse oot wioning ooe heat in three shall not start for a fourth."

J. H. MARKS, Sacramento—Lady Bird by Winwood (soo of Antevolo) was out of Mollie Webster hy Capt. Webster. She has no rscord of 2:30 or bstter.

A. J. COMPTON, Santa Rosa—The horse you refer to is Edeo Vale, not Eveo Dale. Edso Vale is by Eros 5326, dam Meta hy Pisdmont, secood dam Mecca by Mohawk Chief, third dam Mayfly by St Clair. His official record is 2:20, but he has ao unofficial record of 2:16 made io a matinee race.

HOWARD KERR, Sacramsnto—Your filly is not eligible to registration under the rules. Margsry Daw by Flaco we do not find rsgistered, nor is Flaco regis-tsred.

SUBSCRIBER, National City—Kewanna 1749 was foaled in 1891. He is by Ssalskio Wilkes 5825, out of a mare by Almoot Pilot 763. He has already sired oos in the list—Black Acs 2:15¾—aod all his colts are very promising.

SUBSCRIBER, Oakland—Altoona Jr. is oot in the list of staodard performers and is not registered.

Of Value to Horsemen.

Do yon tnrn yonr borses out for tbe winter? If so, we want to call your attention to a very important matter. Horses whicb bave been used steadily at work eitber on the farm or road, bave qnite likely had some strains wbereby lameness or enlargements bave heen oansed. Or perbaps new life is needed to be infnsed into tbeir legs. Gombalt's Caustic Balsam applied as per direc-tions, juet as you are turning tbe horse out, will he of great bene-fit; and tbis is tbe time when it can be used very successfully. One great advantage in nsing this remedy is that after it is ap-plied it needs no care or attention, hut does its work well and at a time wben tbe borse is baving a rest. Of conrse it can be used witb equal euocess while borses are in the stable, hut many people in turning tbeir horses ont would nee Caustio Balsam if tbey were reminded ot it, and tbis article is given as a reminder.

Mr. A. E. Perreo of New York, a member of the State Fair Commissioo, wisbes to adopt the plan of classifying horses which has been in vogue at amateur clubs. By this plan all eotries are made without aoy regard whatever to records, and then a classification committee names the horses that shall start together. This plan might work very well where all the horses were known to the committee, but at meetings where entries were from all parts of the couotry it would be like drawing positions in a race—pure luck. Classify-ing horses by records may not always result in good races, but it does very well unless entries close long before the meeting.

When Millard Sanders distaoced his field with Tom Axworthy (4) 2:08¾ at Lexingtoo last week, it was not the first time the California reinsman had accom-plished the feat. Years ago at Detroit, before the M. and M. received its present name, Sanders won that event with Guy 2:09¾ in like manner.

See Dan Patch and the World's Fair.

Our rsadsrs who intend to visit the great World's Fair at St. Louis during November will be plsased to know that the world's champion harness horse Dan Patch 1:56 will givs two of his marvelous spsed sx-hibitions at the Delmar race track, which is dirsctly opposite of the "Administration Entrancs" of the World's Fair ground.

Dao's sxhibitions will bs on Novembsr 5th and November 10th, commeocing at 2 P. M. This is the only chancs you will svsr have in your life to see the grsatsst fair in the world aod ths greatest horse in the world io one day.

It is nothing unusual for Dan Patch to draw 50,000 people to one of his wonderful psrformances aod many of them travsl for hundreds of milss. The American peopls are great admirers of genuioe grsat-nsss and Dan Patch appsals to them, not only on accouot of being the fastsst horse that ever lived, but also on account of his lovable disposition. He has a spscial liking for ladies and children and the horse never lived who had so many ardent admirsrs as the World Famous Dao.

We have ssen a photograph of him hitched to a sleigh aod bsing drivsn by Harold Savage, the owner's sight-ysar-old soo, aod the sleigh was crowded with small boys aod girls. This is simply one illustration of his trus greatnsss and shows an iotelligence almost human. It is a sight to bs remsmbered for a life time to see Dan Patch nace ooe of his fast milss in a race with two thoroughbrsd ruoniog horses hitched to spesd carts.

As he comes flying under the ths wire in this close aod sxciting cootest, the blood of ths most phlsg-matic person will bs sent tingling throughout the entire system aod men and womsn are often sesn cryiog for joy. Any ons who lovss a good horse will always fssl repaid for a long trip to see the fastest harness horse that has ever stood oo earth. It will be ao evsnt to tsll your children and grandchildren for ysars to come.

It is worth the small admission to ses Dao stop io front of the grandstaod aod look at the people. This he always doss and no driver cao get him to move uotil he has a good look at the crowd. In scoring dowo for a start Dao always tells the driver wheo he is ready for the fast mile. Sometimes he will score down twice and sometimes three or four times, but whsn he is rsady he seods word to the trainer by a different hold the bit. You cao see the King of Harness Horsedom at St. Louis on ths afteroooo of Novsmbsr 5th, or the afternooo of November 10th, for only fifty cents. Mr. M. W. Savage of Mionsapolis, Minn., the owner of Dan, writes us that these two datss are the only datss on which Dan Patch will appear at St. Louis.

We hops you will be able to visit the World's Fair and see Dao Patch on thess dates.

Slaves to Paraphernalia.

In commeoting on the fact that William Andrews rsmoved five pouods of boots and straps from the legs of Grace Bond just before startiog her in the fifth heat of the Keotucky Futurity, Henry Teo Eyck Whits says:

"It is to bs hoped that so startling an illustration of ths haodicap which a collsctioo of ussless hoots imposss oo the sverage trotter will be heeded by horsemen, but it is douhtful if more than a fsw of the really intelligent ones pay any attentioo to the inci-dent. The average trainer aod driver is a slave to the boots, bits, hody aod lsg washes and pateot coo traptions in general for the alleged benefit of horses that are placed on the market every season by shrewd folk who realize that oot more than one trainer in a score has a practical knowledge of the business he is eogaged in. That is why so few traioers of haroess horses make any permanent success. Almost any man who stays io the game will occasionally ruo across a first-class horse, aod by virtue of the inhereot merits of that animal he will ride in front for a season or two, after which he retires to his original seclusion in 'tbe bushes.' The wonder is that the average horse survives the messes that are forced down his throat in the shape of so-called stimulants, speedmakers and tonics, and that his hair and hide come safely through the course of leg and hody washes, liniments and salves imposed upon them by tbe average trainer. When to this is added toe weights, side weights, spreaders, check reins, gaiting poles and about forty other devices to annoy animals that are deserving of good treatmeot, it is no wonder that only about ooe out of every 100 horses that are 'trained' ever amouots to aoything in the racing lioe."

The racing men ought to try the Hart Apartmeots this winter; 3 and 4 rooms, private baths, telephone, steam heat, first class. 750 Ellis street. *tf

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

CLOSE OF MEMPHIS MEETING.

Dan Patch Paces in 1:56 and Major Delmar Breaks High Wheel Record.

MEMPHIS, TENN., October 21.—C. K. G. Billings' string of light harness horses put three world's records to its credit here this afternoon. Prince Direct and Morning Star paced half a mile to pole in 1:00¾, clipping half a second off the previous mark; The Monk and Equity trotted a mile to pole in 2:07¾, clipping a quarter of a second off their own world's record, and Billings rode his pacer Greenline a mile in 2:14, knocking a fraction from the mark made by him here last Tuesday.

Prince Direct and Morning Star, the pony pacers, proved conclusively that they will break the mile record to pole as soon as they are ready. Their half-mile record was made from the quarter to the three-quarters poles, but the pair stepped the full mile, from wire to wire, in 2:05½, equaling the world's record made by Prince Direct and Direct Hal two years ago in this city.

Major Delmar and Dan Patch were scheduled to go against the world's records, but their owners refused to start them because of the high wind which was blowing down the homestretch, and the fact that this wind prevailed makes the record-breaking perform ances of Billings' horses all the more remarkable.

Funston, the heavily played favorite in the 2:25 class pace, just missed the flag in the first heat, but he won the next two with ease.

The first mile dash went to Tom Axworthy and the second to Van Zandt. The half-mile dash was won by Don N., and Sweet Marie added another purse to her already large number by winning the 2:06 class trot with ease. Summaries:

Pacing, 2:25 class, purse $1000.

To beat 1:01¼, pacing to pole, half a mile—Prince Direct and Morning Star (Billings) won. Time, 1:00¾. Fractional time—Quarter, 0:30; half, 1:00¾.

To beat 2:14¼, pacing to saddle—Greenline, b g by Online (Billings) won. Time, 2:14. Fractional time—Quarter, 0:33¼; half, 1:06; three-quarters, 1:39: mile, 2:14.

MEMPHIS, TENN., Oct. 22—In spite of a brisk wind blowing up the home stretch, and cold and unfavorable weather to-day, two records were broken and one equaled at the Memphis track. Lou Dillon circled the track in an attempt to beat 2:01¾ in exactly those figures. Tuna trotted a mile in the first heat of the first race in 2:08½, which is the fastest mile trotted by a four-year-old this year.

The performance of Lou Dillon was remarkable, considering her bad condition on Tuesday, in her race against Major Delmar, and the unfavorable weather conditions to-day.

Paced by a runner beside her, the mare went the first quarter in 0:30½. The next quarter was across the wind, but she reached the half mile pole in 1:01¼; the third quarter was into the teeth of a young hurricane, but the pole was passed in 1:31½, and the mile was made in 2:01¾.

Three of the four races of to-day turned out about as expected. Alexander, driven by Ed Geers, defeated Redlac, the favorite in the 2:09 class trot, but the favorites won the last three races. They were Tom Axworthy, Ash Rose and John M. Summaries:

Trotting, 2:09 class, purse $1000.

Alexander, b g by Star Duroc..........(Geers) 8 7 1 1
Redlac, b b..........(Grunob) 2 1 2 2

Time, 2:01¾.

Fractional time—Quarter, 0:30½; half, 1:01¼; three-quarters; 1:31½; mile, 2:01¾.

MEMPHIS, TENN., October 24.—Major Delmar to-day lowered the world's record for a mile, without a pacemaker in front, to 2:01¼. The previous record, held jointly by Major Delmar and Lou Dillon, was 2:01¾. His trial against time was made before sunset, and the air was cold, although the high wind which had been blowing all day, had gone down considerably. The gelding did not seem warm until he passed the quarter pole, which point he reached in 31 seconds. Down the back stretch he had the advantage of what slight wind was blowing, and he made the second quarter in 0:29¾, while the third quarter was reeled off in 29½ seconds. Coming around the last turn and into the homestretch, Major Delmar tired a bit, but he finished out the last quarter in 31 seconds, and the full mile in 2:01¼.

Charley Mc., ridden by C. K. G. Billings to beat 2:15¾, only succeeded in equaling that time, and the other time trials of the day resulted in failures. Dan Patch was started against 1:59¼, but failed by a whole second to equal that time. Equity also failed in her effort to beat 2:08¾ to a high-wheeled sulky, as it required him 2:12¾ to circle the track with the antique running gear trailing behind.

The professional races of the day were not especially interesting, but both amateur affairs furnished good sport. Summaries:

Time—2:12¾.

Fractional time—Quarter, 0:32; half, 1:04¾; three-quarters, 1:38; mile, 2:12¾.

MEMPHIS, TENN., October 25.—Three records were broken at the Driving Park today, although a number of attempts were made which failed. C. K. G. Billings drove his pair of pacers Morning Star and Prince Direct, against the amateur record of 2:10 to pole, and succeeded in lowering it to 2:06. Her Grace, a bay mare, owned by Clem Beachy of Lexington, circled the track in 2:04¾, the fastest time ever made by a green pacer. The mare, however, failed in her attempt to beat 2:03.

John M., E. E. Smathers' great piece of racing machinery, kept up the work he has been doing by winning the Emerald handicap, for 2:06 pacers. He lost the first heat to Locanda, who paced the mile in 2:03½, which equals the stallion record in a pacing race this year, but won the second heat in 2:02¾, the fastest time made in a second heat this year. He also won the third and deciding heat.

Lou Dillon, Prince Alert and Dariel all went against time, but none succeeded in lowering a record.

Sweet Marie won the free-for-all trot, with great ease, and Colonel D. took the 2:17 trot, also with ease.

The classic Transylmulia was the feature of the day's card. Ancestor, by Pedigree, driven by Ed Benyon, the only mule in the lot which did not run at least half the way, won, with Long Drawn, driven Scott Hudson, second with only four breaks to his discredit. Codfish, driven by H. C. Hersey, finished sixteenth, but was placed third for not running more than three-quarters of the way. The time, 4:10¼, breaks the world's record for a mule race. Summaries:

Fractional time—Quarter, 0:31¼; half, 1:02½; three-quarters; 1:34½; mile, 2:06.

MEMPHIS, TENN., Oct. 26—Dan Patch paced a mile in 1:56 here to day, the fastest time ever made by a harness horse, and Major Delmar trotted a mile to a high-wheeled sulky in 2:07, which breaks the world's record made by Maud S., just twenty years ago. It was the last day of the local meeting and the last of the Grand Circuit of 1904, and these two wonderful performances were a fitting climax to a great meeting and a sensational season.

The showing of Dan Patch astounded the spectators. Two months ago he was at the point of death. To-day he traveled faster than any harness horse ever went. True, he was paced by a runner with a wind shield in front and another at his side, but even at that his performance is marvelous.

The son of Joe Patchen warmed up in splendid shape, and, after scoring once, he went forward. With clock-like precision the brown horse stepped around the first turn and to the quarter in 0:29. Turning down the back stretch Scott Hudson, who drove the pace-maker, had to urge his horse forward, as Patch was crowding him. The pacing marvel fairly flew to the half in 0:57½, and when the time was announced a great cheer came from those present. At the three-quarter pole the timers' board showed 1:26½. When the brown pacer passed the judges' stand in 1:56 flat cheer after cheer greeted the performance, and Hersey was almost carried from his sulky on his return to the stand.

The wind shield used was the same as that employed when Lou Dillon trotted a mile in 1:58½. It consisted of a strip of canvas about four feet square, attached to the sulky of the running pacemaker.

The exhibition of Major Delmar, E. E. Smathers' grand gelding, was almost as remarkable. After Equity's feeble effort against the often attempted and long standing mark of Maud S., it was felt that her figures were bound to stand for some time to come. Alta McDonald and Major Delmar, however, upset all calculations.

Ed Geers was badly hurt in an accident during the afternoon. The veteran trainer was working out Joymaker between the heats of the last race. As he rounded the last turn he was thrown to the ground. His left leg was broken below the knee and his right ankle sprained.

W. O. Foote whose driving has been unsatisfactory during the meeting, was to-day suspended for one year. A short meeting will be held at the Memphis track on November 3d, 4th, 6th and possibly the 7th. Lou Dillon and Dan Patch will both go against their records. Summaries:

Pacing, 2:21 class, purse $1000.

Funston, ro g by Dictatus..........(Snow) 1 1
Emil D., b g..........(Rafferty) 2 2
Flinch, b g..........(Whitehead) dis

Time—2:13½, 2:27¼.

Notes and News.

Dan Patch 1:56.

Major Delmar 2:07 to high wheels.

A very stylish road mare is offered for sale. See ad.

Sweet Marie 2:04¾ hae won seventeen heats in hetter than 2:10.

A general attack on the records will he made at Memphis next week.

McKinney, Sidney Dillon and Axworthy will have full books next year.

Grace Bond 2:09¼ won $14,000 at the Lexington meeting in two etakes.

Don't miss making third payment next Tuesday in Breedere Futurity No. 4.

Monroe 2:10½ and Leonora 2:13 of the Salishury string will go to the Old Glory sale.

W. J. Andrewe headed the liet of winning drivers at Lexington with $13,625 to his credit.

Jay McGregor 2:08 is only six yeare old but three of his get have taken standard records.

The two fastest stallions of the year, Locanda 2:03¾, and Redlac 2:08½, are hy Allerton 2:09¼.

Kelly Brigge won his race at Boise, Idaho, and his mile in 2:11 there hroke the track record.

The hetting was very light at Lexington this year, hut the racing was high claee nevertheless.

The list of new 2:10 trotters for 1904 now numhers thirty. It has heen a great year for trotters.

Trilhy Direct 2:08¼, Mush 2:08¾, Clipper 2:06 and Ben F. 2:09½, will all go to the Old Glory sale next month.

Bartolo, a three-yeaa old colt by the champion yearling trotter Abdell 2:23, has taken a trotting record of 2:19¼.

There were 69 heats trotted at the Lexington meeting, the fastest being 2:04½ and the sloweet 2:18¼, an average of about 2:11½.

The *American Horse Breeder*, generally correct in ite etatements, puts Ole 2:11 and Briney K. 2:11 down as pacers. Both are trotters.

J. M. Nelson, who took China Maid 2:05¼ and other good ones East two years ago, ie now at San Jose engaged in the real estate husiness.

When asked why he sold McKinney, H. B Gentry quickly replied: "Beoauee I was offered my price and saw no honorahle way of refusing it."

The Utah State Fair ran one week and sixty thousand people attended. A hig race program with $1000 purses is promieed for next year.

Mise Palo Alto took a standard record recently, gives Palo Alto 2:08¾ a total of sixteen standard performers out of a total of ahout forty foale.

The engagement of a promising colt or filly in a rich futurity often adds hundreds and eometimes thousands of doliars to his or her selling value.

There ie a trotting mare down at San José that is the real thing She worked a half in 1:03¾ the other dsy and an offer of $5000 has heen refueed for her.

Of the mares nominated in Breedere Futurity No. 5, those bred to Kinney Lou 2:07¾ are the most numeroue. Twenty-six of them were named in thie stake.

Nancy Stam 2:30 eleven years old hy Stamhoul 2:07½, dam Nancy Lee the dam of Nancy Hanks 2:04 eold for $245 at the Round Top Farm sale in New Jersey last week.

Lou Milton, dam of Lou Dillon 1:58½ did not produce a foal this year, hut was hred again to Sidney Dillon and hae heen nominated in Breedere Futurity No. 5.

Third payment of $5 each is due and must he paid hy Tuesday, November 1st on all foals entered in Pacific Breeders Futurity No. 4, which is for the foals of 1904.

Major Delmar'e final "prep" for the Memphie cup race consieted of five milee at Lexington. The fastest was in 2:08¾. He was driven to wagon hy Mr. Smathers.

The *American Horse Breeder* aeke: Have any of the dash or hest 2 in 3 racee this eeaeon heen more thoroughly enjoyed hy horsemen, who are ardent lovers of trotting sport, than the five heat Kentucky Futurity for trotting three-year-olds and the five heat Transylvania, in hoth of which world'e records were reduced?

A practical horseman and hreeder wants to meet a capitalist who desiree to engage in the breeding, training, racing and selling of harness horses. See advertisement.

A meeting of the Board of Appeals of the National Trotting Aseociation for the Pacific District will be called for next month. Several important cases will he up for decision.

The owners of Baronlace, the paoer by Lovelace that took a record of 2:15 up north thie year. were offered $2500 for the colt hy California parties, hut the offer was refused.

Alex. Brown, who recently purchased the Woodland track, says that a good meeting will he given there next year and good purses will he hung up for the trotters and pacers.

Dunham, Fletcher & Coleman recently eold through their Woodland hranch a fine gray Percheron stallion to W. H. Evans and Peterson Bros. of Templeton, San Luis Ohispo county.

Nell, hy Estill Eric, ls the only mare that has produced two trotters to heat 2:09, Belle Vara 2:08¾, and Tom Axworthy 2:08¾. The latter made his record in a winning race at Lexington.

Millard Sanders has a yearling, a two-year-old, a three-year-old and a four-year-old, all hy Axworthy, that he will match againet any other four horses by one sire, for $1 up a eide per race, winner to take all.

Keep your colts paid up on that are entered in the etakes. Third payment of $5 is due and must he paid on or hefore Tueeday next on all foale entered in Breedere Futurity No. 4, which is for foals of this year.

When Country Jay trotted his mile to saddle in 2:10 he only had a 95 pound hoy on his hack, so it ie not a record as the rules require 145 pounde. When Mr. Billings rode Charley Mac a mile in 2:13¾, the gelding carried ahout 180 pounde.

The largest list made by any one nominator in Breeders Futurity No. 5, $7000 guaranteed, was sent in by the Santa Rosa Stock Farm which made ten nominations. Mr. W. A. Shippee was next with nine, J. W. Haile & Co. third with eight.

There is talk of a $5000 stake for trotters and one of the eame eize for pacere to he given in California next year. Two such stakee would keep lots of the boys home who have heen wandering in the East looking for easy money that was very hard to get.

Tiverton 2:04½ is in winter quarters. He wae not engaged at Memphis. An effort was made to get a match for him with Sweet Marie there, and Secretary Howe held out hig inducements for it, hut as the mare had two engagements there it wae declined.

W. G. Durfee, F. E. Wright and Fred Ward, who took their horsee to the North Pacific circuit this summer, have returned home. Although they each won a few races, they state that railroad fares, entrance fees and hotel hills used up all their winninge.

Frank S. Turner, euperintendent of the Santa Rosa Stock Farm, will take Sidney Dillon East to the Old Glory sale. The great stallion will he in good hands. The car containing the eire of the firet two minute trotter will leave Santa Rosa ahout November 14th.

It is to he hoped that the great reinsman Ed Geere, who wae so seriously injured in an accident at Memphis on the last day of the meeting, will soon recover. The trotting turf neede the services of euch men ae Mr. Geers, and hie loss to it would he a national calamity.

A three days' meeting will he held at Memphis next week during which Lou Dillon, Major Delmar, Dan Patch and others will he sent against their present records. It may he that Sweet Marie will he given a chance to eee how fast she can trot a mile against the watch.

One hundred and eighteen stallione are represented in the Breedere Futurity No. 5 hy 388 mares bred to them this year. This ie pretty good evidence that the breeding of trottere is on the increase on thie Coast as thie list of stallions is the largest ever repreeented in the stake.

Work on the new track at Santa Cruz wae to hegin this week. It will be a regulation track thrown up one inch to the foot on the turne and the soil will permit training over it an hour after a heavy rain. It ie hoped to have the track ready for trainers hy the first of the new year.

James Thompson did not do any "dreaming" on his campaign with John Caldwell hut was wide awake all the time. He won over $7000 with the Strathway gelding and closed the season with a record of 2:11¼ on the horse, which leaves him eligible to the hig 2:12 class stakes for next year

Mr. Rohert Leighton, who has heen acting as presiding judge and manager of the races on the North Pacific Circuit, reached San Francieco this week, and will immediately enter upon his duties as manager of the Polo and Pony Racing Aeeociation that will hold meetings during the winter months at Riverside, Santa Barhara, Del Monte, Burlingame and San Francisco.

"I tell you," said the passenger who had just finished reading an automohile advertisement in one of the magazinee, "the horse must go." "Yes," anewered the man sitting opposite with a copy of the BREEDER AND SPORTSMAN in hie hand, "I see that horse McKinney just went for $50,000.

Summaries of the races at the Walla Walla Fair appear in this ieeue. There were heavy rains during three days of the six which accounts for the slow time in many of the events. While the race traoks up north are often a eea of mud during the eummer meetings, the people never let a little thing like that hother them.

Barney Simpeon, who now owne the pacer Arner 2:17¼, own hrother to Diahlo 2:09¼, Don Derhy 2:04¼ and others; hae this etsllion at Pleasanton and may give him a lower record next year. Arner can pace a mile in 2:10 whenever he ie pointed for it. He ie a grand looking horse, one of the handeomest of all Bertha's foals.

County Clerk J. D. Kalar of Monterey county, has recently purchased from the estate of Jesee D. Carr, an eight monthe old filly that has great epeed inheritance. She is hy Searchlight 2:03¼, dam hy Boodle 2:12½, second dam hy Carr's Mamhrino, eire of the dam of Sweet Marie 2:04¾. The filly ie a dark hay and a grand looker.

Almaden 2:22¼, winner of the Occident Stake this year and of the two-year-old division of the Breeders Futurity laet year, Murray M. 2:14 winner of the three-year-old Breeders Futurity thie year, and Marvin Wilkes winner of the Stanford Stakes this year, are all represented in Pacific Breeders Futurity No. 5 hy mares hred to them last epring.

The eecond dam of the two-year-old gelding Jaok Axworthy 2:15½, one of the season'e eensational hahy trotters, wae the famous old-time Grand Circuit trotter Trinket 2:14, hy Princeps. Trinket was hred to eeveral prominent siree. Mated with Stamhoul 2:07½, ehe produced a filly called My Trinket, that, when mated with Axworthy 2:15½, produced Jack Axworthy 2:15½. My Trinket was trained and was fast, hut hroke down hefore taking a record.

Lewis B. Rooker, hrother of A. F. Rooker, a well known etock man of Stockton and formerly of Nevada, was accidently killed at Stockton last Wednesday afternoon hy falling from his horse while he was driving a hand of mulee toward that city. His horse stumbled and fell and Rooker struck on hie head, hreaking his neck. He wae a son of General Rooker of Nevada and was horn at Austin, in that State, thirty-five yeare ago.

Young hreeders when selecting their stallions and hroodmaree should hear in mind the fact that the produce is quite as likely, if not eo, to follow the family in general characteristics as the individuale. For instance, a stallion which is himself large hut the majority of whose anceetors were small is more likely to get a large porportion of animale that will he lacking in size at maturity than a emall eized stallion the majority of whose ancestors were large animals. The eame ie true of defects in conformation, temperament, gait, eoundness, etc.—*Am. Horse Breeder.*

Victory, the handeome two-year-old stallion whose picture adorns our front page, is one of the hest hred ones on the coaet. Hie eire Nearest ie the sire of Alone 2:09¾ and ie an own hrother to John A. McKerron 2:04½. His dam Princese Airlie is hy Prince Airlie, son of Guy Wilkes and the great hroodmare Chantilly by Nutwood The second dam of Victory is Minnie Princess by Nutwood, third dam Kate Crockett hy Langford, son of Williamson's Belmont, fourth dam Fanny by American Boy, Jr., and fifth dam Puss hy Lance. This ie royal hreeding.

Mr. I. C. Mosher stopped over at Sacramento a day or two last week on hie way home to Loe Angelee with the horses he had heen racing on the North Pacific Circuit where he wae the "Geers" of the north, heing at the top of the liet of winning drivere. Mr. Mosher had with him Red Skln, winner of the $2000 etake at Salem, Oma A., Tidal Wave, Athalene, and a couple of gallopere all the property of Mr. S. S. Bailey. He also had the handsome young hlack stallion Nocturno, helonging to Mr. G. A. Westgate of Albany, Oregon, that he will train in Los Angeles this winter.

Mr. T. J. Crowley received newe last week that his weanling colt Commodore Sloat hy Monterey 2:09¼, dam Lottie Parks 2:16¾ hy Cupid, wae severely injured at the Fair ranch at Newark. The injury is in the etifie and the little fellow ie now in a sling. The colt ie entered in the $7000 Pacific Breeders Futurity No. 5 which closed on the 15th inst., and is aleo in the Crowley Stake and it is to he hoped will soon fully recover from the injury and he able to meet all hie engagements when grown. The Crowley Stake without the Crowley colt would he like the play of Hamlet without the melancholy Dane.

The Healdshurg Frenoh Percheron Stock Co. has heen organized hy five prominent farmers and stook hreeders of Sonoma county and the eplendld hlack Percheron etallion Alexando has heen hought from Dunham, Fletcher and Coleman of Woodland. The company ie composed of the following gentlemen: F. A. Petray, President; H. G. Hewitt, Secretary and Trustee; C. B. Emery, Manager and Treasurer; J. A. Petray and E. A. Petray, Trusteee. All the memhere of thie company are young energetic men and are huetlers. Mr. H. G. Hewitt is the little one of the company and he le six feet high and weighs nearly two hundred It is possihle that they may purchase a French coach stallion.

388 ENTRIES IN BREEDERS FUTURITY NO. 5.

The List of Individual Nominators Larger Than Ever---Many Stallions Represented.

Breeders Futurity No. 5, which has a guaranteed value of $7000, closed for nominations on the 15th inst. Two hundred and fifty-four persons or stock farms made nominations, the largest number of individual nominators represented in this stake since its inception. There were 388 entries, fifteen less than the number received for the last stake, but when it is considered that two or three stock farms, heretofore regular patrons of stakes, have gone out of existence, the entry may be considered the best ever received. As usual several persons put off making their entries until too late, and already over a dozen applications are filed for nominations in the stake should any of the mares prove barren or their foals die before the next payment is due. The 388 mares nominated were bred to 118 stallions, which is the largest number of stallions ever represented in the stake. Last year Zombro 2:11, son of McKinney headed the list, 24 of the mares bred to him being nominated. This year Kinney Lou 2:07¾, another son of McKinney, heads the list with 26 of the mares bred to him named. Sidney Dillon comes next with 17, Stam B. 2:11¼ is represented by 16, Searchlight 2:06¼ 14, Bonnie Direct 2:05¼ 12, Nutwood Wilkes 2:16½, Monterey 2:09¼ and Demonio 2:11¼ have 10 each, Captain Jones 9, On Stanley, Petigru, Count Hannibal and Greco 8 each. Robert Direct, Delphi and Lecco are each represented by six mares and Moses S., Nushagak, Prince Ansel, Welcome, Zombro, Zolock, Jules Verne and Athablo by 5. The stallions represented by 4 mares are I Direct, John A., Kewanna, Directum II, Neernut, Stoneway, Seymour Wilkes, Tom Smith, Temescal and Washington McKinney. Those by 3 each are Meridian, Lynwood W., Hambletonian Wilkes, Frank S. Turner, Edward W., Almaden, Chas. Derby, Cassiar, Cruzados, Mendocino, Nearest, Peter J., Royal Derby, Wayland W. and Scott McKinney, and those by 2 each are Azmoor, Alta Genoa, Bert Logan, Bonnie McK., Barytone, Cassian, Dictatus, Doctor W., Dazzler, Diawood, Diablo, Direct Heir, Educator, Gen. Frisbie, Highland, Iran Alto, Six Bells, The Commonwealth, Tennysonian and Young Altamont. The rest of the list of stallions, those represented by one mare each, is as follows: Alta Vela, Alki, Athaneer, Big Boy, Bonnie Steinway, Bayswater Wilkes, Boyd Derby, Benton Boy, Coronado, Cupid, Dave Ryan, Dumont S., Dictatus Medium, Direcho, Electro McKinney, Ed. Keil, Exchange, Guynut, Henry Nutwood, Hurler, H. M. Stanley, King L., Moko, Marengo King, Milton Gear, Murray M., Mambrino Chief Jr., Mestoe, McKinley, McNear, Monochrome, Marvin Wilkes, Nehalem, Peralta, Prince Robert, Pacheco W., Prince Derby, Richmond Chief, Robin, Red Seal, Silver Bee, Sky Pointer, Jr., Sheet Anchor, Son of Stam B., Silver Coin, Sutter, Tomonco, The Oregon and Waldstein McKinney.

The Tulare Fair and Race Meeting.

The fair and race meeting at Tulare just closed was in every respect a success. The exhibit of stock was first-class. All the different breeds of cattle were represented by some of the best herds in the State, and much interest was shown in this branch of the exhibition. There were hogs and sheep galore, and six large pumping plants in operation on the grounds, but as at all fairs the horse was the greatest attraction. All the different breeds of horses were there, from the standard trotter down to the Shetland pony. The stock parade was of such proportions and merit as to remind one of a State fair. The procession was led by Sheriff W. W. Collins with Howard Williams' beautiful span of mares. Then came standard-bred horses, thoroughbreds, draft horses of all breeds and grades, and about a half-mile of cattle of different breeds. Mrs. Howard Williams' beautiful saddle mare, Monte Evans, attracted much attention and comment by her graceful perambulations.

There were some running races on Wednesday, but the regular program began on Thursday. Summaries:

Pacing, 2:17 class, purse $120.

Proctor	(Hackney)	1	2	1
Newport	(Sangster)	2	1	2
Graceful George	(Depoister)	3	3	3

Time—2:20, 2:19½, 2:19¼.

Trotting, stallions, purse $50.

McKinley, b s by McKinney	(Martin)	1	1
Boy Wilkes by Bay Wilkes	(Owens)	2	2

Time—2:47½, 2:56.

Trotting, to beat 2:30.

McKinley by McKinney (Martin) won

Time—2:29.

Pacing, 2:15 class, purse $75.

George by Loeber	(Middleton)	2	1	1	1
Selda	(Depoister)	1	2	2	2
Bolivar	(Sangster)	3	3	3	3

Time—2:20, 2:19, 2:20, 2:18¼.

Gentlemen's road race.

Lita	(Norris)	1	1
Lucille	(Martin)	2	2
Emma Temple	(Rowley)	3	3
Bessie	(Lopez)	4	4

Time—3:04, 2:56.

Pacing, yearlings, one-half mile.

Rockaway by Stoneway	(Broilliar)	1	1
Double Gear	(Morris)	2	2

Time—1:16, 1:12.

Pacing, 2:28 class, purse $500.

Doctor W	(Leggett)	1	1	1
My Way	(Broiliar)	2	2	2
Lady R	(Sweeney)	3	3	3

Time—2:19, 2:15, 2:16½.

Pacing, 2:17 class, purse $200.

Proctor	(Hackney)	1	1	1
George	(Middleton)	2	2	3
Newport	(Sangster)	3	3	2
Graceful George	(Depoister)	4	4	4

Time—2:19¼, 2:19¼, 2:19½.

Pacing, two-year-olds, purse $200.

Stonelita by Stoneway	(Broilliar)	1	1
Frank Button	(Kirkman)	2	2

Time—2:48½, 2:20.

One of the notable events of the meeting was the performance of Rockaway in the yearling pace. This colt is only a month off the salt grass, and two weeks ago could not show better than a three-minute gait. In the second heat Mr. Broilliar, after he had gone a quarter at a moderate gait, shook the lines a little over his back and discovered that he had been holding a twenty clip in reserve. Rockaway is a light sorrel with four white feet and two glass eyes, characteristics of his mother. Mr. Broilliar will probably condition this colt to beat the world's yearling record later in the season.

Stonelita, Mr. Broilliar's two-year-old pacer, is also a remarkable animal, having stepped the Hanford track in 1:04, and is the most graceful, easy moving pacer ever seen in this section.

McKinley, the big fat son of McKinney, sprung a surprise by trotting a mile in 2:29 with only three weeks' preparation and weighing 1320 the day before the trial. If the track had been better he would have gone several seconds faster, as he trotted the hard part on the turn a quarter in 33 seconds.

There were many runners in attendance and three running races every day.

Mr. Ingwerson is entitled to much credit for his management of this fair, as everything went off smoothly and satisfactorily to all concerned.

Look out for something good in Tulare next year.

SPECTATOR.

Walla Walla Racing Summaries.

[Meeting, Oct. 10th to 15th.]

Pacing, 2:17 class, purse $500.

Prince Charles, ch h by Charles Derby	(Helman)	1	1

Time—2:20, 2:27.

Running, five furlongs—Eldred won, Zaza second, Albemarle third Time—1:03.

Running, six furlongs—Alice Carey won, Cerro Santa second, Suburban Queen third. Time—1:51½

Running, one mile and sixteenth—Anvil won, Glenrice second Lord Eldred third. Time—1:51½.

Running, six furlongs—Hogarth won, Resigned second, Trapshooter third. Time—1:17½.

Cured With One Application.

Mr. Theo. H. Ivory, Ivory Stock Farm, Smithville, N. Y., writes October 15th as follows: "One application of Quinn's Ointment removed the swellings or puffs in the gamble joints of a very valuable colt of mine. The puffs were of about five months standing, and I assure you I shall hereafter use it when necessary." This is the general expression of leading horsemen all over the country who have given Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs and all bunches there is nothing better. Price one dollar per bottle delivered. Address W. B. Eddy & Co. Whitehall, N. Y., if you cannot obtain it from druggist

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

Nov. 1-April 1—Trout season closed

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewator for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Closo season for taking salmon above tidewater.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Oct. 25, 28—World's Fair Dog Show, St. Louis, Mo. F. D. Coburn, Chief of L. S. Dept., St. Louis, Mo,

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E. Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Oct. 24—Missouri Field Trial Association. Sturgeon, Mo. L. S. Eddins, Secretary, Sedalia, Mo.

Oct. 24.—Ohio Field Trials Club. Washington Court House, O. G. R. Haswell, Secretary, Circleville, O.

Oct. 25—Connecticut Field Trial Club. ———— ——, Conn. F. M. Chapin, Secretary, Pine Meadow, Conn.

Oct. 31—Monongahela Field Trial Club. Ohlong, Ill. A. C. Peterson Secretary, Homestead, Pa.

Nov. 1—Sportsmen's Field Trial Club. Clare, Micb. Erwin C. Smith, Secretary, Midland, Mich.

Nov. 7—Independent Field Trial Club. 6th annual trials. Hntsonville, Ills. H. S. Humphrey, Secretary, Indianapolis, Ind.

Nov. 8—Western Beagle Club. Inangural trials. Oregon, Ills. Reno B. Cole, Secretary, De Kalb; Ills.

Nov. 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Kennel Club. Field trials. Clay City, Ind. C. F. Young, Secretary, Clay City, Ind. Week following Ills. Cb. trials.

Nov. ——National Beagle Club. 11th annual trials. Grafton, Mass.

Nov. 15—Miobigan Field Trial Club. ————, Miob. Chas. E. Sisson, Secretary, Muskegon, Mich.

Nov. 15—Central Beagle Club. 9th annual trials. ————. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 22—International Field Trial Club Rutbven, Ont. W, B Wells, Honorary Secretary, Cbatham, Ont.

Nov. 29—Virginia Field Trial Association. Martinsville, Vs. C. B. Cooke, Secretary.

Dec. 3—Continental Field Trial Club 10th annual trials. Thomasville, N. C. John White, Secretary, Hempstead, L. I.

Dec. 12—Alabama Field Trial Club Huntsville, Ala. J. M. Kirkpatrick, Secretary, Huntsville, Als.

Dec. 12—Pointer Club of America. 5tb annual trials. C. F. Lewis, Secretary.

Dec. 17—Eastern Field Trial Club. Waynesboro, Ga. Simon C. Bradley, Secretary-Treasurer, Greenfield Hills, Conn.

1905

—— ——American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, wbose dams have been duly qualified. Am. Field Publisbing Co., Chicago.

Jan. 9—Pacific Coast Field Trials Club. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco, Cal.

Jan. 10—Georgia Field Trial Association. Albany, Ga. P. M. Essig, Secretary, Atlanta, Ga.

The Late E. D. Fulford.

Elijah D. Fulford, a trap shooter of national reputation and a whole souled sportsman, passed away in the city of Utica recently.

There was a very large attendance at the funeral of friends and fellow sportsmen in that city on October 18th.

Services were conducted by Rev. James D. Corby of tbe Church of the Reconciliation at the family residence. The members of the Oneida County Sportsmen's Association attended in a body. Tbe Oriental Quartette, consisting of E. H. Stewart, Robert J. Hughes, A. Spencer Hughes and F. E. Swancott, rendered several selections. The esteem in whicb Mr. Fulford was held was shown by the many large and beautiful floral tributes, including a standing column four feet high from the Onelda County Spurtsmen's Association; placque of roses and palms from tbe Bre Powder Company; large and beautifully designed bed of flowers from the Du Pont and Laflin and Rand Powder Companies; Mr. Ed Banks of the Du Pont Powder Company sent a floral design; Annie Oakley sent an ivy wreath; large standing wreath from the employes of the Remington Arms Company; large pillow from the Union Metallic Cartridge Company. The bearers were Frank E. Butler of Nutley, N. J.; J. S. Fanning, Jersey City, N. J.; J. G. Heath, Madison, N. J.; C. R. Mizner, Clarence C. Boff and Charles Windbelm of Utica. Interment was made in Forrest Hill Cemetery. Of tbe bearers Jack Fanning represents the Laflin & Rand and Dupont Powder Co., at Wilmington, Del.; Messrs. Butler and Heath the Union Metallic Cartridge Co., with plant in Bridgeport Conn., and main office in New York city. They came to Utica as representatives of tbe company, especially to attend the funeral, all being personal friends of the deceased. Before returning home they spoke in highest terms of Mr Fulford and said that it had been possible a large delegation of trap shooters would have been present at the funeral, among whom were very many friends by whom he will be greatly missed.

Talks to Dog Owners.

EXHIBITING DOGS.

Having attempted to instruct his readers in the elementary principles of kennel management and breeding dogs, the writer may perhaps go a little further and offer a few suggestions upon exhibiting for the benefit of the beginner. As in most branches of life, experience will be found the tbe best teacher by those who show dogs, but still there are a few preliminary lessons to be learned, which, if laid to heart, may save the novice money and minimise the disappointments which every exhibitor, however eminent, has to endure at some time or other.

THE MISTAKE OF BEING OVER-SANGUINE.

To commence with, it may be laid down as an unvarying rule that if anybody intends to succeed as an exhibitor he (or she) must always show the best animals he can. Of course, a few prizes may be picked up here or there with a moderate dog in second-rate company at minor shows, but there is no certainty about this, as in the first place a pot-hunting exhibitor may swoop down upon the small fixture at which the beginner is exhibiting and clear the board; or else some extra good puppy or novice, which is destined to be a champion of the future, may be making its first appearance upon the occasion. It is safe to assert, therefore, that the prize is never won until the judging slips are safely landed in the secretary's office, especially as sometimes judges make palpable mistakes in their placing of the dog, and even when the awards have gone up on the board the exhibitor is not invariably safe, as his representative may be disqualified in consequence of some technicality or breach of the rules. Possibly, therefore, it is better for the exhibitor not to feel too sanguine until his money is paid him after the show, but under any circumstances it is incumbent upon him to be prepared for disappointment.

J. M. Goloheck's Judge.

Under any circumstances the disappointed exhibitor may play the game and accept the blows of evil fortune as a sportsman should. This does not imply that he need accept an injustice lying down, but it is meant to suggest, and very strongly too, that it is not only unwise but undignified to create a scene and raise querulous complaints, addressed to the public at the ring-side, against the decisions of the judge. This sort of thing never does anybody any good, and usually gets the disappointed one laughed at behind his back; indeed, it has not been an unknown occurrence for his acquaintances to draw a well-known bad loser out after his dogs have been beaten, in order to enjoy the spectacle of seeing him making himself look ridiculous. Consequently the beginner should be most particularly careful to keep cool if bad luck greets his earliest appearances in the show ring.

THE BEST DOGS ARE THE CHEAPEST.

If his dogs are good ones they are certain to receive their deserts in due course, and consequently they will repay their owner for his outlay in money or in trouble, or possibly both. Moreover, a good, well-bred dog or bitch may materially enhance its value by appearing at a show even if it gets beaten, for there are generally plenty of people who appreciate its merits, with the result that if he a dog it may attract stud fees, or if a bitch its puppies may be sought after. It is no disgrace for a good dog to get beaten in a strong class; and if the judge makes a mistake by placing it behind an inferior one in either good or bad company, the circumstance is usually drawn attention to, and the defeated one earns the sympathy of the public and thereby gains a valuable advertisement. On the other hand a moderate dog never gains much by being exhibited, for if he wins it will usually be in poor company, so that there is not much to be proud of in the achievement; or if he gets beaten the popular verdict will probably be "Serve him right," which is worse.

The fact is that a second-rate dog is rather a white elephant to his owner, as he usually costs a fairly big sum to buy, and is as often as not a difficult article to sell. On the other hand there is always a demand for good dogs of most breeds, whilst misfits can generally be disposed of to people who want a dog for a companion and not for show at a modest figure which the owner of the second-rater could not afford to accept.

AVOID OLD OR WORN-OUT ANIMALS.

It sometimes happens that a beginner commences his career as a showman by purchasing one or two well nigh worn-out old dogs, with which he hopes to make a name as an exhibitor. This is a most unwise course to pursue, for it practically leads him nowhere, as by the time they have won a few prizes the antiquated tykes are done for, and their possessor has to commence over again. Consequently, as a general rule, the inexperienced buyer had better be very shy of purchasing old dogs, or, in fact, well known prize-winners of any age, which may be offered to him at exceptionally low prices. Of course, there are exceptions to every rule, and he may be lucky in getting a bargain offered to him, but the novice should endeavor to ascertain exactly before he concludes a deal why it is that the owner of a prize-winner is offering him the animal at a low figure, and why some well known exhibitor of the variety has not secured the bargain.

ESCHEW LONG-PRICED PUPPIES.

In dealing with the other extreme, it may be suggested with some confidence, that the beginner will not be displaying an inordinate amount of wisdom if, upon his own responsibility, he purchases a puppy at a large figure, simply because it has won prizes in good company. This is simply because many a precocious youugster is nothing more or less than a sort of canine flash-in-the-pan, and therefore entirely falls to sustain its earlier reputation when it reaches tbe adult stage of its existence. A puppy that looks like lasting, if so be that he is at the top of bis class, is a very valuable asset in bis owner's kennel, and consequently is not likely to be sold, unless for some sufficient reason which may be discovered, unless his master has a dark one or two that are morally certain to beat him when he or they come out. At all events, a puppy which bas been overshown may always be regarded with suspicion, as either his owner may be credited with a desire to have made the most of him before he gave signs of losing his form, or else it is quite possible that the protracted exertions he bas undergone may have affected his health and power to develop as he ought to.

Of course, it must be distinctly understood that heaps of puppies which have won prizes, and which have subsequently been sold at long figures, develop into very valuable show dogs, besides making great names at stud. Likewise there is no desire on the part of the writer to lay it down as an inflexible rule that old and seasonoble winners have not proved most satisfactory purchases when they have changed hands. Indeed, cases have been known in whicb exhibitors have quite built up reputations for themselves by buying ancient prize animals and showing them successfully. These lines, however, are written in the hopes that they may be of service to beginners, and consequently the advice may be repeated, tbat tbe latter will never be acting wisely if they pay long prices for any dog upon their own judgment, and will be acting very indiscreetly if, unaided by advice, they dabble in very old animals or precocious puppies. In sbort the legal maxim *caveat emptor* is one tbat specially applies to such transactions, and it ought to be remembered that no discredit applies to a seller for getting the best price he can for his dog, provided, of course, that he is not guilty of misrepresentation when describing the animal and alluding to its merits.—*The English Stock-Keeper.*

DOINGS IN DOGDOM.

SIRE AND SON GOOD WORKERS.

One morning, early this week, we had the pleasure of a turn afield with J. M. Goloheck and a quartette of Granger Inn Kennels' English Setters over the stubble and knolls back of picturesque Carquinez straits near Eckley station Contra Costa county.

Ch. Cato Jr., Ch. Laura L., Judge (Ch. Cato Jr.–Mellwood Nellie) and Merry June, a handsome bitch puppy by Petrel's Count-Gath's Moxey were in the string and a lively bunch they were. Cato has ranging and working qualities that are high class and stylish in tbe extreme. Rarely will one see a Setter cut the pace and do his work more thoroughly. Cato in condition and properly handled should make a grand field trial dog. He is a fast and merry worker and seems to have lots of stamina. He is steady and apparently easy to control for he was called in several times when half a mile away on an adjoining hillside field busy as a bee in quartering his ground.

Judge, an upstanding sturdy five months old puppy, however, took our fancy, for he is full of promise for maturing into not only a crack bencher but a corking good field dog as well. In style and action he shows merit not excelled by many matured dogs. As a goer he was as good as his sire, save the difference in endurance between a puppy and a three-year-old, at tbat we have seen older dogs that were not as fast or strong. His bump of location and nose are extraordinarily well developed. He started away on a cast with Cato, the old dog left him behind in due course, the youngster paid strict attention to business and hunted his ground thoroughly, coming to a high hank topped by a fence he then took a back track until he picked up his dad's trail, off he went "merry as a grig" over the fields and knolls, through fences, etc., until, after nearly a mile, he came up to

Cato in the stubble at our rear. The old dog was on a point at a lark and the youogster backed him as prettily as could he desired. At another time, after he had prospected a vineyard to his satisfaction, it was amusing to note his cleverness in locatiog us by a short cut over a hill and through a canyon after we had turned back for the station agsin. This young Setter will be among the ribbon winners and up with the field trial cracks when he is properly developed and matured we candidly believe.

GOLDEN WEST COLLIE CLUB.

Collie interests are iookiog up eocouragiogly if the organization of the Golden West Collie Cluh on Wednesday evening is aoy criterion. This breed has always had a stroog followiog on the Coast. The ladies and gentlemen identified with the preseot enthusiastic movement comprise, with but few exceptions, the most prominent breeders and fanciers on the Coast. In addition to those whose oames will he found below amoog the list of charter members, Secretary H. McCracken informs us that he is in communication with a number of Coast fanciers and he expects to be able to anoounce at the next meeting of the club a membership of over fifty. This, we believe, will be comparatively easy for there is pleoty of good available material to draw upon to fill up the ranks of what should become one of the strongest specialty clubs on the Coast.

For the information of the fancy at large as well as Collie people in particular all necessary information may be obtained hy addressiog Secretary Hugh McCrackeo, 3921 Califoroia street, San Francisco—or 'Phone Geary 4061 after 7 P. M.

The organization meeting, at Dr. Burnham's office, was well attended, a number of lady fanciers taking an enthusiastic interest in the proceedings.

The club will apply for membership in the American Kennel Club and will also request representatiou on the Pacific Advisory Board by the appointment of a delegate to that hody.

A unanimous expression of intention among the members is that the cluh will at all times work in harmony to promote *all* dog interests, that of the Collie fancy in particular. Already several cups have been promised for membership competition and the club will also offer a number of trophies. These inducements—and others to come, should prompt a strong list of entries at comiog shows.

The officers of the club are: Dr W P Burnham, president; Mrs L W Seeley, first vice-president; C R Walter, second vice-president; M Ballin, treasurer; H McCrackeo, secretary. M F Blaochard, Miss M Pabst and J D Craig, executive committee. W P Leech, W W Stetthеimer and H McCracken, committee on constitution and hy-laws. Charter members, Dr W P Burnham, Dr O N Orlow, E J McCutohen, M F Blanchard, W P Leech, W W Stettheimer, J D Craig, Mrs L W Seeley, Mrs A Hallows, Mrs S Loth, Mrs W C Bogen, Norman J Stewart, J P Norman, W S Kittle, C R Walter, M Ballin, H McCrackeo, J K Cleary, F Baltzer, W C Bogen, C S Aiken, M Rosener, C T Wendell, E J Thomas, H R Cooper, R Mohr, C J Abraham, R D Fry, P A McDooald and G Marcus.

THAT POINTER DECISION

We are in receipt of the following letter from Mr. George A. Craofield, which is prompted by our remarks concerniog the award for best American bred in the San Mateo show. In our report we inadvertently omitted to mention Mr. Phil Wand and J. Bradshaw together with W. E. Chute, N. H. Hickman aod G. A. Cranfield as the judges for this special.

EDITOR BREEDER AND SPORTSMAN—I noticed in the report of the San Mateo show in your columns the remarks coocernng the Pointer Top Notch Mason's Kiog—"What's the use, it's all arranged." This is more than I can understand. It was my suggestion, when judging for specials, that each judge should write down on a sllo of paper his first and second choice and hand the same to the secretary. The dog receiving the most votes to receive the cup, which was done.

My choice for best American bred was Mr. Chas. Newman's St. Bernard Lester C. and the Pointer I placed secood. So if Cranfield, Hickman and Chute were the only judges in the ring. Then Hickman and Chute must have voted for the Pointer and the judge that made the remark must have been either Bradshaw or Wand.

The followiog are the awards for specials I had to decide upon.

Cup for hest dog owned in San Mateo—1 The Greyhound McVey. 2 Boston Terrier Glenwood Enchantress.

Best American bred—1 St. Bernard Lester C. 2 Polnter Masoa's King

Best dog in show—1 Fox Terrier Waodee Coastguard.

Mr. Cranfield is In error in the surmise that the remark was made by either Wand or Bradshaw. It was credited to Mr. Hickman. In justice to Mr. Ward we will state that he remarked to us, that he could not conscientiously give first cholce to the dog he favored, the English Setter Cato Jr, because, as he claimed, the latter had a shade the worst of it on condition and coat.

A KNOWING DOG.

The Calaveras *Prospect* relates the following dog story:

An instance of the wonderful sagacity of a Collie dog recently came to our notice. A dog assisting young Tohla Granita at Douglas Flat to drive stock through the bush came upon an old blind shaft, and before it was aware plunged down the shaft, at the bottom of which was considerable water. Frank Cooper, a rider, soon secured a lariat rope, at the end of which was a large knot. He lowered this down the shaft hut it harely reached the dog. Realizing its position the animal made a few plunges and finally secured a firm hold on the knot at the end of the rope. Cooper hegan to hoist and the Collie hung on by its teeth until it was landed safe and sound at the top.

LOST SETTERS.

Mt. View Kennels had the hard luck to lose early this week two English Setters. The dogs got away from the kennels and did not show up again, notwithstanding that a leogthy search was made for them in the country adjacent.

The dog lost is a black white and tan, even marked head, hlack over one shoulder and large patch over hip, he weighs about 55 pounds. The hitch is a hlack and white one, left ear black, and body ticked, she weighs about 40 pounds.

License For Hunters.

The license question seems to have heen pretty well threshed out in a number of States as well as in the British Provinces. As the matter is likely to hoh up at the coming session of the legislature we offer some data taken from a pamphlet recently compiled for the United States Department of Agriculture by T. G. Palmer, Henry Oldys and R. W. Williams, Jr., assistants, Biological Survey. Many of our readers will doubtless be ioterested, and California sportsmen are reminded that theirs is one of the few States not requiring a license for the privilege of hunting game. In the States of Missouri and Arkansas the privilege of hunting is not extended to non-residents; and in thirty-one states and territories (Including Hawaii, hut not including Oregon and Georgia, in which licenses must be secured to hunt for market), aod throughout Canada licenses must be secured before non-residents may hunt any or certain kinds of game. In thirteen states and territories and two Canadian provinces a like restriction is imposed upon residents, but the fees are usually very much smaller, and often are merely nominal. Thus in Colorado, Idaho, Illinois, Indiaoa, Minoesota (big game), Nebraska, South Dakota and Wisconsin, resident licenses cost $1, while non-residents psy from $10 to $25, according to the state, in North Dakota and Michigan the fee for residents is $25. In Wyoming the same distinction is observed in the issue of "gun licenses" for hunting big game, a resident being charged a fee of $1 and required to secure a license ooly for shooting in counties other than that in which he resides, while a non-resident pays $50 for the privilege of huntiog aoywhere within the state, and in addition is compelled to employ a guide. Some of the Canadiao licenses are equally expensive. British Columbia demands $50 for a general license, add Newfouodland $50 for a caribou license. New York makes each non-resident subject to the same restrictions as to license fees and conditions that a resident of New York is subject to in the state in which such non-resident resides, and if there are none, to such as the commissioner may prescribe. Kentucky and Tennessee have adopted a similar plan; but charge no fee when none is prescribed by the non-resident's state, and Tennessee exempts non-resideots that pay $100 in taxes on land owned in Tennessee. Washington has reduced the non-resideot license fee to $1, the amount charged resideot hunters.

Licenses are generally issued for the season, and thus expire at a fixed date. Io seven states they are good only in a single county—Colorado (hird license), Florida, Georgia (market-hunting license), Iowa, Maryland, South Dakota and Washington—and the fees for these county licenses vary from $1 to $25. In Nebraska, as in Wyoming, a resident is required to secure a license to huot anywhere in the state except in the county in which he resides. In Maryland there is much variation, as each county is subject to a separate law. Anne Arundle county prohibits non-residents from hunting except oo iovitation of land owner and on his land. Each of the other counties has some form of license for which a fee is charged, but several of them allow non-residents to hunt without license if provided with a written permit or iovitation from the owner of the land. Such invitations, however, do not exempt non-residents in Caroline, Dorchester (except relatives), Garrett, Kent, Talbot and Worcester counties, nor in Somerset and Wicomico, unless the non-resident is accompanied hy a resident while hunting. (The following counties of North Carolina require hunters to obtain written permission for hunting on lands other than their own: Alexander, Alleghany, Beaufort, Buncombe (hirds), Caharrus, Carteret (in Beaufort township ooly), Caswell, Clay, Craveo, Davidson, Edgecombe, Franklin, Halifax, Henderson, Iredell (hirds), Jones (on posted lands), Lincoln (birds), Macon, Madison (quail), Martin (Robersonville township only), Mitchell, Moore (?), Orange, Pitt, Richmond (Steeles township only), Rowan, Surry (quail), and Wilkes.) Special provisions govern the Patuxent river—non-residents are required to secure $10 licenses and each pusher or paddler a $2.50 license. In Somerset county residents are required to secure licenses, the fee for which is $1.

In some states licenses are required only for hunting certain kiods of game. Thus, in Michigan and New Hampshire tbey are issued only for deer, in Maine for deer and moose (birds in a few counties), in Wyoming for hig game.

A number of states have two or more kinds of hunting licenses. Thus Colorado, Idaho, Wisconsin and Nova Scotia issue licenses to shoot any game and separate ones at a smaller fee for small game only; Minnesota, Montana and South Dakota provide separate licenses for hig and small game; New Brunswick charges non-residents $30 for a license to shoot moose and carihou and an equal amount for the privilege of shooting deer and birds in Westmoreland county; Ontario requires residents to pay a fee of $2 for hunting deer and $5 for hunting moose and caribou, and Quehec provides for a general license at $25, one for game animals at $20, a season license for birds at $10, and a bird license at $1.50, good only for a single day.

In Idaho, Illinois, Indiana, Iowa, Louisiana, Maine, Minnesota, Montana, Nebraska, North Carolina, Ohio, Tennessee, Virgioia, South Dakota, Wiscoosin and Wyoming licenses carry with them the privllego of shipping out of the state a limited amount of game, but generally on condition that it shall be be properly marked or accompaoied by the owner. Colorado issues storage licenses at $1, importation liceoses at $1, and park licenses at $1 to $100. California, Colorado, Illinois, Michigao, North Carolina, Oregon, and most of the Canadiao provinces issue special permits, upon application to the game officials, allowing shipment of game out of the state for breeding purposes.

Non-resideot land owners or taxpayers are not required to pay the usual fee in New Hampshire, New Jersey, Maryland, (most counties), West Virginia, Tennessee, Montana, North Dakota, or Nova Scotia; but to secure this exemption in New Hampshire the non-resident hunter must own land to the value of $500 or more, in Tennessee and Nova Scotia he must pay a tax of at least $100 or $20 per annum, respectively, and io North Dakota must own or cultivate a quarter section of laod.

In Maine (oo wild lands of the state, except Dec. 1–15), Wyoming, and South Dakota non-resident hunters are not permitted to hunt big game unless accompanied by qualified guides. and in Colorado, Maine, Montana, Wyoming, New Brunswick, Newfoundland, aod Ontario guides are liceosed. The Northwest Territories issue special 5-day licenses for the benefit of guests of residents. Nearly every state requires licenses to have their licenses in personal possession while hunting, and to exhiblt them on demand of aoy warden (In New Hampshire, of any person).

Georgia, Louisiana (non-residents), Oregon (oon-residents), and Tenoessee requlre market hunters to secure liceoses. Tennessee also puts market bunters under bond of $200. Louisiaoa and Pennsylvaoia place all unnaturalized resideot hunters on the same basis as non-residents.

In few states an additional clerk's fee, 25c to $1, is required to cover cost of issue.

GOSSIP FOR SPORTSMEN.

NEW GUN CLUBS ORGANIZED.

The Sutter Gun Club, with a capital stock of $10,000, it is said, is about to be organized. Part of the W. H. Hawn place near West Butte will be leased for a term of years aod a comfortahle club house will be built says the Marysville *Democrat*.

R. C. Kells, A. H. Hewitt, C. E. McQuaid, R. W. Skinner Lawrence Schilling, G. L. McIntosh, Harry D. Onstott, J. B. Wilkie, Dr. H. Barr and H. A. Walton have each subscribed for $500 of the capital stock.

So much laod has been leased by market hunters that local people are forced to lease if they are to enjoy hunting during the winter.

The Belvedere Shootiog Club was organized at Suisun on the 16th inst., with a membership of twenty-five. The officers are: R. Leo Van der Nailleo, President; F. F. C. Gregory, Vice-President; W. H. Bryan, Treasurer; Leonard Prior, Secretary.

The list of members is the following: Prof. R. Leo Vao der Naillen, Nat Boas, F. A. Deering and R. Speckter of San Francisco; Leonard Prior, Will Robbins, Geo. Harding, L. H. Pimentel, C. E. Mayfield, J. F. Shields, A. Hilbord, F. F. Gregory, W. H. Bryan, J. C. Murphy, Wm. Pierce aod J. A. Wilson of Suisun.

The club has leased from Hoxey aod Wolf the shooting privileges on Joice Island in the center of the Suisun marsh includiog some of the best duck grounds in the State. On the first day of the season eleven members of the club bagged 478 birds mostly sprig aod teal. The shooting days of the club are Wedoesdays, Sundays and holidays.

WHO INVENTED GUNPOWDER?

In China the legend is cherished by the people that the invention of gunpowder is due to a Chinaman who lived in the mists of that antiquity for which they possess such a deep veneration. But no Chinese writer seriously claims that the invention is the work of any of his countrymen; it is regarded as haviog come to them from the "outer barbarians." There is, in truth, nothing in the military history of China during the thirteenth and fourteenth centuries to lead us to believe that the Chinese then possessed an explosive, though there is little doubt that they used various kinds of combustibles which did damage to their enemies. Only in the fifteenth ceotury do we hear of the use of gunpowder and cannon by the Chinese. It is extremely improbable that these were invented in China; but there are a number of facts now known which lead to the conclusion that the Chinese obtained their first gunpowder and fire arms from Europe by land or water at the end of the fourteenth century, and that the invention was wrongly adopted as a national discovery before the arrival in China of the Portugese in the sixteenth century. These are very clearly shown by Lieutenant-Colonel Henry W. L. Hime in his work recently published on the origin of gunpowder, which, though written more for military than sporting readers gives the results of much research into the origin and progress of explosives from the earliest days, leadiog us inevitably to the conclusion that whatever the Chinese knew of gunpowder they acquired it indirectly from its real inventor, Roger Bacon.

Bacon was born at Ilchester, in Somersetsbire, in 1214, and died about 1294. It is incontestably proved that he was the discoverer of the first recipe for the making of gunpowder, which he concealed in his writings by putting it into the form of an anagram. The proportions and ingredients he thus recommended were 29.4 per cent of sulphur, 29.4 per cent of charcoal and 41.2 per cent of saltpetre. The next complete recipe is that given in the MSS. of Dr. John Arderne, of Newark, a practicing surgeon in 1350, who gives 66.6 per cent of saltpetre, 22.2 per cent of charcoal and 11.1 per cent of sulphur. But the invention and discovery was undeniably due to the researches of

Bacon, who not only made, but also fired, the first gunpowder. This is made quite plain by the author of the work referred to, who, at great pains in marshalling his facts, and the deductions drawn from them, extracts the secret of gunpowder manufscture from the writings of Bacon himself. To an English monk, therefore, must he given the credit of the first gunpowder, just as six hundred years later the world became indebted to Forsyth, a Scottish clergyman, for the percussion-cap, the real basis of all our many improvements in firearms during last century. Friar Bacon sought to conceal his discovery from the crowd in the opinion that scientific information was bad for the people "unable to digest scientific facts, which it scorns and misuses to its own detriment." His experience was embodied in the declaration by him that "the mob scoff at philosophers and despise scientific truth." Like most inventors, Bacon did not profit by his discovery. no more than did his successor Forsyth. By great research into records in many languages, Lieutenant-Colonel Hime has clearly exploded all claims to the invention of gunpowder except that of Bacon, of whose knowledge of its properties and of its mode of manufacture he must satisfy every reader of his historical work, by his most able and convincing process of reasoning, founded on what has evidently been most painstaking research.

HUNTING TRIP IN AN AUTOMOBILE.

In a uniquely constructed palace car automobile, equipped with sleeping quarters and ample storage room for supplies of all kinds, three well known sportsmen started from Boston recently on a fifteen-day hunting and camping tour through New Hampshire and Maine. The idea was the clever conception of Freeman N Young of Arlington and Roy A. Faye of Cambridge. Their collaborator and companion, Dr. Albert H Tuttle of Cambridge, and Mr. Young's two Pointer dogs Jill and Bess, completed the party, which left amid the cheers and good wishes of a host of friends who were gathered to witness the start.

The automobile in which the three will travel and camp is a 16-horse-power Rambler car, upon which Messrs. Young and Faye have built a strong frame of wood, braced with steel rods. 16 feet long. 4 feet 10 inches wide and 6 feet high. For about 4 feet from the flooring the sides and part of the rear end are sheathed and painted a terra cotta, then varnished. The roof is of waterproof carriage leather, and extends over the entire frame, the hood in front reaching over a foot beyond the front wheels.

Hung from the frame, about three feet below the roof, is a 4x6 foot spring bed, with a hair mattress and full equipment of blankets. The seat in front will accommodate three, and the bed may be reached either from front or rear. Just in front of the steering gear is a curtain, which may be rolled down, and a similar curtain at the rear converts the body of the vehicle into a cozy room, which is lighted by a single incandescent electric light, the power being furnished by storage batteries.

Under the bed is a space 3 feet high, 7 feet long and 4 feet 10 inches wide, in which are stored an alumnium camp outfit, clothing, gasolene and provisions of various kinds. There is also an electric heater, which may be used as a radiator, or to heat soldering irons, or for cooking purposes in case of emergency.

The machine is equipped with extra tires and two sets of electric batteries. There are also two acetylene headlights, two kerosene headlights, and a kerosene rear-end light, all of which may be detached and utilized for illuminating the interior of the car.

It was the intention of the party to run night and day, one managing the machine while the other two sleep, and, according to Mr. Young's testimony, "the bed is as easy as that of a Pullman sleeper, except when you strike a rock." As they travel, they will select spots for camping when the roads are bad. Meals will be obtained at farm houses and hotels, or, when desired, can be prepared aboard the automobile.

While the weight of the car is a little more than that of the regular body, no difficulty is anticipated in maintaining the speed of the car, if the tires withstand the extra strain. As both Messrs. Young and Faye are experts in mechanical construction, probably no delays will be met with on account of breakage of the machinery.

Woodcock is the game which will be sought for, and with the two dogs, these three gentlemen, who are crack shots and of high rating in the Middlesex Sportsmen's Association, expect to bag many birds. If many birds are found in one locality, they will camp for several days before moving on. Still, if larger game is met with, it will not be disregarded, as the party has taken rifles in preparation for that event.

From Arlington, the party started for West Lebanon, N. H., their first stopping place. From there they were to go through Limerick, Me., to Wiscasset, Me., and the neighboring country, perhaps venturing futher into the Mooschead lake region, according to the amount of game found and the condition of the roads.

If this trip proves successful, another is contemplated next spring, but at any rate, a host of friends will anxiously await their return from the present venture, assured of a multitude of entertaining tales of experiences camping in an automobile.

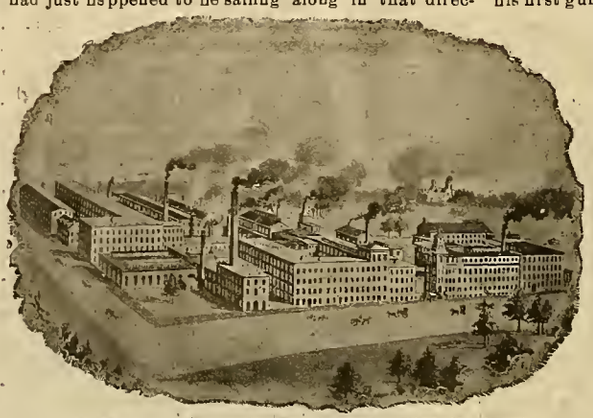
A MEEK AND LOWLY BIRD.

The mud hen—or, to be more accurate, the coot—is a meek and lowly bird whose existence is made perilous and uncertain by the guns of the hunters.

It is not endowed with the sagacity of the wild duck nor the goose and is comparatively an easy mark, especially when the hunters gather in force and surround the birds. The bay county marshes, and, for that matter, all the river and overflowed districts, are more or less infested with mud hens in the fall, and if they are so persistently and energetically hunted that it is a wonder they do not get up and leave the country. The ducks will desert a district if they are shot at for a long time, and kept on the wing from morning till night, but the long-suffering and patient mud hen will stick to the spot it has selected for its fall vacation until it meets a tragic death at the hands of the sportsman. This reluctance to leave a body of water is well known to the shooters, and they take advantage of it. And when there is no duck shooting to be had to amount to anything there are nearly always mud hens swimming around, ready to afford excitement of a milder character.

The mud hen is a good swimmer, with a fringe of membrane on his toes, which gives him considerable propelling power. He is of a slate-color, with thick duck-like plumage on the under side of the body. He is about fifteen inches in length, and is an awkward looking bird whether on the wing or in the water. The bill is short and chicken-like, and the wings are short and broad, the bird weighing about two and a half pounds. They have funny cocked-up tails, and when in flight these tails give them a grotesque look. Their flight as they rise from the water is clumsy, and not until they get well away do they exhibit any speed or smoothness of flight. They are usually found in flocks around the shallow ponds and edges of lakes and marshes, sometimes 500 or more birds together. When they are alarmed they will get up one, two, or a dozen at a time, and swing around until they find a quiet spot, and they gradually get all together again in the course of an hour or so if undisturbed in their new refuge.

They do not seem to care about decoys—that is, the duck decoys—and not many mud hen decoys are used, at least not in local waters. A brave array of sprig, mallard, red-head or canvasback decoys makes no impression on the mud hen's sedate imagination, and when they are shot over the decoys it is because they had just happened to be sailing along in that direction. Sometimes they can be shot along a pass between two ponds if there is only a short distance between the two bodies of water and the hunters are keeping them moving back and forth. They are the victims of the amateur hunter nearly always, for when he cannot get ducks he can almost certainly manage to bag a few mud hens.



The Remington Arms Company's Works, Ilion, New York.

Much has been said concerning the table qualifications of the mud hen, the meat however is rather dry. Possibly the lack of flavor, or rather juciness, may be caused by the almost universal practice of skinning the bird, this being an easier way to dress a mud hen than to pick it, the feathers being so tough and downy as to make picking a task. A mud hen stew or saute, when the bird has been properly picked and the fat skin not removed is said by old hunters to be an appetizing and most palatable dish.

FALL SHOOTING.

Local sportsmen are anxiously awaiting favorable weather conditions for duck shooting. Since the opening of the season the weather has been too warm for the broadhill hunters. The rains just before the 15th scattered many of the home bred birds from the ponds on the marshes, the stay-at-homes find refuge from the shooters as usual when the days are pleasant, by loafing out on the open bay waters. The main body of the northern migration is due just as soon as the rigors of winter set in up the Coast and then there will be plenty of good duck hunting. Quail hunters, too, have found the warm days a set back to the sport.

AMONG THE ANGLERS.

The striped bass are in Raccoon straits again, quite a few large ones having been hooked recently.

Steelhead are fairly plentiful in the Paper Mill. The first rains, it is believed, will bring in a run of salmon to that favorite stream.

A One Arm Shooter.

John A. Flick, Havenna, O., a remarkable shooter with one arm, at Cleveland, Sept. 28, beat the entire field, winning silver loving cup on a straight score of 25, out shooting two ties in the shoot-off. Mr. Flick shoots under the name of "Brady," never shot anything but a Parker—and don't want to.

On Sept. 27, at Morris, Ill., A. J. Stauber killed 65 live birds straight with a Parker, automatic ejector, 30 and 35 yards rise. This is a remarkable record, and speaks volumes for the "Old Reliable" Parker gun.

F. H. Soow of Brooklyn, O., at Lake Brady, Oct. 24 and 25, shooting the Parker gun, won high average, defeating all experts and amateurs alike. At Dalton, O., Oct. 6 and 7, he also won high average. At Canal Dover, in October, he won high average. Mr Snow scored at Lake Brady 265 out of 290.

Strike!—If they don't give you Jackson's Napa Soda when you ask for it.

Averages Reported.

Indianapolis, Ind., October 12th and 13th, W. R. Crosby, first general average, 383 out of 400, shooting "E. C." C. A Young, second general average, 358 out of 400, shooting "Du Pont." T. A. Marshall, third general average, 350 out of 400, shooting "Du Pont." E. D. Rike, of Dayton, Ohio, first amateur average, 335 out of 400, shooting 'Infallible." Ed. Voris of Crawfordsville, Ind., second amateur average, 334 out of 400, shooting "Du Pont." John W. Cooper of Indianapolis, Ind., third amateur average, 327 out of 400, shooting "Du Pont."

Warsaw. Ill., October 12th, first general average, Mr. Bonicamp Sr., of Keokuk, Ia., 146 out of 185, shooting "E. C." Second general average, F. O. Gash of Warsaw, Ill., 143 out of 185, shooting "Du Pont." Third general average, Mr. Bonicamp Jr., of Keokuk, Ia., 152 out of 185, shooting "E. C."

Sisterville, W. Va., October 12th and 13th, R. L. Trimble, first general average, 380 out of 400, shooting "Infallible." W. A. Wiedehusch of Fairmount, W. Va, second general and first amateur averages, 378 out of 400, shooting "Infallible." J. F. Mallory of Parkersburg, W. Va., third amateur average, 372 out of 400, shooting "Du Pont." In the Merchandise Event Mr. Wiedehusch ran 117 straight and 25 straight.

Remington History.

A brief history of the Remington Arms Company will doubtless be interesting to many of our readers:

The Remington Works were started in the year 1816 by Eliphalet Remington, a farmer boy, who made his first gun at his father's forge. This weapon proved so attractive to his fellow-townsmen and acquaintances that he received requests to duplicate his production, which he did, and thereby started the manufacture of firearms. From that day to this the business has increased so enormously that the works now occupy about 18 acres of ground and consist of 60 buildings, the floor space amounting to nearly 400,000 square feet, and over three hours are required to merely walk through and casually inspect the various rooms and departments. The company employs about 1000 hands, mostly skilled mechanics.

The company is by far the largest manufacturer of double-barrel shotguns in this country, if not in the world, and in addition produces military and sporting rifles, both single shot and magazine patterns in great numbers.

The extraordinary success achieved by the Remington Arms Company is attributable to its extensive experience covering a period of 87 years, to the high and honest standard of workmanship, spirit of progress and the adoption of latest manufacturing methods, all of which enables them to produce and sell superior firearms, giving the consumer greater value than other manufacturers not so well equipped.

Taper Choke Boring.

The one quality a gun must possess is that of shooting in the very best manner. The Ithaca Gun Company's system of choke boring gives better results with the different sizes of shot, from dustshot up to buckshot, taken under all conditions to which a general purpose gun is subjected than any other system in use. With their method of boring they accomplish the purpose with less than the usual taper or contraction, giving greater strength to the barrels throughout, greater penetration and less recoil.

Winchester On Top.

The same old story, and could it be otherwise? Shooters of Winchester goods took the highest honors at the seventeenth semi-annual inanimate target tournament of the Los Angeles Gun Club, the Pacific Indoor Shooting Club's annual tournament and the New York State annual military rifle tournament.

Los Angeles tournament, Oct. 8th, first day—The highest general average was made by Fred B. Mills of Bolsa, Cal., with a Winchester "pump" gun and Winchester "Leader" shells, 166 out of 180. The second highest average was made by J. E. Vaughan of Los Angeles with a Parker gun and the "Leader" shells, 161 out of 180. The Tufts-Lyon medal was won by J Gibson of Nordhoff, Cal., with a Smith gun and "Leader" shells, 47 out of 50. The two-men team cup was captured by Fred B. Mills and C R. Walker of Santa Ana, Cal., 45 out of 50. Mr. Mills and Mr. Walker both used Winchester "pump" guns and Winchester "Leader" shells. Both the miss-and-out events were won by J E. Vaughan with a Parker gun and "Leader" shells.

Second day, Oct. 9th—The highest general average for the day, and which also proved to be the highest average for the entire tournament, was made by J. E. Vaughan with a Parker gun and "Leader" shells. Score 160 out of 180. Score for the entire tournament 321 out of 360. The second highest average of the day was made by Fred B. Mills, 152 out of 160. Score for the entire tournament 318 out of 360. Mr. Mills shot a Winchester "pump" gun and the "Leader" shells. The longest straight run of consecutive breaks was made by Mr. Mills, 57 straight from the 18-yard mark. The championship diamond medal, emblematic of the champion target shot of Southern California, was won by J. Gibson with a Smith gun and the "Leader" shells, 49 out of 50. The five-men team trophy was captured by the team composed of Fred B Mills, O O. Orr, Frank Ecker, C. L. Julian and J. Kolb on the combined score of 108 out of 125. Three of the five men shot Winchester "pump" guns and four used the "Leader" shell.

THE FARM.

Opportunities in California for the Eastern Dairyman.

California is to-day probably the land of greatest opportunity for the intelligent dairyman, writes Superior Judge Peter J. Shields in "For California," and this is so without regard to bis meane or the extent to wbich he intends or is able to invest or engage in that hnsiness. For reasons peculiar to this State her dairy industry is very largely undeveloped. For this reason, and becauee of the conditions here so perfectly favoring the rearing of cattle and the manufacture of their product, an investment at this time in a dairy farm or a dairy herd cannot fail of immediate and substantial profit. California agriculture has not developed with that evenness and symmetry characteristic of our other States differently situated. Our people first engaged in gold mining, and our first growth was along that line. Next came wheat growing, which we carried to a high state of perfection, and later horticulture and general fruit growing engaged tbe attention of our energetic people. In this latter field of industry, which may he said to-day to be our leading one, we have led the world. We do not want to he understood as indicating that stock growing, vegetable production and general agriculture has not been developed to a high degree, hut only that such industries have been in a measure subordinated to those above indicated. The present tendencies in California are toward more diversified farming, more intensive culture and smaller boldings. With this movement has come a rapidly growing interest in livestock breeding and dairy hushandry. Under such circumstances this State may he safely said to he on tbe verge of a da'ry development without a parallel in tbis country. Now is the time to engage in the dairy business in California; no state offers such advantages. On the eve of a great dairy progress the investor will engage in a business wbich is growing; he will grow with it and share in the progress which it makes. We produce but little more than one-half the dairy products consumed in the State; the opportunity is present for the investor to help produce the otber half. We are at the gateway to the Pacific seas with a growing export demand which we cannot supply. With our climate and feed we can cheaply produce large quantities of grass hutter at a time when such cannot be had in the great area of the Eastern States, and we ehould develop a great and profitable market for sucb product in that direction. Our people have not largely given thought to dairy affairs, and as a consequeace lack that dairy education and experience wbicb the trained Easterner can supply with great profit to himself. In addition to all of the other directions in which the market for dairy products must grow, the home market must not he forgotten. Witb the improvement in qnality in the bntter produced in this State in recent years home consumption has greatly increased, and of the better butter to be made by hetter dairymen much greater quantities will he consumed by our own people. Ready employment here awaits trained and capable dairymen, and dairy farmers are sought for and given every industrial and financial encouragement. From statistics collected by the State Dairy Bureau it appears tbat the average California cow under the treatment and by the methods now employed makes hut little over one hundred pounds of hutter per year. Under our conditions the trained dairyman could easily, by selection and hreeding, improve his herd to produce an average of three hundred ponnds, with slightly added cost, and of course at a greatly increased profit. California dairy herds are too largely made up of native cows or of those indifferently graded. A ready profit awaits the dairyman wbo hreeds and selects hetter animals with which to work. A splendid field exists in California for the private dairy of high class which aims to serve a select trade. This is a feature of dairying which is much neglected with us, and wbich can be made to certainly succeed.

Dairying is conducted in California under exceptionally economical conditions. Cattle can be milked ali winter long, almost entirely in the open air. The temperate weather permits the cows to browse all day upon the green grasses of our mild winter months. They waste none of tbeir energy nor expend any of their food in a struggle with the elements to survive The dairy farmer does not have to hibernate in California; he loses no time because of weather, hut can work twelve months in the year on his farm and with his stock. The small dairyman need use hnt little of his slender means in constructing costly dairy buildings to protect his cattle from the rigors of winter, or his fodder from the weather. We recall a California berd which produces four hundred and ten pounds of butter per cow per year on grass alone, and which is kept altogether in the open air. This State affords unexampled opportunities for the breeder of pure bred dairy cattle. Our people are turning towards such animals with an interested attention. Young things can be brought to matnrity here early and at little cost, and can be readily disposed of or put to immediate and profitable use. California is the home of alfalfa, the State which first grew it in this country, and the State which grows it best. It is the greatest of stock and dairy foods, and the ease and abundance with whicb it can he grown solves the problem of a dairy fodder and a balanced ration, and simplifies and promotes tbe economy of dairy farming.

Lastly we can say to the Eastern dairyman that California is a cattle sanitarium, the diseases which harrassed and impoverished him at home will cease to trouble here. Digestive distnrbances are prevented by twelve months of green grass; tuberculosis makes poor headway in the open air life of the California cow, while such troubles as rheumatism and garget are disposed of by the same mild climate and the same sanitary sunshine. California is a fair prospect for the Eastern dairyman seeking investment; here opportunities abound, and ready profits are certain to follow intelligent efforts.

Purity of Milk and the Danger That Lurks in It.

In a paper read before the International Congress of Arts and Sciences at the recent St. Lous meeting, Dr. Arthur Renolds, commissioner of health of the city of Chicago, pointed out the dangers lurking in milk that was allowed to age before its delivery. The subject of his paper was, "Shorten the Time from the Cow to the Bahy." Dr. Reynolds said in part:

"The milk supply of Chioago is produced so near the city that milk could be delivered to the consumer within twelve hours from the time of milking, hut at present the largest proportion of this important article of food is from twenty-four to thirty-six hours old before delivery.

"Twelve-hour old milk is worth very much more, from a dietetic standpoint, than twenty-four hour old milk, while thirty-six hour old milk not only has little food value, but is positively harmful to the young.

"The time has come when the value of milk must he judged hy its age, hy the conditions under which it is produced, and hy the treatment it receives from the time it leaves the dairy until delivered to the consumer.

"Everyone knows that sour milk is unfit food for the young, hut every one does not know that milk may he unfit for such food many hours before it becomes sour to the taste.

"Before milk is drawn from the udder it is absolutely free from bacteria. Before it has reached the pail from the teat —even under the most cleanly conditions —at least 150 to every teaspoonful will have been caught np from the air. In twenty-four hours, unless checked by cold, these will have increased to 4000,000, and in a few hours more they will have multiplied so enormously, that the milk will he sour even to taste.

"Old milk not only starves the young, but it poisons them, causing the excessive mortality among the young—especially during the hot weather, which hastens souring of milk hy favoring the growth of the hacteria.

"All milk intended for the use of children, should he hottled in the country, immediately after having been thoroughly cooled. The hottles should he put in cases, packed with broken ice and so shipped to consumers within twelve hours after hottling, and at a temperature below 50 degrees.

"Milk hottled in the city cannot rank with the country hottled milk, because it is shipped to the city in cans without being loed, and because after the cream has risen during the transit, the hutter fat cannot again, without the greatest pains, be thoroughly intermingled with the milk so that each hottle receives its due proportion."

Alfalfa as the Forage Plant of California.

Alfalfa has been grown with more or less success in every state and territory in the Union form Maine to Washington, and from California to Florida. From hulletins published by the United States Department of Agriculture, there is evidence that alfalfa has gained recognition as the hest hay and soiling crop in the entire West. There is not a state from which the report has not gone out that alfalfa will, when properly treated, become the most important of forage grasses and clovers. In the South, it has been widely recommended as a valuable addition to the list of forage grasses and clovers. In the Middle and Eastern States, it promises to become a rival of the hetter known and more widely grown red clover.

California, with 298,898 acres planted of alfalfa, according to the census of 1900, hut probahly over 350,000 acres at the present time, is the second most important State in point of alfalfa acreage in the Union, heing exceeded only hy Colorado. Land planted to alfalfa in California is productive throughout the year, however, while in Colorado the growth of the plant is necessarily arrested at least three or four months of the year during the season of snows, frosts and hitter cold.

The California Promotion Committee has collected some data showing the success with which this great fodder is grown in different sections of California. Despite the fact that alfalfa is so generally grown care must he observed in its cultivation, if one is to secure the hest results. It has its enemies, hut with any sort of attention, there are few crops in California so hardy and dependable. Root rot is a more common disease in the Southern States than in California. Alfalfa will not make the hest development "with wet feet" and in California it is often raised without irrigation other than that incident upon the natural percolation of water through the soil Alfalfa is soon killed hy an excess of water in the soil. If an alfalfa field be flooded and the water is allowed to stand on the field two days in midsummer, when it gets hot during the day, every root will he killed, and when the water has been drained off, the land will he ready to he plowed and prepared for some other crops.

Alfalfa makes a splendid food for hogs as well as dairy stock, and the success with whicb it is grown in this State should he a factor in encouraging its production.—*For California.*

The Laws Against Water Pollution.

A review of the laws forbidding the pollution of inland waters in the United States, wbich may be of great practical benefit to the public, has been prepared by Mr. Edwin B. Goodell for tbe United States Geological Survey. It is published as No. 108 of the series of Water-Supply and Irrigation papers, where it is available for all.

Mr. Goodell's purpose bas not been to prepare a complete work on water pollution for the use of members of tbe bench and bar, hut rather to put into the hands of public officials, legislators, water companies, manufacturers, farmers, and otbers interested in the subject, a guide for their action, and to furnish references to the sources from a more exhaustive knowledge of the subject may be obtained if required.

No attempt has been made to present a detailed statement of the entire law against water pollution as it exists independently of statutes, hut the hroad legal principles under which anti-pollution statutes become operative are explained and important court decisions are quoted to show authority for varions deductions. Tbese principles and decisions have been classified and are presented in three groups:

(1) The rigbts of riparian owners to pure water as against one anotber.

(2) The rights of the public (as distinguished from individual owners) to bave inland waters kept free from pollution by riparian owners or others.

(3) The conditions under which, and be extent to which, public municipalities may use inland waters in the disposal of sewage matter from public sewers.

The statutes enacted in various states are classified according to their general scope and an opportunity is tbus afforded to compare their effectiveness and desirability. In some states there is notbing more than a simple provision making it a crime to poison wells and springs, while in others elaborate provisions have been made to cbeck and, so far as possible, absolutely prevent all pollution of all waters hy the refnse products of animal life or the waste of human industry. In citing tbe statutes, Mr. Goodell has grouped tbe states together logically to show tbe stage of growth in sanitary edncation at which eacb has arrived.

It is hoped tbat the publication and distribut'on of tbis paper will help to hring abont a general apprehenoion of correct principles npon the important subject of water pollution.

Cost of a Creamery.

"Wherever the milk from at least 400 cows can not be guaranteed within a radins of five miles," says Prof. Washburn of the Missouri Agricultural College, "the creamery had hetter not he hnilt. The cost of making a pound of hntter will be ahout 6 cents and no farmer company can stand such expense. If 500 or 600 cows can he secured in tbe five-mile radius, the cost of making a pound of butter can be reduced to 3½ or 4 cents, which is a profitable basis of business, and the creamery will benefit the community. A good little creamery that can bandle this amount of business can be built and equipped for $2000 or $2500, if tbe company will let the 'creamery promoters' alone and huy an outfit of some reputable dealer. If a cheese factory is, for some reason, preferred for the same number of cows, it ought not to cost more than $1000 or $1200. As a rule, it ie hetter for the farmer to send his milk to a creamery already established, even if he has to haul it farther, as this will help to increase the output of the plant and lessen the cost of making a pound of butter, thus enabling the concern to pay a higher price for butter fat."

Glanders or Farcy.

Glanders and Farcy are two commonly used expressions relative to one and the same disease, although they originally designated two different complaints. This malady attacks the horse, and is inoculable and contagious, and is caused by the bacteria mallici, which can be traced in the morbid tissue, and cultivated out of it. Glanders is especially the term for the disease in the mucous membranes, belonging to the respiratory organs and their lymphatic glands. Farcy means the same disease, located in the skin and its glands.

Symptoms—Both forms of the disease may have a chronic course, or an acute one, and both forms may either develop separately or conjointly. It is, therefore, advisable to describe them seriatim.

The first suspicious symptom is a discharge from one nostril. It is, however, not always limited to a single nostril; there may be exceptions when it occurs in both. The discharge is not copious, and sometimes almost disappears. Very often blood is mixed with nasal slime. The lymphatic gland of the under jaw, correspondoning to the affected nostril, becomes enlarged and hard, it does not suppurate, is very seldom painful when pressed with the hand, and becomes attached to the jaw; on the mucous membranes of the nose, especially on the septum, which separates the nostrils, nodules and ulcers can be seen. The nodules may vary at the beginning from the size of a millet seed to that of a pea, of a yellowish color, and afterwards turn to ulcers. The different ulcers may join, and then extend in growth considerably. Sometimes the ulcers heal up, and a white scar can be observed. These symptoms are specific, and warrant the diagnosis for glanders under all circumstances. The absence of one of the symptoms still leavee the case suspicious, and should cause the isolation of the animal. Other symptoms not characteristic of the disease may set in; for instance, there may be a falling off of condition; the animal may become hidebound, and sometimes a chronic cough and short breathing set in. Very often the symptoms of farcy may be observed. The chronic form may run for months and even yeare. With bad food and over working, the symptoms may become severe, and moderate again with better food and more rest.

Chronic glandere may also be confined to the lungs only, the absence of external symptoms preventing a reliable diagnosis. In such a case the disease may be suspected when the horse has been in contact with an affected animal, and showe lose of flesh, has a cough and is short of breath.

Acute glanders begins suddenly. The animal shows high fever; the visible mucous membranes of the nose are much reddened, and soon become covered with nodules and ulcers which unite and form one ewoolen sore. The discharge is copious and mixed with streaks of blood. The respiration is hurried and labored, the nostrils being blocked by the ulcers and swelling; a snoring noise is emitted by the respiration, which can be heard at some distance. The head is usually swollen at its lower part, and symptoms of acute farcy may appear. The stricken animals live from 8 to 14 days.

CHRONIC FARCY.

This disease usually begins with a nodule like swelling of the attacked part, and when the swelling disappears an ulcer breaks out. This ulcer shows a discharge of rather thin, slimy, yellowish fluid, and a very unclean wound with upturned edges. At the same time, or soon afterwards, another nodule appears, not very far from the first one, which may vary in size from a hazel nut to an egg, which also breaks up, and is followed by an ulcer. This second ulcer is connected with the first one by the lymphatic vessels. New nodules and abscesses will break out in the direction of the heart, all along the course of the lymphatic vessels. Also, from the head downwards, and from the legs upwards, ulcer after ulcer may appear. Sometimes they may disappear, and even completely heal up. The connecting lymph vessels may get inflamed, and assume the shape of a cord. The gland to which this inflamed vessel leads will also become swollen and hard and painful to the touch, but will not suppurate. These symptoms may start anywhere, but usually begin on the legs, the head or the withers. At the same time large swellings of the attacked parts can be observed, and lameness, loss of appetite and condition, and general feverishness may be the consequence. Chronic farcy may also run a long time before the animal dies, or till the disease develops into the acute form.

ACCUTE FARCY.

This form does not show any peculiar symptoms. It breaks out more or less suddenly takes a very rapid course, and accordingly produces fever, and all the signs of a grave, morbid condition, and it is usually accompanied by the symptoms of acute nasal glanders.

There is no immunity from this disease, and its curability cannot come into consideration, for a horse which suffers from glanders is a constant danger to all its surroundings, men included, and should be destroyed as soon as the diagnosis is certain.

All reported cures (there are many) may easily be understood in the light of the foregoing facts.

Keep your healthy horses away from your sick ones, or better still, keep them apart from any animal you do not know.

This should be the rule until the disease has been completely eradicated. If the disease should break out in a stable, careful disinfection should take place before fresh horses are again put into it. For this purpose, wash with a disinfectant fluid all places where the horse could possibly have reached with nose, where the discharge might have been scattered, or where the body of the horse could have left infection by the slightest contact. Moist places, such as the standing place, should be dug up, and copiously sprinkled and oven saturated with the disinfectant. Harness, saddles, halters, brushes, etc., should be washed with weak disinfectant fluid, and dried in the sun before being used again. Manure bedding, and all waste forage should be burned.—W. R. Gilbert in *Hoard's Dairyman.*

The manes and tails of the horses should be looked after carefully as very essential to their appearance and make-up.

A most useful farm horse is of medium size, well muscled, active and good dispositioned.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1 50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

How Can We Tell a Good Dairy Animal?

She doesn't belong to any breed exclusively, but is found in all breeds. In experimental work it has been found that it is not breed that determines the value of a cow as a money maker, nor is it color, size, or her score on the scale of points of that breed. For the scale of points of the different dairy breeds is misleading, the cows scoring the highest are not necessarily the best cows. The score of a dairy cow should depend upon her ability to convert raw material into dairy products economically. Great dairy performers of all breeds have similar conformation. The first requisite of a dairy cow is large feeding. The more raw material she can make use of, other things things being equal, the better the cow. An animal's feeding capacity can be closely ascertained by its conformation, it depending largely upon the size of the middle or barrel. The first and most important point in determining the size of the barrel is depth of body through the middle; then comes length of body from shoulder to hock points, and its breadth through the middle. A broad muzzle and strong jaw are also desirable—W. A. Peterson in *Farm, Stock and Home.*

Mr. Chisholm of New Mexico is the heaviest individual raiser and feeder of swine in the entire Rocky Mountain region and finishes 5000 hogs each year. He is raising enough kaffir corn to supply his needs and thirteen hundred tons are required each season to fatten his herd. After feeding 500 tons, the alfalfa-run hogs are in condition to begin actual fattening and 800 tons more prepare them for the market. This is about one-third as much feed as is used in the east and his hogs weigh about three-fourths as much as the eastern hogs when finished. Last year, he made a careful test and found that his hogs gained 100 pounds each on 447 pounds of ground kaffir corn. The hogs were young—eight months old—and gained 1.6 pounds a day. He found also that grinding the corn effected a saving of eighteen per cent.

Here is what a Boston woman is said to have written to a sanitarium in Colorado whither she was about to come for her health: "Please engage for me two quarts daily of pasteurized milk from a cow whose bag has been washed in peroxide of hydrogen and wrapped in antiseptic cotton during heat of the day. Secure this from a cow that is given distilled drinking water and is fed microbe-disinfected meadow grass free from noxious weeds and see that her temperature is down to eighty degrees Fahrenheit when she is milked. See that the stable is thoroughly disinfected daily.

Linseed meal is very beneficial to horses, and will help materially in making their coats black and sleek.

Sale of Guernseys.

The sale of the Spotswood Farm Guernseys, the property of Edward Trotter Price, at Broad Axe, Pa., October 19th, drew a large attendance who were comfortably housed and seated in an ample tent. The weather was perfect and the cattle were in fine condition and were well handled. The bidding, while conservative, was persistent under the persuasion of Auctioneer Peter C. Kellogg and his spirited assistant, P. J. Casey, and most of the breeders present thought the sale indicated a firm undertone to the Guernsey market. There were no sensational prices, yet the 91 head, of which there was an unusually large share of very young calves, made a general average of $221.53. The following is a classified summary:

FEMALES.		Average per head
25 cows brought	$8740	$338 80
31 heifers brought	6895	222.09
13 heifer calves brought	1880	144.61
MALES.		**Average per head**
8 bulls brought	$1500	$187.50
14 bull calves brought	1425	101.78

Mr. Price will make another importation of cattle from the island of Guernsey, where a good number of high-class animals have already been secured by his local representative. They will be sold at Spotswood Farm next spring or early summer.

Large Deal in Shorthorns.

Ben F. Rush and William Pierce of Suisun has just concluded one of the biggest deals in blooded cattle ever made on the Coast. They have purchased the entire herd of full-blooded Shorthorns owned by Joseph Marzen of Lovelocks, Nevada. The herd consists of 228 head of cows and heifers and 58 bulls, and have carried off more premiums at the Nevada and California State Fairs than any herd of beef breeds exhibited. While Mr. Marzen was at Sacramento this year he announced that on account of his advanced age he would retire from the stock business, with the result that Messrs. Rush and Pierce visited his farm, as above stated.

The cattle arrived in Suisun this week, and were placed on one of Mr. Pierce's farms, which will be conducted separately by the new owners as a special breeding farm. It will be given the name of the "Humboldt Farm." The introduction of these cattle into Solano county will result in benefit not alone to the owners, but to the entire State.

The University of Illinois Agricultural Experiment Station states that uniformity of fat in milk is better for infants than the milk from a single cow, as the single cow's milk varies greatly from milking to milking. The station adds enough cream or skim milk to bring the butter fat to four per cent. They then place it in the refrigerator and hold at 40 degrees until delivery.

Once More, Why Not Keep a Few Sheep?

We have been insisting for the last ten or fifteen years that it will pay every farmer who has any great part of his farm fenced with a sheep-tight or hog-tight fence to keep a small flock of sheep, commencing with 25 and limiting the number to 100, says a writer in *Wallaces*. A flock of this kind can be kept on the farm with little or no expense, and what expense they are is repaid many times by the aid which the sheep give in keeping down weeds, which for the last three years have been one of the greatest pests with which the western farmer has to contend. A flock of this kind properly managed will yield from six to nine pounds of wool per year per head and from 25 to 30 lambs, which, if they are dropped early and pushed on with a little grain, will sell when they can be offered in carload lots at about $5 per head in Chicago or in any of the great markets. If they are dropped on grass in May and fed on grass alone until September and turned into the fields they can be fattened largely on what else would be wasted and will bring about $5 per head in the market then. We do not know of any one thing managed in a small way that will yield better returns than 25 sheep on a quarter section farm.

This article was suggested by the call of one of our subscribers at the office. He has a small flock of sheep, has always found them profitable, and some movers came along a few days ago and one of them asked him what he would take for one of his lambs. Without thinking he said $3. One of the movers immediately picked out one of his best lambs, killed and dressed it and found it weighed sixty pounds. The farmer's conclusions on this subject were something like the following:

"I have sold sixty pounds of first-class mutton at 5 cents per pound. If I wanted to buy a leg of poor mutton in any city they would charge me 18 cents per pound; what a fool I am selling the best meat in the market at about half the price I pay for it. Hereafter when I want any good feeding I will go to my own flock and in the future will double the size of it."

Many farmers now are not buying beef on account of the retail price. The family is too small to handle even a yearling steer at this time of year, but they can at any time have the best kind of meat by killing a sheep or a lamb, and if they have ice can keep it safely until it is all used. In fact, a small flock of sheep in addition to furnishing an excellent profit and keeping down weeds, furnishes also the most practical meat supply for the farmer at this season of the year, or, in fact, at any season. Think it over and try to get these money-makers to help you for their health's sake to keep down the weeds.

The entering wedge for government inspection of stallions has been started in the Canadian Northwest Owners of stallions are required to register with the proper government official a thorough description of their horses with a true statement of the breeding of each animal If the horse is pure blood he is registered as such; if a grade or cross breed the breeding of both sire and dam are given. A certificate is then handed to the owner and he is required to post copies of it in public places near where the animal is kept, in order that full and complete information may be easily acquired by those interested.

A cattle feeder named Joseph Thomas of Alliance, Ohio, says he notices a big change in the cattle now being produced in the west. Eighteen years ago he visited some western ranches at which time the average range steer was tall and stood away up from the ground while very few had the rich red color that now characterizes the bulk of the range stuff. He says that while the east is breeding for milk and butter, the west is growing beef stock and as a consequence the western stuff is considerably in the lead.

Those who have tried it say that it pays to keep a cow cleaner than a horse. This takes work, because a cow is naturally more unclean than a horse. They don't hesitate to lie down with their udders in a heap of manure. It should be carefully washed, the flanks should be brushed so that as little dirt may go into the pail as possible.

Well water or spring water is cool enough to make good butter, and in which to set milk, It is usually about fifty degrees. It seems colder in warm weather, and warmer in cold weather, but varies very little in winter or summer.

It is stated that butter color is fast losing its place in the markets. Customers prefer the color that grass gives in summer and that feed gives in winter. Color does not add anything to the taste or odor.

Sober up on Jackson's Napa Soda.

ROAD MARE FOR SALE.

A STYLISH, HANDSOME, WELL-BROKEN and perfectly sound Road Mare for sale. A very desirable animal in every respect. Apply to the Owner, 164 Golden Gate avenue, San Francisco.

WANTED.

BY A MAN WHO THOROUGHLY UNDERstands every feature of the trotting horse industry from the selection of sires and dams to the breeding, rearing, training, racing and selling, to interview or correspond with some gentleman who has the necessary capital and the desire to produce and own the best. Have had years of experience and trained some of the best trotters ever produced in California There is money to be made in the business now and for years to come. Address "Horseman," care of BREEDER AND SPORTSMAN.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fe ‑ck which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, $1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

SAVE-THE-HORSE

Registered Trade Mark

SPAVIN CURE

$5 PER BOTTLE. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Splint, Thoroughpin, Capped Hock, Shoe Boil, Wind Puff and All Lameness.

ON BROKEN DOWN, WEAK, SPRAINED and RUPTURED TENDONS and LIGAMENTS its power is unfailing.

The fire-iron is uncertain and invariably only aggravates the injury or disease; blistering is less effective: both necessitate laying up the horse for months. Mercurial and poisonous compounds cause irreparable injury.

"SAVE-THE-HORSE" eliminates all these factors.

Cures without scar, blemish or loss of hair. Horse may be worked as usual and with boots, as no harm can result from scalding of limb or destruction of hair.

Need of second bottle improbable except in rarest of cases.

Send for booklet and copy of guarantee.

$5—All druggists and dealers, or sent express paid.

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D. Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy..... $7
BOUND IN CLOTH, per Copy..... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse, as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

CAPT. THOS. B. MERRY,
Hotel Marlboro, Los Angeles.

TEAMS FOR SALE.

PAIR OF WELL-MATED STANDARD-bred Bay Geldings; stand 16.1; weigh 2600 lbs; well broke, both single and double, and are a fine carriage team, handsome and stylish. Also, a handsome black Driving Team, 6 years old; these mares are well bred, being by St. Nicholas, son of Sidney. They are square trotters and can beat 3 minutes to pole; either mare can trot a mile single in 2:40. For further particulars as regards price, etc., apply to A. DOBRZENSKY, Prop. Vendome Stable, Newmen, Cal.

FOR SALE.

A HANDSOME 4-YEAR-OLD BAY FILLY; pacer; stands 16.2½ hands; sired by McKinney, dam Mission Bell by St. Nicholas. Full sister to Mechanic. A smooth-gaited filly, goes without straps or boots, and with less than a month's handling has paced a half in 1:11. Is sure to make a fast pacer. Address or apply to JOHN ROWAN, 1347 East South Street, Stockton, Cal.

Dr. Spencer's English DYSPEPSIA WAFERS

Relieves and cures Indigestion, Heartburn, Dyspepsia and all Stomach complaints.

Price 50¢ per box.

BRITISH PHARMACAL CO LTD DISTRIBUTORS MILWAUKEE, WIS.

CAN YOU ENJOY A SQUARE MEAL?

Do you sit down at the table with a fine appetite intending to enjoy your meal immensely and after a few mouthfuls give up in despair? That's a typical "well along" case of indigestion or dyspepsia. Hundreds, yes, thousands are in the same boat and are willing to do almost anything to be as they used to—healthy, well and strong with a good sound stomach.

You cannot force your stomach to do work that it is unwilling to do. It has been tried time and time again, with the same results always. The stomach is a faithful organ, but when pushed beyond, and exerted to the utmost, it rebels. Some stomachs are stronger than others, but all have their limit and when the limit is reached it is unwise to attempt to force it into doing further work.

The best and nickest cure offered to that big army of sufferers is

DR. SPENCER'S ENGLISH DYSPEPSIA WAFERS.

If you haven't heard of this cure before, you have been needlessly suffering, for this medicine *will* cure you—cure you as sure as there's a sun above. Would you spend 50 cents if you thought there was some hopes. We know you would, and therefore tell you sincerely that D. S. E. W. *will* cure you.

The curing powers of these wafers are very simple to understand. They are natural in their workings and effects, taking up the work of the worn and wasted stomachs, digesting the food thoroughly and completely.

San Francisco, Saturday, November 5, 1904.

HENRY TEN EYCK WHITE, tbe Chicago *Tribune's* well known correspondent, referring to Mr. C. C. Crippen's recent article in the BREEDER AND SPORTSMAN in regard to the Dexter Princes, in which it was stated that tbe get of this sire "can step fast without any work, consequently when they are asked to do so, and a lameness or filled leg results, the family is condemned," comments as follows: "Mr. Crippen is right on that point. It is the colts of a family celebrated for natural and early speed that are knocked out. If they have the ahility to step at a tender age it is the most natural thing in the world for the average trainer, perbaps unaccustomed to that sort of youngsters, to let them overdo the matter of hrush work, and if they do not hreak down most of them become what is known as 'speed crazy.' The numher of naturally fast trotting colts wbich are ruined from tbis cause is much larger than any one who has not heen called upon to ohserve tbe results of colt training would imagine. A yearling which bas a good way of getting over the ground and a lot of amhition to go as fast as it can all the time is handed over to a trainer. If he is a wise man ahout colts he will begin operations hy taking the colt hack, instead of encouraging it to step, until its legs are ready to stand the strain of a fast clip.

MR. ALBERT TOZIER, State Expert of the Department of Printing of Oregon, who acted as Superintendent of the camp ground at the Oregon State Fair this year, recently wrote the editor of the BREEDER & SPORTSMAN a personal letter from which the following extract is made, as it is of more than ordinary interest to all who are connected with the management of state and district fairs: "I have ever taken an interest in state and district fairs having attended those of twenty-three states. Oregon differs from all. It is a fair peculiar to itself. The old camp ground carries me hack forty years. I have missed just one fair in that time. I was in charge of the camp ground last year and this, and find it a study. It is a feature tbat every state should adopt. Think of it, hrother, at our camp ground last year and this year not an article was molested in any camp, and in the neigbhorhood of three thousand people, hig and little, each year. A town of 200 people must bave a marshal and city officers. This camp ground had no marshal, no police, and not a thing molested. Our hest people camp there."

ANOTHER GREAT STALLION is to he sent away from California, and the prohahility is that he will not come back. We refer to Sidney Dillon, sire of the world's champion trotter and sire of three trotters witb records better tban 2:08 out of hut fifteen of his get that have been trained. Sidney Dillon will leave Santa Rosa on Saturday next, November 12th, for tbe Old Glory Sale. There ie a possihility that he may he purcbased hy a California hreeder and hrought hack to this State where be would he largely patronized, hut the probability is that some eastern hidder will make the high hid for him and tbat he will join the great hand of champion stallions that have been sent from this State to head eastern stock farms. No stallion has had as limited opportunities as he, and the fact that he has produced three 2:08 performers at twelve years, one of tbem the world's champion, is enough to stamp him as one of the greatest trotting sires ever produced.

FRESNO IS TALKED ABOUT as the place for a great trotting meeting next year. It bas one of the fastest and hest appointed tracks in the State, splendid railroad facilities and is a thriving growing town with a population that enjoys harness racing. The Fresno Driving Cluh has within it men of energy who could give a meeting tbat would rival some of tbose beld on tbe Grand Circuit. It will he a pleasure to announce that Fresno has entered tbe circuit and arranged for a good program with generous purses.

A BIG PILE OF MONEY will he required to pay for tbe horses tbat will be offered at the Old Glory Sale in New York next month, as some of the greatest trotters and pacers in America will go under the hammer. Besides Sidney Dillon, Major Delmar and a bost of others it is now announced tbat the greatest of all three-year-olds, Grace Bond 2:09¼, is to be sold. She won $21,350 last year and this. How mucb will sbe hring?

Racing at Santa Maria.

SANTA MARIA, Novemher 2.—Today opened the largest meeting ever held by the Santa Maria Track Association. Horsemen from several parts of the State are here and prominent horses are entered from Oxnard, Ventura, Santa Barhara, Paso Rohles, San Luis and Arroyo Grande, hesides several fast local horses. The hetting was lively, tbe purses the largest ever given on this track. Summary:

First race, mile heats, mixed trotting and pacing, 2:30 class, $150—Miss Mabel first, Amidis second, Si Si third. Best time—2:30.

Second race, quarter mile and repeat, $75—Paloma first (Pico), Pepper second (Herman), Pearl third (Ward). Time—0:25. Start good, finished easily. Lizzie B. also ran.

Third race, running, ⅝ dash, $50—Resperater first (Higuera), McKinley second (Ward), Esperanza third (Pico) Time—1:05. Start had, won easily. Don Cesara also ran.

November 3.—Another large crowd was at the track today to enjoy the racing. Results: First race, mile heats, mixed trot and pace, 2:20 class, $100—Hanford Medium won, Ben Corhett second. Time—2:19. Only two starters.

Second race, half a mile dash, $50—Paloma (Pico) won, Pearl (Ward) second, Lizzie B. (Gregory) third. Time—0:52. Start good, won in a canter.

Third race, three-quarters of a mile, $75—Resperator (Higuera) won, Esperanza (Pico) sec nd, McKinley (Ward) third. Time—1:18½. Start straggling, won easily.

Fourtb race, saddle borses, quarter of a mile and repeat, $30—Ardo (Browning) won, Joe B. (Pico) second, Decoy (Cross) third. Time—0:25. Start good, won driving.

Answers to Correspondents.

L. G. H., Hanford—Zomhro 2:11 was sired hy McKinney 2:11¼, dam Whisper hy Almont Lightning 1023, second dam May Berry hy Kentucky Clay 198, tbird dam hy Edwin Forrest 49.

F. FRARY, Red Bluff—Local, three-year-old record 2:19½, hrown borse, foaled 1893, was bred at Palo Alto Stock Farm, and is hy Wildnut 13,472 (son of Woodnut 2:16½ and Wildflower 2:21 hy Electioneer) dam Ladywell hy Electioneer 125, second dam Lady Lowell hy Shultz's St. Clair, third dam Laura, untraced. Laura is tbe dam of Dock, sire of Occident 2:16¾. The greater portion of the Pacific Coast Trotting Horse Breeders Association's stakes is given to trotters hecause the fast trotter is a more desirable animal than tbe pacer and its hreeding should, therefore, he encouraged more. Anotber reason is that the greater part of the money paid in to the stake is paid hy the owners of trotting foals.

S. A. BLYTHE, Tulare—The summary of the race at Bay District track when Harry Wilkes and Guy Wilkes met November 27, 1886, is as follows:

Harry Wilkes, b g by Geo. Wilkes	1	1	2	1
Guy Wilkes, b s by Geo. Wilkes	2	2	1	2
Antevolo, b s by Electioneer	3	3	3	3
Charles Hilton, b g by Louis Napoleon	4	4	4	4
Arab, b g by Arthurton	5	dr		

Time—2:15½, 2:16½, 2:16½, 2:15.

The good stallion Vasto 20072, record 2:16½, is offered for sale hy bis owner, Mr. John H. Wise of tbis city. Vasto was purchased hy tbe late James G. Fair at a long price, hut after that gentleman's death bad little or no opportunity in the stud. He is a borse of quality, size and finish and his produce are large and well formed borses with speed and carriage qualities. He can be purchased at a hargain. Vasto is by Vasco, son of Harold, his dam is the douhle producer Chess by Magic, bis second dam hy Clark Chief 89 and his third dam hy Pilot Jr.

Will Durfee hrought quite a hunch of horses home witb bim from the north tbe property of that genial horseman, politician and track owner Mr. A. T. Van De Vanter of Seattle. Among those helonging to that gentlemen are Kinmont and McAlropa both hy McKinney; Queen Director and King Director, full brother and sister hy Montana Director out of tbe dam of Prince Direct 2:07, and a two-year-old by Guycesca out of the dam of Caryle Carne 2:11¼. These are all good prospects and will be trained by Mr. Durfee at Los Angeles during the winter.

Los Angeles Driving Club.

During the approaching season the Los Angeles Driving Club is preparing to hold the usual matinees and in general expects the most active year in its bistory, says the *Express* of that city. As usual, tbe opening of the matinee will he held at Agricultural park, Thanksgiving Day, Nov. 24. The officers of the association this year have been members of the driving cluh since its organization and are thoroughly conversant witb the needs of tbe hody.

Since William Garland's great trotter Sweet Marie has heen winning an uninterrupted series of victoriea on the eastern turf there are many who have aspirations of emulating Mr. Garland's success. Sweet Marie holds the local matinee record of 2:11½, made on the Agricultural park track. Primrose, owned hy Fred F. Taylor, holds the club hlue rihhon in the mile pace, baving estahlished the distinctly creditable time of 2:09¼ for this event. At Agricultural park the track is heing kept in first-class condition to enahle members to condition their horses for participation in the opening meeting of the cluh.

Kenneth V. Redpath, secretary of the club this year, helieves the season to he opened Thanksgiving Day will he the hanner one for the organization. The rapid increase in memhersbip is significant of tbe encouraging growth of the cluh and tbe progressive ideas adopted hy its governing board. Those who witnessed the closing of last season at Agricultural Park saw what is generally admitted to have heen the most successful matinee ever held under the auspices of the local organization. Polo pony races, novelty events and other cards which are of perennial interest to the lover of horseflesh are features of the cluh's meets. Several innovations are heing planned along this line to take effect this year. The polo pony dasbes always have furnished rare sport and have stimulated entries from all sections of Southern California where the horse and mallet game enjoys popularity.

Particular attention also will be paid to tbe polo matches whicb are held on the Agricultural Park oval during the distance events. These always have heen a pleasing feature of the meetings of the cluh, and have given the general puhlic a desired opportunity to see a higb-class exhihition of the game. With the construction of the new regulation polo field in Los Angeles the game will he represented hy several strong teams this winter. Outside of Los Angeles, Riverside borsemen show more tban a moderate interest in the plans of the cluh. A string of polo ponies always represents Riverside in tbe events for polo ponies during the Los Angeles cluh's matinees.

One of tbe commendahle rules of the driving club is the absolute prohihition of hooks heing made on tbe grounds during the race meetings of the association.

Any feeling which may have heen engendered during the campaign incident to the recent election of officers has heen entirely dissipated. and indications are promising for the fulfillment of Secretary Redpath's prediction of tbe most successful season since the Los Angeles Driving Cluh was organized.

In the $10,000 Class.

Eleven trainers bave won over $10,000 each on the Grand Circuit this year, as follows:

E. F. Geers	$43,735
Chas. De Ryder	38,222
George Spear	24,535
W. J. Andrews	23,830
W. L. Snow	19,835
A. L. Thomas	17,722
Robert Smith	14,900
Scott Hudson	13,492
Alonzo McDonald	13,150
A. P. McDonald	11,203
Havers James	10,050

Mr. W. H. Graham of Reedly, Fresno county is the owner of a filly that will not he eighteen months old until Decemher, that is the trotting wonder of the county. She is hy Mr. Geo. Warlow's stallion Athablo, (son of Diahlo 2:09¼ and the great broodmare Athalie), her dam is by Eclectic (own hrotber to Arion 2:07¾), second dam hy Dexter Prince and third dam hy Napa Rattler, sire of Alex Button's dam. Mr. Graham expected a pacer wben he bred his mare to Athablo, hut the filly knows nothing hut trot and is a young wbirlwind.

British advices are to the effect that prices for good horses of the higher grades are higher this fall than they were last year and that the supply is smaller than it was then. French, German and Austrian huyers are visiting the British fall fairs and picking up many of the four-year-old geldings and mares offered, the prices for such "feeders," though tbey do not call tbem such in the United Kingdom, heing higher than they have heen for a decade The expectation is that many American and Canadian horses will he imported this winter.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

JOTTINGS.

A McKINNEY YEARLING was sold this week for $5000, the record price in recent years for a yearling in this State. Mr. John A. Cole, owner of the Rancho de las Flores in San Bernardino county, was the seller, and Mr. George S. Newman, of New York City, was the buyer, so the colt will soon be a neighbor of his distinguished dad, who was bought by a New Yorker last month for $50,000. The colt is Mac Rose, a Palo Alto production foaled March 20, 1903, and sold by Fred H. Chase & Co. at auction last January, in this city, to Mr. Cole for $700. According to the BREEDER AND SPORTSMAN'S San Bernardino correspondent whose letter appears on another page, Mac Rose is a very fast trotter and as he is a fine individual, it is no wonder he brought a long price as he is a royally bred one. His sire is the greatest sire of speed of his age that ever lived and his dam, Sweet Rose by Electioneer, had a yearling record of 2:25¾ trotting, and has produced a 2:30 trotter, his second dam Rosemont by Piedmont produced three in the list, his third dam was the greatest of all broodmares Beautiful Bells, dam of eleven in the list and of the only stallion that ever sired three trotters with records of 2:06 or better, and his fourth dam is famous old Minnehaha, dam of eight standard trotters and six producing sons. I don't know where one would find richer producing blood than this colt carries in his veins and he should be a great success in the stud, especially as he is said to be able to show that he is endowed with great natural speed.

The sons of McKinney that are well bred on the dam's side are not so numerous in this State as they should be as the eastern buyers have taken a good many of them and they will take more during the coming year. Owners of good mares should therefore not miss the opportunity so breed to good sons of McKinney next season, as the time may come when California will be short of sons of McKinney just as she is short of the sons of Electioneer. There is one young McKinney here which will doubtless attract the eye of some easterner before long, that has not been in the limelight as yet, as he has been owned in Humboldt county, which is off the line of general travel. I refer to Grecko a four-year-old owned by Mr. Brace, His dam is the double producing mare Alien 2:26½, dam of Mowitza 2:20½ and Sister 2:20. Alien was by Anteeo 2:16½, and out of the famous Lou Milton, dam of the champion Lou Dillon 1:58½ and three others in the list. Grecko carries the blood of McKinney, Electioneer and Lou Milton. That comes pretty nearly up to the record of speed inheritance. From the way the get of Zombro and Zolock were pacing and trotting this year there is no doubt but the speed of the great McKinney will be visited on his children even into the fifth and sixth generations, and to many beyond.

John Caldwell 2:11¼, Col J. C. Kirkpatrick's Strathway gelding, showed a wonderful burst of speed in his last race at Memphis, although he was distanced in the first heat. He has made very few breaks this year, but one or two of them have been of the stand-and-dance order and this was one of that kind. Caldwell was the favorite for the race, in which Bonnie Russell, Brilliant Girl, Clarence C. and Ozone were the other starters. He was on the outside at the start and went away very fast. The track was quite rough where he had to trot and on the first turn he was thrown off his feet. When he got squared away Bonnie Russell was in the lead two or three hundred yards and Thompson sat down to get inside the distance flag if possible as he had played his money on the horse, and the Colonel had a few tickets himself and was an interested spectator of the race. Caldwell trotted like a Sweet Marie for the remaining three quarters and was timed that distance by a dozen watches in 1:32¼, about a 2:04 gait. The flag fell right on the horse's head as Thompson and several horsemen who were standing close to the distance post asserted, but he was declared distanced much to Thompson's chagrin The Colonel, after thinking it all over, was glad Caldwell did not win the heat or race as he would have been out of the 2:12 class to a certainty had he done so. As it is he is eligible to the Transylvania and other big stakes next year and it will take a Sweet Marie to beat him if he is all right when he starts.

Prof. E. P. Heald, President of the Pacific Coast Trotting Horse Breeders Association, has sold the good mare Nance O'Neil 2:09¼ to Mr. B. Croner of this city for $1500 in cash and $250 more to be paid when she lowers her record The mare will be left in the hands of Willard Zibbell, who raced her so successfully this year and there is but little doubt that she will make the extra $250 due early in the season of 1905. Nance O'Neil started four times this year and was defeated but once and then by that whirlwind pacer Edwin S. 2:08, and in that race was second to him. The dam of Nance O'Neil, Nona Y. 2:25 by Admiral was one of the gamest race mares of her day and has proved her quality by producing three good ones—Nance O'Neil 2:09¼, Chas. David 2:15 and Lady Rowena 2:18½, the only ones of her get that ever started in races. Nance O'Neil showed this year that she is a high class race mare, and she will doubtless be one of the great attractions of next years circuit. She has gameness, speed, class, quality and soundness, and wears nothing but a harness. It is predicted by those who know her best that she will pace in 2:05 next year. Mr. Croner has certainly got big value for his money, and if his mare Hattie Croner should round to and be in good condition when the races begin, he will have a couple of mares able to win in both the fast and slow class purses hung up next season.

Notes From a Horse Breeding County.

SAN BERNARDINO, CAL., Oct. 27, 1904.

EDITOR BREEDER AND SPORTSMAN:

You remember Romeo had but a short time to wait after hiding near the wall in the orchard before he heard the sweet voice of Juliet, his loved one, vowing her love to him, unconscious, however, of his presence. It looks now as though the lovers of good horses and matinee racing, like Romeo, would only have a short time to wait before they will have a first class regulation track, spacious grandstand, club house, with plenty of water and a splendid lot of enthusiastic horse men joined in a corporation with a capital stock paid up of $50,000 to better perpetuate and keep in the advance (if possible), of all other counties of the State, the high standard of the harness horse.

The following is a partial list of the 2:20 horses that have either been bred in this city or county. I use the 2:20 list, it being considered by our citizens slow enough for standard hereabouts.

Hazel Kinney 2:09¼, Zolock 2:09¼, Zombro 2:11, Gazelle 2:11½, Ella Madison 2:12¼, Roan Wilkes 2:12¾, Nellie I. 2:15, Nellie B. 2:15, Ed Winship 2:15. Nellie W. 2:15¼, Conn 2:15¼, Bet Madison 2:15, Betty Gentry 2:16, Delilah 2:16½, two years old; Newport 2:17, Irene Crocker 2:17, Mabel McKinney 2:17½, Theron 2:18, Alias 2:19, Maude McKinney 2:19½, three years old; Ambush 2:20, two years old; Contento 2:20, three years old.

The foregoing list of 2:20 and better horses is the result of numerous breeders' attempts, as only Mr. Davies, the owner of Zolock 2:09¼, has bred three in the list; but it is not so surprising after all when the public understands that the foundation for all this success was laid some years ago by such splendid bred stallions as Inca 2:27, Echo 462, Edwin Booth (by Geo. M. Patchen), Mormon Chief, Ethan Allen Jr., Woolsey (full brother to Sunol), Judd Wilkes, Christmas by Strathmore, Albion, Conn 2:15, Happy Prince (by Bayone Prince, dam by Happy Medium), General Wiles 2:15, Raymon 2:27, Adjutant 2:16, McKinney 2:11¼, Zombro (by McKinney) 2:11, Zolock (by McKinney) 2:09¼, and many others, beside two thoroughbreds viz , Sacramento and California Tenbroeck.

John A. Cole, president of the club, has just possessed himself of 36 head of the finest thoroughbred fillies to be found anywhere, many having been bought from Lucky Baldwin, the only man in the United States who has four stallions all Derby winners in his stables. Mr. Cole also owns 50 head of ultra fashionably bred trotting mares, fillies and colts, whose blood lines, and high form, tempt me to describe every one them, but the entire lot can be imagined by a glimpse description of three of them.

Mac Rose 39229 is the peer of any colt on earth so far as royal blood is concerned, sired by McKinney 2:11¼, the greatest sire of 2:10 trotters that has ever existed. First dam Sweet Rose by Electioneer (one-year-old record 2:25¾) and the dam of The Princess Rose 2:30 and a number of very promising trotters. Second dam Rosemont by Piedmont dam of Mont Rose, three-year-old, 2:18, Mazatlan 2:26¾, and dam of Sweet Rose 2:25¾ as a yearling. Third dam Beautiful Bells 2:29½, the dam of eleven in the 2:30 list, the I X L of all broodmares. Fourth dam Minnehaha, dam of eight in the list, including the famous Beautiful Bells. Mac Rose stands 15½ hands, weighs 1004 lbs., jet black in color. The writer understands that accounts of phenomenal speed are not rejected when read in connection with colts of the breeding of this one, but he shrinks from giving the public the actual speed shown by this colt for an eighth of a mile when only sixteen months old; it being so far in advance of public trials for that age that your readers would not give it credence.

Mr. Cole has a full sister to this colt two years old that trotted a half mile in 1:18 the seventh time she was harnessed.

Prince Valentine 38397 owned by Mr. Cole sired by Exioneer 33525, he by Boodle 2:12½, he by Stranger, a son of the great Goldsmith Maid 2:14. Exioneer's dam was Expressive, three-year-old record 2:12½, the greatest race daughter of Electioneer. First dam of Prince Valentine was Nordica, three-year-old record 2:19½ and dam of three in 2:30 list by Advertiser, three-year-old record 2:16, second dam Sally Benton, four-year-old record 2:17¾, world's record 1384 to 1886, dam of four in list, third dam Sontag Mohawk, dam of seven in the list, fourth dam Sontag Nellie, grandam of eight in the list. Prince Valentine is a high formed colt and very fast.

Another of Mr. Cole's animals that the writer fancied very much was Neer Kinney by Neernut 2:12¼, first dam Leonora McKinney 2:20 by McKinney 2:11¼, a full sister to Jennie Mack 2:09, Dr. Book 2:10, Miss Jessie 2:12¾ and Judd 2:20, second dam Leonore by Dashwood, third dam Durferine by Echo 4:62, dam of Leonore 2:24.

Another breeder of note is Benj. Davies, the owner and breeder of Zolock 2:09¼ and his dam Gazelle 2:11 and the great two year-old Delilah 2:16 by Zolock. Mr. Davies laid the foundation well, starting with a mare by Echo 462 and from her loins have sprung many of the finest and fastest colts in Southern California; Mr. Davies owns a colt by Nutwood Wilkes (sire of John A. McKerron 2:04½) that is very fast and handsome, first dam by McKinney, second dam Old Gypsy by Edwin Booth, third dam by Echo 462. Mr. Davies has another out of the same mare and by the same horse one year old; and another out of the same mare by Nushagak (sire of Aristo 2:08¼) and has the mare now in foal to Iran Alto 2:12¼ by Palo Alto 2:08¾.

William Rourke, the breeder of Hazel Kinney 2:09¼ has a colt a full brother to her, Larrie Kinney, that the Blue Grass horse breeders would give a lung for; the perfect conformation he possesses, together with his blood lines makes him one of the gems of our land. He was sired by McKinney 2:11¼, first dam, Baby by Christmas. Mr. Rourke also owns a fine filly by Zombro 2:11 out of Baby and a fine colt by Zolock out of a full sister to Baby.

G. W. Prescott, vice-president of the Driving Club, is a breeder and trainer of trotting horses; his colts by Zolock 2:09¼ and Prince Royal by Dexter Prince are highly formed speedy colts that will in no distant day speak for themselves.

Dr. I. W. Hazlett has a four-year-old filly by Zombro that can trot under 2:20 and a pacer by Zolock that gives promise of rare speed; they are out of a very fast and game road mare sired by Jose Romero 2:19¼, he by A. W. Richmond, etc.

Another breeder fast coming into prominence is Summer B. Wright, owner of Red Rock by Zolock 2:09¼, first dam, Alta Rena 2:27 as a three-year-old, second dam, thoroughbred; this colt is a remarkably smooth gaited, level headed fast trotter, having shown a one-quarter in 37 seconds at 16 months old with very little training. He owns another by Stanton Wilkes 2:10½ out of Alta Rena that is a natural pacer and a highly formed colt; he has several others that would gladden the heart of any horseman,

There are many citizens here who have from one to three promising youngsters that will be noticed later on by the writer.

E. J. GILBERT,
Secretary Driving Club.

Several Austrian buyers are in this country, scouting around to find trotters that will be fast enough to win next season in their country. With a good many American trotters in Austria, able to trot in 2:10 or better, it takes a horse able to win here to get the money over there, and the result is that these foreigners have to pay quite handsome prices to get what they want. If it should happen that this autumn trotters fall lower in price than they were last season, the Austrians will take, so they say, from ten to fifteen trotters over with them in December. If values are preserved on the same level as that on which they rested last winter they will go home empty handed.

Warren Lewis of Ypsilanti, Mich., writes us that his brother Charlie Lewis drove Lady Red Wilkes in nineteen races this year and got a piece of the money sixteen times. He also started Shadow Wilkes in seven races and got third money or better in each start. With Queen of Hearts he won three races and with the colt Red Devil two. The Charles H. and Warren Lewis stable made thirty-five starts the past season and was thirty-one times inside the pay-offs. It is possible Charlie Lewis may ship his horses to California and winter them at Pleasanton.

The last public appearance of Dan Patch this year will be at New Orleans, December 8th. He will appear as the leading attraction at a running meeting, which shows that the managers know a drawing card when they see one.

A Written Statement from Robert Smith.

Just before the meeting at Columbus, Robert Smith, lessee and driver of Sweet Marie, wrote a letter in regard to the matter to an old personal friend, Mr. B. F. Fleming of Denver, Colorado, who recently gave it out for publication. The letter is dated October 2d, and is as follows:

"I have been so tremendously busy fighting for my rights during the last few weeks; in fact, beginning with the Brighton Beach meeting, that I have not had any time to even write friends. The events which have happened have been almost awe-inspiring. The dead heat at Brighton was won by a full head, so much so that the boy ran out and took off my number, and most of the people left the grand stand. Frank Bower was there, among many of my friends, and they all told me that I won it. I could have won it further off, but you know about how I win all of my heats. However, I won the next heat handily, and that settled the race, but I could not understand why the second was called a dead heat. I trotted the last quarter of the 2:08½ heat in 30¼ seconds, and the last quarter of the last heat in 30¾ seconds. We then went to Readville. In first heat I was down well in all the scores and finally in the score that I was back in, Walker said 'Go' I was at least seven lengths back. Anyone else would have laid up the heat, but I did not want to give the judges any opportunity to say anything to me, so I went for the heat. I was last horse around the first turn and was stopped a good deal in the first half. I finally got loose and trotted the last half in 1:02¼, but did not have far enough to go to catch the first horse. I finished second and I trotted the mile in 2:07½. The heat was won in 2:08¾, so you can see by the time how far back I must have been at the send-off. I went into the judge's stand and complained of such a start, and they assured me that I would get a better start next heat, but I told them that I was afraid the damage was already done. My mile in 2:07½, and last half in 1:02¼, and a terrible wind blowing up the stretch, that such a terrible clip might take all the trot out of my mare.

"The start in second heat was almost as bad as the first, and Marie tried four or five times to make a break in that mile; and, again, I had to trot around every other horse and finished second again. They took me out in the third heat, and Marie did just scramble in in 2:13¼, all out. During the scoring for the next heat there was an upset, a runaway, and after that another horse pulled a shoe, so that there was a delay about an hour before the word was given for the fourth heat. That gave Marie a long rest, and she freshened up better than the other horses and won the heat in 2:11½, and another heat in 2:12¾ All the three heats McDonald drove her were slower than every heat I drove her this year, yet they awarded him $300 for driving. Even after a thorough investigation of the race and finding no fraud of any kind, they exonerated me in every way, yet they gave away $300 of my money. Not as a fine, but to pay for the other driver, in face of the fact that I drove her the first two heats of the same race in 2:07½ and 2:10¾. But, as in all cases when they put in a new driver they never give the word until the new driver is right up, head and head, and not back seven lengths as they did with me up.

"Well, then on to Providence, I was head and head in every score, and the only time I was back they said 'Go.' Tiverton and Consuela S. went away to the eighth in 15½ seconds. They all could outstep my mare away, and it was impossible for us to win that heat, and when I got inside of the seven-eighths pole I was third, and saw I couldn't catch the other two, as I was about five lengths back I stopped driving and jogged on to the wire. At that I went the mile in 2:08¾. I could have gone on to the wire faster, but I had nothing to gain, as I was already third and could not catch either of the other two, for they were racing head and head, and went the mile in 2:07, the fastest heat of the year up to that time.

"The next heat was precisely the same as the first—same conditions on the send-off. It seemed they would not give the word when I was up well, and that heat was in 2:07¼. I made up my mind to get away head and head the next heat, even if I was fined every score down, and I felt satisfied that I could win if I could get off with them. But when I went out for the third heat they called me in the stand and told me they wanted McDonald to drive. I tried to tell them the conditions, that I was trying my best to win, but that I couldn't when they gave me such send-offs; that I did not have a dollar bet on the race in any way, nor did I stand in with anyone who did and that it was $5000, and that I would not be foolish enough to pull my mare in that kind a stake. But it was of no avail. They put McDonald up behind her, protecting him in the scoring; sent him off to the good, and Marie won in 2:06¼, 2:08¼, 2:08½. She made a break with him—the first break she had made all year. Then there was a howl. They investigated the race and could not find any evidence of fraud in any way, but suspended me for the balance of the season and gave McDonald $1000 for driving. Mind you, they did not fine me that amount, for that would go into the National Trotting Association, but gave it to McDonald. Doesn't that strike you as being a little peculiar? Unprecedented and unheard of in the history of the trotting turf that any driver was awarded that amount.

"I would not accept the money from them. The amount due me was $2250; they wanted to give me $1250, but I told them I could not accept $1250 for a debt of $2250; consequently I would not accept any of it. Within four days the Providence association lifted the suspension, and I was free and straight with the National Trotting Association. They did it under rule 52, section 1, which gave them the power to do it.

"I then started in the Charter Oak stake, and, thinking best not to give them any chance at me again, I decided to get some one else to drive her and got Jim Curry. That was the roughest-riding race I ever saw, even on a half-mile track in the bushes of Missouri. There were several horses in there that could beat Marie away, and it was a sight to see them close in and rough ride her. There were several different colors of paint on both sides of my sulky after the race, and Marie made three breaks in one heat. She was away back at the quarter pole, and by trotting the last half of the first heat in 1:02½ finished second. It was a novelty race and that second got her $800, but after that she had no chance. Made a break in every heat on account of others running into her, and it has just been that way ever since Brighton Beach, but I never appreciated it till I saw some one else up behind her. They did this kind of rough riding to her right under the judges' noses, but the latter took no notice of it. Several days after the board of stewards of the Grand Circuit met and disqualified me from driving the balance of the season on Grand Circuit tracks, but that did not affect the mare. They did that without any trial, or advising me in any way about it, and the charge made was, as I understand it, for laying up two heats. So, see how I stood then. I could drive on any track in the world—Lexington, or Denver, or Philadelphia, or at the late fall meeting at Readville, or anywhere but Columbus, Cincinnati or Memphis. Although my mare was entered in my name at those three places, yet she could start. They would take my entrance money and pay me any money she might win, yet I could not drive her. Yet I could drive her in the Transylvania at Lexington. Did you ever hear of such rot? But I guess the Grand Circuit stewards did this in order to uphold their representative in the judges' stand, who is presiding judge all along the line. So that, although I have been innocent of any breach of the rules, or of any fraud, and have tried to win every race I have started in, yet they treat me to such a dose. It looks like a mighty peculiar thing to me. They have no evidence of anything against me, because I was doing my best to win. In the Readville race, when they thought I wasn't trying, I drew blood out of the mare with the spur, and in the Providence race my wife won $95 on the race. So I would be a nice cur to even try to throw my wife down by pulling, especially when it was a $5000 stake and I hadn't a dollar bet on it. What would be my motive for not winning?

"When I was driving they would not let me off at the wire, and when they put some one else up they wouldn't let them off until Marie was up in front. So there is the secret of it all, but what is at the bottom of the action of the judges I can't tell. It seems pretty tough that there shall be such an imputation on a person's character when he has been trying to win every race and every heat.

"You know I had a big offer to 'do business' where I could get a lot of money, but I turned it down, as you know—for I wouldn't have pulled that mare or any other horse for all the money they could pile up in the center field. Yet I get that kind of a dose. After the stewards took that action, I became so disgusted with the whole affair that I made arrangements with Mr. Garland to give the mare up, and turned her over to his private secretary, whom he sent over from Los Angeles. I freed myself from the whole affair, and let them go on with her or do what they pleased. Of course at Columbus and Cincinnati she ought to have easy races, as there are only a few starters, and the only hard race I see for her is the Transylvania. In that there will be a big field, and if they can beat her away, and if she gets the same kind of starts that they gave us, she cannot win But if they protect her in the starts, she will win, for she can beat any horse, single handed, that is racing this year. She can trot a mile in 2:05; that is, she could when I turned her over, but if they work her too much between races or change her rigging in any way, I am afraid she wont be so good.

"Lots of drivers have laid up heats, and they have told me so, but the judges have not said a word or done a thing; yet I try every heat, and they stop me from driving and give another man $1300 for driving. Guess a fellow who tries to do right had better keep out of the sulky.

"My wife won a little money on the mare during her starts. She wanted to buy something to keep with the money, and bought a fine diamond horseshoe with Marie's name engraved on it."

Hambletonian Wilkes Goes to Hanford.

Jacob Brolliar, the well known Visalia horseman organized a company last week and purchased from Green Meadow Stock Farm of Santa Clara that splendid son of Geo Wilkes, the stallion Hambletonian Wilkes, sire of Murray M. 2:14, winner of this year's three year-old $6000 Breeders Futurity, and also sire of Phœbe Wilkes 2:08½, Phœbon W. 2:08¾, Robert I. 2:08¾, Rocker 2:11, Vic Schiller 2:11¼, Tommy Mac 2:11¼, Arlene Wilkes 2:11¾, Sunbeam 2:12½, New Era 2:13 and many other fast trotters and pacers. He is also sire of the dams of many fast ones, including Stella 2:09¼, Xava 2:10¼ and others. Hambletonian Wilkes was bred by L. E. Simmons of Lexington, Kentucky and was foaled in 1880. He is the only son of the mighty George Wilkes on this coast and is a strong, vigorous horse, a grand individual, with great bone and muscular development. During the years he has been in California he has not had the best of advantages in the stud, and in the Breeders Futurity for foals of 1901, but one bred to him was nominated. Yet that foal won the three trotting division of the stake this year and afterwards took a record of 2:14 and is classed as one of the great three-year-old trotters of 1904. Hambletonian Wilkes is out of a mare by American Star 37, a producing son of American Star 14. His second dam is Lady Lumps by Hambletonian 10, and his third dam by Abdallah Chief. He is a stout bred horse, and his get show race horse qualities as well as fine style, size and splendid trotting action. He will be bred to some of the best mares in Kings and Tulare county this year, and his presence in that section cannot but help improve the value of the standard bred stock owned there He will be kept at Hanford. The names of his new owners are B. S. Gurnee, James Watson, Dr. R. E. Dixon, Joseph Corey, James Bullock, Alex. Anderson, Lee Dollenmyer, Ed. Earlanger, Mr. Morris of Tulare, and J. Brolliar of Visalia.

Horse Breeding in France.

Mr. J. B. McLaughlin of Columbus, Ohio, an importer and authority on draft and coach horses writes as follows:

Horses are as much the product of the soil on which they are grown as they are of the sire and dam. The soil of the Percheron region is especially favorable for the production of good bone. The men engaged in the business in northern France are bred to the raising of horses as were their ancestors many generations before them. They are good feeders and good caretakers.

The breeding district of the Perche is a country of cultivation and not of pastures. The farms are small. Every farmer owns a couple of good mares which he works hard and feeds well, mating them with high-class stallions which are owned in the central part of the district. The colts are all sold at weaning time to the owners of the stallions and at six months old are taken out of the farming district, to the pastoral district, where they are kept until one and one-half years old, then are taken to a district farther north where they are put at moderate work and kept at work.

The working of the draft colts is instrumental in giving the Percheron breed its strength, activity and ability to move a heavy load at rapid gait. The Percheron district produces about five thousand colts per year, the coach district about fifteen thousand.

The first government inspection is at two and one-half years, the second at three and one-half. The government-approved horses are marked with a star, and those which are rejected are marked with an R.

I believe that gray is the best color for the Percheron, having many advantages, and especially in hot weather, over the black. I do not believe that the craze for black Percherons rests on a substantial basis of merit. The French coach breed was established over a hundred years ago by the use of thoroughbred stallions on native mares, but for many years no outside blood has been introduced, and the French coach horse is now a distinct breed. They are bred for vigor, high action, endurance and speed, and have defeated all other horses on sod tracks at long-distance races under the saddle, two to four miles.

BOSTON, March 27, 1889.

Dr. S. A. Tuttle.
Dear Sir:—In regard to your Elixir will say it is the best liniment in use and cannot say too much for its good merits, also the White Star and the Condition Powders. As I have used all, am speaking understandingly.
Dr. Tuttle has cured two horses of quittors for me and will say with surprising success. O. RAY, 98 Union St

Notes and News.

Millard Sanders has driven five trotters to records better than 2:10.

Tiverton 2:04½ will be wintered in New York by his old trainer, John Howell.

Country Jay 2:10¼ worked a mile in 2:06½ for Gus Macey at Lexington last week.

Sweet Marie's winnings this year amount to $23,325—enough to pay for her oats for several seasons.

Robert Smith's letter to a Denver friend, which appears on another page, is most interesting reading.

A handsome and stylish road mare, ball bearing buggy and a fine harness are offered for sale. See advertisement.

Jay McGregor 2:07¼, record made against time, is the fastest trotting stallion of the year. He is by Jay Hawker, dam by Robert McGregor.

Scott Hudson, the well known reinsman, will be in California in a few days and may conclude to spend a good portion of the winter in this State.

Bonnie Russell 2:10¼ should be a good horse in his class next year, and we look to see him get pretty well inside the 2:10 list early in the season.

McKinney 2:11¼ reached his new home at the Empire City Stock Farm on Saturday morning, October 22d in splendid health and condition.

Mr. William Garland, owner of Sweet Marie, denies the story that he was offered $30,000 for the great mare, but says he would refuse such an offer if it were made.

W. A. Clark's string of trotters and pacers, including the $10,000 two-year-old colt Bon Voyage 2:15 reached Los Angeles from the East this week in charge of Ted Hayes.

Lisonjero 2:08¼ by Dexter Prince has as great a burst of speed as any trotter out this year. He wears shoes that weigh less than three ounces each, and no boots but quarter boots.

One of the remarkable things about Sweet Marie is that when going at top speed she can catch in a few strides if she happens to break. There are few handier breakers than she.

Mr. John Payne, builder of the favorite long shaft sulky, is now the owner of the California pacing gelding Enoch 2:12¼ by Sidmoor, dam Belle (the dam of Gaff Topsail 2:16) by Alcona.

Charles Marvin thinks Expedition is the best son of Electioneer. He is out of Lady Russell, own sister to Maud S. 2.01¾. Expedition is the sire of Bon Voyage 2:15. the good two-year-old recently purchased by W. A. Clark, Jr. for $10,000

An advertiser who owns a well-bred standard and registered son of the great Sidney 2:19¾, and who has splendid pasturage for a half dozen head, desires to secure a few good mares, preferably of Wilkes blood, to mate with his horse. Read the advertisement in this issue.

Camilla 2:19¼ by Deputy defeated McKinley 2:06¼ in a match race at Holland, Mich., on October 16. The heats were half-mile and the best time was 1:05¼. Camilla has been a successful race mare this year, winning four firsts, three seconds and one fourth out of eight starts.

At the matinee of the Los Angeles Driving Club to be hold Thanksgiving Day, Sweet Marie 2:04¾ will be driven on tho track by her owner, Mr. William Garland. She will get an ovation and there will be thousands there to greet the greatest race trotter ever produced.

Dr. Cockrill of Bloomfield has sold to Mr. S. B. Wright of Santa Rosa the mare Nellie Fairmont, dam of the champion five-mile trottor Zambra and she is now running in a paddock at Santa Rosa with the famous mare Eveline (dam of Ole 2:11, Roblet 2:12, Maud Fowler 2:21¾ and Tietam 2:19) by Nutwood.

In *Sunset* magazine for November is a half-tone engraving under which is the following caption: "Lou Dillon 1:58½ finishing a practice heat." The engraving is from a photograph of a couple of pacers driven by Jim O'Kane and E. Stewart at a meeting of the Golden Gate Park Driving Association at Tanforan.

Kenney, the Bikeman, is not out of luck, but he is out of McMurray carts and bikes—only temporarily, however. He sold the last one last week, but on the 10th inst expects a carload of a dozen and a half of the models of 1905 to reach his place at 531 Valencia street. By the way, he has a demand for second-hand carts and sulkies that he cannot fill and wants to buy several. If you have a good one you don't want, let him know, and if you want a nice new one drop around to his place about the 10th of the month to get your pick of the consignment of new ones.

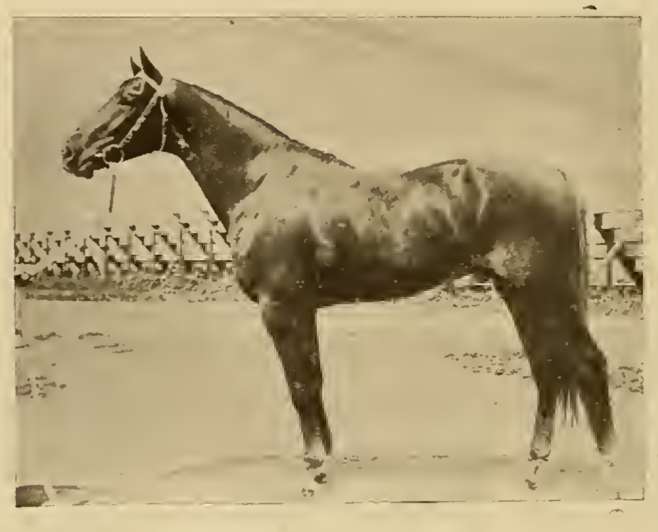
Sweet Marie 2:04¾ has been returned to Los Angeles after her unequalled campaign through the Grand Circuit. Her owner William Garland, will probably drive her an exhibition mile at the Thanksgiving matinee of the Los Angeles Driving Club. A great crowd will turn out to see the champion of all race mares

Pierpont Morgan 2:27½, by Idolita 2:09¼, is one of this season's good three-year-old trotters. He is not as fast as some, but no colt has furnished his owner more real pleasure. He has won four matinee races at Readville against aged horses, pulling an 85-pound wagon and his owner, George Leonard, who weighs close to 200 pounds.

Through an error one of the nominations to Breeders Futurity No. 5 was omitted from the long list printed in these columns last week. Mr. S. S. Stiles made two nominations in the stake and one of them was omitted. This was Belle Mac by Ensign Golddust. She was bred to the stallion Stickle, son of Silver Bow 2:16 and Grace, the great broodmare by Buccaneer.

It is rumored that Dr. J. C. McCoy of Kirkwood, Delware, will send his grand young stallion, Admiral Dewey 2:14¼, as a three-year-old, to California this winter to make a season during the early months in 1905. Admiral Dewey is by the great Bingen 2:06¼, out of Nancy Hanks 2:04. There is no doubt but he would be well patronized by the progressive breeders of this State.

Lyman Redmond, who dropped dead in the sulky at York, Pa., recently, was a brother in-law of William Bair, the driver of the ex-trotting queen Maud S. 2:08¾, and assisted in caring for her at Cleveland at the time of her record making performance when she trotted in 2:08¾. Mr. Redmond, it will be remembered, was one of those who insisted that the Maud S.'s sulky was fitted with either roller or ball bearings.



STILETTO 2:16 1-4 by STEINWAY

H. Rutherford, who campaigned a string of trotters belonging to Judge Brents of Walla Walla on the North Pacific circuit this year, will winter them in Los Angeles. Helen Norte 2:16½ by Del Norte is one of the handsomest and sweetest gaited trotting mares that has appeared on this coast for some time and looks like a sure 2:10 trotter. The get of Del Norte are all showing up well and he is one of the coming sires of the northwest.

Mr. James De La Montanya has reached home from his trip on the Grand Circuit and is accompanied by the well known trainer Jack Curry, driver of the famous pacer Prince Alert 1:59½. Mr. Curry piloted Mr. Montanya's good mare Tuna 2:08¼ in many of her races this year and drove her to her record which is the fastest heat by a four-year-old this season. Mr. Curry will remain in California all winter and may handle a few runners until the training season for trotters opens in earnest.

Frank E. Wright of Sacramento, who was an amateur driver a year ago, raced all through the Pacific Coast this year and showed himself to be one of the cleverest reinsmen on the circuit. His campaign was quite a profitable one as he started in twenty-eight races, and was never outside the money, and won two-thirds of them. Mr. Wright will send his good pacer Kelly Briggs 2:09¼ a mile against time at the next meeting of the Sacramento Driving Club. He should beat his record.

Raymond, the *Horse World* correspondent, says: "Mr. Smathers will quit the arena of matinee racing with the satisfaction of having won permanently for the New York Driving Club, the $5000 Memphis cup, something that will in some respects make up for the defeat he sustained a few weeks ago in the race for the Cleveland Challenge cup. It is no secret that Mr. Smathers believes he actually won that event also, and in that belief he is sustained by many who saw the race, including one of the most prominent amateur reinsmen of Buffalo. It is said that it was the outcome of the Cleveland race that caused Mr. Smathers to consign all his horses to the auction ring. His action in this respect is to be regretted, for he has done much to increase the interest in harness racing in a professional as well as in an amateur way."

Mr. Geo. Stickle, of Angels, has sent his horse Stickle by Silver Bow 2:16, dam Grace by Buccaneer, to Sutherland & Chadbourne at Pleasanton, who will work him for speed. Mr. Stickle also sent with him a five-year-old full brother to Daedalion 2:10 that is very promising. The get of Stickle are showing up well, and although not numerous as yet, make up in quality what they lack in quantity. One of them, a trotter owned by Vet Tryon of Sacramento, stepped a quarter in 31½ seconds over the Sacramento track a few days ago and is the sensational young horse of that section.

The usually correct *American Horse Breeder* says that Carr's Mambrino does not seem to be distinguished by a standard number." This is a mistake. The horse is registered as Mambrino and his number is 1789 He will be found recorded in Volume 4 of the American Trotting Register on page 132. The late Hon. Jesse D. Carr, who purchased and brought him to California always claimed that his dam was by Mambrino Chief, and it is so stated in Volume 8 of the Year Book, although Volume 4 of the Register gives his dam as "not traced." There is no doubt but the breeding as given in the Year Book is correct however.

The spirited picture of the California bred stallion Owyhee 2:11, which appears on our front page this week was sent up by Mr. John Robertson, proprietor of the Trugania Stud Farm, near Melbourne, Australia, who owns this fast son of Chas. Derby, and shows that the Australian photographers are experts in making instantaneous pictures of horses in motion. Owyhee's son Owyho, (one of the few of his get in the United States, as he was sold to Mr. Robertson the year following his racing career) took a race record of 2:09¼ pacing this year, and is looked upon as a coming 2:05 performer. The catalogue of the Trugania Stud Farm is one of the handsomest things that has come to this office in years.

That very handsome chestnut four year-old Stiletto by Steinway, out of the old Nutwood mare Nola, took a pacing record of 2:16¼ over East this year. Stiletto was sent to the Blue Ribbon sale last year, and had paced a half in 1:01¼ before he left Pleasanton. He was consigned by his owner and breeder, Mr. C. L. Griffith, and was purchased by the late Jas Golden for $2400. Stiletto did not do well last year, but is said to be a very fast horse this season and his record is no measure of his speed. Nola, his dam, is also the dam of the black pacer Sharkey which Dr. McConnell of this city uses as a roadster and which is not only one of the fastest, but at the same time one of the handsomest and most pleasant driving horses in San Francisco. Nola is also the dam of Kola 2:29½, trotter, and in fact all of her colts have shown great speed. The Nutwood mares are keeping in the lead as usual this year as the producers of standard trotters and pacers and there will be a big addition to their list in the Year Book of 1904. At the close of the season 131 daughters of Nutwood had produced standard speed and it will not be surprising if the list reaches 150 this year.

The former noted Grand Circuit trotting mare Phœbe Wilkes 2:08½, died of colic at East Lynne Farm, Flemington, N. J., October 10th. She had been bred and was in foal to Lynne Bel 2:10½. Phœbe Wilkes was owned by the estate of the late W. C. Harrington of Cohoes, N. Y., and in her day was one of the most famous trotters on the big tracks. Many yet remember her successful campaigns in the hands of the masterful Myron McHenry. She was foaled in 1885, and sired by Hambletonian Wilkes, son of George Wilkes 2:22, and was out of Dolly Smith (dam also of Phœbon W. 2:08¾ (p). Prince 2:12½, Russell H. 2:21¼ (p), Dolly Wilkes 2:24¼, Theme 2:28¼ and Topsy 2:29½, a total of seven performers.) Dolly Smith was by Mambrino Chief Jr., son of Mambrino Chief 11, and her dam was Maid by Surprise, son of Bonny Scotland. Phœbe Wilkes was bred by E. E. Beardsley, of Bronson, Mich., and took her record at Nashville, Tenn., October 20, 1894. She had produced several foals by Baron Wilkes 2:18, the oldest of which is three years, and one or more by Lynne Bel 2:10½.

Quite a bunch of young trotters and pacers are being worked over the pretty half-mile track at Mr. A. B. Spreckels' Aptos Ranch, nearly all by Dexter Prince, Cupid and Aptos Wilkes. Sandy Smith is holding the lines over them and has a number of good prospects. Among the trotters that are particularly noticeable is a chestnut three-year-old that is called Prince Henry. He is a regular show horse with a most beautiful coat that shines like burnished copper. He has a star, and two white stockings behind, and stands full sixteen hands. Prince Henry is by Dexter Prince, dam by Stamboul 2:07½ second dam Jenny the dam of Hulda 2:08½. Sandy has driven him an eighth in 17 seconds. Another good one is a three-year-old pacer, a bay gelding by Cupid 2:18, out of the dam of Dione 2:07¼. This is a very fast young horse with a nice smooth way of going that is not only very attractive, but looks like 2:10 in the near future. The crop of foals of 1904 at Aptos, while not numerous, is one of the best looking lot of weanlings ever seen on the farm.

News and Gossip of the Gallopers.

The opening of the usual long racing season in California is close at hand, and from those already on the ground it is gathered that the coming session will rather eclipse the meetings of the past in point of racing excellence—which is saying not a little. There will be in attendance nearly all the good stables that have made California famous as a winter racing Mecca in years agone, such as those of W. B. Jennings, R. A. Smith, Dr. H. E. Rowell, Garnett Ferguson, William Cahill, Louis Ezell, Charles Boots, Parker & Thwaite, Mike Daly, John F. Schorr, Barney Schreiber, M. D. Miller, W. P. Fine, Harry Stover, W. Donathan, R. Wilson, James Nealon, C. C. McCafferty, W. Fisher, D. S. Fountain, W. M. Murray, P. Sheridan, E. F. Smith, C. E. Henshall and others equally well known around San Francisco, while Los Angeles, with its undeniably grand climate and its auspicious opening of last season, will have a vastly increased influx of racers and racing men over its initial year. Among the owners who will send strings to the favored metropolis of the southland are Ed Corrigan, Pat Dunne, James Curl, Frank Reagan, Johnson & Dodson, W. Anderson, Joe Cooper, E. J. Baldwin, Gus Lanka, Joe Yeager, B. E. Durnell, James McLaughlin, John Bondy, John A. Cole, Charles Kerr and George Stroehel. The good riders will return, to say nothing of new stars in the racing firmament like W. Davis, Greenfield, W. Dugan, Cormack and Aubuchon.

Many improvements have been made at the tracks in this vicinity, while Los Angeles has a brand-new clubhouse, hundreds of new stables and a magnificent grassy infield—in marked contrast to the one of last spring. At this writing there are fully 700 horses quartered at the tracks of the New California Jockey Club, perhaps 500 at Ascot Park, with horses arriving from Worth, Kansas City and the far Eastern courses on every incoming train.

There will be but few changes in the list of officials at the California tracks. Col. W. R. Letcher will not be racing secretary for the New California Jockey Club during the coming session, his place as handicapper being taken by Horace H. Egbert, who will still act as clerk of the scales. Mr. E. is new in the position of handicapper for a big track (one of the most thankless places in the world). It is one of those positions where, if the work is not satisfactory, one will know it mighty soon, and if satisfactory he will get but slight praise. Ralph H. Tozer, through accepting the secretaryship of Union track, St. Louis, an independent course, forfeited his position of associate judge and clerk of the scales at Ascot, his place being taken by P. P. Pomeroy, a well-known and popular racing official and newspaper man of Chicago.

Horses raised or raced in California cut a considerable figure on tracks east and north of the Golden State in 1894. Tradition, by many considered the best two-year-old filly of the season, is a Rancho del Paso product by Goldfinch (son of the unbeaten Ormonde) out of the famous race mare Reclare. The Mist, by Magnet–Tenebrae, was a filly of stake caliber both in California and around Chicago, while Bearcatcher, which was brought to this part of the world as a yearling and developed here, won seven out of the eight races he started in at Chicago and Kansas City from July 1st to October 15th and was easily the champion three-year-old colt of the Middle West in 1904. In the Horse Show Handicap at Kansas City, mile and a sixteenth, the St. George colt took up 124 pounds and easily ran the distance in 1:45½. As 1:44¾ with 101 lbs. is the world's record, Bearcatcher can be accounted a world-beater. He also won the September stakes at Hawthorne, one mile, in 1:39, 107 lbs. up, "galloping;" dashed off six furlongs in 1:12 3-5 with 111 lbs. at Harlem and again in the same notch with 109 lbs. up, while with 104 lbs. he easily went that route in 1:12 2 5. Alma Dufour, a three-year-old filly by Artillery, bred in Sacramento county by E. Corrigan, has won fifteen races this season, and is still in winning form. Dainty, of the Jennings string, accounted one of the best mares in the far East, is by Golden Garter out of Rosebud by Tyrant.

As most of our breeders dispose of their yearlings at the East these days, there will be but few sales of youngsters in California this winter. The Burns & Waterhouse lot, bred near Hopland, is first on the list. The youngsters are by Altamax, Eddie Jones, Col. Wheeler, First Tenor, and others, and for the most part the dams were stake animals. The B & W. colors will be sadly missed, for this stable was raced at all times on the right lines and in the liberal spirit supposed to pervade California in her happiest days. Late in November or early in December, Charles Kerr, of Antrim Stock Farm, Bakersfield, Cal., will sell at auction either in San Francisco or Los Angeles twenty odd yearlings, the get of Imp. Kismet (son of Derby and St. Leger winner Melton), the good race horse Cromwell, Herald and other well known and favorably regarded race horses, and later dispose of several two, three and four-year-olds. Mr. Kerr will return to the turf this winter with a small but select string of gallopers after an absence of seven or eight years.

It is presumed that W. O'B. Macdonough, owner of Menlo Stock Farm, will have his usual annual sale in the Coast metropolis some time in December, at that time disposing of the yearling progeny of Orsini and St. Carlo and perhaps a few of the highly-thought-of Ossorys. Now that the famous unbeaten "horse of the century," Ormonde, is no more, Mr. Macdonough would probably be inclined to keep all of his progeny possible. I know that he thinks very highly of Ormonde's son, Ossory, and it will be this young horse that will probably take the premiership of the Menlo Stud. St. Carlo, however, has proven an almost phenomenal sire. This season his extra good performers are Elie and St. Denis. Rubicon, the grand Rayon d'Or horse, owned by Edward Lanigan, of this city, has greatly distinguished himself as a sire by begetting the clinking Czaraphine, one of the good two-year-old fillies of the East this season. Eddie Jones, the Morello horse that raced so successfully in the colors of Burns & Waterhouse, is making a good name at the stud, Hooligan winning some nice races in the Northwest in 1904, and the New Zealand bred Musket horse, Artillery, looms up as a sire of constant and consistent campaigners through the string of successes of Alma Dufour, Dragoon, Mabel Bates and Redan. It looks as if Santiago would make a good sire for "Lucky" Baldwin—not as good a one as the great Grinstead, yet a progenitor of speedy and courageous campaigners far above the average. Nonie, by Santiago, was perhaps the best performer that remained on the Coast last summer.

Ralph H. Tozer.

Hamburg

Sold at Auction Last Month for $70,000

Governor Sprague 2:20 1-2 as a Sire.

The great race which Sweet Marie and Tiverton fought out in the Transylvania cannot but call the attention of pedigree students that each of these great trotters carries a dash of the blood of Governor Sprague 2:20½. McKinney 2:11¼, the sire of Sweet Marie, was out of a daughter of Governor Sprague, while Tiverton's third dam was a daughter of that horse. For a horse not bred in what for years has been deemed the most fashionable lines, Governor Sprague was brilliantly successful in his short stud career. He took his record of 2:20½ in 1876, at which time he was the champion five-year-old trotter, the world's stallion record at that time being 2:15¼. He died in 1883 when only twelve years old, but in spite of his early death he established a family that is much larger than that left by many of the most prominent stallions contemporary with him. His standard list contains thirty-six trotters and two pacers. Seven of his produce took records of 2:20 or better at a time when 2:20 trotters were far less numerous than they now are. Twenty-four of his sons have sired standard speed, and his daughters have produced fifty-seven standard performers. It is really surprising to find what a large number of the descendants of Governor Sprague, the get of his sons and the produce of his daughters, have taken records of 2:20 or better when it is considered how short his career in the stud was. No less than sixty-one is the representation of his sons and daughters in the 2:20 list.

Governor Sprague was sired by Rhode Island 2:23½, a son of Whitehall, son of North American, and his dam was Belle Brandon, dam also of Amy 2:20¼, by Hambletonian 10, and it is without doubt his dam that is to be credited with the larger share of his greatness. The most of Governor Sprague's stud service was done in Wisconsin, although shortly before his death he was sent to Kentucky. What his showing would have been as a sire had he been sent to Kentucky or some other locality where his opportunities would have been good can only be conjectured. As it is, he occupies a place in breeding history that is far in advance of that occupied by many of the most meritorious sires of his time. Just at present when among his near descendants is numbered a sensational sire that has just been sold for $50,000—McKinney 2:11¼; the fastest trotting race mare of the year and probably the fastest racing mare ever seen—Sweet Marie 2:04¾; the champion trotting race gelding—Tiverton 2:04½, and one of the greatest three-year-old trotters ever seen—Alta Axworthy 2:10½—the real worth of Governor Sprague is likely to be better realized than it has been during the last few years.—*Horse World.*

The Horse's Interest

Calls for constant attention to do for it what it cannot do for itself. All horses that have ever used Craft's Distemper & Cough Cure know that they have been benefited in several respects. Where used as a tonic when the horse is well it has remained well. Where used after the germ diseases had made their attack, it has invariably repulsed the foe. Every horse knows he has a good breastworks of defense when his owner keeps a supply of Craft's Cure. Every horse owner should note the above suggestion and lay in a supply through a druggist; or, if necessary, the makers will send it prepaid on receipt of price by the Wells Medicine Co., 13 Third St., Lafayette, Ind.

On Wednesday, Oct. 12, in the Live Stock Forum at the World's Fair, St. Louis, in conjunction with the sheep shearing contest under the auspices of the International Sheep Shearing Festival Association, the world's record for fast horse clipping was broken by John Yeager, St. Louis. He clipped the pacer Keno in 13¾ minutes.

Finds It All Right.

Delphi, Ind., Feb. 18, 1902.

W. F. Young, Springfield, Mass.

Dear Sir:—I procured your remedy, "Absorbine," from my local dealer and found it all right. Yours truly,

I. Orahood.

Absorbine, $2 per bottle, express prepaid.
Address W. F. YOUNG, P. D. F., Springfield, Mass.

The racing men ought to try the Hart Apartments this winter; 3 and 4 rooms, private baths, telephone, steam heat, first class. 750 Ellis street. *tf

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Pacific Northwest Trials.

The fifth annual field trials of the Pacific Northwest Field Trial Club at La Conner, Wash., is claimed to have been the most successful meeting the club has yet held. The class and quality of the dogs, in the running of both stakes, were never better. When it is considered that Northero sportsmeo have sent their hitches East to be served by the best dogs to be found, for several years past, it is easily uoderstood that some good ones must have been bred in Washington. The trial grounds were ideal in all respects, save one—and that was a lack of birds to work on.

Deacon, the Derby winner, again proved his mettle over a new field, repeating his B. C. Derby win in a stylish manner. He is a classy, all rouod, good looking dog and is owned by Mr. Cook Inmao of Renton, Washington.

John Schumacher's bitch Catharine M. had a shade the best of it over Mt. View Kennels' Pointer Fandango for eecond. The latter is credited with being a good goer and ehould prove a winner io future triale. Of the eleven Derby eotries there were five starters.

In the All-Age the winoer was Count Whiteetone'e Chief, who readily fulfilled the prophecy made wheo he won the British Columbia All-Age. Chief was apparently in a class by himself. He was first cast off with his litter brother, Uncle Jim; in the second series he met Policy Girl. He is rather a large sized dog, fast and full of class and style, etaunch to a degree and a worthy son of his renowned eire whom he resembles much in appearance and work. There is a possibility of his being seeo in competition with some of the Eastern cracke, if his recent performances bear the fruit of much promise he will be in the money. Souse, winner of secood, did oot come up to his past showing. Policy Girl, wiooer of third io the All-Age, was quite a favorite among the epectators. She is nhout thirty pounds io weight and is a merry goer with lots of bird seose and good nose. She recently whelped a litter to Dan Thiers. J. W. Considine of Seattle, her owoer, end an active field trial eothusiast made the trip from the East to be present at the trials. John E. Lucas, owner of Mt. View Kennels at San Clemente, handled two winners in the Derby and two in the All-Age. S. Hanseo handled Deacon aod Count Whitestone's Chief. Dr. J. M. Meyer, of Tacoma, judged both stakee.

At the anoual meetiog of the club the following officers were elected: John Riplinger of Seattle, President; Julius Redelsheimer of Seattle, and L. B. Youngs and E. B. Roy, Vice-Presideots; Chas. L. Lundy, Secretary and Treasurer; N. A. Wedeen, Oscar Jones, J. W. Considine and Cook Inman, all of Seattle, Board of Governors.

DERBY.

LA CONNER, WASH., October 11, 1904—Pacific Northwest Field Triale Club'e fifth annual Derby. For Pointers and Settere whelped on or after January 1, 1903 Five dollars to nominete, $10 to start. Purse 50, 30 and 20 per cent. Eleven entries, 5 etartere.

I

Chiquita, liver and white Pointer bitch (Dr. Daniels-Fan Go). Mt. View Kennels, owner; J E. Lucas, handler.

With

Fandango, liver and white Pointor bitch (Dr. Daniels-Fan Go). Mt. View Kennels, owner; J. E. Lucas, handler.

Catharine M., black, white and tan English Setter bitch (Detroit Joe-Dolores) J. H Schumacher, Los Angeles, owner; J. E. Lucas, handler.

With

The Deacon, black, white and tan ticked English Setter dog (Sousa-Policy Girl) Cook Inman, Seattle, owner; S. Hansen, handler.

Ramona black, white and tan English Setter bitch (Lady's Count Gladstone-Sport's Destiny). A. H. Nelson, Tacoma, owner; J E. Lucas, handler.

II

Chiquita with Catharine M. Fandango with The Deacon. Ramona with Catharine M.

RESULT.

First, The Deacon Second, Catharine M. Third, Fandango.

ALL AGE.

LA CONNER, WASH., October 12, 1904.—Pacific Northwest Field Trial Club'e fifth annual All-Age. For Pointers and Setters which had not won a first in any open stake Five dollare to nominate, $10 to start. Purse, 50, 30 and 20 per cent. Seven entriee, 6 starters

Sousa, black, white and tan ticked English Sotter dog (Tony Boy-Sport's Destiny) A. H. Nelson, Tacoma, owner; J. E. Lucas, handler

With

Policy Girl, black, white and tan English Setter bitch (Dave Earl-Topsy Queen). J W. Considine, Seattle, owner; J. E. Lucas, handler.

Star's Rod, lemon and white ticked English Setter dog (Starlight W-Rod's Sylvia). T. J Watson, San Francisco, owner; J E. Lucas, handler.

With

Vallta, black, white and tan English Setter bitch (California Boll B y-Rod's Lark). J. H. Schumacher, Los Angeles, owner; J. E. Lucas, handler

Count Whitestone's Chief, almost white (with orange ticks) English Setter dog (Count Whitestone-Sport's May Bello). N. A. Wedeen, Seattle, owner; S. Hansen, handler.

With

Uncle Jim, litter brother to Chief. J. A. Peebles, Seattle, owner; J E. Lucas, handler.

II

Count Whitestone's Chief with Policy Girl. Sousa with Uncle Jim. Star's Rod with Vallta

RESULT.

[illegible] at Whitestone's Chief. Second, Sousa. Third, Policy

Duck Hunting, Past and Present.

"Curious how men hunt ducks nowadays—upholstered hlinds, clubhouses like hotele, and Jap or Chinese cooks, with a lot of keepers to pick up the birds, set out decoys and such, ain't it?"

He was old, grizzled, grey, this speaker. Seventy he would never see again, but his frame was erect, and in his eye still fleshed the fire of youth—a fire thet yeers of outdoor life aod the keen excitements of man's oldest eport had preserved undimmed beyond its time.

He had laio prone io the sunken battery on Chesapeake Bay in ante-bellum days surrounded by his hundreds of decoys and with a heavy muzzle-loading double eight bore within reach of either hand; between his legs a loeding pao with his powder, shot aod wads compartmeot; he had killed his two hundred ceovasbacks in a revolution of the tide.

Then in later yeers, his favorite fowling piece had been one of the first to fire over the virgin prairies and sloughs of the North and West. In the early seventies he had taken his place on the Bois de Sioux and the Lac Qui Parle in western Minnesota: killed his seventy-odd mallards in that one headlong rush that used to merk the "evening flight;" all the sportsman's experiences in early days on the Wapsipincon and Cedar rivers in Iowa had been his: to the old gun had fallen bags of redheads es great as any. In the epring—it had been held no sin then—that same old piece loaded full heavy with the black powder that a later day sportsman spurns—had scored its hundred and fifty bluebills in oneday's flight on the Mississippi. The goose clouds of the San Joaquin Valley had floeted before his expectant eyes until goose killing became monotonous; the sprigs and widgeon of the Suisun were his old friends. So the old fellow had full right to move for reconsideration of the game question; he had voted with the affirmative.

"No such luxury as today'e in mine. When I shot ducks I rose before daylight, built me my blind in such places as the evening flight had suggested, and at first epurned decoys as a needless nuisance. But that was in the days when the incoming fowl beclouded the setting sun, when ao ioexhaustible stream of whizziog, squawking ducks eped past the gun, aod a miss wae of no coneequence.

"True, several of us, kindred spirits, had a clubhouse several years on the Lec Qui Parle. It had hardwood floors, too, and hardwood sides. But they were planed with an ax. Rabbit Bill—a rabbit always looked better to him than a duck—Bill was our Jap cook. And on occasion he could pull a pretty clever trigger, too. I've stood beside him and seen him drop his three dead ducks in five shots, hour after hour, in one of those Minnesota passes, aod that's not shooting ducks over decoys, either—but here, I'm getting away from the subject. Somehow I cao't forget those old days, though I'm pretty old myself oow.

"No, we had oo keeper then. We kept the birds moving pretty lively and that was 'keeping' eoough for us. There wasn't any closed ground; most of it wasn't fenced. The best shot didn't always get the bage, either; the good duck huoter had a chance to profit by his experience. It wasn't a game a novice learned in a yeer; one had to serve long apprenticeship at it, though there seemed no end to the supply of birds. It's different again, now. I've been over that same country since—changed and civilized, of course—and the ducke are done, I don't know where. I guess I accouoted for some of them in my time, especially that epring shooting. But I quit that a long time ago. It isn't really fair to the ducks, catching 'em coming and going that way. It seems funny to me to hear 'em telling ahout fifty ducks a day holng too many for one man to kill. I've killed 250 in a day helore now, and right on those Minnesota passes. But I guess fifty is more than I'd care to kill today. I used to pick one kind of ducks and get more thao that in an evening'e shooting."

"Don't you think duck ehooting is easier than it used to be?" the old fellow was asked. He was tiring out, but the eportsman'e instinct rallied with a rush.

"Never a bit. Duck shooting is always hard, and it'e harder now than it used to be because the birds know more about a gun. It's the hunting that has been made ensier by preserved ponds and modern conveniences. No, I think the shooting is, if anything, harder; that is, always giving a fellow credit for being a sportsmao. Birds always have lit on the water and alwaye will so long ae there aro hirds, and a man can ehoot them that way if he is built on that plan, but eomo way I wasn't, and I did a turn or two for the market in my time, too, though I supposo I ought to bo ashamed of it. Still it was looked at differently in those days.

"I remember when big hotels like the Palmer House in Chicago eaeh had their man huntiog for them and shipping back game by ice pack, nften hundreds at a time. But we were comparing the hardness of the shnotiny then and now. There wns another thing. You hear some old fellows tell that the old guns were the best, but don't you over believe it. I've eeen some shots made on eluh marshes that couldn't have been done with the guns I used to shoot, and they were enunted good of their kind, too. No, guns are better and ammunition is better; that tends to equalize the odds between the hunter and the hunted now ae enmpared with then.

"But it's the luxury of present-day duck shooting that makes a hit with me. I can't get used to it. In daye past, wealthy Chicago sportsmen came out into the chicken country in the early fall in private cars luxuriously fitted up, and we used to laugh at them; they had good dogs and fine guns, but we got the birds—probahly because we knew how to hunt them and could shoot."

"Some people are sore at the duck clubs—foolishly, don't you think?" the veterao was asked.

"I don't believe many responsible people hold it agaiost a party of men that they like sport and are willing to pay their money for it. They aren't depriving anybody of ducks, for most of them, I understand, make their shooting by developing water and building ponds. That brings more ducks into the country aod gives even the poorer fellows a chance to get a brece occasiooally. Conditions are different now from io my time; civilization and shooting travel in an inverse ratio, and the gunning must be preserved if there is to be any. I think drained swamps have as much to do with the duck scarcity East as anything else. The only thing I have against the clnb propositioo is that it has a tendency to place the good duck hunter on a par with the good duck shot instead of making excellence in both hraochee necessary to success.

"Some men, they say, ceonot tell a sprig from a widgeon, or a spoonbill from a mallerd. yet they kill ducks. I used to pick them out half a mile away by their gait in the air; all those things are part of duck hunting as I leeroed it. But I guess I was a crank on the subject."

"Do you heloog to any club?" the old man was asked.

"Not yet. I've only heen here this time a little over a week."

When a man once gets that fever in his veins it never goes out even after he has lost power to see.

GOSSIP FOR SPORTSMEN.

A WORD TO ANGLERS.

On and after the 1st iost. the open seeson for the taking of trout is closed until April 1st prox. Steelhead, however, may he teken io tide water only uotil February 1st. The season on salmon is still open.

The first winter's run of steelhead in Russiao river made their appeerance last week. This agreeable news prompted a number of local anglers to visit the favorite resort last Saturday and Sunday.

This run is rather early, for statistics of pest seasons show that the fish hardly ever rua up Russian river until December.

The bar at the river's mouth has been open for some time and the early rains which raised the river five or six feet is possibly the reason for the early appearaoce of the gamey steelheads this fall. The sport will be on uotil the next heavy rainstorm. For the present, fresh salmon roe will be the favorite lure. Later ehrimp will be in vogue or a spooo trolled through the deep pools.

WATCH THE GAME LAW AMENDMENTS.

The California Fish and Geme Protective Association which will hold its annual meeting at Visalia next month and it behooves sportsmen to see that there is a proper representation in attendance, for it has been announced that all sportsmen will be welcomed.

The game law as it now staods, particularly the "bag limit" and "no sale" clauses will be attacked in the next Legislature as never before end nothing but eternal vigilance and a lively tussle will save the measure es it now is, notwithstanding the apparent good it has worked.

Should the sportsmeo fiod themselves strong enough to not only retain the existing measure, but also to improve upon it, certainly some attentioo should he paid to snipe and other larger waders—shore birds as they are usually called. These have been left out of the reckooing altogether too long.

Jack, or English snipe, should have a season put upon them and one that will give shooters an opportunity to get a few at times when they are in their district—barring the period when the hirds are mating and ready for nesting.

Whilst curlew, ihis and plover are under the duck law nothing is said about marlins, willets and other large waders which afford good summer sport aod a toothsome dish. These hirde are with us when few others are, and there seems to be no reason why the local gunner should not be permitted by law the same opportunity for late summer hay shore snipe shooting that is enjoyed by his brother on the Atlantic Coast.

By all means there should be some adjustment of the hay snipe muddle. It is now in such a state that the average gunner does not dare to shoot at a marlin in summer for fear of killing a curlew and breaking the law. All the shore birds are common from August 1st, in some districts earlier, until the opening of the duck season, when they begin to disappear gradually aod in a couple of weeks but few are left.

WILD FOWL CONTRACT CATTLE SCOURGE.

A new source of danger from anthrax has beeo discovered. It is claimed that ducke and geese feed on the hodles of animals which have died of the disease, and in that way contract it.

As both theso fowls are of a carnivorous nature it ie highly probable that they will make a feast oo a carcass wherever found, and transmit the virus to human beings wheo partaken of by them. The following commuoication to the *Colusa Herald* from a gentleman who is well qunlified to give expressioo to his views will at least be rend with interest:

"Ducke and geese die from eating the cnrcasses of cattle which have died from anthrax. The geese are coming in on the lowlands, where the cattle have died of this dread disease, aod it would be as much as a man's life is worth to eat geese and ducks killed anywhere at this season of the year and under the prevalling cond'tions. Birds and poultry die from eating bits of anthrax victims; the head, breast and comb

swell. Dogs, cats and other small animals also die from eating anthrax carcasses. When a person contracts this disease small, red, itching spots begin to appear in about twelve hours and often prove fatal."

PIGEON SHOOTING LAW TESTED.

The Riverton Gun Club has taken steps to test the New Jersey anti-pigeon shooting law. This is a matter of particular interest to trap shooters all over the country. If the New Jersey phohibitive law is declared to be invalid it will probably lead to similar proceedings in every other state where the legislative ban against live bird shooting prevails. The initial measures were taken at Mount Holly, N. J., October 25th. An excerpt from a press report gives the following account:

"The first step toward testing the legality of the anti-pigeon laws, enacted by the last Legislature, were taken today before Judge Gaskill. Samuel Atkinson, prosecutor, had no difficulty in convincing a jury that the law had been violated, and the result was a verdict of guilty, with a fine of $85.

"A bird was killed from a trap in violation of the law on the grounds of the Riverton Gun Club on September 30, in the presence of two witnesses, who represented the prosecutor. P. F. Barned, of Merchantville, and Charles W. Davis, of Philadelphia, acted on behalf of the Riverton Gun Club, Mr. Davis doing the shooting. The grand jury found indictments against them, and it was on these hills the defendants were tried and convicted today.

"The case will be carried to the Supreme Court, Samuel Kalisch, of Newark, representing the defendants, said that the object was to get a true interpretation of the law as to whether his clients, as owners of the pigeon, had a right to kill it.

"The membership of the Riverton Gun Club includes some of the most prominent men in New York, Philadelphia and all parts of New Jersey. The effort they are making to test the law is arousing great interest among sportsmen throughout the country, all of whom declare that the laws passed in some few states against pigeon shooting have been based upon an entirely mistaken view of the sport."

Taking into consideration past decisions on the questions and which same have been given at length in the columns of the BREEDER AND SPORTSMAN, we would not be surprised at a verdict in favor of the sportsmen.

QUAIL NOTES.

There has been considerable talk among the ultra-protective faction of sportsmen in some districts relative to the advisability of curtailing quail shooting this fall and winter because the birds bred but sparingly during the summer.

The habits of California's characteristic game bird are frequently inexplicable, and by the same token no one should express surprise at the knowledge, be it instinct or sagacity, that prompts quail, with wise foresight at least, to suspend nidification during the summers that follow dry winters. At such times the supply of natural feed is of course low, and a number of the small springs that maintain the birds in many localities cease flowing.

Last winter there were practically no rains worthy of mention until after the passing of the duck and quail season, particularly so in Southern California. It was generally thought that several lively downpours which then occurred would do much to make the birds breed, but it appears that the quail were not generally fooled by the March showers.

In some favored sections where artificial water and irrigation assure the quail plenty of food and water they seem to have carried on the all-important process of reproduction with quite their old time vigor and in several instances two broods have been raised, but the practice was nowhere general, as evidenced by the presence of flocks of old birds all through the summer.

No attempt to curtail the fall sport is likely to meet with much favor at the present time, however. With ranchmen and vineyardists prating about the damage the quail are doing in some sections it would be hard to convince the average gunner that the supply is not up to standard

Relative to the damage that quail do, or do not do, a rather interesting report has been sent out by the Fresno Raisin Growers' Association. The contents of this report will indeed be surprising to those who have always figured the quail among a vineyard's chiefest depredators. According to the Fresno producers, they are invaluable to success in grape culture.

In brief the report advises vineyardists to do all in their power to encourage the quail and to post their places with "no shooting" signs. It is claimed that careful investigation proves that such grapes as quail destroy in that section are simply incidental to their pecking at the bugs and other insects that manage to keep the grape culturists on the anxious bench so much of the time.

The alleged damage quail do has been made a cloak to cover the illegal killing of them about long enough and expert testimony on the subject as regards Fresno is received with interest. Other vineyardists declare, however, that conditions in various districts must be different, we doubt it however.

Talks to Dog Owners.

The ills that dogs are heir to are unfortunately for themselves and their owners very many, but there is comfort in the reflection that a great number of them are not necessary evils, but rather the result of improper feeding and over-coddling. It would be obviously impossible to attempt upon issuing a series of instructions regarding the treatment of all canine diseases within the scope of this series of talks; but remembering the old adage that prevention is always better than cure, and being profoundly impressed by the truth of the saying, we are tempted to offer a few general hints upon the prevention of disease.

Commencing with the commonest and one of the most dreaded of all canine maladies, the opinion may be most confidently expressed that dogs suffer more severely from it than they need, simply because their constitutions have been undermined by injudicious treatment. In the old days, distemper was not the scourge it has become, and yet the leading breeders did not bestow the absurd attentions on their animals which has become the fashion. Such absurdities as stoves in kennels were unheard of luxuries, but the dogs were well bedded, wholesomely fed, and usually given a fair amount of healthy exercise. Fresh air never killed anything but the most delicate or unhealthy animal, on the contrary, it is directly conducive to robustness of health, and the hardier a dog is bred, the less likely he is to suffer severely from distemper. On the other hand, a dog that has been reared in a stuffy kennel is far more liable to contract the disease, especially if any of his companions are sickening for it, as distemper, malgre the opinions of some professional men, is both infectious and contagious.

In treating a dog for distemper, no matter what remedies are used, it is most desirable that fresh air should reach the patient, and what a trial this must be to an animal that has been brought up like a hothouse plant, and has been accustomed to a stove in his kennel. The admission of fresh air, however, does not necessitate a draught, which is always a bad thing even for the healthiest man or beast, and an even temperature of about 60 degrees should be maintained if possible by night and day. Clothing may be worn of course, and the dog should be comfortably bedded; in fact everything that is possible should be done to ensure his comfort, for distemper is especially a disease that is amenable to nursing. A most important thing, too, is to spare no effort to keep up the strength of the patient, for if the dog with a severe attack of distemper on him once begins to lose ground, it will be a very difficult matter to get him on his legs again, and recovery is doubly slow. Solid foods should be avoided, but the stronger the slops are the better, and for the purpose there is nothing to equal good beef tea, with which he should be drenched if his appetite fails him, or he becomes too weak to partake of it in the ordinary manner. In bad cases an egg beaten up in port wine or a little brandy may be administered with beneficial results at intervals, but no matter how desperate the case may appear to be, hope should never be abandoned, as the most marvellous recoveries have been known. When convalescent some fresh haddocks' heads, or other fresh fish, may be simmered down gently over a fire until all the bones have become absorbed and soft, and the jelly which forms when the mass can be given the patient with most satisfactory results.

The strictest attention, moreover, should be paid to cleanliness, and all the soiled bedding and sawdust on the floor should be removed and a fresh supply substituted as soon as possible, whilst the shed or room in which the dog is kept should be frequently disinfected. In selecting a disinfectant every precaution should be taken to ensure a reliable and effective one being selected; and it must be remembered that to be effective a disinfectant need not necessarily emit the abominable odor which some absolutely worthless compounds possess. It is desirable, too, that the invalid's bed should be made up on the floor, on boards for choice, with a liberal supply of straw over them, as if great weakness supervenes he will not be able to get upon his bench, and perhaps may have to lie upon the cold floor all night, with probably fatal results.

It may be repeated that an even temperature of about 60 deg. should be maintained in the distemper hospital, and to ensure this of a night, or in cold weather, it may be necessary to have a fire, or a gas or oil stove in the apartment. In such cases every precaution against fire should be taken, the fireplace or stove being securely wired off, and the bed removed from it as far as possible, so long as the dog is not compelled to lie in a draught, which would probably kill him.

Certain common superstitions prevail on the subject of distemper amongst those uninitiated in the mysteries of doggy lore. One of these is that every dog must have distemper; a second is that a dog cannot have it twice in his life; a third being that any young animals are liable to it, and that, therefore, an adult is certain to escape the disease. All these are fallacies pure and simple, though there are reasonable grounds for an owner hoping that his dog will not suffer from a second attack after having had one, just as in the case of the human race when a child has had scarlet fever. Moreover, an old dog is not so likely to contract the disease as a puppy is, but experience has proved that in both instances it is possible that they may.

One further general refererence to distemper may be made, and that deals with the question of preventative measures, which takes the form of inoculation performed upon puppies in order to secure them immunity from the disease, or a mitigation of an attack in the hereafter. Masters of Foxhounds have been particularly assiduous in their efforts to ensure satisfactory results from the experiments that have been made, but, it is to be feared, without much success. It is not an uncommon proceeding, however, on the part of some owners of large kennels, to place all their young dogs, when they reach a certain age, in the infected kennel, so that they may all contract distemper, and thereby reduce the chances of their giving trouble in the hereafter, after they have been reared to maturity. This need not be regarded as proving the allegiance of the owners in question to the theory that all dogs must suffer from the disease once and once only, but rather shows, as there are not many dogs which have distemper twice, that the owners desire to be over the suspense as soon as possible.—*The English Stock-Keeper.*

DOINGS IN DOGDOM.

IRISH SETTER NOTES.

Often is the question asked, "Why is not the Irish Setter a more popular gun dog in America?" and there can be little doubt it is the old, old story about giving a dog a bad name, and hanging him into the bargain, writes F. Freeman Lloyd. For, rightly or wrongly, it is averred that the Irish Setter is a headstrong creature and no good for the work of the ordinary shooting man. That such an assertion is broadly a false one every Irish Red Setter man will immediately state; he might, too, with pride point to the good looks and works of many a past dog and bitch of the chestnut color. For instance, there was Coleraine Diamond that won at field trials on this continent and in Europe, and bred by the late Rev. Robt. O'Callaghan ("a son of the last Irish gentleman to fight a duel on Irish soil"), that bitch was as Irish as the "auld sod" itself. And if we look back into the pedigree of the Duke of Gloucester we will find some of the old stock that was sent to this country by the deceased military chaplain who was known as "The Red Setter Parson." No one can discuss Irish Setters for long without bringing up the name of the aforesaid Mr. O'Callaghan, as keen a sportsman as ever the cloth produced, and one, too, whose name has been handed down to posterity as an Irish enthusiast fond of the gun dog of his country. And what a treat it was to sit over the fire at night while the blue smoke rose upward and the steam soared from the big-bottomed tumblers of punch, while there came Irish Setter lore by the yard from a man whose heart and soul was in the variety.

How very proud he was, that he was sending his blood and breed to America and with what concern he followed their performances in the field and on the bench in this country was patent to all who cared to listen! That he was a stickler for color and domed skulls everybody knew. "Like a chestnut fresh from the burr-r, fresh from the burr r" the preacher would cry, driving home with simile and example the dark rich chestnut that an Irish Setter should be, and what is more he should be the same color all over—not light in shade here, and washed out there. One day when Mr. O'Callaghan was asked how that color was to be retained or kept up, he gave a sort of sly look, and it might have been a little white fib that covered the advice to "breed in." For it is pretty well known that often Gordon Setter blood is used to get the desired dark shade, and the writer has known—as doubtlessly every other Setter admirer has known—a good Irish Setter and a good Gordon Setter in the same litter. In one instance in New South Wales Mr. Fred Gannon of Sydney, one of the most prominent of all Australian sportsmen, used to exhibit every now and then a Red Setter that used to win and a like successful Gordon that was of the same family. There is, however, a decided type about the head of an Irish Setter that should always be given that consideration commensurate with the old saying that the index of what is the breed of a dog is to be found in his head; the Irish Setter skull is inclined to roundness and is not flat like that of the English. Why two dogs used for exactly similar work should have different shaped heads we will leave for other and wiser people to explain, but the fact remains that the Red Irish Setter is more admired with a domed skull than a flat one. Duke of Gloucester, owned by Mr. T. M. Shafts, Gloucester, N. J., is a big winner, and in the charge of Mr. T. P. Mealey, he is always as fit as hands can make him, furthermore the dog is also said to be a very good one in the field.

THE GAY AND GALLANT SNIP.

Some kind friend has served us a good turn by mailing us a marked copy of the English *Illustrated Kennel News*. Therein we found a par encircled with the blue monitorial symbol used by irate scribes when a rap over the knuckles is in order. Mia culpa only by appropriation, not by intention. The Bulldog story by Mr. Fred Farman we discovered in one of our daily exchanges—the story had the ring of merit, we were certain it was a cutting and did the proper thing, under the circumstances, gave credit to the writer.

A word here in regard to the ancient and commendable custom of clipping. Across the water, the fancy and its affairs, lead the world, by reason of years of devotion to the sport, experience in breeding and developing, and preponderance of numbers in the rank and file of dogdom

The banners of the Eastern devotees of the doggy cult are in the van of Coast dogdom—which, by the way, is slowly recovering from its latest attack of rabies, what will come next Providence only knows.

Many of our Coast fanciers are eager for good things pertaining to the fancy in general or their particular breed. A majority of the kennel publications are unknown to them save when mentioned in the columns of the BREEDER AND SPORTSMAN. When we come across an article of merit or general interest from the pen of an expert prompted by the observance and experience of possibly a quarter of a century's devotion to the game, we propose to do what we can in giving further deserved publicity to a "good thing," crediting of course its original source. We have not the honor of noting in our exchange list the English *Illustrated Kennel News*, hence the unintentional faux pas. In this matter we believe our English contemporary has been imposed upon; to pull a chestnut out of the coals, in the interest of petty local spite.

The name, as announced last week, of the recently organized Collie specialty club should have been Golden State Collie Club instead of Golden West Collie Club as given to us inadvertently by the secretary.

The recent demise of Mr. Jonas Foster is noted in an exchange. Mr. Foster was a noted Yorkshire Terrier fancier, his kennel having a credit of over 10,000 wins on the right side of the ledger.

ENTRIES FOR THE KENNEL CLUB SHOW, 1904.

We append below the entries for the above show at the Crystal Palace and Mr. E. W. Jaquet, the esteemed secretary of the Kennel Club, is to be congratulated on the results of his hard labors, as the splendid total of 3240 is a number of which he may justly feel proud, for an increase of 348 at a time when shows have been so much under a cloud makes the results attained all the better, says *The English Stock Keeper*. Of the ups and downs in the figures St. Bernards are on the up-grade, and of Chows the same may be said; twenty-one increase in Pointers we are sure will be glad news to many, whilst sixty-three more Retrievers is a compliment to that old fancier, Mr. J. H. Salter. Spaniels also are good, but Collies have fallen down two short of fifty. Bobs are capital, whilst Bull Terriers look like taking a new lease, thirty-six more this year being certainly most satisfactory. Whippets also have nearly doubled themselves, but Dachshunds drop a score. The greatest jump forward is by the game little Scottie, with the grand increase of 128. Dandies are disappointing. Poms are 193 against 120 in 1903, whilst Dr. Tulk must feel proud at the way in which the Pug fancy has supported him, there being fifty-seven more than on the previous occasion. Mr. Graves also has a fine entry in Toy Spaniels, sixty-three in excess of the last venture. Japs and Pekinese are on the forward move, yet it is regretful to notice that but a solitary specimen of an Italian Greyhound will be benched. These are the salient features of the list, and in conclusion we must congratulate the Kennel Club on what bids fair to be the best exhibition yet held under their regime:

	1904.	1903.	1902.
Bloodhounds	37	67	17
Otterhounds	9	9	1
Foxhounds and Harriers	28	22	14
Beagles	35	63	31
Mastiffs	18	25	17
St. Bernards	61	37	96
Newfoundlands	38	37	37
Great Danes	102	110	68
Irish Wolfhounds	47	52	66
Deerhounds	56	53	49
Borzois	56	72	57
Chow Chows	96	60	67
Foreign dogs	21	19	11
Greyhounds	29	28	30
Pointers	56	35	42
Setters	78	73	102
Retrievers (Flat-coated)	80		
Retrievers (Curly-coated)	23	179	106
Labradors	13		
Spaniels	141		
English Springers	13	207	216
Welsh Springers	14		
Cocker Spaniels	109		
Collies	97	145	115
Old English Sheep Dogs	51	27	31
Basset Hounds	25	39	57
Dalmatians	35	17	27
Poodles	38	51	44
Bulldogs	132	107	73
Bulldogs (Toy)	30	31	24
Bull Terriers	68	32	38
Whippets	68	39	49
Airedale Terriers	61	51	36
Fox Terriers (Smooth)	187	277	250
Fox Terriers (Wire)	104		
Welsh Terriers	63	49	47
Dachshunds	120	146	137
Bedlington Terriers	11	7	15
Irish Terriers	73	67	70
Black and Tan Terriers	12	15	27
Skye Terriers	42	73	49
Clydesdale Terriers	3	4	12
Scottish Terriers	183	55	69
Dandie Dinmont Terriers	58	92	89
Schipperkes	45	53	38
Pomeranians	193	120	111

Toy Spaniels	110	47	76
Japanese	76	47	64
Pekinese	75	41	89
Italian Greyhounds	1	20	14
Black and Tan Terriers (Min.)	13	14	20
Yorkshire Terriers	10	8	20
Maltese	5	..	..
Griffon Bruxellois	23	12	16
Totals	3240	2892	2837

A COLORADO KENNEL.

Belfast Kennels, formerly Blackthorn Kennels, have been removed from Empire, Col., to Central City, Col. Mr. Ballantyne has registered the first mentioned kennel name with the A. K. C.—the kennel title, Blackthorn, had been already registered hence the change in the name of the Colorado Irish Terrier kennel.

WINTER BENCH SHOW.

Rumor has it that there will be the usual bench show held in coojunction with the poultry show this winter. The show will take place in Alameda, however. The report comes from, we believe, a reliable source, but was received too late for verification. If such is the case, and the proposed show to be held in this city will not come off, it is a mattor of congratulation all round.

IT IS A SAFE BET.

So "Stet" writes in *Field and Fancy*:

That when Eastern shows hold their fixture under W. K. L. rules it will not prove much of a drawing card.

That from the number of entries at the World's Fair Dog Show it did not require very large cuffs for the judges to mark the winners on.

That it is not good policy for professionals to have one-half and one-quarter interests in dogs that are bound to come up before them in the circuit shows to be judged.

That a number of the winter shows will not have for judges handler-importers, and it commences to look like a clearing of the atmosphere in regard to "some of the evils that we know of."

That if specialty clubs and all others, in fact, would publish their premium lists earlier and give them better circulation, it would prove of greater value to the shows, giving the exhibitor more time and the press much better opportunity to give further publicity to the fixture.

Sickel—If they don't give you Jackson's Napa when you ask for it.

California Fish and Game Protective Association

The following circular has been mailed to clubs and individual sportsmen in this State by Secretary E. A. Mocker:

Your attention is called to the fifth annual meeting of the California Game and Fish Protective Association, to be held at the city of Visalia, on Friday and Saturday, November 11 and 12, 1904.

This will be one of the most important meetings ever held by the Association. At its last annual meeting a committee was appointed to consider all proposed changes in the game laws. This committee has made its report, proposing many valuable amendments. These will be considered by the State Association at its coming meeting, and from the result of its delibsrations a final bill will be drafted and its passage urged before the legislation. Every citizen and every section of the State is interested, for good or ill, in all changes in our laws for the protection of the game, and every association in the State should be sure to have its representatives present at this meeting.

The Visalia Association under whose auspices and hospitable care the State meeting will be held are making every effort to ensure the comfort and perfect enjoyment of all who attend.

As has been the custom of the association, the Friday night meeting will be an open one, to which the citizens generally are invited. The Visalia Association has provided a large hall for the occasion with a band in attendance.

Your association is entitled to five delegates, or five votes, in case a part of the delegation is absent.

Fly Casting Club Medal Winners.

The medal winners of the San Francisco Fly-Casting Club for the season of 1904 have been announced by Secretary Brotherton as follows:

Championship class—Distance, J. B. Kenniff, average for the season of ten contests 118 84-120 feet. Accuracy, J. B. Kenniff, average for the season, 90 118-120%. Delicacy and accuracy, W. D. Mansfield, average for the season 92 65-120%.

First class—Distance, H. B. Sperry, average, 99 48-120%. Accuracy, T. C. Kieruff, average, 89 64-120%. Delicacy and accuracy, J. B. Kenniff, average, 92 5-120%.

Second class—Distance, G. H. Foulkes, average, 88 96-120%. Accuracy, Carlos G. Young, average, 88 110-120%. Delicacy and accuracy, Dr. W. E. Brookes, average 86 80-120%.

Lure casting—C. R. Kenniff, average for the season 97 58-100%.

General improvement medal—J. B. Kenniff.

The high men in the Roos trophy contest are W. D. Mansfield and C. R. Kenniff, this event will not be decided until next year. The trophy is hung up for the best general average score for two years.

J. B. Kenniff is the winner of four medals this season, the result of application and hard wark combined with natural skill. C. R. Kenniff who has demonstrated his ability to maintain a world record pace in the lure casting event will not enter this contest next year, leaving the field open for other members. Mr. H. B. Sperry is to be congratulated on the result of his first season's work at the lake. Mr. Kieruff keeps up the enthusiasm for the sport that made him also the winner of several medals last season.

The club will hold a banquet on next Tuesday evening.

A Business Change.

Mr. J. Boswell Kenniff, a popular sportsman and prominent member of the Fly-Casting Club, who has been connected with the Emporium, the E. T. Allen Co., the H. Skinner Co. and at present the Olympic Arms Co., for the past decade, will sever his connection with the last named establishment on December 1st.

Mr. Kenniff will "go on the road" for the firm of Baker & Hamilton. We feel assured that Mr. Kenniff's genial personality and experience in his line will win him as many friends on the Coast circuit as his courteous assiduity in catering to the wants of local sportsmen has won for him while in business in this city.

Last Sunday, hunters who were on the Suisun marshes had one of the best duck shooting days remembered in years. On most preserves limit bags were the rule.

The San Francisco Striped Bass Club will hold the annual club outing at Lake Merritt tomorrow.

Striped bass anglers who trolled the estuary and still fished in Lake Merritt, last Sunday, had good luck with the bass.

Two Essential Features.

The automatic ejector on the Ithaca gun is simple but remarkably effective. It has but three parts. The gun opens easily. The shells are started about a quarter of an inch in the regular way before the ejector kicks them out, which prevents swollen shells from sticking. There are many poor ejectors on the market, if you ever used one you will much appreciate an ejector which works properly every time you want it to, throwing out only the shell fired. Ejectors are placed, at a comparatively slight extra cost on any grade of Ithaca guns.

Another good feature is the reinforced frame and double thick nitro breech which makes the Ithaca gun the safest gun for nitro powders.

Smokeless Averages Reported.

Crawfordsville, Ind., October 5th, W. R. Crosby, first general average, 439 out of 450, shooting "E. C." Guy Burnside of Knoxville, Ill., second general and first amateur averages, 435 out of 450, shooting "E. C." and "Du Pont." Mr. Crosby made a run of 202 in the two days' shoot.

Clintoo, Ont., October 6th and 7th, P. C. Wood of Springwells, Mich., shooting "Du Pont" and J. E. Cantelon of Clinton, Ont., shooting "Infallible," first general average, 171 out of 200, J. E. Hovey and R. Graham, both of Clinton and both shooting "Du Pont." Second general average, 168 out of 200. H. Scane of Ridgetown, Ont., third general average, 167 out of 200, shooting "Du Pont." W. G. Doherty of Clinton, Ont., fourth general average, 164 out of 200, shooting "Infallible."

Baltimore, Md., October 10th and 11th, J. M. Hawkins first general average, 282 out of 300, shooting "Du Pont." Wm. Wagner, of Washington, D. C., second general and first amateur averages, 270 out of 300, shooting "E. C." Lester S. German of Aberdeen, Md., third general and second amateur averages, 264 out of 300, shooting "Du Pont."

Downs, Ia., October 10th, first general average, Fred Gilbert, 194 out of 200, shooting "Du Pont." Second general average, Russel Klein of Spirit Lake, Ia., shooting "Du Pont."

His Work Tells.

Mr. Jay Green, a young amateur, is rapidly coming to the front. Mr. Green is exceedingly enthusiastic over what the Parker can do, and he is making records every day. At Rochester, Sept. 29th, he won high average, amateur, with a score of 158 out of 170. At Batavia, N. Y., Oct. 11th, Mr. Green won first expert average with 107 out of 120. Mr. Green broke 92 out of a possible 100. Mr. Green is a staunch advocate of the "Old Reliable" Parker.

Winchester Doings.

Pacific indoor shooting club tournament. The championship rifle cup, emblematic of the champion indoor rifle shot of the State of California, was captured by C. Meyer with a Winchester single shot Schuetzen rifle and Winchester make .22 W. R. F. ammunition. Score 701 out of 750.

Winchester military factory loaded ammunition makes new world's records at Creedmoor, and carry off the highest honors at the New York State annual military rifle tournament. Capt. W. G. Hudson, U. S. A., shooting the new .30 caliber Springfield rifle and the Winchester factory loaded .30 caliber Model 1903 Springfield cartridge made the wonderful score of 17 consecutive bullseyes at 800 yards, 14 consecutive bullseyes at 500 yards, and 11 consecutive bullseyes at 900 yards, winning the handsome Thurston trophy. Total score 224 out of the possible 230 at 500, 800 and 900 yards. Capt. Hudson also captured the Allcomers' short range match, and the Allcomers' mid range match with the same combination. Corporal W. B. Short, N. G. N. Y., using the same make of rifle and ammunition that Capt. Hudson used, scored 16 consecutive bullseyes at 800 yards and won the National Guard championship of the State of New York.

When you desire to obtain the very best results at the traps, in the field, on the marsh, indoor or outdoor rifle, revolver, or pistol shooting, use the Winchester make of ammunition and you will get the best that can be manufactured, and if your aim is correct the ammunition will do the rest for you.

Garden City Riflemen.

The San Jose Rifle Club held a very successful prize shoot at Schuetzen Park on October 30th. Among those present were a number of marksmen from San Francisco and Palo Alto—of the thirty-six shooters present all but one used U. M. C. primers. Merit wins out every time.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

Nov. 1-April 1—Trout season closed

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 10-Oct. 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tide water.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Nov. 11, 12—California Game and Fish Protective Association. Annual meeting. Visalia, Cal.

Bench Shows.

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E. Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Nov. 1—Sportsmen's Field Trial Club. Clare, Mich. Erwin C. Smith, Secretary, Midland, Mich.

Nov. 7—Independent Field Trial Club. 6th annual trials. Hutsonville, Ills. H. S. Humphrey, Secretary, Indianapolis, Ind.

Nov. 8—Western Beagle Club. Inaugural trials. Oregon, Ills. Reno B. Cole, Secretary, De Kalb, Ills.

Nov. 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Kennel Club. Field trials. Clay City, Ind. C. F. Young, Secretary, Clay City, Ind. Week following Ills. Ch. trials.

THE FARM.

Poultry Pointers.

To have a healthy flock keep hut few in a pen.

Houses that are cleaned daily need but little disinfecting.

As far as possible keep hirds of a size and disposition together.

There is nothing better for young tnrkeys than cnrds squeezed dry and crumbly.

Pekin ducks are the best for keeping on farms where there are no ponds.

Too much and too rich food is often tl e cause of apoplexy.

Oatmeal is one of the very hest grains for feeding young chickens.

Vermin nearly always surest attack poorly kept, ill-fed chicks. So keep thrifty.

A good, dry dust hath is an effectual instrument in removing vermin from fowls.

To prevent egg eating make the nests dark and compel the hens to go in from the front.

Never allow lice to get much of a start. Whitewash often and keep plenty of dust around.

One or two fowls with the cholera will soon infect an entire flock.

Diarrhoea is generally caused by improper food, filthy coops, damp, cold temperature.

With ducks for hreeding, one drake to every five ducks is a safe nomber to allow.

The duck is a rapid grower, easily raised if kept from water and trailing through wet grass and weeds when young.

Do not feed too much at a time, nor too often the same article, nor too often in the same place. Variety is absolutely essential.

Do not feed wet, sloppy food. The down of the little chicks gets soiled with it and it seems to prevent their growth.

Condimental foods are all those which have a stimulating effect other than that derived from ordinary diet.

Partial fertilization may result from weakness or inactivity of the male hirds, or of the females, or from the fact that either or both are too fat for hreeders.

It is a mistake to put too many eggs under a hen. She cannot cover only so many, and when too many are given a portion of them are not covered as they should he and in consequence fail to hatch.

When eggs are placed under hens the first few days of incuhation are hy far the most critical, and the hens should be closely watched that they do not remain off too long and allow the eggs to hecome more or less chilled.

Daring the latter part of spring and dnring the summer it will he found a good plan, so far as is possihle, to make the nests upon the ground. Or if this cannot he done conveniently, the next best thing is to put an inverted sod in each nest.

One advantage with late hatched tnrkeys is that they cost less, both in time and expense to raise. As the weather is usually warm and settled, they can be allowed a free range almost from the start, and as they are ahle to pick up a good part of their food the cost is materially lessened.

When it is desired to push tbe growth of the turkeys it will he found a good plan to feed tbem regularly at night. One of the best rations to give tbem is whole corn.

Pure bred fowls should not he bred prematurely. There is a tendency to hurry nature. If crowded the tenfiency is to weakness.

Bran furnishes the lime deficient in other grain foods. It makes a goon addition to almost any food ration.

Some have two sets of roosting poles, which are cleaned and changed every week.

Fowls do not naturally run in large flocks. If left to themselves they will he in small groups—a few hens with a rooster.

Very much depends upon the early hatching of the pullets. Unless hatched early they wi'l not commence laying any earlier than the hens. Good hens should not he discarded too soon. They may be serviceahle until four years old, if carefully managed.

Chicks die from heing chilled. They do not always die right away, and the blame is laid somewhere else. Don't let your chicks get chilled.

Where coal oil is nsed ahout the nests, it is well to apply it in the afternoon, so that the most of it may evaporate hefore the hens use them.

When grit is not plentiful, a large sandstone may be hauled up, and pieces hroken off when necessary.

Coops without hottoms are the healthiest in which to raise yonng chicks, if moved every day. A nice, dry place should he selected each time.

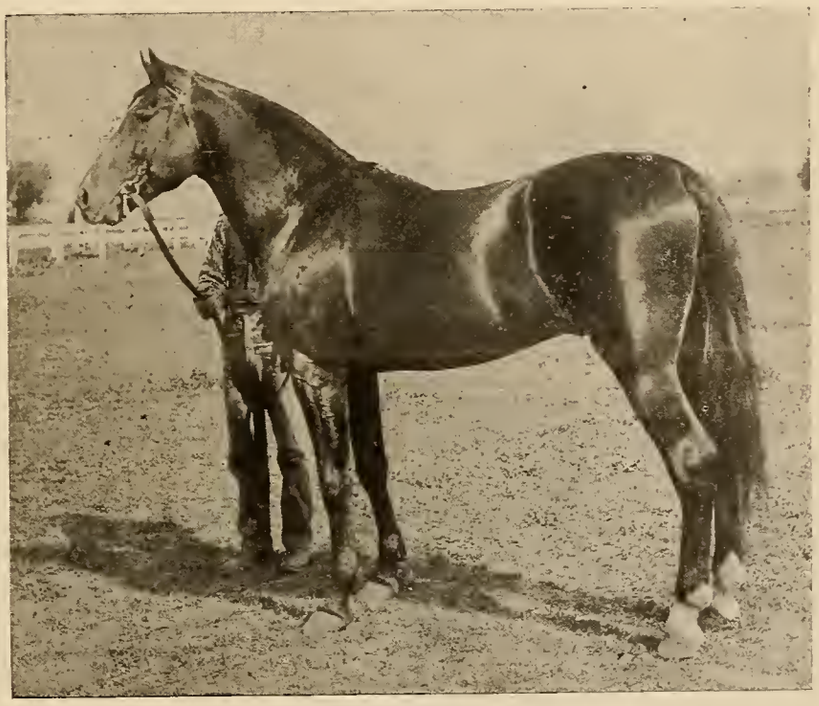
Owing to the strong odor developed hy the droppings of poultry in summer, it takes more work to keep the hen house clean in warm weather than in cold.

A Cheap and Durable Paint.

A durahle paint suitahle for wood work around the shop, barn and other places exposed to continued moisture from rains or otherwise, is prepared in the following manner: Two parts of cold tar, two of pitch, one-half part of slaked lime aud an equal amount of rosin are melted together and applied to the wood while still being quite warm. Into the last coat of this paint applied is strewn a very fine and dry sand which effects a rock-like covering over the entire surface, and tends to add material strength to the point.

Another recipe which, while being a little more expensive than the former, is said to be equally meritorious, is as follows: Ten parts of yellow wax are dissolved in ten parts of linseed oil on the one hand and five parts of rosin in eight parts of oil of turpentine on the other, the heat applied heing but moderate, and the care taken to avoid firing of the inflamable ingredients employed. Any suitahle coloring may he added.

Still another recipe, which has stood the test of a long service, is this: Twelve ounces of rosin are melted in an iron kettle, twelve quarts of fish oil added, with two pounds of flowers of sulphur. After heing thoroughly liquified an ad libitum quantity of hrown ochre, ground in oil, is added, and the paint, which should he applied while still hot, is ready for use. Any other coloring matter may replace tbe ochre, hut it should also he finely ground or ruhhed witb oil before heing added to the liquid materials. The first coat should be put on as thin as possihle and be perfectly dry before the second coat is applied.



Hambletonian Wilkes

Sold to a Company of Kings and Tulare County Horsemen Last Week

Eggs are almost as sensitive to odors as butter is. The shell heing porous is little protection; the alhumen soon ahsorhs any objectionahle odor with which it comes in contact and retains it.

Poultry are not very choice in what they eat. Laying hens need to he gnarded somewhat in what they eat, as nothing is too nnclean for them.

Unusually large males are not desirahle. They are not good breeders and are liahle to injure young pullets by their clumsiness.

A contract system of milking is in vogue on some farms in Denmark. Women do the milking and are paid according to the amount of milk they extract from tbe cows or the quantity of butter fat contained in it. The latter system is regarded as the hetter as it induces tbe milkers to strip tbe cows carefully, knowing tbat the richest milk is in the strippings. The milkers receive a certain sum of money weekly and twice a year are given what additional amount is coming to them on the hasis of tbe fat content of the milk.

The following rations have been recommended for dairy cows giving sixteen pounds of milk or two gallons a day: Sorghum hay eighteen pounds, hran fonr pounds, corn stover eighteen pounds, linseed meal two pounds. Or alfalfa hay fifteen pounds, oat straw five pounds, kaffir corn meal eight pounds. Or alfalfa bay twelve pounds, sorghum hay six pounds, barley five pounds, bran four pounds. Or alfalfa hay twelve pounds, millet hay six pounds, ground wheat five pounds. Or alfalfa hay ten pounds, sorghum hay nine pounds, linseed meal two pounds, bran four pounds. For cows giving twenty-two pounds of milk the following rations are suggested: Alfalfa hay fifteen pounds, sorghum hay seven pounds, kaffir corn meal eight pounds, ground wheat two pounds. Or alfalfa hay five pounds, sorghum hay fourteen pounds, hran seven pounds, cottonseed meal three pounds. Or prairie hay ten pounds, soy hean hay ten pounds, hran nine pounds, oil meal one pound. For cows giving twenty-seven pounds of milk the following rations are named: Alfalfa hay twenty pounds, kaffir corn meal eight pounds, soy hean meal one and a half pounds. Or alfalfa hay sixteen pounds, oat hay six pounds, ground wheat seven pounds, cottonseed meal two pounds.

—o—

Dairy Notes.

To bave your cows milk long, milk them clean.

Uneven salting and working makes streaky hutter.

Keep the farm separator clean inside and outside.

Do not keep over small hatches of skim milk. Feed it while it is sweet.

When the butter sticks to the worker the latter was not scalded properly. Rub it with salt and scald again.

There is no longer any question that the earlier the calf is taken from its mother, tbe easier it will he to teach it to drink.

It don't pay to keep cows for a side issue. Get the hest and make dairying a hnsiness just like any hranch of farm work.

In the snceessful dairy, kindness to animals, cheerful attention to cleanliness and the comforts of the cow are sure to be found.

Some one has said tbat shape makes hreed; color makes variety It might he added, efficiency makes value.

—o—

Cream shonld not be churned the day it is taken from the milk, hut should he allowed to ripen.

FOR SALE.

THE STALLION VASTO 20070, RECORD 2:16¼, sired by Vasco 10998 (son of Harold 413), dam Chesa (great hrodmare) by Magic 1457, second dam Betty (dam of Retta 2:28¾) by Clark Chief 89; third dam Sue by Pilot Jr. 12. Vasto is a fine large horse, a rich bay with style and finish. Is a sire of speed and handsome carriage horses. Is a grand individual and a profitable stallion in the hands of a practical horseman. For price and further particulars address CHAS. W. COE, 27 South First Street, San Jose, or JOHN H. WISE, Room 23, 318 Pine St., San Francisco.

Cost of Production.

The Indiana Dairy Association recently offered a valuable prize for the best essey on the cost of milk and butter production. It was won by Mrs. Chas. Lamont whose essay is as follows:

Our herd consists at present of ten Jersey cows and heifers, none of them registered, but headed by an A. J. C. sire. Our butter is sold retail to private customers.

We consider silage the most economicel of all food stuffs, as well as the least trouble to feed. Bran we find the most expensive, and we wish for the day when a satisfactory substitute for it can be prodnced on our farms. But this far along any thing to take the place of bran seems to be in the experimental stege in Indiana, and we find that to dispense with it, even when the cows are on pesture, generally results in a loss of butter of more value than the cost of the bren.

We began January 4th last to keep account by weight of all the feed our ten cows ate in seven days, with these results: The average daily ration fed in two feeds wes 40 pounds silage, 5 pounds bran, 5 pounds clover hay and 6 pounds corn stover, or all the stover they would cat up clean: the bran was fed according to qnantity of milk, 6 pounds being the most fed to any one cow. The cost of one week's feed for all wes: Silege, $3.50; bran, $2 85; clover hay, $1.47; stover, 42 cents. Total, $8 24.

The price of silege was estimated at $2 50 per ton; bran $16; clover hay $6; stover, $2. The butter sold du ing the seven deys was 58 pounds, which at 29 cents a pound amounted to $16.82 for the week; and deducting the cost of production left $8.58, or $2.04 for each dollar expended on feed. The amount of milk prodnced was 1147 pounds, food cost of 100 pounds milk, 72 cents; for one pound hutter, 14 1-5 cents; estimated value of skim milk, at 20 cents per 100, $2 We are aware the amount of milk and butter is small, and only the good price received for the finished product leaves us a fair margin of profit.

However, our herd then numbering eleven cows, produced an average of 290 pounds butter during the pest year, which sold for $77.82 for each cow, and counting the cost of food for a year at $38.60, left us $39.22. Skim milk we count worth $10 a cow more, leaving the heifer calves and manure against the cost of labor. Then we must remember there is a wide difference between selling the crops off the farm and selling them to the cow at market value to be returned to the land in the shape of the manure wherewith to feed next year's corn crop. Then again, by the eid of the skim milk we can, with careful feeding, put our fat hogs on the market twice each yeer weighing anywhere from 200 to 240 pounds at from five to six months old, a result we could not pretend to reap without the skim milk. Also we must mention the heifer calves growing into cows at an early age to enlarge and improve our dairy berd. We have seid nothing of the weekly trips through all weather to sell our produce, nor of all the trials and vexations which attend dairying, but with all these things considered, we think we are fairly well compensated by the cow, both for her food and for our trouble.

Warranted to Give Satisfaction.

Gombault's

Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puff, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Lawrence-Williams Co., Cleveland, O

A Knockout Blow to Oleo.

"Washington, D. C., Oct. 24—The American butter maker has won a substantial victory over the beef pecker and meker of oleomargarine The United States Supreme Court in a decision today, affirmed the decision of the lower court, which upheld the ruling of Commissioner of Internal Revenue Yerkes in holding that the use of palm oil in oleomergarene constitutes an artificial coloration to make oleo in the semblance of butter. This ruling by the commissioner was in accordance with the law of the last Congress, providing the use of artificial coloring matter in oleomargarine to make it resemble butter, subjected the colored oleo to a tax of 10 cents a pound. The oleo manufacturers were hit hard by the law, nothwithstanding the fact that the same law reduced the tax upon uncolored oleo to one-fourth of a cent a pound. Palm oil, in the ratio of less than one-half of one per cent, gives a good butter color to oleo, but so small a quantity was immediately held by the Commissioner of Internal Revenue to be manifestly for color purposes, and not as a necessary or desirable ingredient of oleomargerine. The use of a greater quantity of palm oil gives too high a color, and also a slight perfume, so that palm oil can not be constituted for cottonseed oil, although the law permits the use of vegetable oil as constituent parts of oleomargarine."

It does not follow that the oleo people will abandon the field, or that the dairy interest can expect to maintain their present advantages without further effort. On the contrary, the oleo people are already organizing for a raid upon Congress to secure a repeal of the present law, and—the truth may as well be told now as later—they will succeed unless the dairy interests combine and meet them at all points.

Second Sale of Fall Wool.

The *Sutter County Farmer* of October 28th says: The second sale of fall wool by the Sutter and Yuba Wool Growers Association was held at the Garrett Co. warehouse last Saturday and the prices were somewhat in advance of those received last month. The highest price Saturday was 15c per pound. The buyers were F. E. Green and Dickens & Kearns, and the number of bales sold 177½. The following from this county sold: G. Summy, 3859 pounds at 10c; F. H. Graves, 12,804 pounds at 10¼c; 9341 pounds at 13 5/16c; Coppin Bros. 1881 pounds at 13½c and 91 pounds at 15c; T. Bredy 15,913 pounds at 13¾c.

—o—

In selecting lambs for feediog, those with large, coarse frames or heavy hones should be rejected. The smooth, plump individuals are more desirable because a medium amount of flesh and fat will give them the form desired in tho market and that which will bring tho highest price. The quality of showing quickly the results of good feeding is found developed in the highest degree in the lowest, thick type. A good feeder may be known by its rather short, thick wide face deep wide chest, well sprung ribs and general form. The mutton leg, back and loin should shnw full development.

—o—

Standard cream contains not less than 18 per cent of milk fat.

Holsteins in California.

Every breed of livestock as well as every race of man, has had its origin in some particnlar portion of the earth, writes Prof. Anderson of the Polytechnic School at San Louis Obispo. Certain conditions of soil, climate, food and local topography have exerted a powerful influence in making the race or breed as modern time finds it. Man and beast are creatures of habit, and the longer the habit, the more attention should be given it hy those who would reap snccess in the management of their affairs. Man, by force of will and power of initiative, rises above the forces of changed environment more readily than the beast, hut still everyone is more conversant with the fact that his best work is done under familiar surroundings of food, climate and variety of employment. If this be true of man how much more true of the beast.

Probably the two most potent factors in animal development are food and climate both of which are subject to man's control to a greater or less degree. For example, the Wisconsin dairyman may make his winter a comfortable climate for his cattle hy warm berns, and he may give his Holstein the quantities of nourishing food they require from well filled mows of clover hay and silos full of luxuriant corn. The Hollander is obliged to keep his cow in the stable during a harsh winter. But California goes one better even than the Holstein's native heath, for here the natural climate is more comfortable than any artificial ones. Experience is proving that the Holstein gives better returns under the California sunshine than on her native heath.

The Holsteins never found food conditions anywhere more favorable to their development than on this coest. The great valleys of California, Oregon and Washington, where irrigation is bringing and can bring forth such luxuriant crops of the best forage; and the evergreen pestures of the sea border sections afford a wealth of food that is celculated to meke the "black end white" beauties to rise still higher in the scale of production. The lowland pastures of Hollend may here be duplicated and excelled by heing available during a larger portion of the year.

It must not be understood that Holsteins will thrive in all perts of the Coast region. There are hilly and mounteinous sections with dry and scanty pesturage where it would be suicide to the cow and to the owner's pocket to attempt to keep them. Some other breeds are better adapted to those sections. But in the valleys and more level sections where corn, alfalfa or clover cen be grown and where pasturage is abundant when grazing depended upon, there the Holstein mey be expected to give as large returns as she has in any other country, and, I am inclined to believe, more than we now dream of when all Californians learn to give their cattle as careful attention as is now given by a few breeders.

Relation of Salt to Dairying.

Cows should be salted regularly or, better still, should have constant access to salt.

The practice of salting them once a week is not a good one, as the most of cattle will lick a little salt every day if they can get it.

Thus provided they will yield more and better milk than otherwise, and will also maintain a better degree of health.

As salt provokes thirst, the milch animal should have as free access to water as to the saline mineral, or the latter will do her more harm than good.

Speaking of salt leads me to say that some failures in dairy butter making I have noticed came about by salting the cattle and the butter out of the same barrel.

In other words, coerse, insoluble salt was used for the butter, when only the highest and most refined grade should be employed.

Salt that is not soluble will not permeate the substance of butter evenly, and thus rancidity may be induced.

Again, grains of salt in butter always detract from its appearance, end are inimical to even flavor, from these causes alone lowering its market value. Let me say here that there are today just as fine grades of Americen dairy salt produced as come from England.

American milch cattle fed on American grass produce butter salted with American salt that is the peer of any on earth and is so conceded in foreign markets

In attaining this result, however, one must utilize the best of everything, think not that poor or cheap material can be introduced with impnnity to future quality.

I know a dairyman once who, in a spasm of economy (?) sought to save fifty cents by purchasing a cheaper grade of salt then was his wont, and later lost on his shipment of butter thereby seven dollars.

It was one of the most effective lessons he could have been taught in practical dairying, exemplifying as it did that cheap material always produces cheap quality. When it comes to cheese making, salt holds just as important a position as in other deiry lines, i. e., that solubility and purity are highly necessary.

The relation of salt, be it understood, to all phases of dairying is a highly important one, and because this fact is so little appreciated accounts for many dairy failures.—*Dr. Geo. E. Newell.*

Standard condensed milk conteins at least 36 per cent of milk solids, of which not less than one-fourth is milk fat, and not more then 50 per cent of total solids is added sugar.

—o—

Milk does not cool fast enough of itself to raise the proper amount of cream. The milk would do better if set in cold weter, or in a cool draft, if no cooler place cen be found.

Dairy Notes.

The test of the churn will show the quality of the milk.

The time and place to salt hutter is in the churn.

Cowt should he fed according to their age, size and requirements.

The dairy cow should he selected with individual capability for this position.

Comfort is very essential in keeping a cow up to her hest in milk-giving.

In making the most in dairying the hy products must he used to the hest advantage.

A heifer calf intended for a cow should be trained with this end in view.

Cream should not be churned the day it is taken from the milk, but should be allowed to ripen.

The character of the feed decides to a very great extent the yield and quality of the hutter from any cow.

Succulent food increases the flow of milk, hut does not materially increase, the proportion of water in it.

The relative proporti ns of fat and casein are changed in a marked manner hy a chaoge in the ration.

An extra yield of hutter will naturally follow the use of richer feed if the cow has heen well selected.

In getting hutter ready for market particular care should he given to have it put up neatly and as clean as possible.

The quality of the product counts for more in the dairy than any other industry.

Nervousness and viciousness are engendered in the ill-treated cow, and are transmitted to her offspring.

Foaming of cream in the churn may he due to too low or too high temperature, or too long keeping.

When the cream is perfectly ripened before churning the churn gets out more of the fats and the huttermilk carries away less.

The producing of fat varies greatly in milk, hut it varies more with the poor milk of poorly fed scrubs than with other classes

Always churn just as soon as there is cream enough, and sufficient acidity develops. If cream is held beyond this it will he injured.

There is at least one good advantage in keeping cows, and that is, if the milk can not he turned into hutter or cheese profitably, it can in nearly all cases be fed to pigs and calves with profit.

Cream globules made from cows long in milk are coated with the cheesy matter of the milk more tenaciously, as this white substance is more solid or firm than during the first months of milking, and is not so easily rubbed off and, being very hard to soften, long churning is needed.

In marketing hutter to the best of advantage it is very important to have it put on the market in a neat, attractive form. If made to appear fresh, clean and solid, instead of soft and mushy, the difference in price it would he possible to realize will pay well for the extra trouble required.

The dairy cow should he gentle, milk easy, give a fair flow of milk and hold out well. A cow that does not possess each one of these virtues is not a suitable animal to he kept long on the farm. Kicking and restless cows and cows which milk hard are nuisances, and the sooner they are disposed of the better.

Tuttle's Elixir

is a quick and permanent cure for distemper, founder, lameness of all kinds, pneumonia, thrush, cuts, bruises, collar and saddle galls, colds, stiffness, etc. It is used and endorsed by the Adams Express Co. We offer

$100 Reward

for any case of Colic, Curb, Contracted or Knotted Cords, Splints, recent Shoe Boils or Callous that it will not cure.

Tuttle's Family Elixir

is the best household remedy that can be used for rheumatism, sprains and all other pains and aches. Saves doctor bills and stops pain instantly. Our 100-page book, "*Veterinary Experience*," free. Send for it.

Tuttle's Elixir Co., 437 O'Farrell St., San Fraocisco, Cal.

Beware of so-called Elixirs. Tuttle's only is genuine. Avoid all blisters; they are only temporary relief.

KENDALL'S SPAVIN CURE

Bleecker, N. Y., Jan. 24, 1904.

Dr. B. J. Kendall Co.

Gentlemen: Enclosed please find a 2c stamp for which kindly send me your "Treatise on the Horse and his Diseases." I think that your **Kendall's Spavin Cure** is a great remedy for everything. I would not be without it. I cured a Spavin of three months standing on a colt with one bottle of your Spavin Cure. WILLIAM RHINEHART.

Price $1; six for $5. As a liniment for family use it has no equal. Ask your druggist for **Kendall's Spavin Cure**, also a "Treatise on the Horse and his Diseases," the book free, or address

Dr. B. J. KENDALL CO., ENOSBURG FALLS, VT.

BROODMARES WANTED.

HAVING FIRST-CLASS FACILITIES FOR raising a few good colts, I would like from four to six large, roomy, standard-bred Mares to breed to the hest bred son of Sidney 2:19¾ on the Pacific Coast, either on shares for a number of years or to purchase on easy terms Can furnish feed, care and handling. Will mate them with Sidney Alan 29116 (Vol. 14, A. T R.), son of Sidney 2:19¾, dam Variation hy Allandorf 2:19½; second dam hy Orange Blossom 2:26, etc. The mares must he good individuals, well hred and an outcross or nearly so. References given to those wishing to farm out their mares. Give breeding and description. Mares of Wilkee blood preferred.

WILL ROBINSON, Suelling, Cal.

ROAD MARE FOR SALE.

A STYLISH, HANDSOME, WELL-BROKEN and perfectly sound Road Mare for sale. A very desirable animal in every respect. Also, a pneuma ic, ball hearing Park Wagon and set of fine Harness, used hut little and good as new. Whole outfit first class and will he sold cheap. Apply to the Owner, 164 Golden Gate avenue, San Francisco.

WANTED.

BY A MAN WHO THOROUGHLY UNDERstands every feature of the trotting horse industry from the selection of sires and dams to the breeding, rearing, training, racing and selling, to interview or correspond with some gentleman who has the necessary capital and the desire to produce and own the hest. Have had years of experience and trained some of the hest trotters ever produced in California. There is money to he made in the business now and for years to come. Address "Horseman," care of BREEDER AND SPORTSMAN.

TO TRADE FOR A BROOD MARE.

STANDARD-BRED GELDING 7 YEARS old hy Prince Nutwood, dam by Strathway. Stands 16½ hands high and weighs 1225 pounds. He got a record at Salinas, Septemher 18th, of 2:31, jogged the last eighth. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. Promises to he very fast. W. H. Williams, who worked him on the San Jose track five weeks before the Salinas meeting, says that he looks like a 2:10 or 2:12 trotter. Good individual and will sell him at a reasonable price or trade for a high-class brood mare. Address

HENRY STRUVE, Watsonville, Cal

CAMPBELL'S HORSE FOOT REMEDY IS THE **BEST REMEDY**

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directione given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, $1.00; Half-Gallon, $1.75; Gallon, $3.0 2½-Gallon, $5.50; Five-Gallon, $10.00.

Books giving full directions for ite use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of thie paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

Sold hy all Dealers in Harness and Turf Goods. If not in stock ask them to write any Jobber for it

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-fi e years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, heen converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

$5 PER BOTTLE. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except low Ringbone), **Curb, Splint, Thoroughpin, Capped Hock, Shoe Boil, Wind Puff and All Lameness.**

ON BROKEN DOWN, WEAK, SPRAINED and RUPTURED TENDONS and LIGAMENTS its power is unfailing.

The fire-iron is uncertain and invariably only aggravates the injury or disease; blistering is less effective: both necessitate laying up the horse for months. Mercurial and poisonous compounds cause irreparable injury.

"SAVE-THE-HORSE" eliminates all these factors.

Cures without scar, blemish or loss of hair. Horse may be worked as usual and with boots, as no harm can result from scalding of limb or destruction of hair.

Need of second bottle improbable except in rarest of cases.

Send for booklet and copy of guarantee.

$5—All druggists and dealers, or sent express paid.

C. O. STANTON, San Jose Manager.

Isn't He Worth Saving?

ABSOLUTELY CURES — QUINN'S OINTMENT — SPLINTS, SPAVINS, WINDPUFFS, BUNCHES — REMOVES

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan Ind., writes. I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without **Quinn's Ointment.** I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." **Price $1.00 per bottle.** Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N.Y.

J. H. RAVEKES. San Leandro.

For Sale or Trade for Real Estate

THE STANDARD-BRED TROTTING AND brood mare **PACETA**, sired by Lone Pine, he by Electioneer; also her filly, 17 months old, sired by Sidney Dillon. I make this offer as my time is too fully taken up to drive them Address "S," care BREEDER AND SPORTSMAN, San Francisco, Cal.

FOR SALE.

A HANDSOME 4-YEAR-OLD BAY FILLY; pacer; stands 16.2½ hands; sired by McKinney, dam Mission Bell by St. Nicholas. Full sister to Mechanic. A smooth-gaited filly, goes without straps or boots, and with less than a month's handling has paced a half in 1:11. Is sure to make a fast pacer. Address or apply to JOHN ROWAN, 1347 East South Street, Stockton, Cal.

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D. Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy......$7
BOUND IN CLOTH, per Copy.......... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse, as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

MEN — WOMEN — CHILDREN.
WEAK KIDNEYS CURED FOREVER.

If you have a pain or dull ache in the back it is unmistakable evidence of kidney trouble. It is a warning to tell you trouble is ahead unless you remedy the cause immediately.

Lame back is only one symptom of kidney trouble. Other symptoms are, being obliged to pass water often during the day and to get up many times during the night, inability to hold your urine, smarting or irritation, passing brick-dust or sediment in the urine, catarrh of the bladder, uric acid, constant headache, dizziness, sleeplessness, nervousness, irregular heart beating, rheumatism, bloating, irritability, worn-out feeling, lack of ambition and sallow complexion.

Hooper's Parsley Kidney Pills are proving to be the most wonderful cure ever gotten out for weak and diseased Kidneys. If you have tried the many so-called "cures"—if you have become disgusted with them and stopped using them, try one package of Hooper's Parsley Kidney Pills and you will immediately begin to feel better. Hooper's Pills are a cure. They will stop the trouble just where it is and prevent that awful and dreaded Brights Disease. Don't buy any but Hoopers. The British Pharmacal Co., Milwaukee, Wis., Distributors.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, November 12, 1904.

EASTERN HORSEMEN will, if rumor can he relied upon, soon he coming to California in larger numbers than usual to spend a few weeks in the glorious winter sunshine of the Coast and incidentally to pick up a few trotters and pacers able to win money in races or to head the flyers on the eastern speedways. California horses bave made a marvelous showing in tbe east this year, having won ahout one-tbird of all the money hung up on the Grand Circuit, and those who want the hest are looking this way for them. California hreeders and owners will therefore have better opportunities to dispose of their horses during the next few months than for several years past, hut the prohability is that nearly every buyer will he of the Missouri type and will bave to be "shown" what a borse can do hefore he pays over the money for him. We would remind California owners and hreeders, especially those wbo are not heavily endowed with tbis world's goods, tbat "a hird in tbe hand is worth two in the hush" and a fair offer during the winter months should not be declined because prices may be higher in the spring. Men of wealtb can afford to keep their horses and refuse to sell them except at prices that are full measure of their worth. A rich man can also afford to lose a valuahle horse by death or have bim knocked out in training, but the average horse owner cannot. Not a month passes hut some owner refuses a price for a horse tbat he is never afterwards ahle to obtain, and while there are some who get hig prices by holding on, they are exceptions and like angels' visits are "few and far hetween." The values of harness horses that can race and win are better than they were last year at this time, and the owners of trotters and pacers that are good prospects need not he hackward about asking fair prices for tbem. But there is a limit to horse values and care sbould be taken to not fix tbem so high as to stop buyers from coming here. Get all you can hut rememher that the nimhle penny is better than the slow shilling.

RICH STAKES FOR RUNNERS are offered hy Coney Island Jockey Club, entries for which are to close Tuesday next, Novemher 15tb. For the June meeting of 1905 the two-year-olds have two big stakes, in each of which $2500 is added. These are The Foam at five furlongs and The Surf at five and one-half furlongs. At the June meeting in 1906 the three-year-olds are offered Tbe Tidal (cash value $20,000), at one mile and a quarter, Tbe Lawrence Realization, $10,000 added, at one mile and five furlongs, and The Mermaid, $3000 added, one mile and a furlong, for fillies. At the autumn meeting, 1905, the Annual Cbampion (cash value $25,000) will be run. It is for three year-olds and upwards, that are now yearlings and two-year-olds, and tbe distance is two miles and a quarter. For the autumn meeting of 1906 tbere are The Great Filly, $5000 added, for two-year-old fillies at six furlongs; The Century, $20,000, for three-year-olds and upwards, at one mile and a half. For the June meeting, 1907, is The Lawrence Realization, $10,000 added, for three-year-olds (now weanlings), one mile and five furlongs. These stakes are among the ricbest events offered hy any of the great racing associations in the East, and sbould receive the attention of every breeder and owner. Entry hlanks can be found at the secretary's office of the California Jockey Club in this city or at the Oakland track, and can also he obtained at tbe office of tbis journal, 36 Geary street, San Francisco

A GREAT OPPORTUNITY FOR BREEDERS is the fifth annual Kentucky Fall Sale of thoroughbred horses which the Fasig-Tipton Company will hold at Lexington, November 28th to Decemher 3d. Between five and six hundred head of as superhly hred stock as was ever offered to tbe public will be disposed of at this sale. It will comprise consignments of native and imported stock, stallions, mares, yearlings, weanlings and horses in training. It will offer the hest opportunity for the year for breeders and others to get some of the choicest blood in America at tbeir own prices. It will not he necessary to cross the continent to bid at this sale. Send to tbe Fasig-Tipton Company for a catalogue, pick and what you would like to bave, decide on what you are willing to pay, and send your commission to the Fasig-Tipton Company to hid that price for you. California breeders need some new Eastern hlood on their farms. They can get it at this sale at reasonahle prices. Glance your eye across to the opposite page and read more about tbis great sale. It affords the best cbance of the year to get something good at your our figures.

ANOTHER PIONEER HORSEMAN of California has "crossed the divide." Mr. A. C. Dietz died at his Ferndale Stock Farm, Ventura county at noon on Thursday, November 10th, after an illness of but a few hours. Mr Dietz was born in Burlingame, New York, April 30, 1834. He came to California in tbe early 50's, and estahlished himself in the paint and oil husiness in this city, hy which he accumulated a large fortune. His home was across the bay, in Oakland, Alameda county and he huilt many husiness blocks in that city, among them Dietz's Opera House and the Dewey Theatre. He has heen an owner and hreeder of trottibg horses for forty years and owned among otbers the stallions Longworth 2:19 and Sable Czar. He bred Alfred C. 2:12¼ and the trotter El Moro 2:13½ that is now one of the cbampion pair of tbe New York speedway. For several years Mr. Dietz was President of the Golden Gate Fair Association, District No. 3, and when he retired tbe treasury of that association contained several tbousand dollars. He was a prominent owner of borses that raced on the harness circuit in tbis State up to eight or ten years ago, and on one or two occasions headed the list of winning owners. A widow, a son and two daughters survive bim, and friends from one end of the State to tbe otber will bear of his death with profound regret

Credit to Whom Credit Is Due.

Adhell's turf career was notbing sbort of brilliant. His first start was in a yearling race at San Francisco, Cal., 1904. It was a dash of one mile for yearlings, and he had four competitors. He won in 2:28 His next start was at Woodland, Cal., in a mile dash for yearlings, and he won tne race in 2:26. One month after this Adhell started at San Jose, Cal, Septemher 27, to heat 2:26, and the first time trying he trotted the mile in 2:23. Adbell was bred at Palo Alto, and foaled March 30, 1893. He was sired hy Advertiser 2:15¼, a son of Electioneer. His dam was the famous Beautiful Bells 2:29½. He was educated and driven hy that greatest and most successful of colt trainers, Charles Marvin, wbo bred and trained Bon Voyage (2) 2:15 —*Kentucky Stock Farm.*

The closing paragrapb of the above item is not true. Adbell was trained by John Phippen, at that time the head trainer of Palo Alto Stock Farm, and was driven to his record hy Walter Mahen of Los Angeles.

Answers to Correspondents.

J. W. Haile, Suisun—Stonewall is standard and registered, his number being 11050. He is hy Director 2:17, dam Nellie Steinway hy Steinway 2:25¾, second dam Nellie Grant hy St Clair 656, tbird dam Lady Grant 2:34½ hy Cook's Good Ike, son of Grey Morgan, fourth dam hy Kentucky Whip and fifth dam by Copperhottom.

Of the fourteen three-year-olds that took standard trotting records, during the season just closed, only four scored hetter tban 2:15—Grace Bond 2:09½, Alta Axworthy 2:10½, Lord Rovelstroke 2:12¾ and Princess Athel 2:14. No world's record was broken by three-year-olds this year; the record of Fantasy 2:08¾, made eleven years ago, still stands. But the average time is the fastest Grace Bond started four times and trotted five heats in 2:10 or better. This is the best season's average for a three year-old.

Fred Keyes, one of tbe most prominent and successful trainers and drivers in the country, has taken employment witb Prince Waimsky of Russia, and has sailed for that country. This is Mr. Keyes' second trip to Russia, baving spent two years there some years ago. He is a very successful trainer and race driver and trained a large stable of trotters at the Cleveland track tbis year.

It is said tbat Mr. Smathers has changed his mind and will not send Major Delmar to the salesring. It is also reported that he has reconsidered his intention to retire from the trotting turf and will be seen again at tbe matinees next year and will send a few horses around the Grand Circuit.

Will It Ever Be Beaten?

The following question is going tbe rounds: Will the time made by Beuzetta 2:06¾ in the fourtb heat, ever he beaten in a fourth heat of a trotting race? We have no desire to detract in the least from the honor which Beuzetta gained from her brilliant performance, but in considering tbe question whicb some turf writer has propounded it will be well to examine and understand the conditions under whicb that unequalled fourth beat was made, and the energy expended in tbe three previous heats.

The time of the several beats of the race won by Beuzetta when she placed tbe world s trotting fourth heat record at 2:06¾, was as follows: 2:10¼, 2:07¼, 2:11¼, 2:06¾. The average time of the four heats is 2:07⅞. Beuzetta finished in seventh position in the first beat. The time of tbe several beats in the Transylvania, wben Tiverton equalled the record for a second heat, 2:04½, and Sweet Marie set tbe mark for a third beat at 2:05, was as follows: 2:05¾, 2:04½, 2:05, 2:08½, 2:09. The average time of tbe five heats is 2:06 13-20, which is 2 9-40 seconds faster tban tbe average of the four heats in whicb Beuzetta got her record. The average time of the first four heats of the Transylvania was 2:05⅞, or just three seconds faster tban the average of tbe four heats in the wonderful race won by Beuzetta.

That botb Tiverton and Sweet Marie are capahle of winning a fourth heat in 2:06¾ over a good track in a race where the time of tbe three previous beats is 2:10¼, 2:07¼, 2:11¼ there is not the shadow of a doubt, and tbere are a few other trotters, including Lou Dillon and Major Delmar, that are ahle to do it under those conditions, wben properly fitted.—*American Horse Breeder.*

Equals Major Delmar's Record.

Memphis, Tenn., Novemher 8.—Poorly paced, short of work, and over a track as bard as flint, Lou Dillon today trotted a mile, without a pace maker, in front. in 2:01¼, equalling tbe world's record made over the same track on October 24th, hy Major Delmar. Everytbing considered; it was one of the greatest miles ever made hy the mare.

Lou Dillon's performance was the feature of tbe supplemental meeting of the Mempbis Trotting Association whicb hegan today. When tbe queen of the trotting turf came on the track, she worked once the reverse way of the track, and was then sent away at the first score. Sbe was turned only fifty yards from tbe wire, Millard Sanders, who drove her, knowing that she was short of work, and would not be able to go the whole distance at her hest clip.

She went away slowly, but gained terrific headway hefore she reached the first turn, and reeled off tbe first quarter in 0:29¾. Still increasing ber speed she went on to tbe balf in 0:59¼. Going up tbe backstretch and rounding the far turn, the mare had to face tbe wind, and althougb a runner picked her up at the half she was only able to reach tbe three-quarters pole in 1:29¾. From this point on Millard Sanders was forced to drive hard to keep the mare going. Under the whip she fought her way down the stretch, and finished the mile, all in, in 2:01¼.

A Fast Diablo Gelding.

Mr. A. O. Gott, of Alameda, writes tbe Breeder and Sportsman, under date of November 3d, that he had just returned from a day's outing at Pleasanton in company with his friend, Mr. Chas. S. Neal, and while there they saw Barney Simpson work Mr. Gott's five-year-old gelding Mephisto hy Diablo 2:09¼, dam Nancy hy Engineer. Simpson bad the colt just two months and twelve days at the time of their visit and that day he stepped him a mile for them in 2:15½. It was very gratifying to Mr. Gott to see his gelding pace a full mile for the first time after sending him to a trainer and do it without a hitch or a hohhle in 2:15½. Mephisto was never worked a mile or hitched to a hike until August 21st, tbis year. October 18th, Barney reported a half in 1:05¾ and a quarter in 0:31½. Mephisto it sound, strong, handsome as a picture and witbout a hlemish. He bas made but three breaks since he went into Simpson's hands.

Mr. Gott also reports seeing the yearling filly by McKinney 2:11¼, dam Mucb Better 2:07¼ tbat Farmer Buncb is training and says she trots fast and like a veteran. He also saw Al McDonald drive a large, fine-looking yearling by McKinney a quarter in 40 seconds.

Mr. J. B. Iverson of Salinas has received notice from the American Trotting Register Association of the registration of tbe following standard-bred horses owned by bim: Salinas Belle hy Vermont 332, Prince Neerly 40013 hy Eugeneer, Tbelma I. by Dictatus, Anita I. by Prince Neerly, Ivoneer hy Eugeneer, Dictatus Belle by Dictatus and Mambrita by Mambrino.

Crippen's Chronicles.

MAYFIELD, CAL., Nov. 8 1904,

BREEDER AND SPORTSMAN—In a recent visit to the San Jose track I found quite a number of horses in training and that each stable contained some good prospects and a few extra good ones. Among the horsemen who are located there or have horses there that I met were several who have won fame or distinction with the American trotting horse

There was the man whom the mighty Dexter and the greatest campaigner and money-winning trotter that ever lived, the immortal ex-queen of the turf, Goldsmith Maid, made famous, and who afterwards drove that other champion mare Nancy Hanks to the world's record, besides driving and campaigning many other trotting celebrities in the forty years of his life with the trotters, also selling seven trotters for the aggregate amount of $170,000 (a world's record itself) and owning the fastest trotting stallion west of the Rocky Mountains, as well as the fastest trotting son of the greatest trotting sire living or dead, the great Kinney Lou 2:07¾.

There was the man who purchased the famous McKinney when a yearling, developed him, earned $50,000 with him in the stud and sold him at fourteen years of age for $25,000 and did not feel bad when he heard that the great horse sold again for just twice that sum.

There was the breeder and owner of the noted sire Nutwood Wilkes and breeder of the fastest trotting stallion of the Wilkes tribe John A. McKerron 2:04¾ besides many other fast trotters and pacers.

There was also the man who developed the world's greatest trotting yearling Adbel 2:23 and has trained a greater number of horses than any man on the Pacific Coast and probably taught more two-year-olds to trot in 2:30 or better than any man in America who was for seventeen years and seven months on the pay roll of the Palo Alto Stock Farm, the birthplace of more champions than any other breeding establishment in the world. A place dear to the memory of many for its associations, now passed into history.

There was the old pioneer who brought the noted stallion George M. Patchen Jr. to the Coast, and when he arrived here in company with his wife said he had brought the best woman and best horse in the world to California.

There was another pioneer who has been located there longer and rode more miles on the San Jose track than any other man, and who in early days trained and drove many of the best trotters in California, his last notable performer being the fast pacer F. W. 2:09¼, who swept everything before him a few years ago on the California circuit.

There was the breeder, owner and trainer of the wonderfully fast pacing mare Alone (4) 2:09¼, also owner of her sire, Nearest (brother to the great John A. McKerron). This horseman is noted for his skill with the firing iron and as a skillful veterinary dentist, also for his wonderful flow of oratory when describing the merits of Nearest as a sire or the speed of Alone And he can show anyone from Missouri.

There was also the man who developed Diablo's fastest son, Sir Albert S. 2:03¾, and drove him to a series of unbroken victories on the California circuit in 1901, and this past season successfully campaigned a stable on our home tracks.

I will mention some of the good things being worked at San Jose. First and greatest of all is Budd Doble's magnificent stallion, Kinney Lou 2:07¾. In the best of health, with his coat like satin, bigger and stronger than ever in his life, after a successful season in the stud, Mr. Doble has commenced giving him a little slow work, and if everything goes well intends to race him next season, hoping to give him a record that will be an indication of his speed. As he has trotted the last quarter of a mile in 2:14 in 29 seconds, he should when in order go about as fast as any trotting stallion has gone.

Mr. Doble has two other sons of the $50,000 McKinney in his stables. One a four-year old, a grand individual that has shown a high rate of speed, his dam being a very fast mare by Dexter Prince, he is bred the same as Nora McKinney 2:09½, one of the best gaited trotters ever foaled. The other is a three-year-old out of a mare by Altamont. He is a great prospect, has trotted a mile in 2:16 with limited training. Mr. Doble also has a very smooth-going pacer in a beautiful chestnut filly four-years-old by Cupid 2:18, full brother to Sidney Dillon, dam by McKinney. Mr. Doble is very sweet on her and as she combines the blood that produced Lou Dillon and Sweet Marie she has a right to be a good one. Another well bred member of this stable is Guy Oro, a six-year-old son of Oro Wilkes, dam by Guy Wilkes, and he is a grand looking black horse and trotted a mile as a four-year-old in 2:16.

C. A. Durfee has eight or ten head at the track but is not working any of them and does not intend doing any training. Three of them are mares by McKinney, all bred to Lecco 2:09¾ Probably the most valuable of the youngsters is a two-year-old bay colt by McKinney, dam the great broodmare Elsie, dam of Palita (2) 2:16 and four others; second dam the great broodmare Elaine 2:20, dam of Iran Alto 2:12¼; Norlaine (1) 2:31½ and three others; third dam the famous Green Mountain Maid, dam of nine in 2:30 and of the great Electioneer. This is the best bred son of McKinney, with individuality as good as his breeding and is a good-gaited fellow with lots of natural speed, will make a fast trotter and who can doubt that he will also make a great sire. Mr. Durfee believes he will and intends to keep him for that purpose and will postpone his development until his four-year-old form. A weanling by Iran Alto, out of Rose McKinney, dam of the stake winner Almaden (2) 2:22½ is an elegant filly; she looks like the real thing.

"Jack" Phippen has at present twelve head. Milbrae 2:16½ worked a mile the other day in 2:13½. The five-year-old son of McKinney, dam She 2:12½ by Abbottsford 2:19, owned by Chris Smith, recently stepped a mile in 2:18. This horse is the making of a very fast trotter when he gets right. He has been afflicted with a trouble that has been quite common at San Jose the past season which seems to be a partial paralysis of the back or hind parts, and while the appetite and general health is good the animal is unable to do much in the way of trotting and so far neither trainers or veterinarians have been able to do anything toward affecting a cure. Time appears to be the only remedy. Mr. Phippen has a good looking brown gelding by Welcome 2:10½ that can do a mile in about 2:18, the property of Jasper Paulsen of Palo Alto. But the best one, and he says the best trotter he ever drove is a five-year-old black mare by Chas. Derby 2:20, dam by Leo Corbett 2:29¾, full brother to Sable Wilkes 2:18, next dam by Whippleton, etc. This mare was bred at Oakwood Park Stock Farm, and as a two-year-old Ben Chaboya drove her a quarter in :37. She was purchased at one of the farm's sales by F. Hahn of San Francisco and driven by him on the road till July 28th last when she was given to Mr. Phippen to train. On October 15 she worked a mile in 2:18¾, last half in 1:03¾, last quarter in :31½. October 29th with just three months' work she stepped a mile in 2:13¼, last half in 1:05, last quarter in :32. She surely looks and acts like a high class trotter; is good headed, never makes any mistakes, 15½ hands high, well and strongly made in every particular with a clean, sound set of legs, good gaited with considerable action all around, but wears only elbow and quarter boots. She is without doubt one of the best green trotters in California, and worth all the money it has been reported has been offered for her.

My old friend John Gordon has twelve head in his stable mostly youngsters. A six-year-old gelding by Diablo 2:09¼ dam by Memo, son of Sidney 2:19¾, is his own property, and an extra good prospect. He has been unable to do anything with him this past season on account of the same trouble that affected so many others there. But he is rounding to now and Mr. Gordon thinks he will soon be all right again. He worked a mile in 2:15½, a year ago, with only one season's training. He is a good-gaited steady-going trotter when right and a 2:10 prospect. I hope he will get good enough to realize his owner $10,000 or more, no less. In this stable are three good-looking fillies by McKinney, a three and two-year-old, full sisters, dam Mae Gill by Sidney 2:19¾, the property of E. W. Clayton of San San Jose. The other is out of a mare by Antinous 2:28, son of Electioneer, and owned by Wm. Rankin of Los Gatos. But the peaches and cream, the sweetest little thing that ever happened, is a yearling filly by Monbells 2:23½, dam Idlemay 2:27½ by Electioneer, second dam May, dam of two by Wildidle (thoroughbred), third dam the great old broodmare, Mayflower, who divides honors with Beautiful Bells as being the only mare to produce two trotters to obtain world's records, viz: Wildflower (2) 2:21 and Manzanita (4) 2:16. She is also the dam of eight producing daughters. This little miss who is owned jointly by Budd Doble and F. H. Moon of San Jose, is a bay of fair size and plenty of substance with all the quality of a thoroughbred. She is driven three or four miles every day but not worked for speed yet. I never saw a better gaited baby or one that moved with such a springy, elastic step. There is no doubt in the world but that she will make a fast trotter. It will come naturally, just as it does for a duck to swim. She can't help it. She carries the blood of Beautiful Bells, Mayflower, Wildidle and two crosses of Electioneer.

W. H. Williams has six or eight head. He has two good-looking three-year-old colts, one by Monterey 2:09¼, the other by Stamboulet 2:10½; a fast pacing son of Chehalis 2:04½ and a seven-year-old gelding by Prince Nutwood 2:12½, dam by Strathway (sire of Toggles 2:08½, John Caldwell 2:11¼, and grandsire of George G 2:06¼). This horse has a very strong speed inheritance, his sire being by Dexter Prince out of a Nutwood mare. He is a good-gaited, big horse, and with only six weeks' work trotted a half in 1:09, last quarter in :33; is good-headed and on the trot all the time. His owner desires to trade him for a well-bred broodmare [see ad. in BREEDER AND SPORTSMAN]. I saw him step a quarter last Saturday in :34¼ to cart with ease, first work since October 18th, when be got his record of 2:31 in a road race at Salinas. He ought to be worth a pretty good broodmare.

"Jack" Groom has several head. The pick of the lot is a two-year old black filly by Exioneer, dam Lilly Thorne by Electioneer; next dam Lady Thorne Jr. (dam of Santa Claus 2:17 and Navidad 2:22½. This is a large, well-formed filly, good-gaited and will make a trotter some day. I would like to own her sire for the price he brought in the New York sale a year ago, viz.: $100. He is one of the handsomest horses I ever saw, and if he had been given a proper chance would have made a fast trotter. As is well known, he was sired by game old Boodle 2:12½, dam Expressive 2:12½ (one of the fastest and gamest three-year-olds ever seen) by Electioneer; next dam Esther by Expresa, second only to Dame Winnie as the greatest thoroughbred dam of trotters. Under very adverse conditions he was trained as a three-year-old, and showed a quarter in :35 and a half in 1:14. He had the courage to try harder to trot than any colt I ever saw. Of his first crop of foals, which are now two-year-olds, I have seen several, and they show him to be a wonderfully impressive sire, transmitting his color, style, conformation, quality and general characteristics with more uniformity than any horse I ever knew. There are a number of them owned in California, and I predict that they will be heard from in another year or two. "Jack" has a green pacer that is working miles around 2:15, but I did not learn his breeding.

Wm. Hendrickson, of Geo. M. Patchen Jr. fame, has several head that are being handled by another old-timer, Chauncy Kane. I did not learn their breeding, but one, a good-looking and good-gaited gray mare, acts very much like a coming trotter.

H. Ward has several head including Daedalion 2:10 with whom he dumped the talent at Santa Rosa and the green trotter Rappede (trial 2:17) by Junio 2:22.

Last but not least to mention is the Nutwood Stock Farm stable. This stable has fewer members in training now than at any time during the season. They are, with one exception, all by Nutwood Wilkes and are receiving only light work. T. C., whose dam is by Director 2:17, next dam Lida W. 2:18¾, dam of Nutwood Wilkes, has been a little unfortunate, but is a trotter, and when he gets ready for the word will make them race to beat him. He has all the ear marks of a game race horse. Mamie R., full sister to John A. McKerron, is a good-gaited, busy-going trotter that has shown a mile in 2:16, last quarter in 0:31½. Gray Witch, three-year-old pacer, stepped a half in 1:05 a few days ago. She wears nothing but harness. A two-year-old filly, dam by California Nutwood is an unusually good prospect, having trotted miles better than 2:25; a three-year-old filly by McMcKinney, dam by Nutwood Wilkes is another bright prospect, having trotted a quarter in 31½ seconds. Quite a number of the Nutwood Wilkes family have made a good showing this past season. I know of three two-year-old trotters that have been miles in 2:25 or better. North Star got a record of 2:24½ and was second next two heats in faster time. He had had but about three months' training before the race. The two-year-old full brother to John A. McKerron showed two-minute speed and ability to step in 2:20 before his training was suspended. And, by the way, that colt is one of the few. He bears a very strong resemblance to his famous brother. A better looking, if anything, and just as good a gaited pacer as John A. is a trotter. A two-year-old grandson, Fire Fly by Nearest, paced a mile last July in 2:17¾. Another grandson, Cavalerio, got a record of 2:09½; his son, Cresco Wilkes, got a three-year-old record of 2:17 pulled up. Miss Idaho, a daughter, got a record of 2:11¼. Before the Salisbury horses went east last spring, Charley De Ryder trained a four-year-old Nutwood Wilkes filly twenty-three days and she paced a half in 1:05. Her dam is by Dexter Prince. She will make a very fast mare and no one ever saw a more handsome one.

As T. W. Baratow's stable is just outside the track I nearly forgot to mention him. He informed me that Nearest did a good business in the stud this past season, and that he has a two-year-old filly that can pace rings around Fire Fly (two-year-old trial) 2:17¾. An accident threw her out of training early in the season, but she is all right again, and he has begun working her a little. She did a mile the other day in 2:25½.

Alone who was unfortunately taken sick at the beginning of the racing season is better than ever before. She worked a mile in 2:07 lately with ease. Barstow told me that he would bet all he has on earth that she can step a quarter better than :27, as she has been timed an eighth in :13 it is very likely she can do the trick, and should when in order hit the 2:00 mark. A quarter in 27 seconds is a 1:48 gait, almost a running horse clip, very few pacers have ever shown that high rate of speed.

The two-year-old colt by Nearest, dam by Prince Airlie, that he has advertised for sale in the BREEDER AND SPORTSMAN is an extra good colt, all right in every way and ought to readily find a purchaser. As this letter is much longer than I intended to make it when I started to write I will draw it to a close and go vote for the winner, The ex-Colonel of the Rough Riders. C. C. CRIPPEN.

Notes and News.

Lou Dillon 2:01¼.

Major Delmar 2:01¼.

Both records without a wind shield.

Sidney Dilion goes east today. What will he hring?

Snyder McGregor 2:07¼ was purchased for $20 when a yearling.

W. A. Clark Jr. denies that he has purchased Bitter Root Farm.

Funston, the roan pacer hy Dictatus, has won close to $4000 this season.

Alta McDonald will train and drive Sweet Marie in her races next year.

Editor Hervey of the *Horse Review* cal's Grace Bond the Lou Dillon of tomorrow.

Not less than 250 horses will be wo^rked at Pleasanton during the coming winter.

P. W. Hodges has moved his string of trotters from San Jose to the Pleasanton track.

California trotters have won considerable over $100,000 on tracks east of the Rocky Mountaios this year.

Dan R. 2:01¾ that was touted as the greatest pacer in the couotry last spring, was a rank failure this year.

A few days' hard work when out of condition will iojure a horse more than a month's usage when all right.

The pacer Funston 2:09½ hy Dictatus, winner of two races at Memphis and in the racing stable of W. L. Snow, is owned hy A. Kaul & Son of St. Marys, Pa.

The old-time trotter, Sprague Golddust 2:15¼, now 21 years old, is owned by C. P. Mosher, Auburn, N. Y., and is said to he as vigorons as a four-year-old.

Millard Sanders has worked a two-year-old filly hy Axworthy 2:15½ a mile in 2:14¾ at the trot. She had no engagements and will not be started until next year.

Alcone 2:13¼ by Alcyone, adds five new performers to his list this year. He is owned hy Brook Nook Stock Ranch, Montana, the property of Mr. C. X. Larrahee.

There is one rule that managers of race meetings can follow and not go far wrong. It is to not put in the judges stand the men who show the most anxiety to get there.

It is reportod from Memph's that Ed Geers is doing well and will he out of the hospital in a few weeks although he will have to go to his Thanksgiving dinner on orutches.

Country Jay 2:10½ will have the best of attention durihg the winter, and will he placed in training early in the spring, with a view to campaigning him in the Grand Circuit next season.

Angus Pointer's mile in 2:04½ to wagon is the fastest mile ever pacod to wagon in a race The race, of which this was the second heat, is the fastest three-heat race ever paced to wagon.

What will the Legislature do with the State and District Fairs this winter? Something will have to be done, and a little wise legislation free from politics will accomplish much good for the State.

The "Missourian" a new racing play that had its initial performance in a New Jersey town, introduces a novelty in the shape of a trotting race with genuine trotters hooked to high wheel sulkies.

J. M. Myers, Louisville, Ky., has invented an "adjustable" horseshoe, for which much is claimed. and, apparently, justly so. A company with a $150,000 capital has been organized for its manufacture.

One of the hest prospects for a 2:10 trotter in California is Mr. J. B. Iverson's two-year-old colt North Star 2:24 hy Nutwood Wilkes. He is a big fellow and a grand looker, with all the earmarks of a great trotter.

Twenty-four horses won $1000 or more at the Memphis meeting. Grace Bord the most, $5000, by winning the Stock Farm Futurity. The average time of all the heats trotted and paced at the meeting was 2:09¼.

Before winding up the season's training of The Victor (3) hy Idolita 2:09¼, trainer Tozier stepped him a last eighth in 15¼ seconds, and his two-year-old filly Wildhells hy Monbells trotted a last eighth in 16½ seconds.

Milo Knox returned from Nome last week and will remain in California until the ice breaks up in the spring in that land of gold and extreme cold. He will take ahout twenty-five work horses with him on his return next May.

Alta Axworthy (3) 2:10½ will he raced but a few times next season. Owner Thomas thinks that in 1906, as a five-year-old, she should prove a still greater race mare than she has shown herself to be.

"Marque" sarcastically remarks: "It is the custom for the hookmakers to lose money, so no surprise is felt wheo they complain of losses sustained. Strange how these gentlemen continually lose hut are always eager for a chance to do husiness.

Chas. De Ryder, who was second only to Ed Geers as a money winning driver on the Grand Circuit this year, will leave New York for Pleasanton immediately after the Old Glory sale with a hig string of horses belonging to James Butler of the East View Stock Farm.

Some timers wait for the word "go" to he given hefore they start their watches This will often give a horse a record faster than he should have as the leaders are generally heyond the wire when the word is given. The time to start a watch is when the leading horse has his nose at the wire.

Diablo 2:09¼ arrlved in San Francisco last week by steamer from Portland, Oregon, nnd was immediately shipped to Woodland, where he will make the season of 1905. He is now owned hy T. E. Strong of this city and will be in charge of Mr. Crookham, a brother-in-law of the latter.

Dan Patch did not succeed in equaling his Memphis performance of 1:56 when he started at the Delmar track, St. Louis, Novemher 5th, hut he made the mile in 2:01 flat, which was a great performance and hroke the Missouri State record, which was 2:02¾ and had been held by his sire, Joe Patchen, since 1898.

Lady Ayers, a two-year-old filly by George Ayers, owned by Dr. Kellogg of Helena, Montana, recently worked a half-mile in 1:09 and a quarter in 31 seconds. The doctor does not intend racing her until she is five years old, and it is believed she will then he ahle to win some of the big stakes on the Grand Circuit.

A. L. Thomas, the well known trainer, puts the whole thing in a nutshell when he says: "If you want two-in-three or three-in five heats, I want the privilege of deciding which three of the five I can win, but as it stands the rules really call for every heat to he a dash, and the three-in-five is anomalous."

Wilque holds the unique record of having fallen down and yet won a heat. It occurred at the Island Park, Alhany, track. He fell in the first quarter, having been crowded into the ditch which does duty for the pole, and no damage heing done to horse or sulky scramhled up again and went on and won the heat.

The horsemen of Bangor, Me, are making preparations for an ice track this winter. Like the ice tracks in Canada this one will be on land and will be much easier kept in repair than those on the river. Forty or more horse owners in Bangor and vicinity have subscribed for the track and an association will soon be formed which will build an ice track.

Notice is given that the next regular meeting of the Board of Appeals of the American Trotting Association will he held at the Auditorium Hotel, Chicago, Tuesday, Decemher 6, 1904, at 8 o'clock P. M., for the transaction of such business as may properly he presented to the hoard for its consideration. All new applications aod written evidence must be received at that office not later than Novemher 19, 1904.

Mr. Henry Cowell, of this city, is the owner of two highly hred fillies which he will send to the well known trainer Hi Hogohoom, to have developed. They are a hay yearling filly hy Nutwood Wilkes dam Liska 2:28¼ (dam of Lisonjero 2:08¼, etc.) by Electioneer, and yearling filly, also a hay by Nutwood Wilkes, dam the great mare Expressive 2:12½ by Electioneer. Mr. Cowell purchased these fillies at the closing out sale of the Palo Alto Stock Farm held at Fred H. Chase & Co.'s last January. The first named is said to be a great natural trotter.

We are in receipt from Jacob Brolliar of Visalia, of a picture of his yearling pacer Rockaway, commooly known in that vicinity as Little Jim. This colt has only heen driven six half miles hetter than a 3:00 gait. One was in a workout in 1:27. The next three were in his first race, which he won, pacing the third heat in 1:20¾. One week later he started at Tulare City and won the first heat of his race in 1:16 and the second in 1:12, which made the sixth time he ever was driven faster than a three minute gait in or out of a race up to that time. A few days after his last race Rockaway stepped an eighth in 16 seconds with such ease that Mr. Brolliar is confident he can do the same distance in 15 seconds on a good track.

L. V. Harkness' great mare, Fereno, 2:05½, and the only performer aside from Grace Bond that ever won hoth the two and three-year-old renewal of the Kentucky Futurity, and Ozanam 2:07, the Transylvania winner of 1902, in which she defeated the now champion trotting gelding, Major Delmar, will hoth end their racing careers at the close of this season and he retired to the stud at Walnut Hall Farm. Fereno will be bred to Walnut Hall 2:08, and it will be the first time on record that a colt and filly winner of the two-year old Futurity were ever mated together. Ozanam will be bred to Moko, the sire of Fereno. When these two mares are retired Walnut Hall Farm will have the distinction of having in the stud the two fastest race record mares ever at one time in the hreeding ranks of any trotting establishment in Keotucky.

Major Muscovite has been shipped over 10,000 miles hy freight this season. His mile in 2:08 at Saugus, lowering the track record, is equal to a mile in 2:05 over a track like Readville. Out of 18 races paced this season he won 13 first moneys and was second four times.

E. Stewart has purchased the Occidental Horse Exchange formerly conducted hy William G. Layng, and announces that he will conduct auction sales of livestock including thoroughbred aod standard hred horses. Mr. Stewart has arranged with Mr. W. W. Mendenhall to take full charge of this department. Mr. Mendenhall has had much experience in this line and being thoroughly posted in regard to the horses of this Coast will prove a valuahle acquisition.

At Oakley Park track, hefore retiring his stahle of trotters to winter quarters, T. H. Griffin sent several of them fast miles for the entertainment of a few friends who were visiting him. Among the horses worked was the gelding Black Bart 2:17¼ be Rohin He trotted the mile in 2:08¾ and the last half in 1:03¾. He is said to be sound and all right now, and it is confidently expected will get a race record better than 2:10 next year.

Monroe Salishury returned from the east last week and is husy getting things ready for the East View Farm horses that will be shipoed to California right after the Old Glory sale. Quite a numher of mares and two or three young stallions from the East View Farm will he seot to the old Valensin Farm near Pleasanton which Mr. Butler purchased last year. Mr. Salishury says that Pleasanton is the only place to train horses for the Grand Circuit and he expects to see the world's record breakers of the future get their early work on this famous track.

The Greymouth Trotting Club of New Zealaod, has inaugurated a stake of one thousand pounds for foals hred in 1905. The stake is patterned after the Pacific Breeders Futurity of the Pacific Coast Trotting Horse Breeders Association, and the conditions are almost identical. The BREEDER AND SPORTSMAN suggests to its numerous New Zealand readers that they patronize the New Zealand Futurity No. 1 as liherally as possihle. Nothing encourages the breeding and racing of trotting aod pacing horses like good stakes of this description We congratulate the Greymouth Club on its enterprise.

The service fee for McKinney 2:11¼ has been fixed at $300 for the season of 1905. Mr. William Simpsoo, his new owner, says: "McKinney's fee is entirely independent of his cost, for his actual merit and demonstrated quality as a sire combine to make his value lay over that of all other living stallions to such an extent as to make it impossihle to place his fee at lower figure and do him justice. I will not permit him to he bred to any mare that I am not convinced has by breeding and individual merit a most excellent chance to produce a world heater. As soon as his colts are old enough they will be handled by a most expert trainer, and no effort will be spared to maintain his pre-eminence and increase the value of his get."

If there are any drivers in the United States who imagine that lines are hard here for those who lay up a heat or drive foul once in a while, they should rememher that there are places where the ways of the race track transgressor are considerable harder than than they are here. The last issue of the *Weekly Press*, published at Christ Church, New Zealand, contains a list of drivers disqualified during the past month. The list is quite long and aside from many who are harred from racing for non-payment of entrance money, there are several set down for *five years* for foul driving, and *two years* for using abusive language. As there are several cases of life sentence for ringing, the extreme penalty does not seem to have stopped this practice in New Zealand.

The big sale of trotting and pacing horses at Chicago week hefore last, did not result in big prices except in a few instances. Top price was reached when the mare Izetta 2:13½ was offered. After some lively hidding she was knocked down to Monroe Salishury for $5000. Mr. Salishury was acting for J. H. Rogan of New York. Izetta is hy Pactolus 2:12¾, dam Shadannie hy Shadeland Onward. She is expected to beat 2:10 considerahle next season She will prohably he trained at Pleasanton this year. You Bet 2:07, the McKinney pacing gelding sold for $530, and Ollis McKinney 2:16¼ by McKinney out of Princess hy Electioneer hrought $410. She is eleven years old. Ellen Houser, the ten-year-old mare hy Truman out of Elsie hy Gen. Benton sold for $350 The attendance was good, the prices generally were satisfactory and the bidding lively.

At the Providence, Rhode Island, track, a few days ago, the horsemen were discussing Prince Alert, when one of them said: "He's a remarkahle horse, just the same. A few weeks ago they had it that he was getting foxy and wouldn't try; didn't finish out his miles. I notice that most of them slow up a little in the home stretch when they've been down to the half in less than 60 seconds, and a horse that comes within an eyelash of shading the two minute mark. as he does every time he's asked, is game enough. But it's his career that I'm thinking of. He's no spring chicken, and years ago, when he was out on the country rings, they did all kinds of things to him, until neither he nor anybody else could tell whether they wanted to win or get distanced with him. I saw him lose once not fifty miles from this city, when he could have paced the track twice while the field against him was going round once, and there wasn't money enough, all told, in the pool hox to huy him a blanket They came close to spoiling him forever, but he's still on the turf, and it takes a mile hetter than 2:01 to stop him."

225 THIRD PAYMENTS IN BREEDERS FUTURITY No. 4.

$6000 Stake for Foals of 1904 Already Has $3436 to Its Credit.

That the subscribers to the Pacific Breeders Futurity Stakes are keeping up their interest in these rich events, the values of which are guaranteed by the Pacific Coast Trotting Horse Breeders Association, is evident by the number of payments which are made in them. On the first of this month third payments in Stake No. 4, $6000 guaranteed for foals of 1904, were made. There were 403 original entries in this stake, and of these 301 had second payment made on them March 1st, this year, and on November 1st 225 third payments were made These payments have put a total of $3436 in the stake, which is an assurance that the stake will be worth more than the amount guaranteed. Those on which third payments have been made are the following:

A Prophesy Fulfilled.

[New York Herald]

When the racing season of 1904 was about to open, the *Herald* prophesied that it would be the greatest on record in America, no matter from what point you might choose to view it—the liberality of the racing associations, the quality of the horses, the clean character of the contests or the interest manifested by the public.

The forecast has been verified, for in all these respects the season now drawing to a close in the north is the most brilliant within memory of any veteran of the American turf and track.

Success has been written all along the season's record. Never were so many horses in training as were undergoing the finishing touches of preparation in the spring, and summer days saw a succession of fields that provided some of the grandest contests ever witnessed here on the racing and trotting tracks of the country.

The ever increasing number of horses of the highest class is due to the liberality of the racing associations under the jurisdiction of the Jockey Club and the generous spirit of those in charge of the Grand Circuit, the rich prizes offered encouraging the breeding industry everywhere and multiplying the candidates for the great stakes of the season.

The conduct of affairs by the associations and the safeguarding of the private and public interests of the race course by eliminating as far as possible every undesirable element have drawn hundreds of owners to the entry lists who had previously held aloof, and increased by tens of thousands the attendance of a public confident that the racing would be fair and square from start to finish.

It is indeed the golden era of the horse. And though the all but numberless breeding farms are sending to almost any one of the great race meetings as many horses of the first rank as formerly would have been the total for the whole season the prices easily commanded by the best of them remain as high or even higher than ever. The recent sales of racing and harness horses readily prove this to be the fact. A most agreeable and significant incident, too, of the purchases was the class of men who were the buyers. It showed that racing interests are daily passing into stronger and better hands; that wealthy amateurs are coming to the front and assuming personal part in active racing life, as was the case in our grandfathers' days, when it was called and was indeed the amusement of gentlemen and "the sport of kings."

This last mentioned view of the situation is emphasized by the increasing number of so-called matinee races, where the fastest trotters in the world are entered and driven by amateur owners, and in the hunt club meetings—more numerous than ever—at which gentlemen riders take part in the steeplechase and flat races to the delight of assembled multitudes.

It is no wonder that lovers of the horse are enthusiastically shaking hands with each other over the result of the summer's sport, recalling the pleasure they have had at the races and looking forward to even greater things when the season of 1905 is ushered in.

Jackson's Napa Soda does not tangle the feet

News and Gossip of the Gallopers.

The latest hit of news of interest to hreeders is to the effect that John Mackey, Walter B. Jennings and Irving P. Diggs have formed a co-partnership and purchased the Curtis ranch of something like 500 acres, situated in Yolo county, four miles from Knight's Landing and five miles from Woodland. They will call their establishment "Yolo Thoroughhred Farm," and will start with ahout fifty hroodmares, including the celehrities Angelique, Eye Lash, Hinda Dwyer, Middie Dwyer, Princess Noretti, Ricardo, Scarlet Rose, Solitude and Torsina. The story was that the Monument Ranch recently vacated hy Ed Corrigan had heen purchased, hut it proved erroneous. John Mackey, known first as "Patchen John" in the trotting horse world, and latterly as Superintendent of Rancho del Paso, the world's greatest thoroughhred hreeding estahlishment, is known all over this country as a clever and shrewd horseman. Walter B Jennings has trained a host of racing celehrities for J. B. Haggin during the past ten years, and previous to that trained many good racers for himself in Missouri and the far East. Mr. Jennings hails from Virginia, and just previous to hecoming trainer of the Rancho del Paso horses owned quite a hreeding estahlishment in his native State. Irving P. Diggs, a Yolo connty stockman and hreeder, owned Lily Diggs, hy California, and hred Diggs, Sutton, Arhaces, Olinthus and Diomed. His father was prominent as a racing man in California forty years ago. Yolo county was where Theodore Winters emharked on the hreeding ship, and there he hred many grand race horses. Jim Douglas, Red Cloud and Etta also come from that county, where the Dinsdales and Adamses used to hreed extensively, and where the ranch of the late Charles Fair was situated. The fact that John Mackey is going into breeding with the ahove-named gentlemen, and the further fact that many of the most noted thoroughhreds helonging to J. B. Haggin have heen transferred to Elmendorf and other of the Haggin holdings in Kentucky lends color to the helief that most of the hreeding operations, if not all, of the greatest of all horse-hreeders are to he shifted from "the land of sunshine" to "the Grand Oid Commonwealth," and the formation of the Mackey-Jennings-Diggs comhination marks the heginning of the end of Rancho del Paso as a stock farm of international renown.

Henry T. Oxnard, the sugar king and prominent candidate for the United States Senate from California, has purchased Golden Maxim, a son of Golden Garter and Miss Maxim that showed stake form and then hroke down. The royally-bred young horse will he placed in Mr. Oxnard's stud near Napa, Cal. There the multi-millionaire will have some royally-bred mares, including Balance II, Bracelet (dam of Bangle and Limewater), Ganges, Imp. Marcianesi, Miss Landeman and Imp. Ridicule.

There will not he as many thoroughhreds in training on the Coast this year as last hy fully two hundred, hut enough to insure good racing at any rate. Besides, it makes matters more satisfactory to the smaller owners, who have had their entries thrown out times without numher in the past, when there were 1400 horses in active training in this vicinity and 800 would have sufficed. The racing at Los Angeles helped the small owner out considerahly last year, and now it looks as if there would he perhaps 650 horses here and 500 at Ascot. When it is considered that only ahout 4000 horses start in races in this country in a season and that 1150 of this numher are in training in California alone, the showing is more than good. With two tracks at New Orleans and two at Hot Springs, requiring at least 1855 horses to carry on their races for say four months, it will he seen that 3000 of the 4000 horses in training in America must he hrought into play, and it also demonstrates that only ahout 1000 are left, exclusive of the coming two-year-olds, counting those that never race in the winter and those thrown out of training on account of hreak-downs and illness of various descriptions. At Union track last season over 600 horses started in races, and as these gallopers can only start at Union and over the tracks of the far East, it does not take much of a mathematieian to figure that the New Orleans and Hot Springs tracks need these horses, and need them hadly. Hence an early restoration of the Union horses to good standing hy the Western Jockay Cluh is ahsolutely necessary at an early date, and those who claim to "know something" declare the reinstatement of these men and horses will come at the Decemher meeting.

The dispatches have it that Ed Corrigan has heen in New Orleans recently trying to persuade Messrs. Bush and Renaud to divide dates with H. D. ("Curly") Brown, therehy saving a world of money and worry that would he expended were there a turf war in the Crescent City this winter. Incidentally, it would save the formation of a rival circuit and jockey club in the Middle West and South that would have sufficient financial hacking to at least give the W. J. C.—a none too harmonious organization—an awful fight, and perhaps a licking. Mr. Corrigan knows the situation as well as anyone, and the recent "track war" at St. Louis, where, in a World's Fair year, the Union track people lost $60,000 and the Fair Grounds-Delmar folks fully $240,000, is a sign high enough and large enough for all good race track managers to see and ponder over for a while.

W. D. Randall secured a settlement in full from the railroad company for the killing of his racehorses, Axminster and Clivoso.

Among the late arrivals of people identified with racing we note E. T. Martin, Sam Shaen, Starter Dick Dwyer, Alton Edom, "Western Al" Smith, Stirley Everhard, and Jockey Eddie Dominick, who will "do" 107 pounds or less this winter.

Among the riders who will sport silk today, the opening, are W. Davis (a new star), Dominick, Larsen, Greenfield, Frank Kelly, Crosthwaite, Sullivan, Joe Jones and McLaughlin. The latter has come to the front with a rush since Schreiher let him go, and it shows that the German may know good beer when he sees it if he doesn't know a rider when he ohserves one. McLaughlin's engagements here will he made hy Gil Summers.

The opening handicap, at one mile, will hring out ot least a dozen starters, and if they are on edge the chances of Alhula, Elliott, The Mighty, Claude, Gold Money and Fossil look hest to me, though perhaps Dainty is "the class" of the race.

RALPH H. TOZER.

Boise Races.

October 16—Trot or pace, mile dash to wagon, purse $100.

Time—2:19, 2:17¼, 2:17¼.

Sweet Marie may he accounted a physical giantess. After the terrific second heat in the Transylvanis, she stood in the paddock lashing out with her heels and giving no sign whatever of heing distressed. Tiverton, in the meantime, stood with his flanks heaving and his eyes dull and colorless. The story of the third heat was told plainly in the paddock, and it seems a strange thing that so many who het large sums on the races pay so little attention to the doings in the paddock, where many a story like the above is told hy the horse's condition. Tiverton is certainly a wonderfully game gelding, hut physically is not the equal of the hig mare. She is indeed a marvel.—*Horse Review.*

Strike!—if they don't give you Jackson's Naps Soda when you ask for it.

Santa Maria Meeting.

SANTA MARIA, Novemher 4—This was the most successful day of the race meet, the weather was good, the crowd large and the hetting lively. The half-mile dash was the most exciting and caused the heaviest hetting. Summaries:

First race, mixed trot and pace, 2:25 class—Miss Mahel won, Si S. second, Amidis third. Best time, 2:29¼.

Second race, 2:40 class, trotting, mile heats—Miss Thompson won, Highness Bismark second, Ward B. third. Best time, 2:47.

Third race, running, three furlongs and repeat—Resperator (Ward) won, Paloma (Cross) second, Detective was drawn after first heat. Time, 0:37.

Fourth race, running, half a mile dash—Esperanza (Pico) won, Don Garr (Cross) second, Dodo (Browning) third. Time, 0:51. Pearl (Ward) also ran.

SANTA MARIA, Novemher 5—Today ended the most successful and interesting races ever held here. The hetting was good and the crowd large. Summaries:

First race, mixed trot and pace, free-for-all—Hanford Medium won, Ben Corhett second, Miss Mahel third. Best time, 2:20.

Second race, running, quarter mile and repeat—Pepper (Ward) won, Dodo (Browning) second, Joe B. (Higuera) third. Time, 0:50.

Third race, running, half-mile and repeat—Resperator (Higuera) won, Don Garra (Cross) second, Esperanza (Pico) third. Time, 0:50.

Lewiston, Idaho, Harness Races.

Pacing, special, purse $150.

The Champion Sire.

Hear what Arthur Caton Thomas, an eastern expert has to say of McKinney: "McKinney's recent sale, for $50,000 to William Simpson of New York, and the sensational performances of his daughter, Sweet Marie 2:04¾, have clinched his claim to the title of "World's Leading Sire of Extreme Speed." He is the only sire of six 2:10 trotters. At 17 years of age he is the sire of eleven in 2:10, thirty in 2:15, sixty-four in 2:30. He is a sire of the world's champion trotting race mare, and also the champion four and five mile trotters. He is the leading money winning sire of 1904—his get having won over $30,000. His daughters have produced two 2:10 performers this year. Forty-seven per cent of his performers are in the 2:15 list—a larger per cent than is to the credit of any other leading sire. Seventeen and a half per cent of his performers are in the 2:10 list—a larger percentage than is to the credit of any other leading sire. He is the sire of thirty in 2:15—no other sire of his age has half as many."

There is a movement on foot in Cincinnati for the purchase of Oakley Park hy the Hamilton County Agricultural Association, hut this will in no way affect the Grand Circuit meetings to he held there during the next five years. The present management of Oakley Park will retain the right to hold their annual Grand Circuit meetings and reserve a ten years lease for this purpose if a deal is made with the agricultural society.

The racing men ought to try the Hart Apartments this winter; 3 and 4 rooms, private haths, telephone, steam heat, first class. 750 Ellis street.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

Sept. 1-Oct. 15-Feb. 1—Open season for taking steelhead in tidewater.

Nov. 1-April 1—Trout season closed

Sept. 1-May 1—Open season for shrimp.

July 1-Jan 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct 16—Close season in tidewater for steelhead.

Sept. 10-Oct 16—Close season for catching salmon.

Oct 15-Nov. 15—Close season for taking salmon above tidewater.

Nov 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and [illegible] hen.

Oct 15-Feb. 15—Open season for quail, ducks, etc.

Nov. 11, 12—California Game and Fish Protective Association. Annual meeting. Visalia, Cal.

SUISUN SHOOTING CLUB ORGANIZED.

The Court House Shooting Club is the name of a new sporting club that has been organized at Suisun with the following members: T. V. Corcoran, T. J. Lenahan, Eugene A. Losh, Bert Sheldon, Harry Brown, Jake Anderson, Oscar Cravon, Fred Jones, Clint Owen, Wm Mayfield, Tom Gronnan and Albert Kerr. The club has secured preserves on the Lang and Lemon marsh tract, upon which are located some good ponds. Last Sunday Messrs. Corcoran, Lenahan, Losh, Sheldon, Kerr, Owen and Craven tried their luck at these ponds, and while the birds were none too plentiful, still they bagged about thirty-five ducks.

OBJECTIONABLE QUAIL LAW REPEALED.

As one result of the recent organization of Santa Cruz sportsmen in the interest of rational county game protection laws, the county ordinance which shortened the local quail season one month has been repealed. Instead of the open season on quail beginning on November 15th it is now for the same period as prescribed by the State statute Had there been any necessity for cutting down the open season the law would have been generally accepted.

Lion's Napa Soda is sold in every city, town and hamlet in the State.

Finest Herd of Buffalo in the Country at Corbin Park.

As I sit here in my home in the mountains of New Hampshire, I see through my study windows, to the east the wondrous blue hills of the Croydon Range, stretching away to the north and south as far as the eye can reach. Along the nearer slopes there are great belts of hard-wood trees, clothed in all the beauty of New England autumn foliage—in raiment of crimson, of purple and of gold. Running through them in places there are strips of dark evergreen forest, mostly spruce and pine and hemlock, which extend upward and cover all the peaks and ridges. And above all there is a sky of heaveoly blue, across which is sailing a fleet of white and fleecy clouds. This side of the mountain slopes, and extending to the very border of my garden, there are great stretches of rolling land, almost bare of trees, covered with grass which as this season is light brown in color, and divided by living, leaping trout brooks, whose liquid music comes to me through the open window of my study, writes Ernest Harold Bayoes in the Boston *Herald*. This is the view I have of the Blue Mountain forest, known to many as Corbin Park, the largest and finest fenced game preserve in America.

In this vast inclosure of 24,000 acres there are hundreds of deer and elk and moose, and there are wild boars, too, by hundreds, but what is of far more importance to the people of this country, is the fact, that in this great park is preserved the largest herd of pure-bred buffaloes to be found in any inclosure in the world. This fact is of special interest at this time, when our government and the intelligent people all over the country are being urged to take the last chance to save from total extinction one of the grandest if not the very grandest hoofed animal which ever trod the earth.

That the million of buffaloes which darkened the plains of the West less than 35 years ago were shamefessly butchered to swell the purses of a few unscrupulous men is one of the darkest blots on the history of our country, and it has disgraced us in the eyes of the other civilized nations of the world. For years it was supposed that the buffalo was gone. and in truth there seemed to be no possibility of his survival, and that we now have one more chance to save this splendid creature from total extinction is due entirely to the efforts of a handful of able and public-spirited men like the late Austin Corbin, the founder of the Blue Mountain Forest Game Preserve.

People are so used to thinking of the buffalo as belonging peculiarly to the West, and the owners of Corbin Park are so modest concerning their own achievements, that comparatively few people even know of the existence of this great herd. Of course the United States government and all authorities on the buffalo know all about it, but within the last week I have read one magazine article and one newspaper article concerning the last surviving buffaloes, and in neither was there even the briefest mention of the Corbin herd.

In the year 1890, the late Austin Corbin, who had just fenced his large game park near Newport, N. H., established there a herd of about thirty buffalo of the finest stock, with a view to preserving some of the last survivors of a fast-vanishing race from total extinction. They were taken off the cars at Newport, and driven between five and six miles along the county roads to the park, to the great astonishment of many of the farmers, who had never seen buffaloes before, and who mistook these huge shaggy beasts for some new breed of cattle which Mr. Corbin had imported.

The little herd was allowed to roam at will over Croydon mountain and the plains which surround it for seven months of the year, and during those seven months the animals got their own living, and were no care to any one. But the winters in New Hampshire being long and severe, it was necessary to feed them on hay during the remaining five months, and as a matter of convenience they were yarded during these months in smaller inclosures, near the barns where the hay was stored.

All went well with them until 1896, when the herd had increased to 75, and it was decided to ship 25 head to Van Cortlandt Park, New York. Owing to bad management those 25 became so diseased that they either died or had to be shot. This constituted the most severe setback which the herd has ever sustained. The 50 which were left in New Hampshire continued to thrive, and in 1900 it again numbered 75, and from that time until the present day there has been a steady increase, and now the herd numbers over 160 as healthy and as handsome buffalo as ever graced a western prairie or gladdened the eye of a hungry Indian.

Even as I write I see from my window this splendid herd grazing on a hillside not far away, their dark brown bodies in strong relief against the light brown grass. For a month or more they have been wandering on the other side of the mountain, but now they are back again, and we shall enjoy the sight of them perhaps for days to come. Something has startled them, for they have stopped grazing and have raised their heads in alarm. And here they come down the mountain side like a charge of cavalry, their tails in the air, and their humps rising and falling as the animals move on with their peculiar bounding movement, which carries them easily forward at a speed with which we should hardly credit such ponderous animals.

They come like a landslide, the earth trembles beneath their mighty hoofs, and the sound of their coming is like the roar of an avalanche. As they near the level ground below they gradually slacken their speed, the roar of their hoof-beats moderates and dies away, as the buffaloes finally come to a halt on a grassy plain which borders my garden. And for the hundredth time I must go out to admire anew these picturesque creatures which form the most interesting link we have, connecting the 20th century with the early history of our county—with the history of the Indians and the pioneer settlers.

There are many calves scarcely six months old, with innocent faces and absurd little horns, which must cause their mothers some discomfort, for these husky babies are as yet unweaned. Then there are handsome young spike bulls and heifers and scores of other buffaloes of all ages, up to those grand old patriarchs with deeply-curved horns and long black beards, whose shaggy heads, if mounted (which Heaven forbid), might be worth anything from $500 up

For a moment I forget that I am gazing on almost one-fourth of all the living buffalo, and in imagination I ride with Col. Dodge for fifty miles across the plains through a single herd which numbered 3,000,000 head. And I stand with Catlin in an Indian village, and watch the braves don their masks, each made from the skin of a buffalo's with the horns upon it, and see them join in the "Buffalo dance," that weird ceremony performed in order "to make the buffalo come." And I see the naked Indian hunters, astride the bare backs of their ponies, riding after the shaggy monsters of the plains, shooting them down with bows and arrows. I see, too, a herd of buffaloes standing in the snow, watching with disdain the approach of a big gray wolf. And I see what the buffaloes did not see—the sinewy hand of an Indian creep out from the the shoulder of the wolf, and a long arrow, which soon whistles to its mark, and causes the biggest bull in the herd to sink upon his knees.

Then there is a change of scene, and I see the white butchers come, and by a series of brutal massacres never equalled by the people of any nation which pretends to be civilized, wipe the buffaloes from the earth, while America stands by with folded arms and watches the practical extermination of one of the grandest animals of all time. For a moment my heart sinks, but as I come back to the present and looking up see the vigorous creatures before me, a new hope is born for here is proof that the buffalo may yet be saved, if the American people will but stretch forth a hand to save him.

Given one condition—a considerable area of land over which to roam—buffaloes are not difficult animals to keep. They are quite as easy to rear and less expensive to feed than domestic cattle and in the hands of men wealthy enough to stand the initial expense buffalo farms could be made profitable in almost any of the states north of those which border on the gulf.

In the first instance, the United States government should be most strongly urged to establish several small herds in different parts of the country, so as to avoid all possible chance of a large number being wiped out at one time by contagious disease. One such herd has already been established in an inclosure in the Yellowstone National Park, under the management of C. J. ("Buffalo") Jones, and this has doubled in numbers in a remarkably short time. If from four to six other herds of say fifty animals each were bought and maintained in the same way, the future of the buffalo would be assured. the day would soon return when a buffalo robe could be bought for less than $150, and the American people would have freed themselves from the charge of having allowed their grandest-looking and most valuable native animal to become extinct.

The buffalo is, under ordinary circumstances, a docile animal, neither aggressive nor combative, but W. A. Richards, the commissioner of the general land office, once had an experience which went to show that when aggravated they are dangerous. "I found that ordinarily a buffalo, like any other wild animal with which I have had experience," he says, "will run from a hunter when given opportunity and that when wounded it will not charge a man from a greater distance than about forty yards. On one occasion I met one which was an exception to this rule, however. I was hunting on foot with a Henry rifle. Buffalo were not plentiful in the locality but I finally sighted an old bull lying down on the plains.

"Hunting on foot, I needed meat badly and could not afford to let this old fellow get away. I worked around directly behind him. Buffalo are not wary when lying down and I approached to within 150 yards, when I concluded I was about as close as I cared to be, took aim and fired My bullet struck a rib, made a slit in the hide and did no further damage. The old fellow jumped up and started to run at right angles to the line I was following, giving me a good shot at his side. I fired, but having underestimated the distance the ball dropped and it struck just above the hoof of the fore leg. He then turned and came straight for me. There was nothing for me to do but to hold my ground and shoot.

"I could hear every ball strike him. He came on without the least hesitation and I kept shooting as fast as I could, but after a few shots I became alarmed respecting the number of cartridges remaining in my magazine. I had no time to see whether I was throwing in a cartridge every time I threw down the lever. Just as I was about to pull the trigger for another shot he stumbled and fell down. He was so near I could have thrown my hat on his horns. The old fellow certainly presented a most terrifying aspect. I found two or three bullets in his foretop, flattened on the skull, while the ball which killed him had passed along the side of the neck and entered the body between the neck and the shoulder blade. But for that fortunate shot, this story would never have been told."

Pacific Coast Derby.

Second forfeit was paid on November 1st on the following nominations to the Pacific Coast Field Trials Club's twenty-second annual Derby:

SETTERS.

J E Terry's orange and white bitch Lady Like (Orion–Terry's Lady).

Same owner's orange and white dog Rival; same breeding.

Same owner's orange and white dog Romp; same breeding.

Same owners white, black and tan dog Kenwood (Kilgarif–Ione S).

Same owner's white, black and tan bitch Kilona; same breeding.

Same owner's white, black and tan bitch Gleam Galore (Marse Ben–Mecca II).

Same owner's white, black and tan bitch Dainty (Count Whitestone–Mecca's Lady).

John H Schumacher's black and white dog Sir Roderick (Detroit Joe–Dolores).

Same owner's black and white bitch Katherine M; same breeding.

C W Coggin's black, white and tan bitch Lady Destine (Ch. Lady's Count Gladstone–Sport's Destiny).

A H Nelson's black, white and tan bitch Ramona; same breeding as preceding.

W W Van Arsdale's white, black and tan bitch Modesto (Detroit Joe–Countess Mark).

Same owner's white, black and tan dog Mariposa; same breeding.

Same owner's white, black and tan dog Mojave (McCloud Boy–Rod's Lark).

M Lawrence's white and lemon bitch Youley (Stamboul–Ruby 5th)

Rose & Christensen's white, black and tan bitch Del Rey Bell (Cal. Bell Boy–Countess Mark.)

POINTERS.

W B Coutt's liver and white dog Bolin's Duke (Alford's John–Florence Fauster).

Same owner's black and white bitch Olive Blossom (Bang Up–Miss Rip).

A Gregory Cadogan's liver and white bitch Chequite (Dr Daniels–Fan Go).

Mt. View Kennel's liver and white bitch Fandango; same breeding.

Same owner's lemon and white bitch Dotsom(Jingo's Light–Spring Dot).

C E Worden's liver and white bitch Betty Treadwell (Dr Daniels–Senator's Mistress Nell).

J W Flynn's lemon and white bitch Nellie P ((Dr Daniels–Senator's Mistress Nell).

Same owner's lemon and white dog Romp On; same breeding.

Same owner's black and white dog Burbank; same breeding.

Stockdale Kennel's black and white dog Bob White (Cuba's Zep–Nellie Wilson).

Same owner's black and white dog Cuba's Japan (Ch Cuba of Kenwood–Winnipeg Fly).

Same owner's black and white dog Cuba's Tempest; same breeding.

Same owner's liver and white dog Check Mate(Cuba Jr–Bow's Daughter)

Sixteen Setters and thirteen Pointers in the foregoing list of entries show a plethora of class and quality that should make the stake a memorable one —conditions of weather and grounds, and birds being in evidence, to bring out the working abilities of the dogs, of course being more or less favorable. Katherine M. and Fandango were second and third in the Pacific Northwest trials last month.

The Gun Dog.

It has often been stated that the modern breeds of the dog were gradually evolved from crosses between the dingo, the wolf and other carnivora of a similar nature. Doubtful though this point must necessarily remain, all facts and researches go to show that the varieties were primarily produced by natural selection and by the influence of their surroundings Differences in climate and food tended toward the evolution of distinct breeds, and when eventually the wild species were domesticated by man the varieties were multiplied at will, according to the purpose for which they were required.

In pre-historic times the dog was the companion of the ahoriginal hunter, and was used for tracking and killing game, as well as for guarding his master from the steady approach of an enemy, and it is at this point that the evolution of the gun-dog begins. Throughout the ages man naturally chose the fastest and most intelligent animals to assist him in his search for food, and a keen noso has always been regarded as indispensahle for this purpose.

We are, however, at present concerned only with a limited number of species, namely, those now used in connection with modern sport. Strictly speaking, the Deerhound might be classed in this category, but space will only permit us to deal briefly with Pointers, Setters, Retrievers and Spaniels, although Terriers, Dachshunds, Beagles and others are often used for rabbiting and working in concert.

Pointers first appeared in England about the year 1720, when shooting birds on the wing first came into vogue. A certain Baron Bechill is said to have imported the first Pointer from Spain into Norfolk. Later, Colonel Thornton crossed the Spanish Pointer with the Foxhound, and from this cross the modern breed has descended. At the present date Pointers vary very considerably in color, though the liver and white and lemon and white are varieties perhaps most commonly seen. Orange and white, black and white, or even pure black specimens are not unknown, and one of the best down-wind workers in the writer's experienre was of the last named variety Color is immaterial, but in selecting dogs, especially for breeding purposes, the greatest care should be taken to choose well-formed specimens. No dog requires so much space for the lungs and interior organs as Pointers and Setters, and well sprung ribs are indispensable in connection with a deep chest and strong, muscular loins. The legs should be straight, and the thighs perfectly curved and symmetrical. The dog must have a good head and eye, wide nostrils, and compact feet, neither spreading nor arched; sloping shoulders, with the blades coming close together, the mouth neither undershot nor overshot, but with a broad level muzzle. These qualifications are necessary for all sporting dogs which have to endure hard work, and especially for Pointers, Setters and Retrievers. The tendency of breeders is to select the sire and dam mainly for producing progeny which will shine on the show bench, and utility is in many cases sacrificed to looks. In Pointers and Setters this is hardly so noticeable as in other varieties, but we see it in Retrievers and Spaniels, and the show specimens of these breeds are often deficient in nose, endurance, and other necessary qualities.

Of Setters there are three varieties—the English, the Gordon and the Irish breeds. The former is black or blue and white, orange and white, black, tan, and white, lemon and white, or liver and white in color. Solid colors and patches have in course of time given way to the distribution of the colors in small spots or "ticks." The Gordon is black and tan and the Irish pure red or red and white. The latter is somewhat lighter in build than the other, and rather more graceful in outline, but all three are conspicuous for beauty, and have their distinctive peculiarities. Setters are less suitable for severe work in hot weather than Pointers, but the latter are more liable to suffer from cut feet and torn claws than their long-coated companions. The Setter was formerly known as the Spaniel, but since the development of the varieties of working Spaniels this name has been applied to them alone. Setters were used earlier than Pointers, certainly in connection with falconry in the 16th century, at which period no man could keep a "setting dog" unless he possessed land to the value of £10 per annum. Early in the last century the Laverack breed was introduced, but the strain has now been entirely lost, although the "ticked" varieties of the English Setter generally owe their distinction to a cross with the Laverack.

The flat-coated Retriever has to a great extent ousted the burly Labrador breeds, although the two latter are greatly in favor with wildfowlers or for rough or mixed shooting. The curlies are probably produced from the Irish Water Spaniel and the Poodle, and the flat or wavy-coated variety from a cross between the Labrador, the Collie and the Setter. The liver specimens which are occasionally met with are produced by a "throwback" to the Irish Setter blood, but a liver bitch is just as likely to have black as liver pups.

In breaking Retrievers, the greatest perseverance and patience are necessary, especially with shy and timid specimens, and they should be perfectly steady to "feather" before they are allowed to touch "fur." At the age of six months a pup should have learned to walk at heel, come back to whistle, drop or sit at word of command, and to use his nose in finding some soft object such as a cap, glove, etc., which has previously been dropped without his knowledge. He should retrieve tenderly to hand at full speed, and be more or less under control He may then be introduced to game, and will probably soon discover the meaning of the shot, and, if he is worth anything, will try to "run in." This can be checked by means of a check-cord, and the young dog should be steady at twelve months old, although he will not be seen at his best till the end of the second or third season.

Space will only permit a few remarks about Spaniels, which are of six varieties besides innumerable crosses which are sometimes considered distinctive breeds. These are the Clumber, the Sussex, the Black, Welsh Springer, the Cocker, and the Irish Water Spaniel. The last named is used principally for wild-fowling, and is invaluable to the sportsmen who prefer rough or mixed shooting, while his intelligence and adaptability render him suitable for all kinds of work. In the Highlands both fur and feather lie so much in thick, rank heather that a lightly-built, long-legged dog has a great advantage over the short-legged, heavy bodied show specimens; and the Welsh Springer and the Cocker are thus more suitable than the Clumber and the Sussex Spaniels, though the activity of the latter sometimes enables him to negotiate the thickest cover with success.

Spaniels should be worked in teams, should drop or stand to shot, put up game, but not chase it, and range within thirty yards of the gun or handler. Teams may vary from two to twelve in number, but if many are used the dark and liver colored varieties should be excluded, owing to the risk of shooting them by mistake. Welsh Springers are generally lemon and white in color and are seldom seen in the Highlands. The writer had, however, the opportunity of watching a team at work on the West Coast last winter, and there can be little doubt that no other variety is so well adapted for woodcock shooting, rabbiting, or any form of sport where game lies close in thick covert: The Spaniel was formerly used, like the Setter, in connection with falconry, and is described in works dating from tha twelfth century, but the numbers of the breed were probably very limited at this early period.

Spaniels, Pointers, and Setters have all suffered, in England, from the adoption of driving feathered game as opposed to shooting over dogs, and their popularity has decreased in favor of the Retriever. This is more evident in connection with partridge shooting, owing to the short stubble which remains after the progress of the modern reaper. To a great extent the same tendency is in progress on the moors but from different causes. Some say that the disappearance of Pointers and Setters is only a matter of time, but all dog-lovers would regret the change.

A few years ago, that scourge of the doggy world, for instance, distemper was unknown in the Highlands but we must now make up our minds to endure it in common with the rest of the United Kingdom. The older a dog may be when attacked by the malady, the severer is its form, and puppies, fortunately, generally recover if carefully nursed. The symptoms are unmistakable—feverishness accompanied by a yellow discharge from the nose and nostrils, while in bad cases the lungs and bowels are affected. Fresh air is essential, and the disease must run its course. The afflicted dog should be placed in a warm but airy room or kennel, and food should be light, consisting of milk or broth. The bowels should be attended to and on the first appearance of the malady an emetic may be given with advantage.

DOINGS IN DOGDOM.

A GOOD GREYHOUND INJURED.

Fair Tralee, a notable Greyhound bitch, owned by Mr. Tim Cronin, a prominent leashman of this city, was almost fatally injured by a street car one day last week. Tralee has been a noted performer on the coursing sward and was the winner of several hard fought stakes. We presume, by reason of her injuries, Tralee's coursing days are over, more's the pity, and for which we extend our regrets to Mr. Cronin.

A DASH ANTONIO BITCH GONE.

Mr. George G. Gauld recently lost his prize winning English Setter bitch Miriam J. She was by Dash Antonio out of Patti B. and was bred by Mr. R. Bangham. M. J. was a winning bench show bitch and a consistent and stylish worker to the gun. About a year ago she was injured by coming in contact with a barbed-wire fence while quail hunting with her master. The final development of the lacerations was cancer to which she eventually succumbed. Mr. Gauld was much attached to his good field dog and home companion and feels the loss keenly.

BACK AGAIN.

Mr. G. Wilson, who recently returned after a two years' stay in England and had barely got used to our sidewalks again when he met Mr. F. W. Van Sicklen, who after a few minutes conversation arranged with him to again take charge of the Country Club Kennels near Olema. Mr. Wilson had previously been the kennelmaster for some seven years.

These kennels are one of the best appointed on the Coast, having every convenience and comfortable arrangement for the inmates that could he desired. The buildings are adjacent to a three acre enclosure where the dogs can get a certain amount of exercise and freedom in addition to the regular training work in the hills and open country.

At present there are some 43 hounds (for deer hunting) and a number of royally bred Setters and Pointers in the kennels.

CANCELLED WINS AT TWO SHOWS.

In the *American Kennel Gazette* for October the announcement is made that the following awards at the Oakland show, September 2 and 3, 1901, have been cancelled hy the A. K. C. for the reasons given below:

Classes 40, 42 and 43, Pointers—Top Notch Mason's King, registered as Mason's King, (entered under the wrong name.)

The following dogs have been moved up. Class 43, Pointers—Sport takes first.

Top Notch Mason's King was awarded first in limit, and open dogs (55 lbs and over), the only entry in the classes, and also first winners. He also received the special for best American bred. Sport now is first in winners under the correcting cynosure of the A. K. C.

The San Mateo cancellations are as follows:

Classes, 36, 38 and 39, Pointers—Top Notch Mason's King registered as Mason's King. King was given first limit and open (55 lbs. and over) and first winners. He also won the special for best American bred and for best Pointer.

The following dogs have been moved up in Pointers—Class 36, limit dogs, Lady Ruffle's Rip, first; Jack second. Class 39, winners, Lady Ruffle's Rip, first.

In class 85, Collies—Wag, false registration number given, not listed. Win cancelled for second limit bitches. Montez Tyche was moved up in the class from third to second. Wag was shown and entered by S. Barnett.

WORLD'S FAIR SHOW.

The bench show at St. Louis in connection with the World's Fair Exposition was not an affair of particular magnitude. A total of 217 dogs and 328 entries evidenced a certain amount of apathy among the ranks of fanciers at large. This showing is in line with a previous world's fair venture for an "international hench show." The records now show rather clearly that in this respect it would be better policy and decidedly for the best interest of dogdom to let bench shows come off and be arranged under recognized kennel jurisdiction and auspices. It is not a good way to do business to send a watch to a cabinetmaker to be repaired nor to leave a sideboard with the watchmaker for renovation.

While the kennel press is all in accord in giving due meed of praise to the judges, Messrs. Mortimer, Jarrett, Cole and Byers—the scribes could not justly do otherwise—and also to Superintendent Joseph A. Graham of St. Louis and his assistant Dr. George W. Clayton of Chicago, there seems to be a sentiment of criticism directed against the detailed management of the show, and particularly the benching and care of the dogs.

The actual dogs shown numbered as follows: Airedales 9; entries 12; absent 5. Beagles, dogs 13; entries 22. Black and Tan Terriers, dogs 3; entries 3. Boston Terriers, dogs 12; entries 12. Bulldogs, dogs 8; entries 10. Bull Terriers, dogs 16; entries 25. Chesapeake Bay Dogs, dogs 3; entries 3. Chihuahuas, dogs 4; entries 4. Collies, dogs 22; entries 44. English Toy Spaniels—black and tans, dogs 2; entries 2. Foxhounds

American dogs 2; entries 2. Fox Terriers (smooth), dogs 10; entries 10. Fox Terriers (wires), dogs 1; entry 1. Irish Terriers, dogs 9; entries 9. Japanese Spaniels, dogs 1; entry 1. King Charles Spaniels, dogs 1; entry 1. Maltese Terriers, dogs 2; entries 2. Old English Sheepdogs, dogs 1; absent. Pointers, dogs 12; entries 10. Pomeranians, dogs 4; entries 7; all absent. Scottish Terriers, dogs 17; entries 25. English Setters, dogs 3; entries 6. Pugs, dogs 6, entries 7. Wolfhounds, dogs 4; entries 4. Yorkshire Terriers, dogs 1; entry 1. Welsh Water Spaniels, dogs 1; entry 1. St. Bernards (rough) dogs 4; entries 7; 5 absent. St. Bernards (smooth), dogs 2; entries 2. Toy Poodles, dogs 10; entries 29. Dogs for exhibition, only 8; various breeds. The duplication of entries was obtained in the "get" and "produce" classes, some of the entries in these classes not being entered in the regular classes.

LOSS TO THE SETTER FANCY.

Count Rego, the prize winning Victoria English Setter, passed in his checks on October 31st in the kennels of his owner Mr. T. P. McConnell, the prominent British Columbia fancier and bench show enthusiast. Rego was by Albert's Fleet out of Ch. Albert's Rosalind. He was a handsome and stylish white and lemon ticked dog teeming with typical quality. His early death, he was only two years old, is a decided loss to the northern Setter fancy, notwithstanding there is "a raft" of good dogs up there, for much was expected of him.

The Victoria Kennel Club held the annual meeting and election of officers on the 8th inst.

Fly Casters Enjoy a Social Night.

Four score jolly anglers and invited guests gathered about the oak in the banquet room of a Pine-street grill last Tuesday night for the enjoyment of a duck dinner and various other good things invariably on tap when the San Francisco Fly-Casting Club members hold the bi-monthly meeting.

Carlos G. Young presided as chairman and toastmaster. The speakers on various congenial topics were Alex T. Vogelsang, Walter D. Mansfield, G. W. Lane, John Siehe, J. B. Kenniff, Dr. C. W. Hibbard, H. B. Sperry, C. R. Kenniff, George H. Foulkes, Dr. W. E. Brookes, T. C. Kierulff and W. H. McNaughton. E. J. Finney rendered vocal selections and A. Hirsch played several compositioos on the zither with the skill of a maestro. Professor E. H. Kemp contributed to the evening's entertainment with a series of amusing "moving pictures."

The club unanimously elected John Marsden a member and also voted to join the California State Fish and Game Protective Association. Dr. C. W. Hibbard, S. A. Heller and E. A. Mocker being appointed delegates to represent the club at the State meeting in Visalia yesterday and today.

Medals and prizes were distributed to the winning rod-wielders at "the lake" for this year. J. B. Kenniff was the winner of four events—champion class long distance, and also accuracy, first-class delicacy and accuracy and the Horace Smyth general improvement token. H. B. Sperry received an elegant medal for the first-class long distance prize concerning which he was told "had cost him more, was worth less and would be more highly prized than many other things he had."

T. C. Kierulff was the winner of the first-class accuracy contest. C. R. Kenniff won the lure casting event. Geo. H. Foulkes received the medal for second-class long distance and Champion Walter D. Mansfield was awarded a marvellous "invisible" reel as his reward for winning the championship class delicacy and accuracy event.

There is a club rule which does not permit a medal winner to again receive a medal until he has won out three times, consequently Messrs. Mansfield, Kenniff and Kierulff have several laps to their credit for future medal contests.

Sergeant-at-Arms John Butler and his satellite Ganymedes, Messrs. Volegsang, "Monk" Walker, Brotherton and Siehe, had charge of the local end of the pipe that was connected with a Milwaukee brewery. W. W. Richards, F. V. Bell, A. M. Cumming and several other members provided a bountiful supply of fat ducks for their fellow-sportsmen to dispose of.

Among those present were: C. G. Young, T. C. Kierulff, T. W. Brotherton, Walter D. Mansfield, John Butler, J. F. Siehe, Alex T. Vogelsang, Frank V. Bell, E. A. Mocker, F. M. Halght, Chas. Huyck, J. B. Kenniff, C. R. Kenniff, Luis Butler, E. A. Allen, Jas. S. Turner, Jas Watt, A. Hirsch, W. C. Wyce, A. M. Blads, Geo. Walker, J. Homer Fritch, H. B. Sperry, Austin Sperry, E. J. Finney, Geo H. Foulkes, A. S. Carman, W. F. Bogart, George W. Emmons, J. N. De Witt, R. H. Smyth, R. Isenbruck, J. Peltier, Adolph Muller, W. H. McNaughton, F. E. Daverkosen, W. W. Richards, Al Coombs, Chas. H. Kewell, Dr. C. Von Hoffmat, C. B. Hollywood, E. H. Horton, Edward Everett, Harry C. Goleher, Dr. F. J. Lane, G. W. Lane, S. Rosenheim, Dr. C. W. Hibbard, Dr. McGill, John L. Benn, Walter Benn, Reuben C. Haas, J. A. Harror, W. J. Wolf, W. J. Kierulff, C. W. Carey, John Marsden, Dr. W. E. Brooks, Mr. Johnson, Theo Lagererantz, N. A. Frank, W. A. L. Miller, E. Robbins, M. J. Noyes, J. C. Sellers, W. Henninger, Dr. Chas. J. Burnham, Dr. Allen, Dr. Clark and others.

DUCK LIMIT.

It is claimed the present bag limit—fifty on ducks, will not be the subject of adverse comment and advocated reduction, if an agreement can be reached in favor of a non-sale amendment to the present game statute relating to ducks. The subject will be threshed out at the Visalia meeting to-day.

LICENSE LAW UPHELD.

The State Supreme Court at Springfield has upheld the Illinois game law passed by the last General Assembly. The test of one point in the law was made by Henry J. Cummings, a St. Louis physician, who is a member of a hunting club having a game reserve in Green county.

Charged with hunting without a non-resident hunter's license, Cummings was arrested and fined $25. He appealed the case on the ground that he was a non-resident land owner because of his membership in the club which owned the land, and that the law discriminated between resident and non-resident land owners by making the latter pay a larger license fee.

The court maintains that a game law is not invalid because it provided greater restrictions and severer penalties against non-residents. The court reiterates that the title to wild game is in the state without reference to the ownership of the lands upon which it is found. Therefore, the court says, the state has the undoubted right to regulate the killing or taking of game.

RIFLE SHOOTING A SCIENCE.

In a review of the recent match for the national trophy, which was shot at Fort Riley, Kan., the Hutchinson (Kan.) *Bee* makes some interesting comparisons between the methods of shooting employed by the New York team, which won the trophy, and the Kansas team, which was next to last. "There is a false notion generally held by Americans that we are a nation of expert riflemen," says the *Bee*, "But the average citizen of America is an absolute ignoramus in the use of the modern rifle. They take to the weapon naturally, as did the members of the Kansas team. For short distances they did not compare unfavorably with the experts. But when they came back to the long ranges for which military rifles are made, the Kansans went to pieces. The New Yorker brought his instruments and his books, and, after making observations and referring to the tables, lay down and began to make bull's-eyes. The Kaosan guessed at the wiod and concluded that it would take about so many points on the wind gauge. He fired and the telephone had to be resorted to to tell the man in the pit. He changed his sights and fired

Northern Canvasback Are Here

again. Still nothing doing at the pit. If, after feeling about in this manner for several shots, he finally finds the target he is all right until the wind changes or a mirage distorts the target. Then the feeling process must be repeated. Meanwhile the New Yorker is pulling up the score.

"A Kansan who was lucky enough to make a bull's-eye would think it ridiculous to change his sights for the next shot. So his next shot is a two or a miss. A New Yorker makes a bull's-eye and is told by the coach to lower elevation 50 yards for rising mirage and change from one and a half left to one-half right wind. He makes the changes and gets another bull's-eye. A day of such work shows where the Kansans are outclassed. They can aim and hold a rifle as well as anybody. But they have not learned that the target is not always where it appears to be, and that the fickle wind can be accurately followed and allowed for.

"Should there arise a call for men for service in war, the American army would be composed of men less expert than the Kansas rifle team. Suppose they were pitted against one of the nations which has prepared its men by long practice in the use of the modern rifle. Suppose the armies approach to engage in battle. When 1000 yards apart the army of experts begin to make bull's-eyes in American soldiers. The Americans will be hunting their targets like Kansans at a rifle match. The combat would be wiped off the topography of the seat of war before getting close enough to charge. The man who can get in the first hit will be the winner. It would look to be on the part of prudence and patriotism to prepare the average American with the skill which will enable him to use the modern weapons effectively at the ranges for which they were intended. As well be armed with a musket as with a high-power rifle which he cannot use above the musket's range."

Quail hunters find that the warm weather makes a trip in the foothills pretty hot work.

AN ELK PRESERVE.

The herd of 150 elk which have been protected on the Miller and Lux stock ranges near Bakersfield for the past fifteen years will in a few days be rounded up and transferred to the Government location selected as the future reserve for the animals.

The preserve is a protected valley several miles long having precipitous sides that the elk can neither climb up nor slide down on the one side, the ends of the ends being wire fenced in securely. This elk park is some thirty miles from Exeter. It is proposed to keep the animals in temporary confinement to the selected district until they are thoroughly habituated to their new range, they will then be allowed a larger territory in the national park where they will be safe from molestation.

It is stated that thirty five of the best vaqueros selected from all parts of this State have been engaged to round up and corral the bunch of elk today. There will surely be a lively time for everybody and everything engaged in the round up, the animals have never been herded or handled in any way and are naturally wild and wary. The work of transfering or driving the elk to their new home will undoubtedly be equally arduous. The "circus" will be attended by a number of onlookers who doubtless will pass an exciting day. It is to be hoped the affair will have successful termination.

Duck shooters are awaiting more favorable weather conditions for better enjoyment of the sport. There are countless thousands of northern birds here at present, all in fine condition and full winter plumage, the fine weather, however, enables the birds to keep out in the open water and avoid the gunners.

Bass fishing is on the improve in and around the Tiburon fishing resorts. Good reports come also from San Pablo and Lake Merritt.

More Leaders Leading.

Reports from the tournament of the Lincoln Gun Club, Lincoln, Ill., show very fine records for Winchester "Leader" shells. For the three days' shooting, the first, second and third high expert averages were won by Fred Gilbert, W. R. Crosby and John S. Boa, respectively, with scores of 487, 482 and 480 out of the 500 targets at on the program events. The first and second high amateur averages for this tournament were also won by shooters who used the "Leader" shells, namely, C. B. Wiggio and C. M. Powers, with scores of 477 and 472 out of the possible 500, and both from the 19-yard mark.

At the tournament of the Litchfield Gun Club, Litchfield, Ill., J. S. Boa and W. R. Crosby, both shooting Winchester "Leader" shells, the shells they always shoot, captured the first and second high expert averages from the 20-yard mark, and W. H. Clay, shooting from the 18-yard mark, won the high average with a Winchester "pump" gun and the "Leader" shells.

At the annual target tournament of the Chicago Trap Shooting Association, held in Chicago last week, W. R. Crosby and Fred Gilbert won the first and second high expert averages for the tournament, while L. Willard captured the high amateur average for the three days' shooting. All the above, of course, shot the Winchester "Leader" shell, the shell that has to its credit more high expert and amateur averages, world's records, and has won more trophies, team races, etc., than all the other makes of shells combined. If you desire to obtain the very best results at the trap, in the field or on the marsh, shoot the time tried Winchester make of shells.

Averages Reported.

Raleigh, N. C., October 19th and 20th, Geo. L. Lyon of Durham, N. C., first general and first amateur averages, 340 out of 360, shooting "Schultze" and "Du Pont." Walter Huff, second general average, 336 out 360, shooting "Du Pont." J. I. Johnson of Raleigh, N. C., second amateur and third amateur averages, 327 out of 360, shooting "Du Pont." E. F. Killett of Wilson, N. C., third amateur aveaage, 326 out of 360, shooting "Infallible" and "Schultze" won with 96 out of the 100.

Poughkeepsie, N. Y., October 20th, J. A. R. Elliott and C. C. Kendall of Montclair, N. J., an amateur, tied for first general average, 92 out of 115, shooting "Schultze" and "Infallible" respectively.

Kooxville, Ill., October 21st and 22d, W. R. Crosby, first general average, 369 out of 400, shooting "E. C." Guy Buroside of Kooxville, Ill., first amateur average, shooting "E. C." and tied with Fred Gilbert, shooting "Du Pont," for second general average, 356 out of 400. C. A. Young, third general average, 330 out of 400, shooting "Du Pont." E. D. Rambo of Knoxville, Ill., second amateur average, 329 out of 400, shooting "Du Pont." J. Burmister of Spirit Lake, Ia., third amateur average, 295 out of 400, shooting "Du Pont."

Middletown, Delaware. October 27th J. M. Hawkins of Baltimore, Md., first general average, 183 out of 200, shooting "Du Pont." W. M. Foord of Wilmington, Del., first amateur average and third general average, 178 out of 200, shooting "Du Pont." Mr. Foord also won the state individual target championship with 91 out of 100.

Strong Points.

The shooting qualities of the Ithaca gun are fully warranted, and if there is any defect in material or workmanship the makers agree to replace the same without charge to the purchaser. Two of the strong points of the Ithaca gun are: Every hammerless gun of this make is cross bolted in addition to the regular fastening, which has stood the test for twenty years, thus making two independent fastenings—either one of which will hold the gun securely. The frame is no larger than that of the ordinary hammer gun, retaining a more graceful outline and greater strength of frame than any other hammerless gun.

THE FARM.

Farm Notes.

Sow a variety of grasses on fields intended for pasture.

Good farming is almost impossible without good teams.

Animals will respond in a most practical way to kind treatment.

Generous treatment of the brood sow always pays in the increased thriftiness of the pigs.

Avoid selling hay, grain and straw and convert them into meat, butter and cheese.

The chances of good crops are always improved by thorough tillage and heavy fertilization.

The conditions of soil most favorable to growth of the plant are also most favorable for its improvement.

While it is not good management to be under-stocked, it is a good deal worse management to be overstocked.

Horses which are given continuous work are less liable to be injured than those which are only required to do a day's work occasionally.

Excess of food weakens a working animal and disables it for work. It induces indigestion and is worse than a spare diet.

Young hogs should be put in good condition now, so that they can be readily fattened in short time when full feeding commences.

The best fleece will ever be the work of the best sheep, provided of course, it has a good, thrifty form.

Properly managed crops fed on the farm leave a residuum of good manure to keep up the fertility of the land.

It is a good plan in dry, hot weather and whenever the horses' hoofs become hard and brittle, to oil them every day with sweet oil.

The more good feed the good dairy cow can be made to consume and turn into milk the greater will be the profit.

Clay land is the more retentive of water, and for this reason it is the more important that such land should be thoroughly drained.

Good dairy butter is sold at one dollar a pound in many places in Mexico.

The more feed grown at home for the cows the better. It is cheaper and better.

Hot milk is one of the best stimulants for persons suffering from hunger or extreme fatigue.

A favorable indication for the dairyman is that the taste for good butter and milk is increasing.

When cows are overfed it is a good plan to give them a large dose of oil or melted lard. Two quarts will do.

The taste of fresh butter is becoming more popular. There are those who want it as soon as possible after it is made.

It is said that the butter churned when the cream is fully ripe will keep longer than when the cream is just ripe enough.

When cows are not thrifty it may be owing to sameness of diet. A good laxative may be used and a change in some of the feed.

A cow is not very different from a man: If he is half fed he will do poor work and will probably steal if he has a chance.

It seems extravagant to pay a fancy price for a good cow. But if she is purchased by a good man, she will more than pay her way.

A sloping barnyard is conducive to clean cows and clean milk. Mud and filth make conditions in which it is almost impossible to have clean milk.

There is a marked improvement in all kinds of dairy stock at the fairs. However, there seems to be a tendency to force young stock too soon into giving milk.

A little old milk left in a can is frequently the cause of the souring of a large quantity. Can and vessels in which milk is kept should be kept perfectly sweet and clean.

As the winter comes on it is a good plan to fix the leaks in the cow shed. Cold water in a steady stream is likely to dampen the ardor of the best cow in giving milk.

Exciting a Dairy Cow.

I have made a close study of dairy problems during the last fifteen or twenty years, and I think I have picked up some experience by which others should profit, writes a South Dakota farmer. I refer especially to the matter of exciting the dairy cow. In the first place, I have no use for a dog around a dairy farm. One that is probably trained and looked after by a sensible person may often be useful without being harmful, but where there are a number of individuals looking after the cows I think the dog should be dispensed with. I have many times noticed a falling off of fully one-half in the quantity of milk given by my cows after they have been given a chase by the dog, while I have in mind a few cases where cows under normal conditions gave six quarts at a milking would not give a pint after being chased by a dog. Now, a repetition of this experience for a few times may occur even after a lactation period of only three or four months.

Then, as to the matter of striking a cow, I think this is all nonsense. I find that cows sometimes become nervous when I can in no way account for it, and I have known even quiet animals to kick over the milk pail. Now, to rise in your wrath under such circumstances and use the milk stool as a cudgel is simply to give way to temper and only results in permantently spoiling the cow. I have seen men kick a cow with their big leather shoes in order to make her "hoist." Of course, to one who is not interested there may be a certain amount of entertainment in this proceeding, but the man who is keeping the cows for the profit that is in the business will come out at the small end. By kindness I have often conquered heifers that seemed to be naturally of an evil disposition, while punishment would have permanently ruined them. There is no farm animal quite so nervous as the cow, and none needs more careful or gentle treatment.

The new air treatment for milk fever has worked wonders in the dairy herds of the country. Where it has been applied in time the percentage of loss by cattle afflicted has been reduced to a mere fraction The reason for such a simple cure has been the subject of a great deal of speculation. We now have the assurance of a German scientist that the mechanical effect of forcing the blood out of the udder and into the general circulation is the principal upon which the cure works. A bicycle pump and a sterilized glass tube have saved a great many valuable cows. An extensive breeder of Guernseys recently made the remark that a knowledge of this simple treatment five years ago would have been worth many thousands of dollars to him.

The successful dairy farmer today is a business man, a manufacturer who is producing a commodity in universal demand. He is not in the business for his health, but for a profit above his living. Therefore, a careful study of the marketing of his dairy products is a necessity with him.

Interest on a note runs night and day and never stops until the note is paid. Give the dairy cow the right kind of feed and while you sleep she will be turning into butter fat worth four times as much as the feed and have it all ready when you get up in the morning.

Jackson's Napa Soda untangles the feet.

Horses Pay the Freight.

At the recent Minnesota State Fair, held at Hamlin, the races were the principal attraction and furnished wholesome pleasure for the great crowds who were in attendance each day. The program called for twelve events, which, with a large number of entries, were successfully concluded. In connection with the race feature of the fair the *Horseman and Stockman*, of Minneapolis, calls attention, in a recent issue, to some interesting facts. For instance, there were three hundred and forty-three entries to the twelve races. The total amount of entrance fees paid was $37,150, which with the five per cent additional charged money winners, the total amount of entrance fees reached the magnificent sum of $41,750 The total amount of purse money offered by the association was, in round numbers, $23 000

From these figures it will be observed that the horsemen who made entries at Hamlin left in the treasury of the association as profit the sum of $18,750, not an inconsiderable sum to be contributed by a single feature of a fair like the State Fair of Minnesota. This item does not include all the elements of profit contributed by the race feature of the fair, for it does not include the large number of increased attendance and many other items of profit connected with every fair and race meeting. The great benefit derived from such exhibitions as state fairs is both recreative and educational. Publicity is a sign of progress on the part of a state in providing such institutions as state fairs under the management of state boards of agriculture. They have become a fixture in almost every state in the Union In this connection is it not true that the races are, in almost every instance, the principal feature for the amusement of the people? It is true there are other amusement features, but none are so wholesome and harmless as the sport furnished by the trotters and pacers. The almost innumerable side shows, the three throws for a nickel at the nigger babies, the pumpkins, and all the rest are features, but not in the same class with harness racing.

But it is not always that the state boards of agriculture realize these facts and are ready to do what they can to promote the interests of horsemen. We have known cases where they have done all they could to defeat horsemen in securing their rights and getting what was justly due them. The fact that the horsemen of the country contributed so liberally to the success of the Minnesota State Fact worthy of mention, And this is not an isolated case. Many other fairs, state institutions, have been aided in the same way by the generosity of horsemen And while racing associations are to be commended for offering large purses, and individual stake promoters large stakes, it is true, to the contrary notwithstanding, that the horse owners "pay the freight."

Don'ts for Poultry Men.

This is the way an English poultryman sums up the dont's of the poultry business:

Don't forget to keep your fowl stock young; old hens are wholly unprofitable to keep.

Don't forget that cocks as well as hens eat a lot of food, and no cock is necessary except during the hatching season.

Don't forget that infertile eggs keep much longer fresh than eggs laid by hens running with a cock.

Don't forget that non-setting hens lay far more eggs in the twelve months than the heavy setting breeds.

Don't forget to keep your nests clean; stained eggs are not marketable.

Don't forget that eggs collected daily should always be stored in glass water and left there until they are wanted for market.

Don't forget that dry stored eggs soon become more or less stale, especially in hot weather.

Don't forget to grade your eggs as to size; it improves the sample, and consequently the price.

Don't forget that large, loose feathered hens of the Cochin or Brahma type lay small eggs, and but few of them. They are also large eaters and poor rangers.

Don't forget that close-feathered, medium-sized hens of the Leghorn type are non-setters, good rangers and great layers.

Don't forget that it costs as much to keep a hen that lays eighty eggs in a year as one that lays one hundred and thirty.

Don't forget that a broody hen spoils a fertile egg for table purposes by setting on it a few hours only, so collect your eggs regularly.

Milk is never entirely free from bacteria after it leaves the udder. The number of bacteria contained in milk is an indication of its cleanliness, but not an absolute proof. There are many kinds of bacteria, some are friendly and others are not. The bacteria content as ordinarily taken refers to and includes everything in the bacteria order, whether they be fine flavoring, souring or the germs of fermentation.

In order to make a success of raising the calf on skim milk, the condition of the milk must be uniformly sweet. Nothing perhaps, will contribute more to produce scours in calves than to feed sweet milk one day and sour milk the next.

Racing! Racing!

New California Jockey Club

OAKLAND TRACK

COMMENCING SATURDAY, NOV. 12

Racing Every Week Day

RAIN OR SHINE.

RACES START AT 2:15 P. M. SHARP.

Opening Handicap, $2000 Added

For special trains stopping at the track take S. P. Ferry, foot of Market street, at 12, 12 30, 1, 1:30 or 2.

Returning, trains leave the track at 4:10 and 4:45 p. m., and immediately after the last race.

THOMAS H. WILLIAMS, President.
PERCY W. TREAT, Secretary.

TO TRADE FOR A BROOD MARE.

STANDARD-BRED GELDING 7 YEARS old by Prince Nutwood, dam by Strathway. Stands 16½ hands high and weighs 1225 pounds. He got a record at Salinas, September 16th, of 2:31, jogged the last eighth. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. Promises to be very fast. W. H. Williams, who worked him on the San Jose track five weeks before the Salinas meeting, says that he looks like a 2:10 or 2:12 trotter. Good individual and will sell him at a reasonable price or trade for a high-class brood mare. This horse is in charge of W. H. Williams at the San Jose race track, where he can be seen. Address

HENRY STRUVE, Watsonville, Cal

TO TRADE FOR GELDING.

I HAVE A VERY FINE BROODMARE with foal by Arner (brother to Diablo and Don Derby), bred on May 17th The mare is a fine individual, 12 years old, by Sidney; dam Sultana; can show a 2:30 gait. Her last colt got a record of 2:27. As I have no room to raise colt would like to trade her for a good gelding. Address H KOHLER, 212 San Pablo Ave., Oakland, Cal.

FOR SALE.

VILLON 38090, BAY COLT FOALED JUNE 19, 1903 sired by McKinney 2:11¼, dam by Nearest, brother to John A. McKerron 2:04¼; 2d dam by Anteeo 2:16¼; 3d dam by Venture, sire of dam of Directum 2:05¼. Also ten registered mares and fillies, mostly bred to good stallions—four to Kinney Lou 2:07¼. Correspondence solicited. This sacrifice is due to age and infirmity of owner. G. B. BLANCHARD, S[illegible] Cal.

Close Finish Between Holstein and Jerseys.

The dairy demonstration at the World's Fair at St. Louis in which four different breeds entered into a contest of 120 days to decide which could most economically produce the various products of the dairy, closed on October 15. It has proved not only an interesting trial between breeds but also an exciting one between rival cows of the same breed.

While the cows have finished their work the results will not be known for some days and perhaps weeks. A corps of actuaries are figuring out the debits and credits to each cow to see what her net profits are. Even the butter has to be estimated from the fat percentage in the milk for none is churned. Meantime the dairying parties are awaiting the final returns under no little excitement. Particular cows and possibly the two leading breeds have made so close and exciting a race that results are still doubtful.

The Jersey team has made the most butter per cow, but will receive less credit on by-products. The Holsteins come next in butter and will have a liberal by-product account but are thought to have been the more costly feeders. The Brown Swiss and the Shorthorns while well behind in butter have gained in weight and will be credited with the value of their added beef. Not until all the bearings are figured out will the winners be definitely known.

The most valuable product of the American dairy industry, in dollars and cents, is butter. It takes in round numbers 11,500,000 dairy cows to provide our annual butter output, 1,250,000 cows to produce our cheese and 5,750,000 to produce the milk used in fluid form. In all, this requires 18,500,000 dairy cows. This computation is restricted to cows used in the dairy and milk supply business and for family use. The milk of beef herds devoted only to the sustenance of the calves is not taken into account. The average dairy cow produces 130 pounds of butter per year, or 300 pounds of cheese, or 380 gallons of milk, according to the application of her yield. Computing the value of this aggregate product to the producer at an average of 18 cents per pound for butter, 9 cents per pound for cheese and 8 cents per gallon for milk, the yearly dairy output of the country yields the enormous sum of $477,650,000. The value of the butter output is almost 30 per cent greater than that of the milk and cheese combined.

A cow that will produce a given quantity of butter *at the least cost* is therefore of a type exceedingly valuable to the dairyman. Good butter must contain at least 80 per cent of pure fat and many judges contend that the standard should be placed at 85 per cent. It might be thought, and has been argued with much force, that one time with another, the cow whose functional proclivities and energies tended to the production of milk most abundant in butter fat, would prove the most profitable. But there are other considerations that affect the question. The amount of food consumed to accomplish a given result is a very important and direct element. There is also a reduced value to skimmed milk yet one that is quite appreciable whether it is made into "skim cheese" or fed to calves or swine. In regions where cattle foods are very cheap and the raising of calves and swine correspondingly advantageous, an extra amount of skimmed milk might offset a larger consumption of food and the big milker be the most profitable cow, even though her milk contained a lower percentage of fat. But in regions where cattle foods cost much above the minimum, it seldom pays to put good food into skimmed milk without a considerable yield of butter fat with which to pay cost. The fat, which is the most valuable element of milk and the largest constituent of butter, is the real money getter on the first turn of the capital. The calves and swine are a step outside the dairy question and open upon the department of grazing or stock raising; another turning of the capital.

The one side issue of doubtful pertinence which the World's Fair management have included in the test is the change in the weight of the cows between the start and finish. While there is a beef value even to a dairy cow, her charge in weight would signify little to the practical dairyman except in case of so poor a milker that she was not worth carrying over to another season's dairying, and hence was to be fed into beef.

The breeders of Jerseys feel pretty confident that their breed has won the butter test which is the most valuable of all. But while their team of twenty five cows has a considerable lead in average production of fat over any other team, there is one cow, Shadybrook Gerben, in the Holstein team of fifteen that is giving them a good deal of uneasiness. She has yielded during the 120 days 2⅜ pounds more butter fat than the next best cow in the test. This does not necessarily imply that she has made the most butter, nor that she has made her butter as profitably as some of the other cows. Still, unofficial estimates indicate that she will lead in butter by about five ounces over the leading Jersey, Loretta D, but that the latter will show the greatest profit on the test. This is no safe conclusion for the big Holstein milked enormously and will be credited with a great excess of skim milk besides having gained 54 pounds in weight. In the last respect however the Jersey outdid her by gaining 75 pounds. The hope of the Jerseymen hinges upon the food cost of the respective butter products. They believe that in "cost of maintenance" to say nothing of "economy of conversion," their little champion cow, weighing 998 pounds at the start, will down her big rival that weighed 1265 pounds. In order of butter fat production for the 120 days, five Jerseys came ahead of the next best Holstein. The Jersey team of twenty-five cows averaged apparently about 14 pounds of butter per cow more than the average cow in the Holstein team of fifteen; the best fifteen Jerseys made about 30 pounds of butter per cow, more than the fifteen Holsteins and the poorest fifteen Jerseys surpassed the entire fifteen Holsteins by a safe margin.

The leading Holstein cow Shadybood Gerben started on the test eleven days after freshening which gave her a great advantage. Had the test been started at the date announced she would not have been eligible. An unwarranted postponement of the start for one month by the Fair authorities, robbed the Jersey team of their best month's work, for they had all been selected for the original date. Every dairyman knows how much better a cow is in the first two months of lactation than in the fifth and sixth months. Loretta D., apparently the best Jersey, was seventy days from calving at the start—a loss of fifty-nine days, as compared with Shadybrook Gerben. It was practically pitting the Jersey's fifth and sixth months of lactation against the Holstein's first and second, the other two months being on an even basis. Nothing but the proverbial staying qualities of the Jersey pulled her through. At one period the Holstein cow had more than 11 pounds the lead in butter fat which, on the home stretch, the Jersey reduced to 2½ pounds. "Oh, for another week!" groaned the Jerseymen. "We have frightened the braggarts, whether our cow has beaten theirs or not," chuckled the Holstein men.

HARK COMSTOCK.

Warranted to Give Satisfaction.

Gombault's

Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is truly valuable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O

New Veterinary Society Planned.

Dr. Charles Keane, D. V. S, State Veterinarian, is busily engaged in formulating a State Society of Veterinary Surgeons, much on the same plan as the California Medical Society or the State Board of Health, which he declares will be of the greatest benefit to the stockraisers of the State.

In an interview he said: "I have had this plan in mind for some months, and have discussed it with the various veterinarians I have met in my travels through the State, and they all agree with me in believing it will be of the greatest benefit to the cattle interests of the State of anything that could be devised.

"The fact is that there is no uniformity in county cattle laws, a thing much to be desired, and to achieve such an end we must get together for discussion, education and mutual benefit. To attain this I am endeavoring to form a State society that will meet either annually or semi-annually for consultation and discussion.

'At these meetings papers on various subjects of interest to the cattle industry will be read and discussed, and we will, after the organization proposed, endeavor to secure uniformity of laws which will prove beneficial to all.

"I have addressed letters of invitation to all the county veterinarians in the State, and in those counties which are not provided with such an official I have requested the board of supervisors to designate some veterinarian to act for them."

The letter referred to sets out the doctor's views as outlined above, and points out that the idea is to erect a permanent organization similar in character to the California Health Association. Such an organization of veterinarians, it is set forth, will be of great benefit to the counties, the State, the membership and the cattle industry. The purpose of the society will be to encourage the study of preventive medicine and hygiene, to better the efficiency of official veterinarians in California, to encourage esprit de corps among the same, and to protect the State of California and its livestock industry as fully as possible against disease.

The doctor has fixed the date for the initial meeting of the proposed society for December 16th next, and at that meeting will see to it that valuable papers are presented to discussion drawn out on sanitary topics. He will make arrangements for a place of meeting, and for the reception and care of all delegates. Dr. Keane says:

The fact is that this State is too large and its cattle interests are too diversified for any one man to begin to attend to them alone, and it is for this reason that I am calling this meeting. Stockraisers do not seem to realize that cases of cattle diseases are continually making their appearance in various portions of the State at one and the same time, and that no official can be in Siskiyou and Los Angeles counties at one and the same time.

"I am extremely desirous to stamp out the Texas fever in this State altogether, but I realize that it cannot be done by individual effort, and I am desirous of getting all the county veterinarians interested in the work, so that we can work together in some sort of system that will insure better results all around."—*Sacramento Union.*

Sheep often are recommended as weed destroyers. They are when given free range when weeds are tender, but they are not worth much to destroy weeds that have become old and tough. To take advantage of sheep, to improve pasture for other stock, it is necessary to let the sheep hunt out weeds when tender and succulent. Sheep prefer weeds to grass and clover and will make their living by gathering such herbage as other stock object to.

Home Office—401-407 CALIFORNIA STREET, S. F.

Detrimental Horse Feeding.

When we see a string of mature horses tied up to he fed off like hogs for the market we say to ourselves, "this extra weight production is heing done too late and at somehody's expense," says Dr. A. S. Alexander in the *Live Stock Report*. Think of it for a moment. The high prices are ohtained hy drafters weighing 1600 pounds and up The fattening process puts 200 pounds of fat on the hack of a horse that can not grow another inch in stature or size of bone. The extra price ohtained for this fattened horse is paid for fat, the product of corn, other foods, and idleness. This fat is a positive detriment to the work horse, hut makes him look large and attractive in the market. To he a real draft horse fit for heavy lahor he should weigh the extra 200 pounds without fattening, and the hreeder is the man who should put on that extra weight and do it while the colt is growing. If he does not so manage the early growth of his draft colt that this extra weight is attained he fails of procuring the top price for him in the market. He sells an underweight horse and the professional fattener steps in and takes the profit, as doos the man who huys promising stock cattle and feeds them to the finish.

The buyer puts his money into the fattened horse on the hasis that he is not only plump and heavy, but good to look upon so that he can the more easily turn him over at a profit to the actual worker of the animal. The latter huys thinking he is getting a fully matured drafter, heavy hy reason of frame and muscle, and qualified to work and maintain his weight upon ordinary rations. His disillusion is speedy. Soon the fat melts away in lahor and the wolf in sheep's skin is naked to the eye of the heholder. This thinned down horse is not a draft horse. He looked like one while fat, but, like the hroad shouldered dude divested of his padded overcoat, he is seen to he hut a make helieve giant of medium weight and ahility.

It is a fixed principle in feeding that putting fat on an adult animal is much more expensive work than developing weight in a growing animal. This being the case, while it is a fact that the fatterer of a horse makes a profit, the hreeder could make a greater one hy feeding his colt from hirth to selling time so generously that its full development is attained. This full development is not fat, however —it is hone and muscle and sinew—and with full development we may he sure we obtain also vim, vigor, vitality, power, endurance and wearing qualities. By the stunting process the colt born to be a draft horse weighs say 1450 pounds at selling time, whereas he should weigh 1650 pounds at that time, and would weigh that much if properly handled. Supposing he has attained his full weight he fetches a price corresponding with his "heft" and quality. Supposing he has failed to mature over the light weight he is sold at a discount and then brought up to standard draft weight hy the stuffing process What a difference is here, my friends! On one side a drafter healthily and normally developed from colthood! on the other, a stunted, semi-starved, ill-developed disappointment loaded with fat to hide deficiencies and unloaded upon the user to his loss and to the certain detriment of the hreed.

And how is the draft colt stunted? By endeavoring to raise him cheaply, forsooth; yet we have found that cheap raising means loss rather than profit. Cheap raising means roughing the cold through on straw and hay during the winter. Fed on this principle from birth, it is impossihle for him to attain the growth of which hc inherits from his parents the capahility of attaining when properly nourished. This economy starvation plan is penny wise and pound foolish. It is one of the chief reasons for both disappointment on the part of the breeder and lack of reputation upon the part of the hreed handled. Yet many beginners in the hreeding of draft horses seem to think that mers mating to a heavy stallion insures that the progeny will attain equal weights without the feeder's assistancs. This is ahsurd, and it is high time to comprehend tne fact that drafters are the product of not only blood—hreed or racial prepotence—but complete nutrition at every stage of development.

The hreed gives the foundation to work upon, and the specifications for the erection of an ideal superstructure. Man, however, must supply the material in the environment favoring perfect development, else the ever present tendency to degeneracy will make itself apparent. The hreeder who serves feed favors degeneracy and more than loses at the end what he thought he saved at the start. Let it he understood that when once a man decides to hreed draft horses he should not only stick to the hreed commenced with, hut feed and manage to hring out perfectly all of the capahilities of the hreed handled. Until he learns this he will fail of obtaining his due reward in sale profits and perpetuate the detrimental and costly practice of fattening matured horses for the market

Soher up on Jackson's Napa Soda.

FOR SALE.

THE STALLION VASTO 20070, RECORD 2:16½, sired by Vasco 10996 (son of Harold 413), dam Chess (great hroodmare) hy Magic 1457, second dam Betty (dam of Retta 2:28¾) hy Clark Chief 89; third dam Sue hy Pilot Jr. 12. Vasto is a fine large horse, a rich hay with style and finish. Is a sire of speed and handsome carriage horses. Is a grand individual and a profitable stallion in the hands of a practical horseman. For price and further particulars address CHAS. W. COE, 27 South First Street, San Jose, or JOHN H. WISE, Room 23, 318 Pine Street, San Francisco.

BROODMARES WANTED.

HAVING FIRST-CLASS FACILITIES FOR raising a few good colts, I would like from four to six large, roomy, standard-hred Mares to breed to the hest hred son of Sidney 2:19¾ on the Pacific Coast, either on shares for a number of years or to purchase on easy terms Can furnish feed, care and handling. Will mate them with Sidney Alan 29116 (Vol. 14, A. T R.), son of Sidney 2:19¾, dam Variation hy Allandorf 2:19½; second dam by Orange Blossom 2:26, etc. The mares must be good individuals, well hred and an outcross or nearly so. References given to those wishing to farm out their marea. Give hreeding and description. Mares of Wilkes hlood preferred.
WILL ROBINSON, Snelling, Cal.

WANTED.

BY A MAN WHO THOROUGHLY UNDERstands every feature of the trotting horse industry from the selection of sires and dams to the hreeding, rearing, training, racing and selling, to interview or correspond with some gentleman who has the necessary capital and the desire to produce and own the hest. Have had years of experience and trained some of the hest trotters ever produced in California. There is money to be made in the business now and for years to come. Address "Horseman," care of BREEDER AND SPORTSMAN.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fe ock which injure and often lay up race horses.

All Trainers Should Have it in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, $1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

$5 PER BOTTLE. Written guarantee with every bottle, as binding to protect you as the best legal talent could make it.

POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Splint, Thoroughpin, Capped Hock, Shoe Boil, Wind Puff and All Lameness.

ON BROKEN DOWN, WEAK, SPRAINED and RUPTURED TENDONS and LIGAMENTS its power is unfailing.

The fire-iron is uocertain and invariably only aggravates the injury or disease; blistering is less effective: both necessitate laying up the horse for months. Mercurial and poisonous compounds cause irreparable injury.

"SAVE-THE-HORSE" eliminates all these factors.

Cures without scar, blemish or loss of hair. Horse may be worked as usual and with boots, as no harm can result from scalding of limb or destruction of hair.

Need of second bottle improbable except in rarest of cases.

Send for booklet and copy of guarantee

$5—All druggists and dealers, or sent express paid.

ABSOLUTELY QUINN'S OINTMENT REMOVES CURBS SPLINTS SPAVINS WINDPUFFS BUNCHES

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal."

Price $1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

STOCK FARM FOR SALE.

STOCK FARM, HIGHLY IMPROVED, choice location in California, for sale. BREEDER AND SPORTSMAN.

For Sale. Two-year-old brown Stallion by Diablo 2:09¼, dam by half thoroughbred son of Guy Wilkes, second dam by Venture 2:27¼, thoroughbred son of Belmont. Has stake entries, is just broken and is a good prospect. Apply to this office.

FOR SALE.

ONE OF THE GRANDEST LOOKING AND finest bred young Stallions in California. He is 2 coming 3 years; chestnut with star, and one pastern white; good mane and tail; stands 15¼ hands high; all sound, not a blemish; well broken; never worked for speed; a trotter. Sired by Nearest 2:22, brother to John A. McKerron 2:04½. First dam Princess Airlie by Prince Airlie; second dam Minnie Princess, dam of Leonora 2:25 by Nutwood 2:18¾; third dam Belle by Paul's Abdallah; fourth dam Kate Crockett by Langford by Belmont; fifth dam Fanny by American Boy Jr. Prince Airlie by Guy Wilkes 2:15¼; first dam Chantilly (4-year-old trial 2:19½, dam of Chanty (2) 2:24, Cascade 2:14¾) by Nutwood 2:18¾; second dam Crepon (dam of Lovelace 2:20, Betsy Britton 2:20¾, Brilliantine 2:29½) by Princeps; third dam Crape Lisse (dam of King Rene Jr. 2:17, Balzarine 2:27) by George Wilkes 2:22; fourth dam Tarlton mare, dam of Tarlton 2:30. Only reasons for selling is that I have another colt bred the same way and am overstocked. Address

T. W. BARSTOW, San Jose, Cal.

HAL PACING COLT FOR SALE.

ONE ROAN STALLION COLT, 5 MONTHS old, a model individual and in time fit to go to the best mares in the country. Sired by American Hal, full brother to Blue Hal 2:14½ by Tom Hal, sire of Brown Hal 2:12, sire of Star Pointer 1:59¼. First dam Corman by pacing stallion Newsboy 2:22½; second dam Sky Blue by Tom Hal (sire of Brown Hal 2:12, Hal Pointer 2:04¾, Little Brown Jug 2:11¾ etc). This blood has produced more extreme speed than any in the country.

I have also brood mares and fillies, carrying the blood of Hals, Gen. Hardee, Pat Malone and Blue Bull 75, for sale.

For particulars address

A. EDSTROM, Merced, Cal.

STALLIONS FOR SALE.

Dictator Wilkes, son of the great Dictator and Manola by Geo Wilkes, second dam the great broodmare Lizzie Brinker by Drennon. DICTATOR WILKES is a dark bay horse with size, style and excellent conformation. He stands 15 3 and weighs 1100. Was never worked for speed except a little as a two-year-old, when he was very promising. He is the sire of Monroe S. 2:13¼ and other very fast trotters and pacers.

Temescal, son of Palo Alto 2:08¾ and Telie (dam of Truman 2:12 and two others in the list) by Gen. Benton. TEMESCAL is a handsome chestnut, stands 16 2, weighs 1250 pounds, has an excellent disposition and size and style. But one of his get has ever been worked, a filly out of a Dexter Prince mare, and she shows much speed and great promise.

For prices and further particulars address

W. A. SHIPPEE,
oc22eow Nelson, Butte Co, Cal.

TEAM FOR SALE.

A PAIR OF VERY HANDSOME AND STYlish black Mares by Prince Direct; trotters, and broke to drive single or double; not afraid of cars or automobiles and can be driven by a lady. Absolutely sound and without blemish. Will be four years old in the spring. For sale at a bargain if applied for soon. Apply to

J. H. RAVEKES, San Leandro.

FOR SALE—SINGLE FOOTER.

Silver Belle, HANDSOME BAY MARE, stands 16 hands, weighs 1100 pounds; by Antone. She is not only a fine single footer, but drives single or double. Will be sold at a bargain. To see the mare or for particulars call or address

HARRY BROWN,
268 Second St., Oakland, Cal.

FOR SALE.

A HANDSOME 4-YEAR-OLD BAY FILLY; pacer; stands 16.2½ hands; sired by McKinney, dam Mission Bell by St. Nicholas. Full sister to Mechanic. A smooth-gaited filly, goes without straps or boots, and with less than a month's handling has paced a half in 1:11. Is sure to make a fast pacer. Address or apply to JOHN ROWAN, 1317 East South Street, Stockton, Cal

---

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy......$7
BOUND IN CLOTH, per Copy.......... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

CAN YOU ENJOY A SQUARE MEAL?

Do you sit down at the table with a fine appetite intending to enjoy your meal immensely and after a few mouthfuls give up in despair? That's a typical "well along" case of indigestion or dyspepsia. Hundreds, yes, thousands are in the same boat and are willing to do almost anything to be as they used to—healthy, well and strong with a good sound stomach.

You cannot force your stomach to do work that it is unwilling to do. It has been tried time and time again, with the same results always. The stomach is a faithful organ, but when pushed beyond, and exerted to the utmost, it rebels. Some stomachs are stronger than others, but all have their limit and when the limit is reached it is unwise to attempt to force it into doing further work.

The best and quickest cure offered to that big army of sufferers is

DR. SPENCER'S ENGLISH DYSPEPSIA WAFERS.

If you haven't heard of this cure before, you have been needlessly suffering, for this medicine *will* cure you—cure you as sure as there's a sun above. Would you spend 50 cents if you thought there was some hopes. We know you would, and therefore tell you sincerely that D. S. E. W. *will* cure you.

The curing powers of these wafers are very simple to understand. They are natural in their workings and effects, taking up the work of the worn and wasted stomachs, digesting the food thoroughly and completely.

HIGH GRADE AMMUNITION

U. M. C. POPULARITY NEVER WANES

RESULTS: MOST SATISFACTORY

YOU WANTED BADLY

to bring home as large a bag of ducks from the marsh as your neighbor, but you forgot

THE MAIN FACTOR OF SUCCESS

which rested in the brand of ammunition you used. There is no need of talking about other brands bringing equal results when all successful sportsmen agree that

U. M. C. AMMUNITION HAS NO EQUAL

and that the best results come from its constant use, either in the field or over the traps. Better try it!!!

Money should be sent by postal order, draft or by registered letter addressed to F. W. Kelley, 36 Geary St., San Francisco. Cal.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, November 19, 1904.

THE HOLIDAY EDITION of the Breeder and Sportsman will be published December 24th and will be one of the best holiday numbers ever issued from this office. The cover will be of an original design, in colors, made especially for this number by Mr. George Ford Morris of Chicago, who is beyond question the leading American artist in horse and animal portraiture. All the usual tables of statistical matter will be printed in this number, together with many special articles of interest to the horse breeders and owners and to lovers of field sports. The advertising space of this issue will be limited, and those wishing to take advantage of the large circulation it will have should apply for space early as the forms will go to press one week prior to the date of publication.

IF YOU ARE INTERESTED in having a circuit of district fairs in California next year that will be a credit to this State, and profitable to the breeders, farmers, fruit growers and other taxpayers of California, call on the State Senator or Assemblyman of your county and talk the matter over with him, that he may have your views in regard to the matter. There seems to be a pretty general opinion that the State should be divided into not more than ten districts, to each of which the Legislature should appropriate money to aid an agricultural fair, and if such a measure can be drawn up it will receive the approval of the legislative bodies, the Governor and all concerned. The bill must be thoroughly up to date and in the interest of the whole State, and not for any one section or class. It is a recognized fact that exhibitions of livestock, agricultural products, fruits, machinery, etc, tend to improve the productions of the districts wherein they are held. The State and district fairs of California have done much in the past that has been of vast benefit to our people and added to our wealth. The fact that any fair has been badly managed is not an argument against the fair itself as a beneficial enterprise. We have too many districts, that is certain, and we believe there will be little objection to cutting down the number to ten or even less. Now is the time, however, for those interested to begin discussing the proposed measure and a free exchange of views at this time will do no harm. The Breeder and Sportsman invites correspondence on the subject and will print with pleasure communications bearing on it.

FIVE HUNDRED THOROUGHBREDS, stallions, broodmares and race horses will be sold at auction by the Fasig-Tipton Company at Lexington, Kentucky, during the week beginning Monday, November 28th. This is a great opportunity for farmers and small breeders to obtain good paying investments at low figures. A good thoroughbred mare kept on the farm and bred to good stallions produce colts that will sell at a profit as yearlings, and the mare can be worked nine months during the year at light work and pay for her keep. Look over the big advertisement on the opposite page and send in a commission to buy if you cannot attend the sale.

DAN PATCH is the undisputed champion pacing horse. His record of 1:56 made this year on the Memphis track has never been approached and on Thursday last at Oklahoma City he paced a mile on the half-mile track there in 2:03, lowering his previous record of 2:03¼ made at Birmingham, Alabama, last year.

The racing men ought to try the Hart Apartments this winter; 3 and 4 rooms, private baths, telephone, steam heat, first class. 750 Ellis street. *tf

Answers to Correspondents.

J. W. S., Tulare, Cal—Rosedale, pacing record 2:19¼, is a stallion. He is registered as Rosadel 24,335. His dam Roseleaf by Buccaneer is also the dam of Falrose 2:19.

F. R. G., San Jose—Delmas 20,504 was a chestnut horse by Almoon 20,503, out of a mare of untraced pedigree. He was bred by N. R. Harris, College Park, Santa Clara county, and made a record of 2.25¾ at Napa in 1892.

James Dinsmore, Oakland—Yes; Billy Hayward was standard bred. He is registered and his number is 489. He was a gray horse foaled 1865, and was by Geo. M. Patchen Jr., dam Grey Liz, said to be a daughter of Morse Horse 6.

J. M. Leavitt, Oakland, Cal.—We have no data showing when the first horse clipping machine operated by a crank wheel was invented. Consult the Patent Office Reports in the public libraries.

L. B. Spurgeon, Wheatland—The trotting bred stallion Costello is registered in Volume X of the American Trotting Register. His number is 14,628. He is a black horse, foaled in 1890, by Astorwood 10,279 (son of Blackwood Jr.) dam Carmine by Tramp 308, second dam Kate Carman by Bashaw 50, third dam Madam Kirkwood by Young Green Mountain Morgan.

B. & H., Santa Rosa—Black Ralph 10687 was by David Hill 857, dam untraced. He was bred by Geo. Ellis and died nearly twenty years ago. He stood in Yolo, Lake and Mendocino counties, and sired Killarney 2:20½ Keepsake 2:29¼, Belle Spencer 2:26½ and others. We have no record of Reynard.

Mr. Coram Lost But Won.

Over at the pretty little town of Centreville in Alameda county, on Sunday last, there was a wedding at which Mr. S. T. Coram who has for many years been Superintendent of the James G. Fair ranch at Newark, and Miss Grace Jury of Centreville, were the high contracting parties. On the Fourth of July last, races were held over the little half-mile track at Centreville and Miss Jury, who is an accomplished young horsewoman owned one of the winners. Mr. Coram had an entry in the same race but Miss Jury's trotter defeated him in splendid style, and won the title of the best trotter at the meeting. Mr. Coram was so charmed with the way Miss Jury drove her horse that he concluded to turn lawyer and plead Cupid's case before that fair Jury. His plea was eloquent, the verdict handed down was in his favor and has now been duly recorded. May health and wealth and happiness be theirs, and may the record remain until death does them part.

Evolution of the Shetland.

The Shetland pony of today is a little fellow distinctly apart from his namesake of popular penchant some years ago. Then he was a squat little individuality of chubby, muscular development, almost shapeless in its roly-poly character and set low on stout but shaggy little legs that gave him the appearance of Lilliput's drafter. He patted along over the ground in a regular dog trot, with a patience and energy that offset the fact that he only lifted his feet high enough to get them off the ground and displayed about as much grace in his locomotions as "the sheep in the pasture, the cow in the corn." Such was the blocky, sturdy little bread-winner of his native Shetland isles transplanted to American soil.

Year by year, however, his gentleness and endurance popularized his demand until his use became common and his defects began to storm the eye of the pony breeder. Today the Shetland is a minature jewel in conformation—the best of them—with all the elegancies of type of a show horse. Careful breeding has produced clean, well-turned feet and fetlocks, little legs that are muscular without being stocky, close-coupled little bodies, supple, well set little necks that carry proud little heads as your gig type. He is gaining action, too, slowly but truly; picking his feet up in a brisk, clean manner he did not know before; in fact, some of our best Shetlands display quite remarkable knee action of a modest sort and fold their feet under them with the sharp precision of a veteran high-stepper. They are gaining snap and spirit with out losing the qualities making them famous.

In fact, the Shetland of today is sloughing off his crudities that passed unnoticed among the foothills of his bleak island home of earlier days He is being refined by careful breeding to meet modern exigencies and the demand of a market that wants these characteristics. The horse show has implanted a desire of smartness of type, even among the children's pet and plaything, and those breeders who recognize the fact the most forcibly are the material gainers in the end. The Shetland pony is past the point when he was an experiment. His legitimate position is assured, just as the definite usefulness of the larger pony is growing with the appreciation of his capabilities.

The Fastest Records of the Year.

The fastest records for the year are as follows. Those records made against time are indicated by an asterisk, all others being race records.

Angus Pointer, b g by Sidney Pointer 2:07¼, dam Jane by Grant's Hambletonian........ 2:04¾

More Stallions From the East.

The Woodland *Mail* of last Wednesday says: "C. R. Coleman received Tuesday night from his firm, Dunham, Fletcher & Coleman, of Wayne, Illinois, twelve more fine imported Percheron stallions. Since Mr. Coleman first sold the Belgian stallion Mastic to a Woodland company he has brought twenty-five imported stallions to Woodland and all but three of them have been sold at fancy prices. At the rate the other animals have been disposed of the twelve new ones just received will be gone by the first of the year.

The twelve new stallions are all imported from France and with the exception of one fine gray, all are coal black. Their ages range from three to four years and they are well built animals, in fact, Mr. Coleman says they are the best he has yet brought out from Illinois.

With the sale of the last shipment Mr. Coleman will have disposed of thirty-seven stallions in all and as their average sale price is not less than $2 000 this will mean that Mr. Coleman has received $74,000 for the entire lot. The sale of these horses, causing a change of hands of this amount of money, has not only been beneficial to Mr. Coleman's firm but to Woodland as well, as it has appreciated the reputation of Woodland among horse raisers.

It is reported that a syndicate of horsemen have opened negotiations for the purchase of the Jewett covered track.

Strike!—if they don't give you Jackson's Naps Soda when you ask for it.

JOTTINGS.

SIDNEY DILLON, sire of the first two-minute trotter, walked out of the Santa Rosa Stock Farm's gate on Saturday last with head erect and a jaunty step, and while several of his admirers stood near his old stall and heaved sighs of regret because he was leaving California the stallion did not even turn his head to take a last look at the farm, or whinny a farewell to the old matron in the pasture whose handsome little chestnut daughter had made him famous. Sidney Dillon was going out into the world and he never felt better or looked better in his life. When he reached the station where stood a new Southern Pacific horse car, fitted with everything up-to-date to make transportation comfortable and convenient for horse and care-takers, he marched up on the platform and stood quietly while numerous photographic plates were exposed that the last incidents of his California career might be preserved in pictures. Then he was led across the gangplank and into the car. He acted as cooly as if he were going back into his old stall at the farm, and took his place in the elegant box stall with the air of an old commercial traveler settling himself in a Pullman section. There was a crowd of Santa Rosans at the station to take a last look at "the horse that made Santa Rosa famous" and Superintendent Frank S. Turner of the Santa Rosa Stock Farm, into whose charge the owner, Ira Pierce, had consigned the horse for safe delivery at Madison Square Garden, was presented with so many beautiful boquets of choice flowers that it required a large space on one side of the car to contain them. The writer accepted Mr. Turner's invitation to ride in the car to the junction where it was to be switched to an express train going east, and watched Sidney Dillon with much interest, when "all aboard" was shouted by the conductor and the train began moving. There is no more intelligent head on any horse than the one which this son of Sidney carries. His eyes stand out like those of a deer and are as gentle. When the first slight jerk of motion was felt this head went up and there was a look of excitement in his countenance. He looked to the right and left, while his nostrils expanded and a pose was assumed that would have delighted an artist and made the reputation of an animal photographer could he have secured it on a plate. The train had not moved a half mile, however, until Sidney Dillon was perfectly at home and settled down to his usual stall manners. He is full of life at all times, but his disposition is so perfect that a woman could take care of him and lead or drive him anywhere

Frank Turner told me that the horse knew as much as anybody and could understand every word said to him. As a proof of this last assertion he called to the boy who accompanied him on the trip: "Bring Sid one of those apples," and before the boy could reach into the box, which was at the opposite end of the car from the stallion, he was fixing his eyes on the youth, craning out his nose toward him, and uttering a low whinny which plainly said, "Hurry up with the apple please." Turner regaled me with stories of Sidney Dillon's many good qualities during the hour it took to run the thirty miles to the junction. He said in all his experience with horses, which has extended over many years, he never saw one with the excellent disposition and intelligence of this one. He can be handled by a green boy, will stand quietly to be hitched up and never squeals or prances about unless a stud bridle is put on him, and even then he obeys every word of command. On the road his head is erect, he steps proudly and can trot fast. He notices everything, but seems afraid of nothing. Up to this year he had been bred to not over 55 mares all told, and as four or five of these foals have died, Mr. Turner does not believe there can be over fifty of his foals alive. There were several highly bred stallions at Santa Rosa Stock Farm, including Bay Rose, for which a big price was paid, Beau Brummel by Wildnut and L. W. Russell by Stamboul, and for two years the very choicest mares on the farm were sent to McKinney. So Sidney Dillon was neglected, and even the appearance of Dolly Dillon did not cause him to be used as he deserved. But when Lou Dillon began to show her marvelous speed and every other Sidney Dillon foal that was worked seemed naturally fast, he was brought out into the light and given the premier's stall at the farm. Whoever buys him will get one of the greatest sires ever bred, and there is no question but his list of fast performers will grow with great rapidity from now on. It would be a [illegible] thing for California could he be brought back [illegible] a stock farm and stand for public service here [illegible] there are so few wealthy Californians engaged in horse breeding on a large scale that it is almost vain to hope that any such good fortune will come to us. Mated with the high-class mares of the East I predict that there will be more than one two-minute performer in his list before six years have passed. He will be sold at the Old Glory Sale next week and should be reached on the second day as his number is 283 in the catalogue.

While at Santa Rosa I had the pleasure of visiting for the first time the farm of Mr. S. B. Wright, breeder of that fast but unmarked mare Sonoma Girl, for which her present owner, Mr. J. D. Springer of Pleasanton, refused a big pile of money. Mr. Wright has about 640 acres of as fine land as lays out of doors and it is less than two miles from the beautiful and prosperous county seat of Sonoma county. The larger part of it is leased to hop growers, but at the home place Mr. Wright has several acres of pasture land whereon he raises blooded stock. He owns some prize cattle and hogs, but his little band of broodmares interested me the most. In a paddock by herself was that grand mare Eveline by Nutwood. At twenty-one years she looks better than most mares half her age, and is in foal to Sidney Dillon. She has produced Ole 2:11, Roblet 2:12, Tietam 2:19, Maud Fowler 2:21¾, Nick Russell (trial) 2:18 and several others that will be given records within a year or two. In the orchard were running Maud Fowler 2:21¾ by Anteeo. She is the dam of Sonoma Girl and has a chestnut filly at her side by Sidney Dillon that is the largest, and one of the best looking and best developed sucklings I have seen this year. The majority of the Sidney Dillons are not large, but this one looks like a coming sixteen hand mare, of great finish and style. Maud Fowler is a grand looking matron and will be in the Table of Great Broodmares before very long. Her two-year-old Sonoma Queen, own sister to Sonoma Girl, is a very handsome and well-made young mare and very promising.

Sidney Dillon Starts for New York

Mr. Wright recently purchased the old broodmare Nellie Fairmont, the dam of Zambra, holder of the world's five mile trotting record. She is a big bay mare not overly handsome, but a good looker in harness as she is upheaded and an excellent road mare. Another large mare owned by him is Maud Patchen 2:19¾ by Idaho Patchen, dam Maud W. W. 2:23½ by Gen. Reno. She is a coal black and a strong, well made mare. The five-year-old mare Hattie Fowler by Robin out of Maud Fowler, is in foal to Sidney Dillon. This mare has a lot of natural speed, and I believe would make a show mare if handled in heavy harness. She is round and neatly turned, good head and neck and feet and limbs clean. Mr. Wright's collection of broodmares is not large, but they are choice, and from the success he has had in the past one can predict a continuance, as he is breeding on the right lines. Mr. Wright is one of the few breeders who believes in selling his young stock at a reasonable profit, giving the buyers an opportunity to make something. He has no trouble disposing of his young stock as soon as they are old enough to train. He sold a gelding by Lynwood W. out of Maud Fowler to Mart Rollins for $250, and the latter could now take more than five times that amount for him as he is a very fast trotter. He is an own brother to Sonoma Girl and Sonoma Queen.

On the front page of this issue is an engraving reproduced from a recent photograph of the old broodmare Bee by Stirling, owned by Mr. E. D. Dudley of Dixon. Bee is already in the great broodmare table with three representatives, and has a family of youngsters yet untrained that will make her list of standard performers a long one and put her name high up among the greatest in the table. Bee is eighteen years old and a regular breeder. She is perfectly sound and without a blemish except the near knee which is somewhat enlarged from the bite of a vicious boar. Her first foal was a chestnut mare called Babe by Dawnlight, a son of Dawn. Mr. Dudley never worked Babe on the track, but she was a fine road mare with lots of speed and is the dam of six fine colts. Bee's second foal was the bay gelding Monroe B, now owned by Frank Ruhstaller, Jr., of Sacramento, and that took a record of 2:15¼. Her next foal was Allendale which Josh Albertson worked a mile in 2:11 before Mr. Mills sold him to Mr. Moody of Cleveland. Albertson drove this pacer a final quarter in 29 seconds at Cleveland. Allendale is one of the handsomest roadsters in America, goes clean without any boots and has taken a matinee record of 2:16¼ to wagon. Bee's fourth foal is the brown mare Lorna Doone by Bayswater Wilkes which Sam Hoy worked a mile in 2:18 this fall and will be a good mare next year barring accidents. Her fifth foal is one of the greatest three-year-olds seen on any of the tracks this year. Her name is Friskarina and she is by Bayswater Wilkes. Friskarina won second money in the Breeders Futurity for two-year-olds last year at Petaluma, and this year won first money in the three-year-old pacing division of that big stake, pacing her three heats in 2:15¾, 2:13¾ and 2:18½. She is undoubtedly one of the greatest three-year-olds in America. These are the only foals of this mare that have been worked, but she has a fine bay two-year-old filly, sister to Lorna Doone and Friskarina, a yearling colt by Diablo that for looks and breeding is second to none, and has just weaned a brown filly by Searchlight 2:03¼ that is very handsome. She is again in foal to this great son of Dark Night. Bee is by Sterling (son of Egmont and old Mary by Flaxtail) and her dam is Flash (dam of Javelin 2:08¼, Flare Up 2:14, Sally Derby 2:19¼ and Walker 2:23½) by Egmont, second dam Lightfoot by Flaxtail, third dam the famous mare Fanny Fern by Irwin's Tuckahoe, and fourth dam by Leffler's Consul. Fanny Fern was the dam of Fern Leaf, that in turn produced Gold Leaf 2:11¼, Shamrock 2:25, Thistle 2:13¼, the last named sire of To Order 2:12¾ and many other fast ones.

One thousand and forty-four horses are catalogued for the tenth annual Old Glory sale which opens next Monday at Madison Square Garden, New York. Just think of the amount of money it will take to pay for all these horses, as they will be sold to the highest bidder and no one would guess the average price to be lower than $300 which would mean that about $350,000 will be paid for trotting bred horses at this one sale. The first horse led into the ring will be the great Arion 2:07¾ that sold for $125,000 after he had lowered the world's record for two-year-old trotters to 2:10¾ hitched to a high-wheel sulky. As this mark has never been reduced or equalled by any two-year-old trotter since, even with the aid of a ball-bearing pneumatic, or a wind shield, the greatness of Arion can be understood. His four-year-old record of 2:07¾ has been beaten by but few stallions, he has produced a 2:10 performer and one of his daughters has produced a 2:10 performer. He is not an old horse having been foaled in 1889, and as he has been bred to the best mares in the blue grass during the past three years, his get should make a great showing in the years to come. I hope he may bring as much as McKinney, although one can not expect it.

Polo and Pony Racing.

The fall race meeting and polo tournament of the California Polo and Pony Racing Association will be held at the C. W. Clark polo field, near San Mateo, on November 23d to 28th. The program is as follows:

First day, Wednesday, Nov. 23d, at 3 p. m. Polo. First round handicap tournament, team "A" vs. team "B."

Second day, Thursday, Nov. 24th, at 2:15 p. m. Pony races.

Third day, Friday, Nov. 25th, at 3 p. m. Polo. First round handicap tournament, team "C" vs. team "D."

Fourth day, Saturday, Nov. 26th, at 2:15 p. m. Pony races.

Fifth day, Sunday, Nov. 27th, at 3 p. m. Polo. Match game, North vs. South.

Sixth day, Monday, Nov. 28th, at 3 p. m. Polo. Final game of handicap tournament.

The officers of the association are: President, Rudolph Spreckels; First Vice-President, C. W. Clark; Second Vice-President, F. J. Carolan; Treasurer, R. M. Tobin; Secretary, Robert Leighton.

The Intelligent Horse

Is having more respect paid to it in this, the twentieth, century than ever before in the history of the world. Some horse owners have been slow to recognize this. Those who have heeded their horse's suggestion have learned that its health and comfort are well preserved against all the germ diseases, such as distemper, shipping fever, colds, pinkeye, etc., by the regular use as a preventive when in health of Craft's Distemper & Cough Cure. This remedy is positively guaranteed to cure (or the price is returned) by the manufacturers, Wells Medicine Co., 13 Third St., Lafayette, Indiana.

P. H. McEvoy of Menlo Park is offering two handsome Prince Airlie stallions for sale—Milbrae (trotting record 2:16½) and Menlo Boy 3741. For particulars see advertisement. *tf

News From the North.

[Portland Rural Spirit]

They say there is a green pacer in Montana, sired by Prof. Eaton's stallion Malcolm that can pace in 2:10 or better.

Prosser, Wash., is to have a new half mile race track, and preparations are now being made for a county fair and race meeting next year.

There should be at least two $5000 stakes given for harness horses on this circuit next year, and Portland is the logical place to give them.

Senator Helman has returned to his own illihee at Irvington track from Nez Perce, where he goes into winter quarters with plenty of smoked salmon and dried camas for the winter.

It is most likely the two hig stakes at the Oregon State Fair next year, will be for the same classes as this year. These classes would suit a greater number of horses than most any other.

Lewiston will make an effort to get dates on the fair circuit next year following Spokane. Walla Walla wants to follow Salem, if Portland does not give a harness meet, if so they would like the week following Portland.

W. L. Whitmore is driving Hallie Hinges 2:18 and her full brother, Pricelist, to polc this fall, and they make a swell looking team. They are well matched in looks and conformation, and have size, style, speed and pleasant to drive. Having all these qualities and being absolutely city broke makes them a very valuable team.

J. L. McCarthy & Son, the well-known Portland horse sale firm, inform us that they will hold their third spring horse auction the second week in April. Breeders and horsemen who contemplate selling their horses at Portland's annual spring auction should keep them in the best possible condition. Past sales have shown the value of condition in the sale ring.

The citizens of Pendleton are talking of building a race track and fair grounds for the purpose of holding annual fairs and race meetings. Pendleton is well located for holding a splendid agricultural fair, live stock show and race meeting each year. They have good transportation facilities and a splendid agricultural and live stock country to draw from, and the business men of that city could do nothing more befitting than to arrange for these annual meetings of the agricultural classes in that immediate vicinity.

George W. Maxwell, of Woodland, Wash., who pinned his faith to the trotter many years ago, and who has hung on to them with the tenacity of a bulldog, is having a few youngsters worked at the prune orchard track, Vancouver, Wash., by the old-time trainer of "Democrat" fame, Charles Hawk. Among the lot is Gee Whiz, by Captain Jones; Alki, by Claymont; Oro Belle, by Oro Guy. Mr. Maxwell bred all these youngsters, and it would be a fitting reward to faithfulness to the breed to see the old man get a record breaker out of the lot.

H. H. Helman has returned from the racing circuit and reports a very successful season. Mr. Helman, like many others who followed the circuit, thinks more attention should be paid to harness horses. The habit some associations have of hanging up purses with a string to them should be discontinued and at least two harness races given each day at every meeting. Mr. Helman reduced the record of Mack Mack to 2:12¼ which is no measure of his speed but shows that he is improving each year. He also put in the list Baron Lace 2:14¼ and Loveless 2:20 both by Lovelace and Prince Charles 2:17 by Charles Derby.

Loveless' record of 2:20 is the fastest record for a three-year-old pacer on this circuit this season. She was bought by a farmer up the valley at the McCarthy sale last spring for $380, who placed her in Senator Helman's hands to be trained. She is a very large growthy filly, and when fully matured should be a great mare. Her breeding is superb, being sired by Lovelace 2:20, one of the best bred stallions anywhere. First dam Roxey (dam of Pauline 2:29¼), by Rockwood; second dam by Kisbar; third dam by Oregon Pathfinder. She showed considerable speed last year in her two-year-old form and won the pacing division of the two-year-old stakes very handily, but she is expected to be at her best when fully developed.

A horseman who followed the North Pacific Circuit this year, informs us that it cost him $160 per head for freight on each horse shipped throughout the circuit at car load rates. He started from Salem and took in the two meetings at Bellingham and Everett, back to Salem and from there on to Lewiston, returning to Portland. This means nearly $1000 for freight alone on a stable of six horses, say nothing about the other expenses, and a man would have to win first money in five $500 purses to pay car fare on his horses. This with other expenses takes away all chances of making anything on this circuit with a racing stable, and association managers will look well to their own interest by using their combined influence in having this handicap removed.

N. K. West refused $2000 for his good three year-old trotter, Satin Royal 2:19¼, while in Montana. Satin Royal is by Bonner N. B., one of the fastest trotters ever produced in this country, and had he been handled properly would today have a record far below 2:10. Bonner N. B. is a half brother to Mack Mack 2:12¼, that everybody concedes can step inside the 2:10 list any time Satin Royal's dam is Minoie M., dam of Trumont 2:21¼, that Andy McDowell claimed to be the fastest horse he ever sat behind, notwithstanding the fact that he had given Alix her record of 2:03¾. His second dam is Sally M., the dam of Pathmont 2:09¼ and Altao 2:09¾. His third dam is Sally Come Up, by Paul Jones, the sire of the dam of the great trotting mare Jane L. 2:19½. The way this youngster is bred and the good way he has of going he should bring more money. He certainly will be one of the hard ones to beat next year.

Horse Breeding in Austria-Hungary.

Few if any other countries are doing more useful work in the line of improved horse breeding than Austria-Hungary. This is especially true of its work in the development of light horses intended for saddle and driving purposes. The excellent results obtained have not been the result of careful work done along the line of breeding horsea for saddle and driving pleasure purposes. It has not been an ambition to breed a type of horse which would appeal to the more wealthy classes, but the desire to produce and maintain within its owns borders a type of horse which from a military standpoint would be second to those of no other country.

In recent years some of our would-be strongest nations have learned the lesson, a lesson which some of the smaller nations have long known, that their military mounts are a factor on which, more than any other, success in war may depend. In the recent British-Boer war Great Britain had to expend some $62,000,000 in the purchase of 300,000 horses. These horses belonged to all classes, the major portion being far from what would be considered desirable mount animals under more favorable conditions for purchasing such animals. One of the most pertinent questioos in England today in the line of horse breeding is the development of a horse better suited for military purposes. Perhaps in our country we could well afford to give this line more thought and study instead of devoting so much energy and money to the breeding of the trotting horse for speed alone, little or no consideration being given to type, size and desirable formation.

Horse breeding in the majority of the European countries at the present time is being done with a view of creating and maintaining a suitable supply of useful animals for military purposes. In no other country have I seen such uniform results and meritorious animals as in Austria-Hungary. The city of Vienna has more high class light horses than any other city in the world. More than 75 per cent of the cab horses would not look out of place on any American gentleman's carriage. Taking them as a whole they are very uniform in size, style, action and speed. It is remarkable to note the speed of these animals in their regular work. They will easily cover as much ground in half an hour as the average cab horse in London or many of our American cities will in an hour. The endurance of these animals is also worthy of mention. While some of them show evidence of having seen their best days, the majority are good in their feet and legs, more especially the feet. Not a few, those with considerable Arabian blood, are tied in the cannons and over in the knees.

The present high standard of excellence of the Austro-Hungarian horse is due in no small measure to the aid of the national government. More than a century ago national studs were established; since that time they have been well maintained and increased in number so that at the present time their influence reaches all parts of the empire. They were established for the purpose of breeding a better and more uniform class of horses throughout the entire country. New blood, when introduced from other countries, would be tested to determine whether it would be beneficial to the horse breeding interests. In this way the heterogeneous methods of breeding so common in many countries were avoided. This work is under the direction of the Ministera of Agriculture for Austria and Hungary, paid for out of the agricultural budget and operated by a military organization. In this way the work of the military and agricultural department is very closely allied.

At the present time there are two distinct kinds of establishments, but both are maintained for the one purpose of horae improvement. The first class contains breeding establishments where the State produces and raises horses; then there are the stallion depots which furnish stallions for a certain number of permanent posts. The management of these establishments is accompanied by a special corps of officers, which has two divisions, one for Austria and one for Hungary. The officers of this corps are recruited from the officers of the cavalry and the train who have served three years in a body of troops and in addition have also shown an aptitude for the work. As a further safeguard and commendation of their ability and fitness for the work, they are submitted to an examination before a board under the presidency of the Inspector of the Austrian or Hungarian Studs, at the Veterinary Institute of Vienna or of Budapest. This examination is of both a theoretical and practical nature, covering a knowledge of the horse, its anatomy, and the raising, feeding, riding and driving of horses. Having successfully passed the examination the officer is then subjected to a period of six months' probation before he is definitely admitted. It sometimes happens that cadets who are acting as officers of cavalry and of the train are admitted after one year of service and having met the requirements of the examining board and the probationary period. This corps numbers 128 officers, of whom 45 belong to Austria and 83 to Hungary.

Austria has two breeding establishments, those of Piber and of Radautz, and five stallion depots located at Stadl, Graz, Gooding, Pisek and Vrohowyze. Hungary having much larger horse interests is more liberally provided, having four breeding establishments and five stallion depots. The breeding establishments are located at Mezohegyes, Kisber, Babolna and Fogaros, while the stallion depots are at Stuhlweissenburg, Nagy-Koros, Debreczin, Sepsi-Szevst-Gyogy and Agram. In connection with each of these establishments is an array of uniformed men. These include the necessary veterinary surgeons and accountants. There are on duty at all of the establishments 943 noncommissioned officers, 18 accountants, 3578 privates of cavalry and 135 orderlies, making a total of 4674 men. The commandants of the different establishments employ, in addition to the military attendants mentioned, a large number of civil employes at the different seasons of the year for the cultivation of the soil and the harvesting of the crops produced.—W. J. Kennedy, *in Breeders' Gazette.*

On the New York Speedway.

California horses seem to be very much in evidence on the New York Speedway whenever "brush day" arrives. The following from the New York *Morning Telegraph* of last Saturday is proof of the above statement:

Many enthusiasts turned out at Speedway Park yesterday to watch the edging up of the fast ones preparatory to this afternoon's farewell matinee. Among those noticed at speed were E. E. Smathers behind the matinee pacer Inaha, with no race record at a mile to harness, and yet has matineed in 2:11¼; Brayton Ives sending Monte Carlo 2:07¼, down the upper stretch at a 2:10 clip hooked to a spidery little wagon; James A. Murphy breezing Don Derby 2:04½, at a lightning pace for a quarter on the southern stretch, while homeward bound, and John F. Cockerill with Annie Little 2:12¼, in the thick of the fray, yet with but little opposition, so high class is she. Al Carroll, Crescent, Kingwood 2:17½, Ilderim, matinee record 2:14¼, and Mr. Ryan's pair, Mattie Lynn Holt 2:23¼, and Algonita 2:14, were also stepped fast by their owners.

Mr. Gwathmey turned Tiverton 2:04½, the champion race gelding of the world, over to his trainer, Howell, and joined a group composed of George A. Coleman, Walter F. Kilpatrick and two others at the press stand, acting unofficially as a judge of all finishes.

No one ever saw Tiverton when in such condition as he is after his hard campaign. His limbs are like steel, not a puff, no gumminess, no trembling whatever, and really remarkable is it when one considers that one hard race knocks out many a fast trotter.

Mr. Howell's injured ankle is fast mending, and let us hope he, with all others of our professional trainers, escapes further casualties in the future.

Mr Billings drove yesterday forenoon and got a lot out of Equity, one of his champion pole team. Charles Tanner sat behind Prince Direct 2:07, and a friend worked Greenline 2:07¼.

Sunday will be a gala day, and all of Mr. Billings' horses will be out, weather permitting.

Charles De Ryder, who won $41,000 on the Grand Circuit with the East View horses, and who marked Consuela S. 2:07¾, Aristo 2:08¼, Direct View 2:08½, Trilby Direct 2:08¼, Judge Green 2:09, Ben F. 2:09¼, Leonora 2:12¾, Princess Athel 2:14, and Hopper 2:14½, was my guest behind Fred Wright's little chestnut trotter yesterday. Mr. De Ryder said that after finishing his work here on the East View sale horses and others that he is letting down at the track gradually so to turn out for the winter, he is to take a carload of Directs over to California for winter training.

"I think Hopper could be hooked light and go up to the Speedway and trim anything here today except Monte Carlo and Don Derby," remarked Mr. De Ryder as we jogged along, and of a sudden I remembered having seen him work a mile easily in 2:[illegible] with a quarter in 31 seconds, And he, too, is a M[illegible]r.

Notes and News.

Lou Dillon [illegible] is champion.

The Old Glory sale begins next Monday.

Baron Grattan's sulky and wagon records are now the same—2:06¼.

There are several stallions remaining in California that will sire 2:05 trotters.

Those desiring good pasturage should consult our advertising columns this week.

A well known trainer advertises for a position on a stock farm. See our business columns.

Ben F. will not go to the Old Glory sale. Mr. Butler thinks he is too good a horse to sell just now.

It is reported that W. J. Snyder has resigned his position as secretary of the Detroit Driving Club.

On account of ill health the well known Philadelphia trainer Stote Clark will winter in Los Angeles, Cal.

A four-year-old Dexter Prince trotter worked a mile in 2:16¼ over a Maine half-mile track the other day.

A fine black stallion, 16 hands high, is offered for sale by Mr. Purcell Rowe, 623 Mills Building, this city.

At a Philadelphia sale last week, Owyho 2:09¼ by Owyhee was bid up to $2900, at which figure he was withdrawn.

The pacer You Bet 2:07¼ will be driven on the Philadelphia speedway by his new owner, Mr. James Bell of Philadelphia.

Princess Athel 2:14, the Directum Kelly filly, has won some $5633 this year. She should be good in her class next year.

The name of Redlac, 2:08½, holder of the race record of the year for trotting stallions, is that of his breeder reversed.

Miss Jeannette's mile in 2:23¼, in the first heat of the 2:30 trot at Memphis, is said to be the slowest trotted on the Grand Circuit in 1904.

George W. Saunders of Cleveland has arranged to winter his stable at Selma, Ala., and will ship his horses there the latter part of December.

John Howell, whose leg was broken in the first heat of the Massachusetts Stake when Tiverton 2:04½, fell, is able to jog the fast son of Galileo Rex again.

It is odd that Dan R. should hold the race record for two seasons. Last year his mile in 2:01¾ was a low mark, and his 2:02 heat is best so far this season.

Don Derby 2:04¼, driven by his owner, J. A. Murphy, defeated John M. 2:02¾, driven by E. E. Smathers, on the New York speedway. John M. seemed to be unsteady.

Grace Bond has won five heats in 2:10 or better in races. Only one other three-year-old trotter has ever beaten 2:10—Fantasy 2:08¾, and she has but a solitary heat to her credit.

T. F. Adkin of Rochester, N. Y., owner of Lisonjero 2:08¼, has purchased Liska 2:28¼, the dam of that good trotter. Liska is by Electioneer and is the dam of four 2:30 performers.

Van Zandt, the bay mare by Chime Bell that took a record of 2:12 in 1896 when she was six years old, came out this season and at the age of fourteen reduced her mark to 2:09¼.

It is reported that David McClary has sold his great three-year-old colt, Lord Revolstoke 2:12¾, by Bingen 2:06¼ dam May Fern 2:11¼, by Red Fern, to European horsemen for a long price.

George H. Ketcham is now a full-fledged member of the running horse brigade. A stable of runners is owned by Casper & Ketcham, and will be shipped from Chicago to Latonia soon.

Justina 2:20, by Almont Jr., died at Village Farm, a short time ago. She once held, with Belle Hamlin, the world's team record for trotters, the two daughters of Almont Jr. placing it at 2:13 in 1890.

Electric timing clocks are in use in Australia and give great satisfaction. Why not use them in America, and thus do away with all these disputes about records that are so frequent and so exasperating.

J. D. Callery of Pittsburg, Pa., has sold the trotter, Mendal 2:22¼, to wagon, to Robt. Young, who will use him on the road. He is by Mendocino, dam Lady Ellen, in great broodmare list, by Carr's Mambrino.

A meeting of the association of Importors and [illegible] of Belgian Draft Horses will be held in [illegible] on the 30th inst. There are over one hundred members of this association west of Columbus,

E. E. Smathers is to pension grand old Lord Derby 2:05¾, that won the big $40,000 match race with T. W. Lawson's Boralma 2:07 over the Charter Oak Park in 1902, but all of the others go to the auction ring this month.

Most dealers buying regularly in the Chicago market are of the opinion that good horses are from $10 to $15 dearer than they were at this time last year. At that, the export trade is of twice the size it was at that time.

The four-year-old trotter Direct Wood 2:18¼ by Direct 2:05½, that took his record recently in his first race, and three days later, in his second race, trotted a close second in 2:12½, is owned by Charles Bond of Galesburg, Ill.

The McDowell purse at Lexington, which was for four-year-olds this year, will be returned to its old class, for 2:10 trotters. This year's race was a failure, while in past seasons it seldom failed to produce a great contest.

L. V. Harkness, of Walnut Hall Farm, Lexington, Ky., has decided to retire his two great mares Fereno 2:05¼, the double Futurity winner and Ozanam 2:07, winner of the 1902 Transylvania, and both will be bred next spring.

In discussing all the race plans—2 in 3 and 3 in 5, and the dash system—the auburn-hued, expert Scott Hudson, says: "I don't give a dam (a well bred one) how they race, so they hang up the money where we can reach for it."

Ben Kenney, the noted driver, now fully recovered, save a slight limp, from the accident at Providence, R. I., a year ago last month, which kept him out of the sulky so long, will spend the coming winter in Kentucky and open a public stable again at Cleveland, O., next spring.

Doctor Strong is about the fastest trotter in sight eligible to the 2:08 class. He beat 2:06 three times in his races at Memphis, was timed separately a mile in 2:05, and did not take a lame step. The well known and popular horseman, John Laird, of Marysville, O., owns the sire of Dr. Strong, Strong Boy 2:11¼.

One of the best prospects for sale in California is the stallion Millbrae 2:16¼ by Prince Airlie. He got his record last year on the California circuit after very little work and has trialed in 2:13 since. He is a beautifully gaited horse, handsome and will trot in 2:10 if given the opportunity. Read the advertisement.

A standard and registered McKinney yearling stud colt is offered for sale by an advertiser. The colt's dam is by Nearest own brother to John A McKerron 2:04½, second dam by Anteeo and third dam by Venture, sire of the dam of Directum 2:05¼. The advertiser also offers ten registered mares for sale, four of them bred to Kinney Lou 2:07¾. See advertisement.

Ed Benyon will probably train a public stable next year, as his contract with Walnut Hall Farm, that expires January 1st, will not be renewed. Mr. Harkness having decided to discontinue his racing stable, hereafter the colts bred at Walnut Hall Farm will be sold at the farm as yearlings and two-year olds. Ozanam 2:07¼, will be bred to Moko in 1905, and Fereno 2:05½, to Walnut Hall 2:08¼.

Mr. R. M. Cook of Riverside, made third payment, November 1st, on the bay filly Lila Stanley by On Stanley–Julia by Hancock J., entered in Breeders Futurity No. 4, but failed to include the street number in the Secretary's address on the envelope consequently the letter was not received in time to publish his entry last week. This makes 226 foals on which third payment has been made.

It is reported that the noted ringer, Fred Wilton 2:09¼, that has been detected on numerous occasions during the last half-dozen years, in various parts of the country, while being raced under several names and was, until recently, supposed to be in the stable of his owners, near Kansas City, Mo., has again been discovered at his old tricks, this time under the name of Combine, at Kingfisher, O. T.

John W. Martin who is a member of the Board of Supervisors of Tulare county and acts as Secretary of the Fair Association there, recently purchased from the Mooney estate a colt by McKinley 2:29 (son of the great McKinney 2:11¼) dam Breezy Ayers, full sister to Jasper Ayers 2:09 and May Ayers 2:23¼. The colt is not only well bred but is a good prospect, and Mr. Martin is to be congratulated on his purchase.

Kenney, the bikeman, is making a new light wheel for sulkies and carts that is just a little ahead of any wheel yet made for track or road work. It has all the latest improvements, is strong and durable and the lightest running wheel made. Owing to storms in the East the big consignment of McMurray carts and sulkies shipped to Kenney from the factory last month has not arrived, but they will be in by the 25th.

The excessive secretions of saliva, or "slobbers," as it is frequently called, in horses, has a variety of causes. It may be a symptom of some other affections of the mouth, teeth, throat or stomach, or due to direct irritants in the food, such as lobelia, pilocarpin, muscarlin, tobacco, wild mustard, colchicum, garlic and ginger. Brown or second crop clover hay seems also to induce an excessive salivary secrection. The treatment consists in the removal of the cause. If further treatment seems to be necessary, simple astringent washes for the mouth may be used, such as vinegar and water, boric acid, sulphate or tincture of chloride of iron. Two drams of any of the above in a quart of water.—Dr. Farrington.

Omaha's first annual horse show was a most pronounced success. The Auditorium in which it was held is situated in the most accessible part of the town and the crush of carriages lined up to deliver and receive those in attendance was far greater than was ever seen in the Nebraska city. W. G. Carling, Crow & Murray, George Pepper, E. A. Cudahy, W. H. McCord, Don Riley and W. A. Rule supplied the most of the horses that won the ribbons.

In a recent interview at Memphis Millard Sanders said: "The public is fickle. Today it is 'Queen Lou,' and tomorrow it is 'the mare is a has been'; but we will show them all before we get through. I see no reason to believe that Lou Dillon will not be better next year than ever before. A trotter is supposed to be at its best as a seven or eight-year-old, and Lou Dillon will be seven next year, and I expect to see her materially lower her record in her seven-year-old form."

As soon as possible Millard Sanders, who has remained in Memphis in the hope that he would be able to send Lou Dillon against time, will go to New York city for a short stay. While he is in the big town he will get a string of twenty Axworthy colts and fillies, two, three, four and five-year-olds, and bring them to Memphis, where he will spend the winter. Mr. Sanders has been engaged to handle Mr. Schults' Axworthys next year, and will have twenty-five under his care all winter.

An occurrence of unusual interest at Memphis last month was the mile which Ed Benyon drove the green pacer, Her Grace, by Austral, brother to Boreal 2:15¾, a mile in 2:04¾, in an unsuccessful attempt to beat 2:03, says the *Horse World*. It is hardly likely that the mare was expected to beat 2:03, the object being to give her a fast mile in public and so far as can be recalled the time she made is the fastest ever made by a green pacer in public. Austral, the sire of Her Grace, is owned in New York State, being the premier sire at Stony Ford Farm in Orange county.

David Herspring, who formerly trained and drove trotters in California, is now at Closter, New Jersey where he has the following horses in his string: Red Fox 2:10, Dalgette 2:12, Ed Gray 2:24½, Toledo Bee 2:22½, Carrie L. by Arthur L., four-year-old trial 2:15, and a sure 2:10 pacer, Sweet Novice. Out of three colts by Arthur L. that Dave has in training, two have records below 2:30 and Carrie L. can certainly go in the list—a pretty good showing for the little son of Direct. Herspring is manufacturing a veterinary salve that he says is the real thing and he will be in California in January to place it on the market here.

Hamlin's Almont, Jr., died some weeks ago at Village Farm. He was foaled in 1872 and sired Belle Hamlin 2:12¾, Globe 2:14¾, and Justina 2:20, whose performances in single and double harness aroused the public interest to a high pitch when they were breaking records. Belle Hamlin and Justina first placed the world's team record at 2:13, and later on Belle Hamlin and Globe reduced it to 2:12, where it remained until last season. The three also established a triple team record of 2:14, which has never been beaten. The daughters of Almont, Jr., produced Lord Derby 2:05¾ and four others with records below 2:10.

Judging from the expressed opinions of trainers, drivers and track managers the three-heat system in which every heat is a race with a part of the purse reserved to be added to the winnings of the horse standing best in the summary at the finish of the three heats will be tried on many tracks next season. As a satisfactory method of deciding a tie, should one occur it is likely that most race managers who try the three-heat plan will require the two horses standing even to go a fourth heat to break the tie. All things considered, the three-heat plan is the best one so far suggested to make racing popular with the public and at the same time make it less severe on the horses.—*Horse World.*

The leading sire of 1896, 1897, 1898 and 1900 was Allerton 2:09¼. The leading sire of 1904 is Allerton. Allerton has led five seasons. No other sire has led more than two seasons. A list of sires that have ten or more 2:30 performers enter the list in one year, since 1891, is found to contain the name of Allerton 2:09¼ seven times. Only one sire, Alcantara 2:23, has appeared a larger number of times and Alcantara has lived ten years longer. In the seven seasons Allerton has been one of the leading sires he has put 117 performers in the 2:30 list, an average of seventeen per year. There are seven sires that have gotten 140 or more performers in 2:30. The youngest sire is Allerton 2:09¼, at 18 years. Only two other sires in this list are living. One is 25 years old, the other 28.

The success of trotters and pacers inbred to the Wilkes strain as money-winners and record-breakers has evidently encouraged many breeders to double the Wilkes cross in their animals. Mr. W. A. Bacon, Jr., of Paris, Ky., who owns the noted stallion Jay Bird by George Wilkes, is evidently one of this class, and his colts are in demand, too. He lately sold a yearling by Jay Bird, dam East Moon by Baron Wilkes 2:18, to a horseman of Youngstown, Ohio, and another yearling by Jay Bird, dam Alma by Baron Wilkes 2:18 to J. O. Scott, Minneapolis, Minn. The noted trotter Tiverton 2:04½ and the phenomenal three-year-old trotting filly, Grace Bond (3) 2:09¼, are both inbred to George Wilkes. Allerton 2:09¼, the most successful sire of uniform standard speed of his age is another conspicuous example of this line of breeding. His sire was Jay Bird 2:31¾ by George Wilkes 2:22. His dam was by Mambrino Boy 2:26½, and his second dam by George Wilkes 2:22. Don't hesitate to send your good mares that are descendants of George Wilkes to some good stallion that is also a member of the Wilkes family.—*American Horse Breeder.*

Short and Long Races Discussed.

Knowing the desire for a uniform system of racing and the diversity of opinion among horsemen generally as to what would he the best plan, while at Memphis I interviewed a number of the leading managers, owners and drivers and the following shows their views in hrief:

Palmer L. Clark—Nine years ago, at Red Oak, Iowa, I gave the first meeting at which the plan was ever tried of making each purse for three heats—no more, no less, and esch heat a race. Then and now I helieve it the most practical plan for the racing of harness horses. Two years ago the wide awake manager, Andy Welch, adopted the plan in some events, and the past season C. R. Bentley applied the system at Buffalo, with the additional proviso of a stated sum for the horse standing hest in the summary at the end of the three heats, time heing the test. He will, however, eliminate the latter feature the coming season, which will make his system aud that of Andy Welch at Hartford and Cincinnati next season identical—three heats, draw for position, and award three moneys every heat, 60, 25 and 15 per cent, and an additional purse for the horse standing hest in the summary. In the case of a tie for first money, the two horses shall go a fourth heat to decide the contest in the interest of the pool selling on the race.

F. G. Jones, President of the Memphis Trotting Association—I am in favor of the two in three plan, and opposed to the three in five system, as the most practical at this time.

Murray Howe, Secretary Memphis Track—The day will come when harness horses will race dsshes exclusively, as that is what the public demands. The three in five system is nothing more or less than cruelty to animals, annually crippling hundreds of good horses. Heat races will for some time be the most popular in such trotting towns as Cleveland, Providence and Readville, where the runners are not known.

C. R. Bentley, Secretary of the Buffalo track.—All the scandal on the Grand Circuit has been made possihle hy the old three in five system. The plan at Buffalo of three heats, every heat a race, worked so successfully that with slight modifications it will he our plan again in 1905, and that emphasizes bow I feel.

W. G. Snyder, Secretary at Detroit.—After following the big line clear through to Memphis, I feel that most can be said in favor of the plan of three heats, every heat a race. For the track manager it is protection. He knows just when to hegin his program and just when it will end.

Presiding Judge of the Grand Circuit Ceorge H. Hayt.—The Bugalo plan suits me the hest.

Presiding Judge H. J. Kline.—The shorter and snappier you get them the better. Dash races are the only solution of the vexed question of racing harness horses and the gamhling feature, of which it happens to be a part.

Starting Judge Bohert N. Newton—I favor two in three for the Grand Circuit, and for the West I still favor the three in five system, ending the race at the fifth heat, as the people are in accord with the method in the West.

Starting Judge A. H. Merrill—Two in three for fast classes and three in five for show classes, where the hig fields are. Any other system that has the dash feature can only he a success if the fields are restricted to one tier of horses.

Presiding Judge A. J. Keating--I consider the two in three system the most practical.

Andy Weich, Manager of the Hartford and Cincinnati Tracks—My preference can he hest expressed from the fact that I shall make the Ohio stake next season $10,000, three heats, every heat a race—$3000 in each heat, and $1000 additional to the horse standing best in the summary at the end of the race. This comes the nearest to a dash system, and I look to see them go to saddle as the next best innovation. No race track inclosure in America is hig enough to contain the crowd that would turn out to see, for instance, Lou Dillon and Major Delmar race under the saddle.

Ed Geers—No longer than two in three for me. The clip nowadays is too hard on a horse to go more.

Charles E. Dean—Give me the old way. I have raced horses two miles, dashes, and ten heats under the old system of three in five, and all this talk ahout killing horses is a bugahoo. I never killed one yet.

Scott Hudson—I don't give a d—— how they race, as long as they hang up the money.

Lon McDonald—Every heat in three a race, or two in three suits me. Longer contests wear out the horses.

W. L. Snow—Give me two in three for the real fast classes and three in five for the others, race to he finished in five heats and horses not standing for money to go to the harn after three heats. Dash racing will make a fool out of any horse in their mad effort to get away good in scoring.

A. L. Thomas—I have heen in favor of dash racing for fifteen years. If you want two in three or three in five heats, I want the privilege of deciding which three of the five I can win, but as it stands the rules really call for every heat to he a dash, and the term three in five is anomalous.

W. H. McCarthy—Give me the three in five system as in vogue on the Great Western Circuit this season, race ending with the fifth heat. We want to hreed a race of horses that will "stay." No more than eight horses ought to he permitted to start in a race.

Alta McDonald—I favor hest two in three, hut the Buffalo plan would also he satisfactory to me.

Frank Colhy—Under no consideration should a horse go more than five heats, and two in three seems to he the most practical.

Charles Marvin—The greatest numher of horsemen and the public, I think, prefer the two in three system. Of course, I would enter a sprinter in a dash and a stayer in a three in five contest.

Ed. Benyon—Two in three is my choice, with the hig stakes on the three heat, every heat a race plan.

Joe Rhea—Mr. Benyon has expressed my views.

Dick Wilson—I don't care as long as they are uniform through the circuit, hut I helieve the fast classes should he two in three.

John H. Shults, Shultshurst, Brooklyn, N. Y.—I think the two in three plan the best, but I do not object to dash races interspersed. Our horses get their greatest endurance tested in the scoring, and my plan of scoring heside a mounted guide, recently tried at the Empire City meeting, seems to me to he the solution of the worst feature of the game.

George Camphell Brown, Spring Hill, Tenn.—Mr. Shults has expressed my sentiments.

J. A. Richardson, Boise City, Idaho—The three in five system in the Great Western Circuit suits me; that is, ending in five heats, but I would also send non-money winners to the harn after three heats.

There is one question that all agree on, and that is that hobbles in races should be aholished, and Secretary C. M. Jewett's plan of harring their use to all green horses is the only fair and just plan to get rid of the unsightly and dangerous harness.—*Magnus Flaws in Chicago Horseman.*

Crowning of Major Delmar.

Sam C. Freeman tells of the crowning of Major Delmar on the New York Speedway last week in the following interesting manner in *Trotter and Pacer:*

"Blaze of Glory," truly describes the manner in which the autumn matinee season of the Road Drivers' Association came to a close Saturday. What with a long line of the best trotters and pacers of the Speedway brigade prancing down the macadamized hill to the yellow clay of the lower stretch, driven hy the most noted amateurs of the metropolis as escort to the greatest trotting gelding in the world, fresh from his triumphs on the light harness turf, the crowning of him as king of trotters and the many contests of speed which preceded and followed, it was a hrilliant close to a brilliant season.

Major Delmar 2:01¼, and his owner, Mr. E. E. Smathers, returned from the campaign just in time to make their first appearance on the Speedway at the windup of the matinee season. They were met at the top of the hill at 3 o'clock hy a notahle escort of famous harness horses and drivers of note. Below, the sidewalks hordering the stretch and the grandstand were crowded hy men, women and children who eagerly watched for the coming of the champion. As the impressive cavalcade came in view, led hy the Speedway squad of mounted policemen, the clear notes of a bugle sounded from the grandstand announcing its approach and several thousand persons tip-toed and craned their necks to get the first glimpse of the great trotter. Immediately following the police, as special escort to the champion, came that other great trotter, Tiverton 2:04½, driven hy his owner, the first president of the Road Drivers' Assoclotion, Mr. A. B. Gwathmey, leading the way for Major Delmar. Then followed a long line of hlue ribbon winners, trotters and pacers which have done battle on the great drive and won trophies which they wore on their bridles, led by Mr. J. L. Dodge, president of the Road Drivers' Association. As they slowly jogged hetween the lines of the cheering crowd, Major Delmar bore himself proudly, like some mighty warrior returning home loaded with the trophies of many battles and the hlazing glory of victory.

The procession turned at Highbridge, and returning to the grand stand, the peerless Major stopped there surrounded by his escort. Alighting from his hike wagon and approaching the champion, President Dodge took off his hat to him and on behalf of the Road Drivers' Association addressed him as follows:

Major Delmar, son of Delmar and Expectation, noblest representative of the great Electioneer family, king of all trotters and champion of the world, winner of the Gold Cup at Memphis. Raised and hred and trained in the Empire State. Owned and driven by a New York man and a memher of our association. Bend your proud head that, in the name of the Road Drivers' Association of New York I may decorate you with the insignia of our order and our emhlem of victory. Never was it more honestly earned or more proudly worn. Hail to you, Major Delmar, king of trotting horses and standard hearer of our association.

At the same time a great basket of magnificent chrysanthemums and roses were placed against the Major's shoulder, and Secretary Alfred Reeves pinned a splendid hlue championship rosette to his bridle. Turning to Mr. Smathers, who sat in the featherweight speed wagon which figured in the race for the gold cup, Mr. Dodge continued:

Mr. Smathers—The Road Drivers' Association of New York, of which you are an honored member, desiring to show their admiration, good will and respect for both you and your champion, have allowed me the pleasure of presenting to you in their behalf, this token of their appreciation. May our association continue as fragrant and attractive, but more permanent than this emblem, and may you and the Major continue to earn and wear the laurels of victory. In the name of the association I congratulate you upon the skill and sportsmanship which enabled you to obtain and drive to this victory the greatest trotting horse in the world.

Mr. Smathers hriefly replied for the champion and himself, acknowledging the honor conferred by the association and to that effect that the enthusiastic reception given them on their home coming was reward enough—far ahove money or cups. Then a mighty cheer went up from the crowd that rolled over the great cliffs and seemed as if it could have been heard from the Harlem to the Hudson. Through it all the Major bore himself like the hero he is, and if at any time he became a trifle restive, as any high strung horse will, a word from his master quieted him.

At the conclusion of the formalities Mr. Smathers jogged the great horse up to Highhridge and speeded him down the stretch twice. It was a revelation to those who has never seen the Major step. Such easy, frictionless movement, such suggestion of power, such grace, such marvelous speed as he fairly whizzed past the grandstand, was something to be rememhered for a lifetime. The running horse pounding along beside him was left almost as if he had suddenly heen stopped when Mr. Smathers spoke to him and let him have his head. After the owner had dismounted, the trainer, Mr. Alta McDonald, who developed the horse, drove him down the stretch once or twice, and again the crowd cheered the wonderful trotter.

While somewhat overshadowed by the champion, Tiverton was hy no means slighted hy the crowd. That game and fast son of Gallileo Rex was given an enthusiastic reception and bore himself proudly. The face that he is the only trotter to heat the great mare Sweet Marie his victory in the classic Charter Oak Stake, his wonderful race at Lexington and his many other races which prove him to be among the foremost trotters in America, were all talked ahout as being worthy to rank among the greatest performances in the history of the season. Mr. Gwathmey did not cut him loose down the stretch, as it was Major Delmar's day, but he was heartily cheered al along the line.

Lou Dillon Cuts Unpaced Record.

Memphis, Tenn., Nov. 11.—Lou Dillon smashed the world's unpaced mile trotting record at the Driving Park today by completing a mile in 2:01. The former unpaced record, 2:01¼, was held jointly by Lou Dillon and Major Delmar.

Lou Dillon was driven by Millard Sanders, her trainer, and was accompanied by a runner at the side. The weather conditions were not the best, the day heing cold and disagreeable. Today's meeting had heen properly advertised so as to give Lou Dillon's performance an official rating.

After scoring twice, the word was given. The little mare stepped the first quarter in 30 seconds flat. When straightened out down the hack stretch Sanders called on her for a faster effort, and the half-mile post was passed in 59¾. The runner challenged the mare in the turn for home, and she passed the three-quarters post in 1:30. When well lengthened out for the flight to the wire, Lou Dillon slightly faltered, but passed the judges' stand in 2:01. Both horse and driver, upon their return to the stand, received the plaudits of those present.

Memphis (Tenn.), November 16.—Weather and track conditions were almost perfect to-day, but Lou Dillon failed to equal her world's record of 2:01 made last Friday, although she trotted an unpaced mile in 2:01¼. Her time by quarters was: 0:30¼, 0:59¾; 1:29½, 2:01¼. Trainer Sanders, after to-day's effort, said that, in his opinion, the mare needed more work, and he announced that she would start again to-morrow against 2:01.

Memphis, Tenn., Nov. 17.—C. K. G. Billings' Lou Dillon, for the second time in the last two days, failed this afternoon to heat her recently established record of 2:01, regarding which time a controversy has arisen. Driven by Millard Sanders, her trainer, she went a mile in 2:03 flat.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct 16-Feb. 1—Open season for taking steelhead in tidewater.

Nov. 1-April 1—Trout season closed

Sept. 1-May 1—Open season for shrimp.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Sept. 10-Oct 16—Close season for catching salmon.

Oct. 16-Nov. 15—Close season for taking salmon above tidewater.

Nov 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

July 15-Nov. 1—Deer season open.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E. Stone, Secretary.

Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Dec. 6, 7—Bay State Co-operative Bench Show Association. Brocton, Mass Tom B. Middlebrooke, Clerk.

1905.

Jan. 19 20—Bay State Co-operative Bench Show Association. Lynn, Mass. Tom B. Middlebrooke, Clerk.

Jan. 24, 26 Rhode Island Kennel Club. Providence, R. I. H. M. French, Secretary.

Jan 25, 28—National Fanciers and Breeders Association. 5th annual show. Chicago. W. K. L. rules. T. A. Howard, Superintendent, Chicago, Ille.

Feb. 13, 16—Westminster Kennel Club. New York City. Robt. V. McKim, Secretary.

Feb. 21, 24—New England Kennel Club. Boston, Mass. Wm. B. Emery, Secretary.

March 1, 4—Long Island Kennel Club. Brooklyn, N. Y. Jos. M. Dale, Secretary.

March 8, 11—Duquesne Kennel Club of Western Pennsylvania. Pittsburg, Pa. Fred'k S. Stedman, Secretary.

April 19, 22—Atlantic City Kennel Club. Atlantic City, N. J. Thos. H. Terry, Secretary.

Field Trials.

Nov. 14—Illinois Field Trial Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.

Nov. ——Indiana Field Trial Club. Field trials. Clay City, Ind. C F. Young, Secretary, Clay City, Ind. Week following Ills. Ch. trials.

Nov. 17—New England Beagle Club. 11th annual trials. Grafton Mass.

Nov. 15—Michigan Field Trial Club. ————, Mich. Chas. E. Sisson, Secretary, Muskegon, Mich.

Nov. 15—Central Beagle Club. 9th annual trials. Sherodsville, Ohio. A. C. Peterson, Secretary, Homestead, Pa.

Nov. 22—International Field Trial Club Ruthven, Ont. W, B Wells, Honorary Secretary, Chatham, Ont.

Nov. 29—Virginia Field Trial Association. Martinsville, Va. C. B. Cooke, Secretary.

Dec. 3—Continental Field Trial Club 10th annual trials. Thomasville, N. C John White, Secretary, Hempstead, L. I.

Dec. 12—Alabama Field Trial Club Huntsville, Ala. J. M. Kirkpatrick, Secretary, Huntsville, Ala.

Dec. 12—Pointer Club of America. 5th annual trials. C. F. Lewis, Secretary. Barber, N. C.

Dec. 17—Eastern Field Trial Club. Waynesboro, Ga. Simon C. Bradley, Secretary-Treasurer, Greenfield Hills, Conn.

1905

—— ——American Field Futurity Stake. For Pointers and Setters whelped on or after January 1, 1904, whose dams have been duly qualified. Am. Field Publishing Co., Chicago.

Jan. 9—Pacific Coast Field Trials Club. Bakersfield, Cal. Albert Betz, Secretary, 201 Parrott Bldg., San Francisco, Cal.

Jan 9—Texas Field Trials Club. 3rd annual trials. Near San Antonio, Tex. T. A. Feriet, Secretary, San Antonio, Tex.

Jan. 10—Georgia Field Trial Association. Albany, Ga. P. M. Essig, Secretary, Atlanta, Ga.

Jan. 16—United States Field Trials Club. Grand Junction, Tenn. W. B Stafford, Secretary-Treasurer, Trenton, Tenn.

Dull Finish for Rods---Guides.

The sportsmen's papers of London have printed a great many communications from anglers recently relative to staining or otherwise dulling the finish of fishing rods in order to prevent reflections, on the ground that fish are frightened thereby. Some claim that the reflections from the nickle or German silver fittings of a rod in the hands of an angler casting for trout or salmon can, on a bright day, be seen a long distance away, to which any angler will agree. Their theory is that if this heliographing can be seen on land it can also be seen by the fish and they take it for granted that it frightens the latter away from the angler so equipped. Recipes for staining, smudging or smearing the rod and all of its fittings have been freely offered and flat varnishes of various sorts recommended until it would seem the rod is no longer regarded as a thing of beauty but merely as a means to an end—the catching of fish.

One angler urges the use of a Bristol steel rod, which throws no reflections, and a straw hat and jacket of grass green hue. Another one calls attention to a statement he made in a book he published so long ago that it is now out of print. It was that the line, rod and angler should be invisible and only the fly visible to the fish. At that time he confided the secret to rodmakers that he who took this advice would make a fortune thereby, but for some reason rods continue to be made with bright surfaces and fittings, although other persons have from time to time advocated dull finish for rods. No doubt rodmakers themselves exerted their influence toward discouraging the popularity of dull rods, for no conscientious workman could feel much pride in a rod however carefully made that would show no beauty of grain and color under the flat finish. As one of them remarked, he had a high grade rod to refinish in dull color and he felt that it was a great pity to waste so much work on it.

R. B. Marston gives his opinion of the whole matter in words brief and to the point. He asks if it is necessary to sandpaper the highly finished rod before applying the dull finish, adding: "Not that I intend to take the shine out of my rods. The flash may scare some fish, but it wakes up others which would never have seen the fly if it had not been for the flash. Besides, if another angler sees my rod flashing he gives me a wide berth instead of crowding me."

Which is as good an argument as any the advocates of dull finished rods have given. There may be more truth than poetry in what he says. At any rate fish on this side of the Atlantic are not all educated up to the exact meaning of every reflection they see—if indeed it is visible to them, and so long as the angler does not throw his shadow on the water or make himself unduly conspicuous the fancy rules that he will be content with the rods the manufacturers are now supplying, with a preference for German silver trimmings.

Another subject which has been aired in these papers relates to the number of guides on fishing rods and is worthy of consideration by our rodmakers, some of whom put more guides on their rods than seems necessary in the fulfillment of their function, which is to distribute and equalize the strain on the rod while furnishing comparatively free play for the line. Taking an eminent authority on bait-casting, Dr. James A. Henshall, whose favorite rods are 8 feet 3 inches long, it is noticable that in both lancewood and split bamboo the number of guides is five. No one will surely have the temerity to say Dr. Henshall is negligent in the matter of guides. Few anglers have hy long personal experience become more competent than he to judge.

A prominent maker's high grade rods are equipped thus: Six and eight-strip rods, 8 to 10½ feet, 11 guides and top, maximum; an eight-strip combination salmon rod, four joints and tip, either 12 or 16 feet long, 9 and 13 guides respectively; four fly rods, either lancewood or split bamboo, each a different type, 9 to 10½ feet in length, 11 guides maximum.

Another maker puts on a high grade eight-strip fly rod ranging from 7½ to 11 feet, 12 guides, and seven on a bait rod of similar grade; two types of split bamboo fly rods, 9 and 9½ feet long, carry 11 guides each, and a six ounce split fly rod of 8½ feet, 12 guides.

Examining the rods of a third manufacturer—and all those here noted are very prominent in the trade—we find two rods that are made 9 to 10½ feet long have 10 guides, both being six strip fly rods of high grade.

A 9 to 10 foot fly rod of a fourth house, made of six strips, carries 11 guides and a bait rod of similar construction 8.

A famous rodmaker of the Middle States put 11 guides on his fly rods of 8½ to 10 foot lengths.

Bristol steel bait rods are supplied with—6 guides on a 7-foot rod; 7 guides on a 7-foot 8-inch trunk rod; 3 guides on a 6-foot Kalamazoo bait-casting rod, and 9 on a fly rod 9 feet in length.

One of the most prominent English rodmakers puts 12 and 14 guides and tops on two of his best types of split or greenheart fly rods whose length is 10 to 12 and 9 to 15 feet. Each tip carries six guides. An 8½ to 9½ foot greenheart fly rod has 11 guides, and a salmon rod 16 to 18 feet long has 15 guides, 8 being on the tip.

A prominent rodmaker on the other side points out that too little attention is given to the placing of guides and the fastening of ferules, he holding that the position of guides with relation to the ferrules is more important than is generally admitted. Placing guides close to the ferrules often results in breaking the rod at those points if they are given unusual strain, and fastening the ferrules on the joints with pins causes breakage very often when least expected. This renders a broken rod extremely difficult to repair while the angler is far afield, whereas with joints carefully fitted and cemented the broken wood can be removed from the ferrule and its end whittled to fit the ferrule, permitting the angler to use the rod temporarily until it can be returned to the maker for proper repairs.

An adjustable gun stock has recently been perfected and has been placed on a gun that is now in the market. The object of the device is to permit the raising and lowering of the stock to any desired angle or position, the change to be effected rapidly. The joint is made immediately back of the lock chamber, the end of which is made rounded or semi-circle in form with toothed or serrated edges on the sides. The outer, or smaller, end of the stock is made with a recess designed to receive the locking chamber and also supplied with teeth, which are for the purpose of holding the two surfaces rigidly together by a bolt topped off with a thumb screw. When it is desired to make any change in the shape of the gun stock, all that is necessary is to unloosen this screw and the parts may then be adjusted to any desired position.

This is a feature that will probably be appreciated by quite a few sportsmen, for there are some shooters of such shape and size that they would like to make some change in the shape or angle of the gun stock used by them. Heretofore this has been only possible by having a stock built to order, which, to many, is rather an expensive indulgence.

An Expedition after Condors in Southern California.

In the latter part of January an expedition with a peculiar object will leave Los Angeles for the short mountain range that runs round the northeastern boundary of Orange county. The trip may lead into Riverside and San Diego counties, but it is known that the objects of the search are to be had in the smaller section, and to it most attention will be devoted.

The explorers are going to find, if possible, the home of the biggest bird that flies—the California condor, says the Los Angeles *Times*. Twice before one member of the party has found the home of this giant vulture in these hills, and this spring he hopes to be able to guide a company to some cave wherein they may find the mightiest of birds at home. It is known that the condor lays its single egg in the last week of January or the first week of February, and, being one of the few birds that nest in holes in the earth, it has no fear of rain or wind or even snow, the elements that hold back many smaller birds from nesting. Fifty years ago condors were almost as plentiful throughout California as turkey buzzards now are, but like the buffalo and the antelope, they have faded away, until only an occasional pair remains to breed in some inaccessible canon. What became of them is as much a mystery as what became of the great auk, that huge, wingless bird of the Newfoundland coast, and it is with the object of finding some answer to this question, as well as to photograph the home of the vultures, that several young men will make the trip.

The party will outfit in Los Angeles and go direct from there to the little Spanish-American settlement of Yorba, in Orange county, whence a horseback ride of eight or ten miles will take them into the comparatively wild cliffs and canyons along the upper reaches of the Santa Ana river. In these hills condors are frequently seen, and it was here that H. H. Dunn, who will be of the party, found the first nest of this bird ever discovered south of Tehachepi mountains. Condors are more plentiful in Santa Cruz and Santa Clara counties than in any other part of the State; in fact, they were not supposed to breed in the southern section at all prior to the finding of the nest and fresh egg in the Santa Ana hills three years ago.

At Yorba, a Mexican who knows the mountains of that region thoroughly, will be picked up, and with him horses and a generous supply of rope, for whoever goes after these birds must be prepared to drop down sheer precipices, hanging in midair by the five strands of a hemp line, clinging to narrow ledges and shallow-rooted shrubs on the very face of mountain walls, as well as being all the time watchful lest one blow from the heavy body of the frenzied condor send him headlong to his death on jagged rocks below. Those who have been over this country say there are very rough places back of Peralta and Rincon, the section to which these hunters will go, and it is known to be one of the last strongholds of the mountain lion. This region is very dry, save in the winter months, but the party hopes to find water enough at this early date in the pot-holes and sinks of the canyons to last through, so they will not need to burden themselves with canteens. The question of water sometimes becomes a serious one at such times, but the considerateness of the condor in laying its egg while the rainy season is yet on, may, in a measure, make up for the inconveniences condor hunters would otherwise suffer.

Should the hunt prove successful the returns to be obtained from the trip are not slight. The egg of the condor is worth from $100 to $250—and there are none to be bought for these prices. There are said to be nine eggs of the great bird preserved in the public and private museums of the world today, and all but one of these are in the United States, where they are likely to remain until eggs of the great auk or the giant moa of Madagascar are offered in exchange for them; certain it is that money would not buy them from their fortunate possessors. The skin of the bird is worth from $25 to $75, the price, of course, depending on condition and age.

There is a mounted specimen in the Los Angeles Chamber of Commerce which is considered very valuable, and which came from one of the northern counties. A few days ago the *Times* published the account of the killing of one of these birds near Chino, which is just across the range from the section of country to which this party will go. When alive, the condor measures from six to twelve feet in wing spread, and when flying can be distinguished from all other large birds of Southern California by the two patches of white, one under each wing, with which it is always marked. These patches are well shown in several photographs, both made from life by Dunn, and can be plainly seen even when the bird is flying at the great altitude to which it occasionally rises.

The egg of the condor is larger than that of a goose and of somewhat the same dull-green color, but instead of having the smooth shell of the goose egg, is pitted and marked all over the surface, much the same as the egg of the ostrich. From the time the egg is laid until the young condor breaks the shell is supposed to require from three to four weeks, but, in truth, very little is known of this, and most that ornithologists have to say about it is guess work. When first hatched the bird is covered with a white down, as are also the young of most hawks, owls and ravens, but this soon gives place to feathers and then the little vulture rapidly learns the use of his powerful wings.

Besides Dunn, the party will include C. S. Chase of Los Angeles, and the young Mexican previously mentioned. The latter hopes to bring back a lion skin or two, as well as the coveted egg of the giant bird.

Shootin' Ducks.

Some men hury up their natur'
Inter hooks, an' maps, an' things,
Allus figgerin' that later
Lots o' happiness it brings,
Buy I say that kind o' yearnin'
It jest don't amount to shucks
With a good day's stock o' learnin'
That yew gain while shootin' ducks.

If yew feel depressed an' weary
An' some friend advises yew
That yew live on egg an' sherry.
Now I'll tell yer what tew do:
When yew think yer all hut done up,
Yew just try this little find—
Take two hours after sun-up
In a well-constructed hlind.

On a crisp Novemher mornin',
When all Natur's turnin' brown,
An' ol' Jack Frost he's adornin'
Ev'ry country, yes, an' town;
Then away yew go, while Rover
Leads the way with harks an' bounds
When fust thing yew know yer over
Tew yer fav'rite duckin' grounds.

In yer hlind yew keep a-hohhin'
Up yer head tew watch fer flocks,
While yer spirits keep a-throhhin'
Jest like works in patent clocks.
Well, now, hy the great creation,
Are them mallards?—yes, they's five!
Don't that heat the ol' tarnation?
Didn't leave hut one alive!

—JAY R. RICHARDSON.

Time and Distance Saved.

The North Shore tunnel through White's Hill is completed. Work is now heing rushed on the approaches and the company expects to operate trains through the tunnel by December 5th. The tunnel saves two miles of trackage as well as many degrees of curvature and avoids numerous trestles that have been expensive to maintain. It will also shorten the time of through trains from San Francisco to Lagunitas, Camp Taylor, Point Reyes, Inverness, Tomales Bay, Russian river points and Cazadero Big Trees hy about 30 minutes in either direction. This saving of time will be especially advantageous to those who make their summer homes along the picturesque Lagunitas and Paper Mill streams, carrying them to and from their daily work in one to one and a half hours. The Maillard Estate at Lagunitas, in anticipation of the demand for country homes, has been sub-divided into acre villas, many of which have already been sold and cottages will be erected in the spring. The Lagunitas and Paper Mill streams from San Geronimo to Camp Taylor, Tocaloma and Point Reyes, offers many ideal spots for summer suburban homes. Tomales Bay resorts (Inverness, Millerton, Cypress Grove, Hamlet and Camp Pistolesi), will also be benefitted by the completion of the tunnel. The summer cottage colonies at Camps Meeker and Tyrooe, Monte Rio, Mesa Grande, Duncans Mills and Cazadero Big Trees are all planning improvements for next season in view of the added attractions of those places. Monte Rio and Mesa Grande on the hanks of the Russian river now constitute a colony of 200 cottages, and judging from the unusual activity in the sale of lots this winter, those attractive summer resorts will double their population in another season. The climate, water, roads and environments are all that could he desired in a place of summer residence.

This will also be an acceptable change for the army of anglers and hunters who favor chosen resorts along the line of the road.

GOSSIP FOR SPORTSMEN.

DUCK HUNTING A FAD.

Backed by its unfailing popularity so well expressed in the sporting adage which says, "Once a shooter, always a shooter," the game of duck hunting seems this season to he experiencing a veritahle "boom" similar to that which has brought golf, tennis, bowling and even ping-pong before the fun-loving people at various times within the past ten years. Whether the well-estahlished weakness of the American public as regards going in for "fads" will eventually restore the interest in duck shooting to its normal proportions can only be told hy the next two or three years, though the large investment in money necessary to equip a preserve forms a weighty argument for the longevity of this particular "craze." With those who have seen golf, tennis, billiards and bowling, come and go back to their comparatively small clientele of regular devotees, the financial argument will hardly appeal, however, since each of these sports represents a considerahle expenditure of money.

Interest in shooting, ducks in particular, has this season reached a plane that surprises all the veterans. Hundreds of business men who for years, many of them not since hoyhood's days had touched a gun, took the duck fever, bought into or organized duck clubs, hired somebody to run them, and tasted the ideal recreation for a business man—one that does not require of him the muscular strength and endurance of quail hunting—a condition that must be the outcome of practice and patient training.

There are now twice as many duck clubs as ever before, and this fact alone tells its own story. Indeed, many conservative sportsmen pointing to the generally poor sport thus far this month, declare there are now too many associations of sportsmen bent on the decimation of the ducks. They argue that the present conditions are inimical to good sport in the future, since the clubs have failed to come together on dates, with the result that the hirds are being pounded somewhere nearly every day of the week. While conceding that this lack of arrangement is not for the best interests of all, most sportsmen believe that the more clubs there are, the better will be its sport, as more birds will then stop over for the winter, owing to the greater expanse of fresh water ponds, and the hettering of their food supply. The present indifferent shooting on many preserves may be readily accounted for hy the poor judgment shown in shooting two days at the opening of the season, and hy the uniformly calm weather.

The amount of money invested in local duck clubs existing or in process of estahlishment would cover the sum total of a hig national bank's yearly operations, and the annual cost of operating them would run many a small city.

Few persons have any idea of the number of men who, without saying much about it, slip off quietly of a Saturday evening for a few hours' duck shooting, and are hack home again early in the next afternoon or evening.

THE TEAL IS A STANDBY.

Sometimes whizzing by like a hadly fired bullet and again almost noiselessly darting into the decoys and dropping contentedly to rest with nothing but a half-stifled squack to betray their presence, these little wills-o-the-wisp fill a space in the sportsman's calendar that is not quite taken up by any other bird. Canvashacks are great in their place, hut their place is not on the Alameda marsh. Mallards are but occasionally customers at the decoy stands south of the Suisun marshes, and the big, slow-sailing sprigs occupy a niche that no way conflicts with the teal's title. He is a sprightly chap, more like a quail in his demeanor than a duck, and his pert ways endear him to the gunner so markedly that his poor little fat hody is seldom missed from any limit string.

Shooting sprigs is hard game mainly hecause the hig, white-bellied beauties are chary about confiding in any lumpy heaps of brush that have been known to helch forth veritable volcanoes on previous occasions, but the tesl, and his hosom companion, the spooney, are eternally willing to take a chance and they are the birds the amateur first becomes acquainted with. Getting them, especially the little green-winged chap, is mainly a matter of pointing the "spout" right, for long shots are not necessary.

There are days when the hig duck supply fails, but the teal seldom go back on the gunner, and therein lies another reason for their popularity. Like the jacksnipe, they are always ready to give the gunner a run for his money and to their credit be it said the run is usually a good one.

A NEW YORK SHOOTING SCHOOL.

As a great many friends had asked Schoverling, Daly & Gales the question, "Where can we learn to shoot?" this enterprising New York house has made arrangements with Mr. S. M. Van Allen, Jamaica, New York city, who is a celebrated inanimate target and rifle shot, to teach ladies and gentlemen to shoot inanimate targets and how to shoot in the field as well as how to handle and shoot a rifle. This is an excellent idea and the only wonder is that it has not been started before. Mr. Van Allen has grounds within easy access of New York, with first class traps and other necessary articles for teaching, and is we believe one of the hest men in this country to undertake this task. Any further information will be cheerfully given hy Schoverling, Daly & Gales, 302–304 Broadway, New York.

FLY-CASTING STATISTICS.

A prominent English angler, who is not so prejudiced against American fishing tackle but that he can recognize merit when it is apparent to any person who will use his own eyes and senses, has taken the records of the recent Crystal Palace casting tounament and worked out three classifications as follows: hy competitors, hy weight and hy distance cast. These give the names of the competitors. the weight and length of the rod, the distance cast and its number of times the length of the rod; in other words, one competitor who used a 4½-ounce fly-rod 9 feet in length, cast 72 feet, or 8 times the length of his rod, while another one, using a rod 18 feet long and weighiog 42 ounces, cast a salmon fly 87 feet, or 4 5-6 times the length of his rod.

"The deductions I draw," said this gentleman, "put concisely, are that the average man can not get out of any fly-rod a cast of 10 times its length, and as his rod gets longer and heavier, unless he be a very strong man indeed, the number of times his rod length that he can cast declines rapidly, and the lighter his rod for its length the slower the decline takes place." His conclusions relative to the light rod are sound, but he has ignoored the fact that the fly-rod record in America is considerahly above ten times the length of the rod employed, or to be exact, 129 feet, 6 inches, and made with a five-ounce rod and fly, outdoors. We do not know the exact length of the rod Mr. W. D. Mansfield used in making this cast, but we believe it was 10 feet long, his cast therefore was almost 13 times the length of his rod. Mr. Mansfield's record with an 11-foot tournament rod is 134 feet. Mr. Harry C. Golcher, who holds the world's record with an 11-foot tournament rod, 140 feet, put out his line 12¾ times the length of his rod. His record with a 5½ ounce 10-foot fly-rod is 127 feet. T. W. Brotherton cast 137 feet with an 11 foot tournament rod.

Taenia Coenurus.

[A paper read by W. E. D. Morrison, D. V. S., hefore the Southern Auxiliary of the California State Veterinary Medical Association.]

In this paper I propose only to deal with the taenia coenurus of the dog, and shall only touch lightly on its form and methods of production. It is a most important subject in dog practice, and is, I am sorry to say, not given the attention by the profession that it should be given. Only those who have a large dog practice seem to give the attention to taenia that it warrants. The ordinary practioneer seems to classify all under one head, viz: worms, and treats the dog by the same method and with the same drug or drugs, not attempting to differentiate; hence so many fail to cure when, had they they taken the proper steps to diagnose the case, they would have been successful, and man's hest friend would have been saved many hours of sufferiog.

The tapeworm, as you know, derives its name of tape from its resemblance to a piece of tape used for finishing and hinding clothes, etc., There is an exception to this rule in the little tape worm (taenia echinococus), also of the dog. The taenia feeds hy osmosis, there heing no mouth or ailmentary canal. It is divided into segments. The first segment contains the head, and the other segments are merely generative segments. These segments are produced hy a proccess of budding from the head. Segments are described as unripe, half-ripe or completely ripe, according to the stage of development attained. As you know all segments are produced from the head, so it is of the utmost importance that you remove it. If you fail to do so the segments will again form. The head is provided with four sucking discs, and in some cases has circles of hooks anterior to the suckers each hook formed in a little pocket. These hooks act as anchors for the taenia. As the development of the segments take place they become separated and pass out of the hody and dry up very rapidly, hut the eggs remain prolific for a long time, and undergo various metamorphosis, until they become adult taenia. Each segment contains male and female organs of generation, but only completely develop in a completely developed segment, it forming a complete hermaphroditic individual in itself. I shall not describe the uterus, eggs, etc., hut allow you gentlemen who are studying on these points to look the matter up for yourselves. So with this short description I will proceed with the practical part of this paper, viz: the diagnosis and treatment of this form of taenia in the dog.

Dogs act in various ways when affected by taenia. The length of the taenia and the resultant amount of room taken up hy it plays an important part. If the hulk is great, more inconvenience is caused and the dog is more prone to vomition and suffers more acutely from indigestion and malassilimation. In other words the animal that has a very long tapeworm and has had it for a period of not less than two or three mooths will retain food for twenty-four hours then vomit it up or pass it out per rectum just as he swallowed it. He will have a voracious appetite but will not necessarily he poor. Stools will be constipated and I have found in my practice that the anus and rectum are always more or less inflamed. The animal is inclined to rub the anus on the ground as if suffering from itching hemorrhoidal tumors. In some cases vomition will take place a dozen times a day and if the dog jumps up suddenly or over exerts itself suddenly it will vomit. Whenever you find the above symptoms you should immediately examine for taenia. These symptoms were very marked in a Boston Bull Terrier belonging to Col. J. Brodling of Los Angeles. The dog when brought to me had been vomiting for three months and yet was fat and apparently in good condition. I gave him an injection per rectum resulting in a discharge of segments of taenia. I then starved him for tweoty-four hours and put him on treatment. He vomited the medicine up in about three minutes. I gave him a rest and a dram each of whiskey and water and repeated the dose. He retained the medicine for about ten minutes. I then gave him another rest with two drams each of whiskey and water followed by a howl of vegetable soup. The dog retained the soup. In two hours afterwards I gave one dram of oleoresin of male fern and held the dog's head in my hands for one hour and a half so as to prevent vomition, it being impossible to keep the medicine down without. In four hours he passed the taenia that I now show you in this bottle. He was then fed only vegetable soup with shredded meat for a week and then brought to his usual diet. The dog made a complete recovery.

I present the following case as an example of taenia hut with completely different symptoms. A nine-month-old Fox Terrier belonging to a Dr. Lewis of Los Angeles, passed a tapeworm forty feet long. The symptoms were as follows: The dog would seem to be perfectly well, good appetite, cheerful and very playful as he was when I saw him. Then a change would come in the morning—his nose was hot, his eyes gummy and bleared. He would refuse to move, eat or drink. This would last for three days, then he would appear to be perfectly normal in health and appetite. This would continue for two weeks or so, then he would become semi-comatosed, constipated and would refuse food. I was called to the case and, as said hefore, the animal was apparently in the best of health, eyes hright, nose cold, and very playful. I did not use an injection per rectum, hut told the owner that I considered taenia to be the cause of the trouble. I had the dog starved for twenty-four hours, and followed with one drachm of male fern and two drachms of castor oil. The dog frothed a good deal hut in half an hour passed a taenia forty feet loog. Since then the pup has been in perfect health.

To sum up, watch the actions of the dog yourself for half an hour, then give hot water injection; then order dog starved for twenty-four hours. then give male fern oleoresin with castor oil, or follow with the oil two hours afterwards. Watch for results. If vomition has been a prominent symptom, order meat vegetable soup for a few days before returning to a normal diet.

In conclusioo, if puppies were fed from their earliest infancy proper meat diet (being carnivorous animals) instead of all the abominal messes and mushes given to them, worms would not destroy

pups, and puppies fed with meat instead of mush, when going through distemper, will have a very slight attack, or will rally the sooner and easier for having had a natural diet, viz.: meat. I know that an old tradition like many more handed down from generation to generation, conceived in ignorance and carried out still from a prejudice against new ideas, that puppies should never have meat. It will give that puppies a good start, still hangs to many of the profession. But the day is dawning for better times for puppies, and meat is being substituted by many intelligent breeders for the potbellied, dilutitationary mush diet of our ancestors.—*Western Sportsman.*

DOINGS IN DOGDOM.

TWO GOOD GREAT DANES.

We offer in our advertising column on page 15 the opportunity for the purchase of two of the best Great Danes on the Coast. Ch. Blueheard has been a consistent winner of ribbons and specials since his first appearance in this city when he won second puppies in 1900 at the S. F. K. C. show. As a producing sire he has been an unequalled success. Zouroff his sire was alas a winner. Olga was a winner and dam of winners. Tempest won in 1902, her first appearance, and has won at every succeeding show in which she entered, Ch. Orchard Trilby, her dam, won first puppies St. Louis 1896, and won repeatedly after her advent on the Coast; she was one of the best producing bitches ever shown here.

Blueheard and Tempest should make the nucleus of a leading Great Dane kennel. These dogs can be had at a reasonable price, the present owner not being prepared to maintain a kennel. Particulars may be had by addressing the Kennel Editor of the BREEDER AND SPORTSMAN.

WILD DOGS OF CENTRAL AFRICA.

The wild dog of Central Africa, an explorer writes, is common enough. He is an ugly looking beast, with a pied body, coarse hair, short head and large upright ears. These wild dogs play fearful havoc with game, occasionally clearing out whole districts precisely in the same manner as the red dhole of India, before which even the tiger is said to retreat

They have a wonderful power of scent, wonderful boldness, endurance and pertinacity, and their loose, easy gallop covers the ground far more quickly than it appears to do. They usually hunt in considerable packs, although I have sometimes met them in threes and fours. I have never heard of wild dogs actually attacking a man, but they often behave as if on the point of doing so, and unarmed travelers have been literally treed by them before now.

The Pacific Fox Terrier Club will hold a meeting on Friday evening, November 25th, at No. 426 Montgomery street, this city.

Jos. E. Terry's Ladylike (Orion–Terry's Lady) divided fourth in the Monongabela Derby. Kilgarif, according to a telegram received this week, was placed third in the Independent All-Age.

Entries for the Pacific Coast All-Age Stake will close on December 15th. Entry blanks have been mailed this week by Secretary Albert Betz. Blanks and full information regarding the trials next January may be obtained by addressing the secretary, No. 201 Parrott Bldg., this city.

Granger Inn Kennels' English Setter bitch Theodora Gladstone whelped fourteen puppies (nine dogs) last week to Ch. Cato Jr. The litter at present consists of nine lively and handsome puppies. Cato Jr. seems to be a prepotent as well as a producing sire.

The Visalia Game Convention.

The annual meeting of the California Fish and Game Protective Association was held at Visalia last week.

A number of proposed amendments to the State game and fish laws now on the statute books were presented to the meeting and discussed pro and con, the general result being that the association has taken action to present to and have the following changes in the law taken up and adopted by the Legislature at its coming session this winter—that is, the changes advocated here are the ones that have been published by the daily press, other changes and possibly a number that have not yet been exploited will be sprung at the proper time.

Among the suggested amendments it was agreed that: In addition to advocating a bill that will prevent the sale of all game in the market, the delegates to the convention declared that no trout shall be sold in the market under three pounds in weight (dressed), and they agreed that the individual bag limit on ducks and doves should be reduced from 50 to 25 birds in any one day's shoot, they also advocated prohibitory sale of venison, and that only two deer shall be killed in a season by any one sportsman.

The other changes proposed are many, and perhaps the most important are the absolute prohibition of sale of game in the markets of the State for all time to come and the licensing of guns outside of the county in which one resides. It was agreed in this respect that any person shooting outside of his own county ought to pay a license of $2 for every other county in which he may desire to shoot. Non-resident sportsmen must pay a license of $10 and aliens $25 if the proposed laws are enacted.

Swans are to be protected at all times, and by request of the Audubon Society all song birds and all insect-destroying birds are also to be protected.

The open season for deer is to be from August 15th to October 15th, inclusive, and no more than two deer to be killed by any one sportsman during a season.

The penalty for selling game in market is to be $10 fine for each bird, and for selling venison $10 for each pound, not to exceed five pounds, nor more than $500 in the aggregate.

The open season for trout fishing is to be from May 1st to November 1st. This curtails the present season by one month, and no more than fifty trout, not to exceed twenty pounds in weight, may be taken by any one angler in a day. No trout may be captured between the hours of 8 o'clock P. M. and 4 o'clock A.M.

A close season is proposed for striped bass during the months of February, March and April. At present this fish can be taken all through the year. The laws on black bass are to remain as they are at present.

The delegates from Sacramento endeavored to secure an earlier season on black bass and on snipe shooting, but were voted down. They advocated the sale of game in market.

It was also agreed at the Convention that Dr. A. M. Barker of San Jose should be recommended for the position of Game and Fish Commissioner.

The next meeting of the Convention will be held in Marysville, in order that the following Convention might be held in Sacramento when the Legislature is in session.

The following officers for the ensuing year were elected: President, H T. Payne of San Francisco; vice-presidents—J. H. Williams of Porterville, T. A. Chatten of Visalia, H. A. Greene of Monterey, Dr. A. M. Barker of San Jose and H. W. Keller of Santa Monica; secretary-treasurer, E. A. Mocker of San Francisco.

A committee from the association went before the county board of supervisors and asked that the season on deer, quail and grouse be shortened.

During the first day of the Convention papers were read and addresses made by H. T. Payne, Hon. T. J. Sherwood of Marysville, A. R. Orr of Visalia, Frank Mayer of San Francisco, W. Scott Way of Pasadena and others.

The following named gentlemen were elected to membership of the association: A. E. Holmes, San Jose; Frank V. Bell, San Francisco; Mike Mitchell, White River; John Broder, Three Rivers; R. E. Hyde, Jr., Visalia; Byron Allen, Three Rivers; Fred H. Jones, Visalia; Arthur Bullard, Badger; Martin Stoltz, C. D. Shields, Dr. T. O. McSwain, T. A. Chatten, Z. J. Witten, W. E. Wild, W. W. Cross, Henry Scott, J. T. Maben, A. H. Murray, Jr., Visalia; Gerald R. Lumley, Dr. J. D. Hardeman, J. H. Williams of Porterville; Arthur Sharman, E. S. Phillips, Sultana; C. H. Peugh, Kelseyville; W. Scott Way, Pasadena; John Sinclair, Alameda; Members California Rod and Gun Club Association, San Francisco; S L. N. Ellis, Badger; George Neale, Sacramento and A. R. Orr and Frank Osborn, Visalia.

From published comment and editorials on the work of the convention it is to be assumed that the amendatory measures advocated will meet with strong opposition from the sportsmen at large.

Sportsmen's Show in San Francisco.

At a meeting held last week a local exhibition of a novel character, concerning which there has been some discussion, was definitely decided upon. It will be conducted under the direction of the newly organized Pacific Coast Forest, Fish and Game Association, and will be similar to successful shows recently held in Chicago, New York and Boston. It will be a nature exhibition—the forest, fields and streams will all contribute in the display to show the San Franciscans the best that they possess.

William Greer Harrison, president of the Olympic Club, presided at the meeting, W. de St. Paul Seitz acted as secretary, and others present who joined in the incorporation of the association were: James D. Phelan, Archibald J. Treat, A. Van der Naillen Jr., George T. Marsh, H. C. Tibbitts, R. E. Follett, Wm. McMurray and C. S. Aiken.

The entire plan of the exhibition was discussed. It will be held at the Mechanics' Pavilion beginning February 21st and continuing until March 12th. The pavilion will be made to represent a forest, with redwoods, firs and pines brought from the Sierra and Santa Cruz mountains. There will be ponds, with all sorts of water fowl sporting about, and reservations for forests animals and game of all kinds. Exhibits of industries associated with forest and field sports will be made, Especial attention will be given to the display of wild flowers, trees and shrubs, and days will be set apart for school children and special students of botany and forestry.

The movement is gaining the interest and co operation of all who love out-of-door life, including such organizations as the Sierra, Sempervirens and Country clubs, besides all sportsmen and nature-loving enthusiasts. A continual athletic carnival will be held during the exhibition under the direction of the Olympic Club.

Mr. Follett, the managing director, has had wide experience in matters of this kind, having conducted successfully various exhibits in the East.

The profits of the exhibition will be divided equally between the hospitals for children and training school for nurses and the San Francisco Lying-in Hospital and Foundling Asylum.

Among the subscribers to the association are the following: William McMurray, William Thomas, Charles S. Wheeler, Washington Dodge, Floyd S. Judah, H. C. Tibbitts, Dr. W. E. Poole, R. E. Follett, C. S. Aiken, W. de St. Paul-Seltz, Frederick W. Hall, William Greer Harrison, Archibald J. Treat, Hugh J. Melsaac, Alexander Hamilton, Al M. Cumming, E. C. Ford, James D. Phelan, A. Van der Naillen, Jr., F. E. Booth, George T. Marsh, P. M. Lilienthal, Frank L. Brown, Clinton E. Worden, Alex. T. Vogelsang, James Horsburgh Jr., Harry Babcock.

The new association filed articles of incorporation with the County Clerk. The capital stock is $5000, of which the directors have subscribed $100 each.

Ithaca Pointers.

Among other strong points claimed for the Ithaca gun are: that it has the strongest and simplest action in the market—a self-compensating action, taking up wear at every point, the only self-compensating action made. The safety is automatic and independent. Rebounding locks and independent gas and dirt proof plungers, thus avoiding the danger of exploding primers when the strikers are down as well as keeping the locks clear of gas and burnt powder. There is no forward thrust on the fore end. The act of cocking the gun draws the barrels more closely to the frame and removes all strain from the hinge joint. The barrels may be taken off or put on at all times whether the gun be cocked or uncocked.

The Hunter One-Trigger.

W. J. Golcher and C. C. Nauman, of this city, each received this week a beautifully finished, high grade L C. Smith gun equipped with the single trigger device. The guns were examined and admired by many sportsmen this week and won high encomiums from all.

This device on the L. C. Smith gun, made by the Hunter Arms Company of Fulton, N. Y., adds a new mile post in the history of gun making. The conservative policy of the Hunter Brothers in adding to, or taking from the mechanism of the Smith gun is sufficient guarantee that the new one-trigger has been tested in every particular. In fact, the device has been used and put to every imaginable test by Harvey McMurchy and several other well known experts for the past three years, the one-trigger gun now offered will fill the hill in every respect claimed.

One thing in its favor is the simplicity of the new mechanism. The parts are few in number, large and strong and hence the liability to breakage is reduced to a minimum. This is vital when such heavy loads of nitro powder are being used as today. The Hunter one-trigger is not dependent in any way on friction, the action of the mechanism is purely mechanical and hence it makes no difference whether the gun is dirty, rusty or gummy, this action is bound to work and work every time.

In the one-trigger system the firing finger is always in front of the trigger, the rebound of the gun recoiling from the shoulder drives the trigger against the finger, which will in a defective mechanism discharge the other barrel. In this mechanism this impact of the trigger and finger is blocked absolutely in a manner that can never interfere or delay the firing of the second barrel.

Any one-trigger will balk when the release (the movement of the trigger forward after the first discharge) is more than one-sixteenth of an inch (the thickness of a nickel). To relax the grip more than this is fatal to a quick shot, and in every other except the Hunter it is a necessity. A sportsman, sure he has released enough, pulls the second barrel and his gun balks. In the Hunter one-trigger when the first barrel is fired, the release is less than three-sixty-fourths of an inch (the thickness of a dime). The slightest relaxation of the muscles is ample—and hence it is impossible to balk the Hunter one-trigger. This is one of the most pleasant and desirable features of their mechanism.

The Hunter Arms Company have issued a very neat embossed covered catalogue of their new one-trigger, which will be sent for the asking.

Some Corking Good Scores.

Fred Coleman, shooting the Parker gun at 19 different shoots from July 27 to October 6 inclusive, has broken 1960 targets out of 2065 shot at. This is remarkable shooting as will be readily seen. In one event Mr. Coleman scored 99 out of a possible 100, and made other exceptionally good scores.

Mr. A. L. O'Connell of Chattanooga, Tenn., shooting the Parker gun on Oct. 15, made a remarkable score of 107 out of 108 on a straight run of 82, finishing the day's program of 123 out of 125. This speaks well for Mr. O'Connell and the Parker gun. Mr. O'Connell is a strict amateur.

Mr. M. E. Atchison, of Giddings, Tex., on Sept. 29 and 30, broke 312 out of a possible 350 at 18 yard rise. On Oct. 19 and 20, Mr. Atchison shooting at 295 targets broke 264, winning first high average at 19 yard rise. In the handicap for the gold medal Mr. Atchison broke 25 out of a possible 25 at 19 yards. These are good scores made by the Parker gun.

Mr. J. E. Vaughan, Los Angeles, Cal., using the Parker gun at 20 yard rise on Oct. 7 and 8 broke 320 out of a possible 360 shot at, and winning high average for the two days. Mr. Vaughan is a strict amateur.

What "Billy" and Others Did.

At the Big Four tournament of the Indianapolis Gun Club on October 12th and 13th, W. R ("Billy") Crosby took high expert average with the score of 383 out of 400 targets Ed Voris took high amateur average with the score of 378 out of 400 targets. Both, of course, used the Winchester "Leader" shells.

At the tournament of the Baltimore Shooting Association, held at Baltimore, October 10th and 11th, J. M Hawkins, shooting a Winchester "pump" gun and the "Leader" shells captured the high expert average with the score of 282 out of 300 targets, while J. A. R. Elliott, shooting the same combination, took second high expert average with the score of 280 out of 300 targets shot at. Mr. Hawkins also captured the high expert average at the Annapolis tournament on October 13th with his "pump" gun and the "Leader" shell, score 243 out of 250 targets shot at.

At the Ledford Gun Club tournament, Carrier Mills, Ill., October 15th, both the high expert and the high amatour averages were won by shooters that used the Winchester "pump" guns and the "Leader" shells. John S. Boa winning the expert average and J. T. Gaskins the amateur.

THE FARM.

Fatten the Poultry.

As the time draws near for the fall market for poultry, the judicious fancier hegins to plan for the most out of his flock, or in many cases this is a her instead of a him. Many people lose in selling poultry, hecause they are not on to the fact and many of them have an sunex where all fowls are fattened hefore they are slaughtered. You may as well have this additional amount for the putting on the flesh as well as the packing company. The Thanksgiving trade will he here in a few weeks and it will he well for a goodly amount of the old stock to go and leave room for the young stock in the houses and on the runs. The hest way to fatten any kind of poultry is to enclose the stock in a small, well ventilated pen and for chickens one that can he darkened down at will. The fowls should he fed all that they will eat, then darken the pen and allow them to he as qniet as possihle till the next feeding time. This will enahle them to get the most out of the feed and put on fat rapidly. Chickens as a rule can he fattened in a couple of weeks as fat as they usually get and in fact after that time they gain little. The best feed we ever used is a grain food· Mill hran, corn meal, shorts and gronnd oats in proportion of two parts of the hran to one of each of the others and cook or scald and allow to cool with a cover over the vessel it is scalded in and feed warm. This should have ahout ten pounds of hlood meal to each hundred pounds of mixture. Feed this in the morning and at noon and all the whole corn or wheat they will eat at night and keep them qniet and the pen darkened with plenty of water and grit and they will fatten very rapidly Sweet milk sweetened with sugar will hasten the process of putting on fat as well as the feeding of raw tallow. Too much of this is liable to give howel trouble however. I have put five pounds of weight on an old cock in seven days when hastening for standard weight for the show room. At seven or ten cents a pound, you can well afford to take a little pains in fattening and make your stuff weigh half and often twice as much as when taken off the range and sold whether poor or in good flesh, to say nothing of heing fat Try it. I am going to have the profit, if I live, as I desire it as well as any one else and so dò you.—*Farmer and Breeder.*

A Rare Breed of Sheep.

A flock of the Tunis hreed, shown during the sheep exhibit at the St. Louis exposition, excited much interest. According to the St. Louis *Live-Stock Reporter*, the flock of this rare hreed which was exhihited descended directly from two animals that were hrought to this country from Africa in 1799 hy General William Eaton, who was at that time United States consnl to Tnnis. He purchased them from the Bey of Tunis, hut only one ram and one ewe survived the voyage to this country.

This pair, Caramelli and Selina, were placed under the care of Judge Richard Peters, a noted sheep hreeder near Philadelphia, and a flock of Tunis sheep were raised. These were sent south to North and South Carolina, Virginia and Georgia wbere they were successfully hred until the beginning of the civil war. The breed was then entirely lost until a small flock was discovered in the swamps of South Carolina in 1890 hy Maynard R. Springer of Columhia. The half dozen were caught and the hreed was again started. The flock exhihited at the world's fair were the progeny of this remnant of the flock of Tunis sheep that was lost sight of for fifty years.

This account of the origin of the Tunis sheep in this country agrees snhstantially with that given hy Dr. Henry Stewart ("Domestic Sheep"), who adds that these sheep are noted for their early maturity, their prolificacy (rearing two sets of lambs in the year), and their yield of a fine and long staple of wool. The cross of the rams on onr mutton breeds gives an improved fleece and excellent mutton, for which indeed the pure-hred sheep is as noted as for its wool. The ewes are good mothers The lambs have heen hrought up to 70 pounds at the age of eighty days. In spite of the fact that it comes from Africa, this hreed is hardy and of sound constitution. The rams weigh mature as high as 200 pounds, the ewes up to 160 pounds. The cross of the Tunis with the Merino is especially recommended.

Judging Butter.

The average butter eater has but a slight conception of the ability wbich has heen acquired hy our expert hutter judges. They have smelled and tasted hutter until they have developed such a marvelous sense of taste and smell that they are ahle to detect the slightest off flavor. They do not stop at pronouncing the butter off flavor, hut in most cases proceed to trace its origin and name the trouhle. A foul-smelling churn, decayed vegetahles, tobacco smoke, or a cow-stahle odor is easily detected hy the experts.

One of Freehorn conny's best buttermakers recently received word from his commission man that his hutter had heen running very good, and was all of a high-class quality with the exception of one day's make which indicated that some one about the creamery had on that or the previous day heen fishing. Sure enough the buttermaker admitted that he did go fishing, and only once this summer, and that the butter expert, 400 miles away, at Aurora, Ill , struck the exact date of his fishing expedition. The hutermaker owned up and wrote the commission man that he had gone fishing, hut changed his clothes before going to the creamery. The only way in which he could account for this was that the fishy odor must have clnng to his hands after a careful washing. This goes to show the remarkahle tendency which milk or cream has of ahsorbing odors, and why the greatest care mnst be exercised in their handling.—*Pacific Farmer.*

o

Wool must have strength to be classed as first quality. The wool along the ridge of the hack is the hest to test the whole flee e for strengtn. Pull out a lock there and gradually strain the fiber by pulling the ends with hoth hands. If it parts, the wbole fleece is weak and unsound. Short range and poor food cause weakness in wools. Fullness is a misnomer in one sense. It simply means compactness, or the density with which the fiber grows together. If large spaces of skin lie hetween the locks the fleece is not full and is not perfect quality. Free wool means that the locks and individual fibre are not entangled, but straight. On examining the wool of a perfect fleece the strands and locks sbould freely fall apart. The matting will first show along the ridges of the hack. Thns, a wool huyer seeks the neck locks and those along the back for judging the fleece.

o

State Veterinarian Dr. Keane says that in Los Angeles and Orange counties, where he has heen recently examining into stock conditions, he fonnd gratifying good health among livestock. He says that many replies are coming in to his letter, referred to in these columns recently, calling for a veterinarian convention in Sacramento, Decemher 16, for the purpose of forming a State association, and that these replies are all favorable to the movement. Many stockmen promise to take part and aid in forming the organization.

Jackson's Napa Soda untangles the feet.

Pigs on Alfalfa Pasture.

It is well understood hy many hog raisers that alfalfa is a splendid crop for hogs. It has further heen observed that young growing pigs nntil the time they weigh ahout 100 pounds show the heneficial effects of this crop in the greatest degree. Brood sows also give excellent returns from a field of alfalfa. While pigs are growing and are producing muscle and hone they need food rich in the constituents which go to huild up a strong frame work. An ahundance of protein is needed for that purpose and this is found in alfalfa, hence its value. When hogs are pastured on alfalfa it is more economical to feed some grain in addition as more economical gains are made in this manner. Ahont half of the regular grain ration fed in connection with alfalfa will give splendid results. Alfalfa should never he pastured the first year, and as a rule it is hetter not to do so the second year, hut rather cut the crop for hay. By the third year the roots have become well estahlished, are strong and have grown a good way down into the soil and pasturing may he hegun. It is estimated by some that an acre of alfalfa when the hogs are fed a one-half grain ration, will produce 2,000 pounds of pork during the season. If we credit one-half of this gain to the alfalfa, the profit per acre from this crop at 5 cents per pound for the pork would he no less than $50, which would he a handsome profit considering the fact that no harvestiug was necessary. The great value of green feed for hogs is not generally so well appreciated as it should he. Let us have more hog pastures in the future.—*Successful Farmer.*

Breed to Type.

The demand of the market nowadays calls for cattle of a certain type and the farmer who breeds without any definite idea in mind as to what is wanted is in the rear of the procession.

Not many years ago when land was cheap in the West and cattle were driven a considerahle distance in order to reach shipping points, the matter of early maturity was of secondary consideration. It was then desirable to have cattle of large frame and strong heavy hones. The age limit ran from three to as high as four years in some cases. The times have changed since then; in fact the past decade has seen a remarkahle turn of affairs and all for the better. Quality and not qnantity is sought for. What is looked for now in the feed lots and on the market is animals that are good feeders, hardy and vigorous, close jointed with thick flesh properly distributed on the carcass, coupled with early maturity. To meet this demand, the sire and dam must conform to a type that will produce just such an off-spring as the trade calls for. To produce such types requires straight thinking and to this end, our best hreeders are aiming. The amateur hreeder is entering upon a field of action where there is plenty of competition. Men are studying types as never hefore in the history of animal industry. If he would succeed, he must get into line and produce the kind of product in demand. This can he none only by breeding to type. Let him remember that the huyer is looking for cattle of modsrate size and good finish.

Result of Scientific Feeding.

In the lot of 130 steers sold hy the Illinois experiment station recently on the Chicago market 106 carcasses of extra choice heef were produced, twenty three carcasses of prime heef and one carcass of medium heef. In the ten lots Nos. 1 and 6 produced only extra choice heef, all the other lots yielding some carcasses of the second grade named. No. 1 was fed silage and No. 6 corn and coh meal, gluten meal, oilmeal and clover hay. Lot 6 averaged 1425 pounds, dressed out 62.1 per cent and sold for $6.10.

Dairy Dots.

An inducement to milk dry is to know that the last drops are the richest.

An injured teat may he relieved hy immersing it in a warm hath for fifteen minutes two or three times a day.

Cheese is more delicate as a finished product than hutter. A little poor milk is more injurious to it than to hutter.

In an experiment at the Wisconsin station it was found that it took 1333 pounds of whole stalks to produce the same results as 721 pounds of cut corn fodder.

Dairymen have heen the object of as many swindles as any class of men. They need to he put on their guard against every man who has a new scheme.

High-hred grade Durhams are reported as giving satisfaction in that they are good to give milk, and their calves, when 18 months old, weigh as much as 1200.

One reason some farmers have poor cows is that they do not have the money to huy hetter, and they do not have the money to spare for high-grade service.

There is room for improvement in the hreed of dairymen, as well as in the hreed of cows. One is as important for the success in milk and hutter as the other.

The way to insure clean milk and first-class hutter is to use clean methods. The stahle must he kept clean, and the cow clean, and the vessels clean, in order to have clean milk and hutter.

The Iowa Dairy commission has announced that the cost of making hutter varies from 1.2 cents to 6 cents a pound when made in creameries. The average cost for the whole State is 2½ cents a pound.

Milk should not he mixed, when fresh, with cold milk. The mixture is more apt to sour, than if left separate. Warm milk, covered, sours very rapidly. It does no harm to cover it when the milk has heen cooled.

A writer to *Hoard's Dairyman* says that he helieves his herd of shorthorns, although not registered, are doing as good work as anything in St. Louis. They are not cows that just hoom for a few weeks and then go dry, hut are first-class long milkers.

It is almost universally claimed that milking should always he done with dry hands. The old-fashioned way of milking with wet hands has heen entirely ahandoned. We have never seen a good reason stated for it. A calf is a good milker, and the teats are kept wet.

Weed Out the Scrubs.

That scrub animals will waste large amounts of the farmer's feedstuffs is shown in a feeding test conducted at the Tennessee station. A hunch of animals of good hreed and antecedents were fed for beef and gained two and a half pounds per day, while so called "scrubs" under the same conditions gained only one and a half pounds, a difference of one pound per day. The effect of hreeding, hlood and conformation is instanced in another feeding test where certain beef steers gained only forty-five pounds in sixty days, while others under similar conditions gained 125 pounds in the same period. This goes to show that it does not pay to feed a poor animal. Weed out the scrubs.

o

Keep Salt Clean and Dry.

Salt very readily ahsorbs odors and must therefore he kept in clean, dry places where the air is pure. Too frequently it is stored in musty, damp store rooms where it will not only lump, hut become impregnated with had odors which will impair the quality of the butter.

For Sale. Fine black stallion, 16 hands high, five years old, property of estate. Must be sold at once and cheap Electioneer Jr. Inquire PURCELL 623 Mills Bldg , San Francisco.

General-Purpose Fowl.

The great money-makers among poultry are the Brahmas and the American and Mediterranean breeds. Of late an effort has been made to show that the Orpingtons are as good or even better than our American breeds. If this be true, they are having every opportunity to prove it, for they have been most graciously received by the American public and fanciers, who will give them a thorough test in the scales of value; but it is just as well to consider all these fowls as they actually are, without being led astray by unusual claims of greatness. As the Brahmas have a class by themselves as meat producers, and the Mediterranean family are termed the egg producers, they should not be considered under our heading, as it is our purpose now to speak only of general-purpose fowls, leaving the other two families for consideration at another time.

All who contemplate keeping fowls have in mind one consideration—which will pay the best? There is but one answer to this, and that is: Poultry that pays the best is that which is best cared for along the proper lines. The best Plymouth Rocks or Orpingtons in the world will not give profitable returns if improperly cared for. With this fact continually in view, and with the thorough understanding that good and proper care is one of the most important factors, we shall try to set forth fully the several values of our general-purpose fowls.

We suppose there are more Plymouth Rocks grown and sold each year in this country than of all other kinds for market poultry. They have been the most thoroughly advertised of all our fowls, and we doubt if there is a man, woman or child who knows anything whatever of poultry who could not tell the qualities of the Plymouth Rocks. This is the result of publicity, with the quality to back it up. Or, in other words, those who had Plymouth Rocks liked them so well they could not help telling the whole world about them. At the same time, there are other fowls that lay quite as many, if not more, eggs than they do, and are at least their equals as market poultry.

Of the Plymouth Rock family there are three varieties—the Barred, Buff and White. They are all about alike as to useful qualities, the color variations being only a matter of ornament. They have single combs, yellow beaks, shanks and skin; weight from five to ten pounds each, according to age and sex. They are good egg producers, ranging from 130 to 160 eggs per year, according to how they are handled for laying. They are a larger-bodied fowl than the Wyandottes, and as an average lay large eggs. They do not mature quite so quickly, nor do they make as plump or as early broilers as the Wyandottes. For roasters and other purposes, there is little difference.

The Wyandotte family comprises eight variety colors—Silver and Golden Laced, White, Black, Buff, Partridge, Silver Penciled and Columbian or Light Brahma colored. While this family range in size or weight about like the Plymouth Rocks, they are a more closely-built fowl, and lay claim through this to early maturity as broilers and to a more plump finish as a roasting fowl. Their distinguishing feature is their double or Wyandotte comb, as it is called. It is a fact that the original Wyandottes, the Silver Laced, won the yearly egg test in Australia. It is also true that a pen of the same stood at the bottom of the list—which shows the possibilities to be gained by correct methods of breeding and feeding for a purpose.

Among the eight beautiful variety colors of the Wyandottes, one may select that which will please his taste, with full assurance of having a good general-purpose fowl that will be a good producer of eggs and market poultry. As to the real difference of these two families, there are three—first of all, individual preference of the owner or purchaser for one or the other family. This is a strong feature, as personal liking should be satisfied, for when pleased with the selection, one has more incentive to bestow the best of care on the fowls. In addition to this, the one has the single comb and long body, the other the double or Wyandotte comb and the close, compact body. The single-comb, longer-bodied Plymouth Rock lays the larger egg. The short-bodied, compactly-built Wyandotte lays a smaller egg, quite as many of them, and matures for market a little sooner than the Plymouth Rocks. Both have the yellow skin, shank and beak. Both are fine general-purpose fowls, and about the only difference in quality or value is described in this paragraph. In other qualities, they are quite equal, and when dressed for the spit, with head and feet off, there are few who can tell either the breed or variety they come from.

As to the Orpington family, they are an English breed that are quite like our American Plymouth Rocks and Wyandottes, one kind having the single comb and the other the double comb. They are a heavier-built fowl than our American breeds, and have the white and not the buff or yellow skin. Those who prefer white-skinned poultry might well select the Orpington or Dorking. On the other hand, if you have a good quality of yellow-skinned poultry and wish to keep them as they are, do not cross into them any of the Orpington blood

As egg producers, the Orpingtons are fully the equals of our Plymouth Rocks and the Wyandottes, but they are not any better; in fact, about all the difference worthy of consideration as market or general-purpose fowls is the fact that the Orpingtons are a little heavier built and have white or pinkish-white beaks, shanks and skin. If selected for utility, it should be chiefly on this account; but they should by all means be pure and true to the breed, so as to maintain these qualities, for if crossed with a yellow-skinned breed, one is not likely to improve either. The Black Orpingtons have black shanks and beak and the pinkish-white skin. The Buff and White Orpingtons have the pinkish-white shanks and skin.

There is one other point of difference to be considered, and that is one's admiration for the exhibition fowl. While some are consumed with admiration for the Plymouth Rock, others are equally taken with the beautiful Buff or Black Orpington. One fancier will feel assured that there is nothing that can equal the Buff Wyandotte; another is fully enraptured with the Whites. Each breed and variety has its admirers, all of whom truly believe the object of their admiration to be the best for all purposes that poultry is kept.

Admiration for their own selection has much to do with many statements that this or that fowl is better than all the rest. In fact, each has its value, the best of which is usually brought to the front by those who foster them. We have tried to give as plain a statement as possible of the real points of difference in our general-purpose fowls, each of which has its value and position for which it was intended by those who originated it. From these, all may be able to select some one best suited to their purpose and locality. Not any one of them combines all the best qualities for all things. Each has its peculiar advantages.—*Country Gentleman.*

New Quarantine Regulations.

The following new regulations regarding quarantine of stock have been promulgated by the Federal authorities:

'From November 1, 1904, to January 31, 1905, inclusive, cattle originating in the quarantine district in this State may be moved for purposes other than immediate slaughter to non-infected areas of the State after inspection, and upon written permission from an Inspector of the United States Bureau of Animal Industry, or by a duly authorized State Inspector."

Butter Flavor.

If buttermakers will remember that the quality of the butter is determined by proper management in the first or primary stage, and that churning alone will not and cannot insure the flavor desired, there will be a marked improvement along dairy lines —*American Agriculturist.*

Home Office—401-407 CALIFORNIA STREET, S. F.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

SCIENCE plus HONESTY plus SAFETY plus CURES
—equals—
CRAFT'S DISTEMPER & COUGH CURE.

In all cases of influenza, pinkeye, epizootic, distemper, shipping fever and nose and throat diseases use the best remedy on earth—CRAFT'S DISTEMPER & COUGH CURE. It is fully guaranteed a cure and preventive. Price 50c for small bottle, $1 for large bottle; at all reliable druggists or direct prepaid. Send for valuable booklet, which will be sent free on request. Don't delay.

WALTER SEALY, Manager.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money If It Fails.

PRICES:—Quarts, $1 00; Half-Gallon, $1.75; Gallon, $3 0 2½-Gallon, $5.50; Five-Gallon, $10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

SINGMASTER & SONS, OF KEOTA IOWA.

BREEDERS AND IMPORTERS OF

PERCHERONS, SHIRES, BELGIAN AND FRENCH COACH HORSES

Have a Branch Barn at

127 St. John Street, San Jose, Cal.

High-class stock always on hand. It will pay to call and inspect stock if you are in need of a good stallion C. O. STANTON, San Jose Manager.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

ABSOLUTELY REMOVES CURBS SPLINTS SPAVINS WIND PUFFS BUNCHES — QUINN'S OINTMENT

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequaled. **Price $1 per bottle at all druggists or sent by mail.** Send for circulars, testimonials, &c.

BROODMARES WANTED.

HAVING FIRST-CLASS FACILITIES FOR raising a few good colts, I would like from four to six large, roomy, standard-bred Mares to breed to the best bred son of Sidney 2:19¾ on the Pacific Coast, either on shares for a number of years or to purchase on easy terms. Can furnish feed, care and handling. Will mate them with Sidney Alan 2016 (Vol 14, A. T. R.), son of Sidney 2:19¾, dam Variation by Allandorf 2:19½; second dam by Orphan Blossom 2:26, etc. The mares must be good individuals, well bred and an outcross or nearly so. References given to those wishing to farm out their mares. Give breeding and description. Mares of Wilkes blood preferred.

WILL ROBINSON, Snelling, Cal.

FOR SALE.

THE STALLION VASTO 20070, RECORD 2:16¼, sired by Vasco 10996 (son of Harold 413), dam Chess (great broodmare by Magic 1157, second dam Betty (dam of Rotta 2:29¼) by Clark Chief 89; third dam Sue by Pilot Jr. 12. Vasto is a fine large horse, a rich bay with style and finish. Is a sire of speed and handsome carriage horses. Is a grand individual and a profitable stallion in the hands of a practical horseman. For price and further particulars address CHAS. W. COE, 27 South First Street, San Jose, or JOHN H. WISE, Room 23, 318 Pine Street, San Francisco.

For Sale. Two-year-old brown Stallion by Diablo 2:09¼, dam by half thoroughbred son of Guy Wilkes, second dam by Venture, thoroughbred son of Belmont. Has natural [illegible], is just broken and is a good prospect. Apply to this office.

FOR SALE.

VILLON 38090, BAY COLT FOALED JUNE 19, 1903 sired by McKinney 2:11¼, dam by Nearest, brother to John A. McKerron 2:04½; 2d dam by Anteeo 2:16¼; 3d dam by Venture, sire of dam of Directum 2:05¼. Also ten registered mares and fillies, mostly bred to good stallions—four to Kinney Lou 2:07¾. Correspondence solicited. This sacrifice is due to age and infirmity of owner. G. B. BLANCHARD, San Jose, Cal.

TO TRADE FOR GELDING.

I HAVE A VERY FINE BROODMARE with foal by Arner (brother to Diablo and Don Derby), bred on May 17th The mare is a fine individual, 12 years old, by Sidney; dam Sultana; can show a :30 gait Her last colt got a record of 2:27. As I have no room to raise colt would like to trade her for a good gelding. Address H KOHLER, 212 San Pablo Ave, Oakland, Cal.

J. M LITCHFIELD & CO.—Drivers' Suits, Colors and Caps, Official Badges. Correspondence solicited. 12 Post St., San Francisco.

OAKLAND TRACK

COMMENCING SATURDAY, NOV. 12

Racing Every Week Day

RAIN OR SHINE.

RACES START AT 2:15 P. M. SHARP.

Thanksgiving Handicap,

$2000 Added

To be Run THURSDAY, November 24.

For special trains stopping at the track take S. P. Ferry, foot of Market street, at 12, 12 30, 1, 1:30 or 2.

Returning, trains leave the track at 4:10 and 4:45 p. m., and immediately after the last race.

THOMAS H. WILLIAMS, President.
PERCY W. TREAT, Secretary.

TO TRADE FOR A BROOD MARE.

STANDARD-BRED GELDING 7 YEARS old by Prince Nutwood, dam by Strathway Stands 16½ hands high and weighs 1225 pounds He got a record at Salinas, September 16th, of 2:31, jogged the last eighth. Has worked miles in 2:24, quarters in 33 seconds with six weeks' training. Promises to be very fast. W. H. Williams, who worked him on the San Jose track five weeks before the Salinas meeting, says that he looks like a 2:10 or 2:12 trotter. Good individual and will sell him at a reasonable price or trade for a high-class brood mare. This horse is in charge of W. H. Williams at the San Jose race track, where he can be seen. Address

HENRY STRUVE, Watsonville, Cal

FOR SALE.

ONE OF THE GRANDEST LOOKING AND finest bred young Stallions in California. He is 2 coming 3 years; chestnut with star, and one pastern white; good mane and tail; stands 15½ hands high; all sound, not a blemish; well broken; never worked for speed a trotter. Sired by Nearest 2:22 brother to John A. McKerron 2:04½ First dam Princess Airlie by Prince Airlie; second dam Minnie Princess, dam of Leonora 2:25 by Nutwood 2:18¾; third dam Belle by Paul's Abdallah; fourth dam Kate Crockett by Langford by Belmont; fifth dam Fanny by American Boy Jr Prince Airlie by Guy Wilkes 2:15¼; first dam Chantilly (4-year-old trial 2:19½, dam of Chanty (2) 2:24, Cascade 2:14¾) by Nutwood 2:18¾; second dam Crepon (dam of Lovelace 2:20, Betsy Britton 2:20¾, Brilliantina 2:29¼) by Princeps; third dam Crape Lisse (dam of King Rene Jr. 2:17, Balzarine 2:27) by George Wilkes 2:22; fourth dam Tarlton mare, dam of Tarlton 2:30 Only reasons for selling is that I have another colt bred the same way and am overstocked. Address

T. W. BARSTOW, San Jose, Cal.

FOR SALE.

A HANDSOME 4-YEAR-OLD BAY FILLY; pacer; stands 16.2¼ hands; sired by McKinney, dam Mission Bell by St. Nicholas. Full sister to Mechanic A smooth-gaited filly, goes without straps or boots, and with less than a month's handling has paced a half in 1:11. Is sure to make a fast pacer. Address or apply to JOHN ROWAN, 1347 East South Street, Stockton, Cal

THE AMERICAN THOROUGHBRED AND BREEDERS' HANDBOOK.

It is now nearly thirteen years since Col. Sanders D Bruce published his book on "The Thoroughbred Horse," the editorial portion of which was cut bodily with a pair of scissors from the columns of the *Turf, Field and Farm*, of which he was part owner. I claim only one advantage for my book over his—that it is better edited. It will be properly classified under eight heads, with the English horse in a chapter by himself, the American horse in his own stall and his Australian congener in his own paddock. I shall receive orders for the insertion of stallions at their owners' request at a reasonable charge, of which breeders will be advised by circulars. The price of the book, which will contain some 340 pages, will be as follows:

BOUND IN LEATHER, per Copy......$7
BOUND IN CLOTH, per Copy.......... 5

The need of such a text-book will be conceded by every intelligent breeder, for it will be thoroughly up-to-date in every particular; and the reader will not have to look all through the book to find any given horse, as I shall see that it is properly indexed. One copy of the book to be given gratis to each advertiser and no payment asked till the book is received. All orders for the book or for insertion of stallions' pedigrees to be addressed to

MEN—WOMEN—CHILDREN.
WEAK KIDNEYS CURED FOREVER.

If you have a pain or dull ache in the back it is unmistakable evidence of kidney trouble. It is a warning to tell you trouble is ahead unless you remedy the cause immediately.

Lame back is only one symptom of kidney trouble. Other symptoms are, being obliged to pass water often during the day and to get up many times during the night, inability to hold your urine, smarting or irritation, passing brick-dust or sediment in the urine, catarrh of the bladder, uric acid, constant headache, dizziness, sleeplessness, nervousness, irregular heart heating, rheumatism, bloating, irritability, worn-out feeling, lack of ambition and sallow complexion.

Hooper's Parsley Kidney Pills are proving to be the most wonderful cure ever gotten out for weak and diseased Kidneys. If you have tried the many so-called "cures"—if you have become disgusted with them and stopped using them, try one package of Hooper's Parsley Kidney Pills and you will immediately begin to feel better. Hooper's Pills are a cure. They will stop the trouble just where it is and prevent that awful and dreaded Brights Disease. Don't buy any but Hoopers. If left in after January 6, 1905, a further subscription of $50 each If left in after January 6, 1906, a further subscription of $75 each. All starters to pay $150 additional. The Westchester Racing Association to add a sum sufficient to make the value of the race $25,000. To the winner $21,000, to the second $2000, to the third $1000. To the nominator of the winner, $1000. Mr. August Belmont to add plate of the value of $1000 to the winner. Colts, 126 lbs.; geldings, 123 lbs.; fillies, 121 lbs. Mile and three furlongs

SPRING MEETING, 1907.

THE 41st BELMONT, $25,000.

THE 41ST BELMONT of $25,000, then three-year-olds. To close for foals of 1904, December 15, 1904. To close for yearlings (foals of 1904) September 15, 1905 Liability of those entered as foals by subscription of $10 each, the only forfeit if declared by January 6, 1906 If left in after January 6, 1906, a further subscription of $25. If left in after January 6, 1907, a further subscription of $50 each Liability of those entered as yearlings. By subscription of $25 each, if entered by September 15, 1905, the only forfeit if declared by January 6, 1906 If left in after January 6, 1906, a further subscription of $50 each If left in after January 6, 1907 a further subscription of $75 each. All starters to pay $150 additional. The Westchester Racing Association to add a sum sufficient to make the value of the race $25,000. To the winner $21,000, to the second $2000 to the third $1000 To the nominator of the winner $1000. Mr. August Belmont to add plate of the value of $1000 to the winner. Colts, 126 lbs.; geldings, 123 lbs; fillies, 121 lbs. Mile and three furlongs.

SPRING MEETING, 1906.

THE NINTH NATIONAL STALLION RACE 1906

THE NINTH NATIONAL STALLION RACE for two-year-olds, foals of 1904, to run at the Spring Meeting of 1906, the progeny of stallions nominated, which closed October 1, 1904, under conditions announced. The entries which are as follows:

St. George	$50	Rapallo	$50
David Garrick	25	Ornament	50
Henry of Navarre	50	Kingston	50
Hastings	50	Ben Brush	50
St. Blaise	50	Commando	50
Isinglass	50	Voter	25
Octagon	50	Disguise II	25
Don de Oro	50	Goldcrest	50
Ethelbert	25	Florizell II	50
Ben Strome	50	Banastar	25
Griffon	25	Plaudit	50
Handspring	50	Mirthful	50
His Highness	50	Ogden	50
Gerolstein	50	Galore	50
Golden Garter	50	Frankfort	25
Goldfinch	50	Requital	50
Royal Flush	25	Rensselaer	25
Star Ruby	50	Hawkswick	25
Toddington	25	Marius II	25
Watercress	50	Solitaire II	25
Salvator	50	Crighton	50
Order	50	Warrenton	25
Kinley Mack	25	Belmar	25
Watercolor	25	Yankee	25
Shapfel	50	Meddler	50
Greenan	25	Kilmarnock	25
Arkle	50	Hamburg	50
Bathampton	50	Ballyhoo Bey	25
Ben Holladay	50	Nasturtium	25
Dieudonne	25		

Foals of 1904, the progeny of Stallions duly nominated to be entered and named by midnight of Thursday, December 15, 1904 Colts and geldings at $10 each, fillies at $5 each, the only forfeit if declared by December 15, 1905. If left in after December 15, 1905, and declared by April 20, 1906, colts and geldings to pay $30 each, fillies $15 each. If left in after April 20, 1906, colts and geldings to pay $60 each, fillies $30 each. Starters, colts, geldings and fillies to pay $100 additional. The Westchester Racing Association to add $5000, and 50 per cent of the stallion entrances, of which $1200 to the second, and $600 to the third. The nominator of the winner to receive $1000 out of the subscription and starting money. Of the subscriptions for stallions, the nominators of the sires of the first, second and third horses shall receive 25 per cent, 15 per cent, and 10 per cent, respectively. Colts to carry 122 lbs.; geldings and fillies 119 lbs. Five furlongs.

AUTUMN MEETING, 1907.

The NINTH MATRON, with $10,000 added, for mares covered in 1904, foals of 1905, to be run for by then two-year-olds at the Autumn Meeting in 1907. To be run in two races, one for colts and geldings, the other for fillies. Subscriptions for mares to close at $20 each, or only $10 each if the money accompany the entry. Foals the progeny of mares so nominated to be eligible at $10 each, the only forfeit if declared on or before November 1, 1906. If left in after November 1, 1906, to pay $25 each. If left in after April 1, 1907, to pay $50 each. If left in after August 15, 1907, to pay $75 each. Starters to pay $150 each. The Westchester Racing Association to add $5000 to each race, of which $1000 to the second, $500 to the third, and a division of all entrance fees and declarations accruing for each race. Colts, 122 lbs.; fillies and geldings, 119 lbs. Penalties and allowances. Six furlongs.

NOTICE

Entries for the above are received only under the conditions as printed and in all respects subject to and in accordance with the rules of The Jockey Club and Westchester Racing Association. For Entry Blanks address THE BREEDER AND SPORTSMAN, San Francisco, California.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is non superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fe ck which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, $1.00.

BROODMARES WANTED.

HAVING FIRST-CLASS FACILITIES FOR raising a few good colts, I would like from four to six large, roomy, standard-bred Mares to breed to the best bred son of Sidney 2:19¾ on the Pacific Coast, either on shares for a number of years or to purchase on easy terms Can furnish feed, care and handling. Will mate them with Sidney Alan 29116 (Vol. 14, A. T R.), son of Sidney 2:19¾, dam Variation by Allandorf 2:19½; second dam by Orange Blossom 2:26, etc. The mares must be good individuals, well bred and an out-cross or nearly so. References given to those wishing to farm out their mares. Give breeding and description. Mares of Wilkes blood preferred.

WILL ROBINSON, Snelling, Cal.

FOR SALE.

THE STALLION VASTO 20070, RECORD 2:16½, sired by Vasco 10996 (son of Harold 413), dam Chess (great broodmare) by Magic 1457, second dam Betty (dam of Retta 2:28¾) by Clark Chief 89; third dam Sue by Pilot Jr. 12. Vasto is a fine large horse, a rich bay with style and finish. Is a sire of speed and handsome carriage horses. Is a grand individual and a profitable stallion in the hands of a practical horseman. For price and further particulars address CHAS. W. COE, 27 South First Street, San Jose, or JOHN H. WISE, Room 23, 318 Pine Street, San Francisco.

For Sale. Two-year-old brown Stallion by Diablo 2:09¼, dam by half thoroughbred son of Guy Wilkes, second dam by Venture 2:27¼, thoroughbred son of Belmont. Has stake entries, is just broken and is a good prospect. Apply to this office.

FOR SALE.

VILLON 38090, BAY COLT FOALED JUNE 19, 1903. sired by McKinney 2:11¼, dam by Nearest, brother to John A. McKerron 2:04½; 2d dam by Anteeo 2:16¼; 3d dam by Venture, sire of dam of Directum 2:05¼. Also ten registered mares and fillies, mostly bred to good stallions—four to Kinney Lou 2:07¾. Correspondence solicited. This sacrifice is due to age and infirmity of owner. G. B. BLANCHARD, San Jose, Cal.

TO TRADE FOR GELDING.

I HAVE A VERY FINE BROODMARE with foal by Arner (brother to Diablo and Don Derby), bred on May 17th The mare is a fine individual, 12 years old, by Sidney; dam Sultana; can show a :30 gait. Her last colt got a record of 2:27. As I have no room to raise colt would like to trade her for a good gelding. Address H. KOHLER, 212 San Pablo Ave, Oakland, Cal.

San Francisco, Saturday, November 26, 1904.

A FARMER'S INSTITUTE was held at Elk Grove, Sacramento, last week, which was addressed hy several persons of note, among them Mr. A. B. Nye, who is Governor Pardee's private secretary, Prof. D. T. Fowler, Prof. Smith and other interesting speakers. Much of the talk indulged in by these gentlemen was instructive as well as interesting, hut there were one or two speakers who did not confine themselves strictly to the truth in their statements. The Sacramento *Union* reports Mr. John S. Dare as saying that he visited the California State Fair in 1883 and that "it opened with three sheep, two coops of chickens and one hoh-tailed horse." He added that he did not think the fairs paid the farmers of this State for the money put in them. Now, if the Union has reported Mr. Dore correctly he attempted to be ludicrous and sarcastic at the expense of truth. The State Fair of 1883 was one of the most successful ever held in California. The report printed hy the directors states that the fair was "a success in every particular, giving entire satisfaction to exhibitors, visitors and the management. The live stock exhibition of this year was more varied than at any preceding fair." The report shows that premiums were awarded to 16 different thoroughbred horses, 107 roadster and general purpose horses, 15 draft horses, 13 standard hred trotters, 22 Durham cattle, 47 Jerseys, Alderneys and Guernseys, 9 Devons, 17 Holsteins and a large numher of graded cattle. There were 43 premiums awarded in the swine department, as many in the sheep department and 47 in the poultry department. Besides these many premiums were awarded for herds of cattle, families of horses, breeding pens of sheep and swine that are not enumerated above. For purses and stakes given for trotting and running races the total was $14,005, and the receipts from entries and privileges were $13,520 02, leaving the cost of the racing program but $484.98. while the gate receipts during the week were $13,256 50. From the above showing, the figures of which are taken from the official report of the State Board of Agriculture it will he seen that Mr. Dore did not know what he was talking about when he described to the Elk Grove Farmer's Institute, the live stock exhibit of the California State Fair of 1883. He is like many agriculturists who oppose fairs and can give no facts or reasons why they are not profitable to the State. The agricultural colleges are doing good work and are a necessity in California, but their greatest aids will he the agricultural fairs, and they will be more popular with the people if speed contests are made one of the features.

OWNERS OF THOROUGHBREDS should bear in mind the events opened by the Westchester Racing Association which are to close and name by midnight of Thursday, December 15, 1904. For the spring meeting of 1906 are the Juvenile for two-year-olds, five furlongs, $2500 added; The Fashion for two-year-old fillies, four and a half furlongs, $2000 added, and The Eclipse for two-year-olds, five and a half furlongs, $5000 added. For the spring meeting of 1906 are The Withers for three-year-olds, one mile, $5000 added; The Ladies, for three-year-old fillies, one mile, $4000 added, and The 40th Belmont for three-year-olds, mile and three furlongs, $25,000, and the Ninth National Stallion Race for two-year-olds, five furlongs, $5000 added. For the spring meeting of 1907 there is The 41st Belmont, $25,000, and for the autumn meeting of 1907 the Ninth Matron, with $10,000 added. The full particulars and conditions of these stakes will be found in our advertising columns. Remember the date of closing is Thursday, December 15th.

THE CRESCEUS CASE will come up for hearing at the meeting of the Board of Appeals of the American Trotting Association to be held at Chicago, December 6th. It will be remembered that the ruling of the Board in regard to the performance of Cresceus at Wichita, Kansas, where he was stated to have trotted in 1:59¾, was that the performance was not conducted according to rule and that the time claimed to have heen made was neither a record or a har. And it was further ordered that Secretary Knight "be and he is hereby directed to institute an action under our rules against the said Southern Kansas Fair Association, its officers, attorneys, agents and all parties participating in the said performance, to the end that they show cause before this board at its next regular meeting in December, A. D. 1904, why said Southern Kansas Fair Association and its officers, agents, attorney and all such persons should not he penalized." The result of the investigation will be watched with interest by all horsemen.

THE BUREAU OF ANIMAL INDUSTRY has printed its twentieth annual report for the year 1903, a copy of which has been rcceived hy this office. It is a volume of over six hundred pages filled with the most valuable information for the stock hreeder and owner. The diseases of live stock are treated extensively in its pages, tuberculosis in cattle, anthrax, hog cholera and other infectious and contagious diseases heing expressly reported on. There is much valuable information about curing meats, making and marketing cheese, butter and other dairy products, and reviews of animal feeding. From the report we learn that there were 16,736,059 horses owned in the United States in 1903, of a total value of $1,136,940,298. Of these 367,009 horses, of a value of $24,099,139, were owned in California.

The Old Glory Sale.

Telegraphic reports from the Old Glory sale which opened on Monday of this week are very meagre and we will have to wait until the mail brings a full summary of the sale before particulars can he given.

The sale of Arion 2:07¾ hy Electioneer was a great disappointment as he brought but $2500. He should have sold for at least ten times that amount. He went to the bid of Mr. M. W. Savage of Minneapolis, proprietor of the International Stock Farm a d will be the companion of Dan Patch 1:56, Directum 2:05¼, and Roy Wilkes 2:06½. No other stock farm in America can boast of four such fast stallions and Mr. Savage showed his good husiness sense hy buying the California bred stallion whose two-year-old record has never heen equalled.

Jupe, another stallion which made an enviable record as a yearling, followed Arion. He was sold to F. W. Sears of Blooming Grove, N. Y., for $5000. As a two-year-old Jupe held the world's race record of 2:13¾. He is now ten years old; and was consigned hy David A. Snell of New Bedford, Mass.

The once famous horse Delmarch, twenty-six years old, who held the world's stallion race record in 1891, was sold for $375. The average for the 124 horses sold on Monday was a little over $280 per head. Better prices were realized Tuesday when seventy-seven horses were sold for a total of $36,845, an average of slightly over $478.

Sidney Dillon was the star attraction of the third day, but his sale was a disappointment as he only brought $9000, a sum he can earn in one year at the stud. He went to the hid of Mr. Sterling Holt of Indianapolis, proprietor of a large breeding farm, and owner of Rex Americus and the promising young stallion Sterling McKinney, which he purchased in California two years ago.

The day's sales aggregated $60,605 for the 123 head sold, an average of 567 for the day. For the three days 342 head have been sold for $142,965, an average of $412. This amount is ahout $30,000 more than the total of last year's sales for the same period.

Home For Worn-Out Horses.

A young Massachusetts woman, who inherited a large sum of money, has started, near the village of Stowe, some twenty-five miles out of Boston, a home for horses. The place is called Red Acre Farm, and on it are to he seen all kinds of old, worn-out and crippled horses, from the thoroughbred to draught type. The farm was opened in May, 1903. The horses are taken there, given treatment if necessary, and after a long rest and good care may turn out to be "creditable to the farm." Afterwards these are returned to careful owners, fitted to hear life's hurdens: hut not until they are entirely rehabilitated are they allowed to be taken from the place. The farm is the only one of its kind in America, and is sheltering hundreds of horses which need care and kindness.

P. H. McEvoy of Menlo Park is offering two handsome Prince Airlie stallions for sale—Milhrae (trotting record 2:16½) and Menlo Boy 3741. For particulars see advertisement. *tf

The American Type.

A. H. Godfrey, Secretary of the American Hackney Breeders Association says: "We see today American bred horses of trotting lineage, which in their general character, and action, are almost duplicates of the choicest hackneys imported in 1890 and subsequent years, but with this difference, that their speed is such as to make them appeal to all lovers of swift horses, and their quality is of course remarkable. Buyers of show horses and those who use animals for brougham work in the city, and also to occasionally drive them at high speed in the country, invariably call for animals that combine the substance of the hackney and the speed of the trotter.

The versatility of the American bred horse whether of pure trotting or thoroughbred lineage or the result of foreign colder blood, has been frequently demonstrated during recent years in the heavy harness competitions, and while the show authorities provide lavishly year after year for imported heavy harness types shown in yearling, two-year-old and mature form to halter, it is becoming patent to all unhiased observers that while the value of heavy imported material as foundation stock is admitted, the vogue of the imported horse of distinctly European type is in statu quo, and the public taste here turns towards a horse combining the best elements of the speedy American trotter and the substantial European types that shall more surely present the ideal animal. In short, the American carriage horse, cross bred or pure, is looked for, and it is becoming more and more evident that in the near future all foreign breeds must become merged into it. That wealthy patrons of the show and exhibitors of brilliant high steppers realize this, and that breeders and operators in the markets East and West are catering to the demand is apparent. Judges at the shows, as for years past, will undoubtedly make their selections with the ideal American carriage horse in view, and there cannot be a douht that the distribution of the enormous sums of money that have been spent recently for sensational horses and which will he spent during the show, point directly to the exploitation of a type of carriage horse that shall be distinctively American.

Patchen Wilkes Goes to Tennessee.

The sending of Patchen Wilkes to the famous pacing nursery, Ewell Farm, in Tennessee, is interesting from the fact that the fastest pacer in the world was sired hy his great pacing son, Joe Patchen. In Tennessee, Patchen Wilkes will be mated with mares of the famous Hal pacing family, and it will be interesting to watch the outcome. The Tennessee breeders have dipped into the best trotting blood that has been characterized by the production of speed at the pace with good results. Directly 2:03¾, a son of the great Direct 2:05½, made a couple of seasons in Tennessee. Mercury 2:21, a son of Sidney 2:17¾, has heen very successful on the pacing hred mares of Tennessee. John R. Gentry 2:00½ is now in service there, and in taking Patchen Wilkes to their state Tennessee breeders have gone to the fountain head of the branch of the Wilkes family that gave to the pacing turf the present champion, Dan Patch 1:56¼. With this profuse introduction of trotting blood, however, Tennessee may lose its reputation as being the home of a pacing breed of horses, for there is little doubt hut that the foals from the Hal mares and by the trotting bred horses mentioned will include many that will take the trotting gait.—*Horse World.*

Wild Horses in Oregon Will Be Killed.

The state veterinarian of Oregon has ordered that all wild horses in that state be shot down as the only means of wiping out the mange in that state. This action is considered necessary in order that horses of private individuals may be protected from the scourge of mange now making itself evident in the bands of almost every horse breeder who has stock on Oregon ranges. Indian ponies first contracted the disease and it was communicated hy them to the wild horses, where it multiplied, no treatment to curtail its ravages heing possible. Many cattle are also suffering from the mange.

So dangerous has become the disease that the wholesale destruction of these animals affected has been determined upon and will he gone about scientifically. An immense corral will be built in the vicinity of Echo, Oregon, and after the wild horses have been rounded up and driven into it, they will be shot and their bodies hurned. State officials will have charge of the work, and after the last vestige of the carcasses has heen destroyed the ground in the vicinity of the slaughter place will he disinfected.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

JOTTINGS.

TIN CUP RECORDS are again becoming unpopular with the public and with horse breeders and owners who look upon the actual race as the supreme test of the horse bred for speed and endurance. A few years ago many owners of stock farms had a craze for putting the get of their stallions "into the list." At every meeting horses were started to beat 2:30 simply that a long list of standard performers might be gained and thus advertise the stallion as a great speed producer. Not only were these trials held at the county fairs and regular meetings, but special meetings were gotten up especially for the purpose of marking horses, and but little good and much evil resulted. Scandals resulted, as a matter of course, until the public and the best element of the horse breeding community became disgusted with the time record business and a "tin cup" mark was looked upon as of but very little value and was a subject of derision in almost every quarter I believe the tin cup records of their get did Electioneer and Sidney more harm than good and every California horseman knows that Stamboul would have sold for more money and been more largely patronized in the stud had his race record been the only one claimed for him.

And now the miles against time are causing more trouble in the trotting ranks. There is a claim that Lou Dillon did not trot a mile in 2:01 without a wind shield at Memphis the other day and two "outsiders" have made affidavit that they caught the mile in 2:02¼. The reputations of the judges and the real timers, who affirm that the mare actually trotted the mile in 2:01 are such, however, that there are few who doubt the time given out, but those few are not backward in expressing their opinions and the smirch on the record will remain in spite of everything. That Lou Dillon can trot a mile in 2:01 without the aid of a pace-maker or wind shield whenever she is in good condition and the track and weather are not unfavorable is beyond question, and it is absolutely certain that the little mare has not been as good this year as she was last and since her sickness at Cleveland has not shown those wonderful hursts of speed she possessed last year But great mare as she is and great trotter that her rival, Major Delmar, has shown himself to be, there are scores of practical horsemen who believe that Sweet Marie can defeat them hoth in a three in five race, and that the McKinney mare would sell for more money at auction than hoth the others is probably true.

The 2:04¾ of Sweet Marie looks slow alongside the 1:58½ of Lou Dillon, but how far could the latter have beaten the former in the heat in which the Los Angeles mare made her record? Not far, even though she had plain sailing and the best part of the track. A race is so different from a time performance that thero can be no fair comparison between the two. In the time performances the track is like a hilliard table, the weather is near perfection or a postponement is ordered, and if there is a slight breeze at the time set for the trial it is delayed until there is a calm. The horse has the pole, of course, the driver of the pacemaker holds a watch, and anything that might tend to obstruct tho performance in anyway whatever is eliminated. But in a race there is no favoritism. The horse excepts the position he has won or earned. The trotter in front of him does not pull out to let him go by. If he has the outside and the footing is heavy ho must stay there or trot faster than any other horso to get the pole. He cannot be rated, but his driver must accept the rate of speed at which the others are going—whither it be too fast to win or too slow for a low record. Lou Dillon and Major Delmar were both in fine fettle at Memphis in the cup race of 1903, and the California mare was thought capable of a mile in two minutes to wagon against the watch, yet the time of both heats in that race was 2:04¼, and both horses were driven to their best.

So the conclusion that Sweet Marie's performances this year are fully as great as those of Lou Dillon and Major Delmar are justified Mr. C. A. Durfee, who owned Sweet Marie's sire for so many years, holds that her last quarter of the fifth heat in the Transylvania is the greatest performance in trotting annals. This is the fastest five-heat race ever trotted and yet she came the last quarter of this last heat in just 31 seconds, official time. Could Lou Dillon or Major Delmar trot five heats in a race in the time made in the Transylvania and come the last quarter of the heat in 31 seconds? I doubt it, and in doing so I do not detract anything from the greatness of either the mare or the gelding, which are undoubtedly the [illegible] marvels of the age But Sweet Marie is the greatest combination of speed, endurance and race horse qualities that ever lived and that is why (in my opinion) she would hring more money than both the others if sold with them in the same auction ring.

"But," says one, "you don't think that Sweet Marie could trot a mile in 1:58½ as Lou Dillon did, even under the same conditions, do you?" I do not; Sweet Marie is one of those strong, rugged trotters that do not show the greatest speed flight. In a dash of a mile, or a spurt at any part of that distance I would expect Lou Dillon to beat her easily, and in any two in three race Lou or the Major should be able to finish ahead of the McKinney mare twice. But when it came to three in five Sweet Marie would have speed enough to make either or both of them step miles in 2:03 to beat her, and having done so, they would not be able to come the third heat in better than 2:04 while she would.

James Butler, who purchased the old Valensin farm near Pleasanton, last winter, is expected here in January and it is thought he will send quite a number of mares to the farm and make it a breeding farm of considerable pretensions. I understand he will put the stallion Directwell at the head of this farm. This young trotter will be six years old in the spring and is one of the purest gaited trotters ever seen on the Pleasanton track. He received an injury to one of his feet which necessitated a thick leather pad under the shoe to make the leg as long as the others, but he trots so perfectly that the closest observer cannot detect any fault or hitch in his gait. Directwell is by Direct 2:05½ and his dam is Anne Allerton 2:15¼ by Allerton 2:09¼, second dam Edna W. 2:29 by Brougham 800 (son of Hambletonian 10), third dam Belle of Clarence by Finch's St. Lawrence. Belle of Clarence was one of the old fashioned mares that produced a trotter every time she was bred. She produced ten foals that took race records from 2:26 to 2:57½, and her descendants have all been good gaited trotters. Directwell should be a good sire for California and it is to be hoped Mr. Butler will permit him to serve mares outside those of his own at a reasonable fee. The Allerton cross is needed in this State.
